AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday). This is a voluntary program. (See OFR notice 41 FR 32914, August 6, 1976.)

Monday	Tuesday	Wednesday	Thursday	Friday
DOT/COAST GUARD	USDA/ASCS		DOT/COAST GUARD	USDA/ASCS
DOT/NHTSA	USDA/APHIS		DOT/NHTSA	USDA/APHIS
DOT/FAA	USDA/FNS		DOT/FAA	USDA/FNS
DOT/OHMO	USDA/FSQS		DOT/OHMO	USDA/FSQS
DOT/OPSO	USDA/REA		DOT/OPSO	USDA/REA
CSA	CSC		CSA	CSC
	LABOR			LABOR
	HEW/FDA			HEW/FDA

Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

NOTE: As of August 14, 1978, Community Services Administration (CSA) documents are being assigned to the Monday/Thursday schedule.

federal register

Area Code 202 Phone 523-3240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

Title 3—The President

Memorandum of September 8, 1978

Determination Extending the Exercise of Certain Authorities Under the Trading With the Enemy Act

Membrandum for the Secretary of State, the Secretary of the Treasury

THE WHITE HOUSE,
Washington, September 8, 1978.

Under Section 101(b) of Public Law 95-223 (91 Stat. 1625; 50 U.S.C. App. 5 note), the exercise of certain authorities under the Trading With the Enemy Act is scheduled to terminate on September 14, 1978.

I hereby determine that the extension for one year of the exercise of those authorities with respect to the applicable countries is in the national interest of the United States.

Therefore, pursuant to the authority vested in me by Section 101(b) of Public Law 95-223, I extend for one year, until September 14, 1979, the exercise of those authorities with respect to those countries presently affected by: (1) the Foreign Assets Control Regulations, 31 CFR Part 500, (2) the Transaction Control Regulations, 31 CFR Part 505, (3) the Cuban Assets Control Regulations, 31 CFR Part 515, and (4) the Foreign Funds Control Regulations, 31 CFR Part 520.

This determination shall be published in the FEDERAL REGISTER.

Jimmy Carter

The President

PROCLAMATION 4594

National School Lunch Week, 1978

By the President of the United States of America

A Proclamation

Every child needs wholesome food. The National School Lunch Program was created in 1946 to help our nation achieve that goal. It now provides nutritious lunches to 26 million children every school day.

I am proud of the success of the National School Lunch Program and of the two other nutrition-related school activities that complement its success.

One is the School Breakfast Program that now serves 2.8 million children daily. It gives all children, not just the needy, the chance to eat breakfast at school if they cannot eat at home.

The other is the Nutrition Education and Training Program that will instruct children, teachers, and school food service workers on the relationship between food, nutrition, and health.

In recognition of the National School Lunch Program's contribution to America's youth, the Congress, by a joint resolution of October 9, 1962 (76 Stat. 779; 36 U.S.C. 168), has designated the week beginning the second Sunday of October of each year as National School Lunch Week, and has requested the President to issue annually a proclamation calling for its appropriate observance.

NOW, THEREFORE, I, JIMMY CARTER, President of the United States of America, do hereby urge the people of the United States to observe the week of October 8, 1978, as National School Lunch Week and to give special recognition to the role of good nutrition in building a stronger America through its youth.

IN WITNESS WHEREOF, I have hereunto set my hand this eighth day of September, in the year of our Lord nineteen hundred and seventy-eight, and of the Independence of the United States of America the two hundred and third.

Jimmy Carter

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

[6325-01]

Title 5—Administrative Personnel

CHAPTER I—CIVIL SERVICE COMMISSION

PART 213—EXCEPTED SERVICE

Department of Agriculture

AGENCY: Civil Service Commission.

ACTION: Final rule.

SUMMARY: This amendment shows that positions concerned with an economic emergency loan program in the Farmers Home Administration (FmHA) are excepted under schedule A because examination for these positions is impracticable. This amendment also shows that the existing FmHA Schedule A authority for emergency loans is to be used for natural disaster emergency loans, to distinguish between the two authorities.

EFFECTIVE DATE: August 25, 1978.

FOR FURTHER INFORMATION CONTACT:

Michael D. Sherwin, 202-632-4533.

Accordingly, 5 CFR 213.3113(e)(3) is amended and (e)(7) is added, as follows:

§ 213.3113 Department of Agriculture.

• • • • • •

(e) *Farmers Home Administration.*

• • •

(3) Temporary positions whose principal duties involve the making and servicing of natural disaster emergency loans pursuant to current statutes authorizing natural disaster emergency loans. Appointments under this provision shall not exceed 1 year unless extended with the prior approval of the Commission for additional periods not to exceed 1 year each.

• • • • • •

(7) Positions concerned with an economic emergency loan program authorized by the Agricultural Credit Act of 1978, for seasonal employment not to exceed August 31, 1982.

(5 U.S.C. 3301, 3302; EO 10577, 3 CFR 1954-1958 Comp., p. 218.)

UNITED STATES CIVIL SERVICE COMMISSION,
JAMES C. SPRY,
Executive Assistant to the Commissioners.

[6320-01]

Title 14—Aeronautics and Space

CHAPTER II—CIVIL AERONAUTICS BOARD

[Reg. ER-1073, Amdt. 32]

PART 241—UNIFORM SYSTEM OF ACCOUNTS AND REPORTS FOR CERTIFICATED AIR CARRIERS

Revision of Route Air Carrier Reporting Entities

AGENCY: Civil Aeronautics Board.

ACTION: Final rule.

SUMMARY: This final rule revises the listing of geographic reporting entities included in the Board's economic regulations for three route air carriers which were recently granted authority to conduct transatlantic flights.

DATES: Adopted: August 31, 1978. Effective: August 31, 1978.

FOR FURTHER INFORMATION CONTACT:

Raymond Kurlander, Director, Bureau of Accounts and Statistics, Civil Aeronautics Board, 1825 Connecticut Avenue NW., Washington, D.C. 20428, 202-673-5270.

SUPPLEMENTARY INFORMATION: Section 21 of part 241 of the Board's economic regulations lists the operating authority of each air carrier according to geographical area ("entity") for purposes of reporting financial and statistical data. On January 26, 1978, the Board granted transatlantic operating authority to Braniff Airways, Delta Air Lines, and Northwest Airlines, order 78-1-118. Section 21 of part 241 is therefore amended to reflect the addition of these routes.

Because this amendment reflects a grant of authority that has already been made, the Board finds that notice and public procedure are unnecessary and that an immediate effective date is in the public interest.

Accordingly, part 241 of the economic regulations (14 CFR Part 241) is amended as follows:

1. Amend section 21, "Introduction to System of Reports," revising the list of route air carrier reporting entities contained in paragraph (i) to read in pertinent part as follows:

§ 21 Introduction to system of reports.

• • • • • •

(i) • • •

Title 16—Commercial Practices

CHAPTER I—FEDERAL TRADE COMMISSION

[Docket No. 8939]

PART 13—PROHIBITED TRADE PRACTICES, AND AFFIRMATIVE CORRECTIVE ACTIONS

Rubbermaid, Inc.

AGENCY: Federal Trade Commission.

ACTION: Modification of order to cease-and-desist.

SUMMARY: This order reopens proceedings and modifies the cease and desist order issued on April 13, 1976, by replacing sections III and IV of the original order. The modification eliminates the requirement to send copies of the order to resellers of firm's products; provides a description of the required notice to be sent to resellers; and places the responsibility of sending such notice to indirect resellers on company's distributors.

DATES: Complaint issued September 5, 1973; modifying order issued August 17, 1978.[1]

FOR FURTHER INFORMATION CONTACT:

Ronald A. Bloch, Bureau of Competition, Federal Trade Commission, Sixth Street and Pennsylvania Avenue NW., Washington, D.C. 20580, 202-523-3552.

SUPPLEMENTARY INFORMATION: In the matter of Rubbermaid, Inc. The prohibited trade practices and/or corrective actions, as codified under 16 CFR Part 13, appears at 41 FR 20161, and remains unchanged.

The order modifying order to cease and desist, is as follows:

ORDER MODIFYING ORDER TO CEASE AND DESIST

ORDER

On August 7, 1978, respondent and complaint counsel jointly petitioned the Commission to reopen this proceeding to modify sections III and IV of the order to cease and desist which issued on April 13, 1976, and became final on August 7, 1978.[2]

Section III of the order requires that respondent provide its direct and indirect resellers a copy of the order and a notice describing generally respondent's policy relating to resale prices. Section III further provides that those customers terminated because they failed to comply with any refusal-to-deal provision, will be extended an offer to be reinstated. Finally, section III provides for the treatment of complaints relating to the provisions of the notice.

Section IV requires respondents, for a period of 5 years, to send a copy of the order to new resellers to whom it directly sells.

By the proposed modification the order would describe the content of the notice to be sent to resellers and would relieve respondent of the requirement that it send a copy of the order to resellers. The proposed modification would further provide that respondent's distributors, rather than respondent, send notices to indirect resellers.

Because of the repeal of the McGuire Act and the consequent end of State-sanctioned resale price maintenance, several of the provisions in the order and the notice to be sent resellers are no longer relevant and would likely be misunderstood by resellers of respondent's products. As a further result of the abandonment of State-sanctioned resale price maintenance, respondent no longer is required to, nor does it, retain the names of indirect purchasers. These changed conditions of fact and law warrant the modifications requested by respondent and complaint counsel.

Accordingly, *It is ordered*, That the proceeding be, and it hereby is, reopened.

It is further ordered, That the order to cease and desist be, and it hereby is, modified by substituting for sections III and IV of the order, the following:

III

It is further ordered, That respondent shall:

1. Within sixty (60) days from the date upon which this order becomes final:

(a) Mail or deliver to all resellers which purchase directly from respondent a copy of the notice attached as exhibit A, and execute an affidavit so stating; and

(b) Mail or deliver to each of respondent's wholesalers; sufficient additional copies of the notice attached hereto as exhibit A and request such wholesalers

(i) To mail or deliver these notices to each reseller of respondent's goods with whom they deal; and

(ii) To affirm to respondent in writing that they have made the distribution of these notices as requested.

2. Within sixty (60) days from the date upon which this order becomes final, mail or deliver, and obtain a signed receipt for a copy of the notice attached as exhibit A and a written offer of reinstatement, to every reseller who has been terminated by, at the request of, or with the participation of respondent since January 1, 1966, for failure to comply with any refusal to deal provision of his contract, and reinstate forthwith any such reseller who within thirty (30) days thereafter requests reinstatement.

3. Immediately upon receipt, take such action as may be proper to insure correction of any complaints concerning the unavailability of Rubbermaid products to any reseller as a result of such reseller's pricing or customer selection policies or practices and retain such complaints and records of corrective action taken thereon for a period of five (5) years from the date on which each complaint is received. Reports of said complaints and of corrective action taken shall be included in reports to the Commission required by paragraph V. 1. of this order.

IV

It is further ordered, That respondent shall:

1. Fully acquaint all appropriate present and future personnel with the provisions and the requirements of this order.

2. For a period of five (5) years from the date of this order, mail or deliver a copy of the notice attached as exhibit B to all new resellers to whom respondent directly sells.

By the Commission. Commissioner Pitofsky did not participate.

JAMES A. TOBIN,
Acting Secretary.

[FR Doc. 78-25632 Filed 9-11-78; 8:45 am]

[1] Copies of the modifying order filed with original document.

[2] Petitioners also filed on Aug. 8, 1978, a joint motion for suspension of compliance. This order obviates the necessity for the requested suspension of compliance and therefore the motion is rejected.

[4110-03]

Title 21—Food and Drugs

CHAPTER I—FOOD AND DRUG ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

SUBCHAPTER E—ANIMAL DRUGS, FEEDS, AND RELATED PRODUCTS

PART 522—IMPLANTATION OR INJECTABLE DOSAGE FORM NEW ANIMAL DRUGS NOT SUBJECT TO CERTIFICATION

Imidocarb Dipropionate

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: This document amends the regulations to reflect approval of a new animal drug application (NADA) filed by Burroughs Wellcome Co. providing for the safe and effective use of a drug for intramuscular injection in horses and zebras for the treatment of babesiosis.

EFFECTIVE DATE: September 12, 1978.

FOR FURTHER INFORMATION CONTACT:

Robert A. Baldwin, Bureau of Veterinary Medicine (HFV-114), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857, 301-443-3420.

SUPPLEMENTARY INFORMATION: Burroughs Wellcome Co., 3030 Cornwallis Road, Research Triangle Park, N.C. 27709, filed an NADA (97-288V) providing for the use of imidocarb dipropionate for injection intramuscularly in certain equines (horses and zebras) for the treatment of infections caused by *Babesia caballi* and *Babesia equi*. Treatment is limited to nonfood animals, is not recommended for other equidae, not for animals younger than 1 year old, and not for animals in near-term pregnancies. Product is to be sold under permit issued by the Director, National Program Planning Staff, Veterinary Services, APHIS, USDA, to licensed full-time State, Federal, or military veterinarians.

In accordance with the freedom of information regulations and § 514.11(e)(2)(ii) of the animal drug regulations (21 CFR 514.11(e)(2)(ii)), a summary of the safety and effectiveness data and information submitted to support approval of this application is released publicly. The summary is available for public examination at the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Room 4-65, 5600 Fishers Lane, Rockville, Md. 20857, from 9 a.m. to 4 p.m., Monday through Friday.

Therefore, under the Federal Food, Drug, and Cosmetic Act (section 512(i), 82 Stat. 347 (21 U.S.C. 360b(i))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1), part 522 is amended by adding new § 522.1155 to read as follows:

§ 522.1155 **Imidocarb dipropionate sterile powder.**

(a) *Specifications.* Imidocarb dipropionate powder is reconstituted with sterile water. Each milliliter of solution contains 100 milligrams of imidocarb base.

(b) *Sponsor.* No. 000081 in § 510.600(c) of this chapter.

(c) *Conditions of use.* The drug is used in horses and zebras as follows:

(1) *Amount.* For *Babesia caballi* infections, use intramuscularly 2 milligrams of imidocarb base per kilogram of body weight, repeating dosage once after 24 hours. For *Babesia equi* infections, use 4 milligrams of imidocarb base per kilogram of body weight, repeating dosage four times at 72-hour intervals.

(2) *Indications for use.* For the treatment of babesiosis (piroplasmosis) caused by *Babesia caballi* and *Babesia equi*.

(3) *Limitations.* Administer intramuscularly in the neck region. Do not inject intravenously. Do not use for other equidae or for animals of other species. Do not use in horses less than 1 year old. Do not use for animals in near-term pregnancies. Imidocarb dipropionate is a cholinesterase inhibitor. Do not use this product simultaneously with or a few days before or after treatment with or exposure to cholinesterase-inhibiting drugs, pesticides, or chemicals. Do not use in horses intended for food. Federal law restricts this drug to use by or on the order of a licensed veterinarian. Imidocarb dipropionate is sold only under permit issued by the Director of the National Program Planning Staff, Veterinary Services, APHIS, USDA, to licensed or full-time State, Federal, or military veterinarians.

Effective date. The regulation is effective September 12, 1978.

(Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i)).)

Dated: September 6, 1978.

LESTER M. CRAWFORD,
Director, Bureau of Veterinary Medicine.

PART 524—OPHTHALMIC AND TOPICAL DOSAGE FORM NEW ANIMAL DRUGS NOT SUBJECT TO CERTIFICATION

Neomycin Sulfate, Hydrocortisone Acetate, Sterile Ointment

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: This document amends the animal drug regulations to reflect approval of a new animal drug application (NADA) filed by the Upjohn Co., providing for use of a combination drug for treating certain eye and ear conditions in cats and dogs. This application reflects the National Academy of Sciences/National Research Council (NAS/NRC) evaluation of a similar product.

EFFECTIVE DATE: September 12, 1978.

FOR FURTHER INFORMATION CONTACT:

Henry C. Hewitt, Bureau of Veterinary Medicine (HFV-112), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857, 301-443-3430.

SUPPLEMENTARY INFORMATION: The Upjohn Co., Kalamazoo, Mich. 49001, filed an NADA (93-514V) providing for use of an ointment containing neomycin sulfate and hydrocortisone acetate for treating infectious, allergic, and traumatic keratitis, conjunctivitis, acute otitis externa and, to a lesser degree, chronic otitis externa in cats and dogs.

Upjohn's combination of neomycin sulfate, hydrocortisone acetate, and tetracaine hydrochloride was evaluated by the (NAS/NRC) drug efficacy study group. The results of this evaluation were published in the FEDERAL REGISTER of August 22, 1970 (35 FR

13490). The NAS/NRC concluded, and the agency concurred, that the combination product is probably effective for treatment of certain ear conditions and probably not effective for treatment of eye conditions in domestic animals. The NAS/NRC evaluation recommended removal of tetracaine hydrochloride, deletion of certain claims, and addition of warnings.

The 1970 announcement was published to inform the holders of NADA's as to the findings of the NAS/NRC and the agency and to inform all interested persons that such articles may be marketed providing they are the subject of an approved NADA and otherwise comply with the requirements of the Federal Food, Drug, and Costmetic Act. Holders of applications were required to submit adequate documentation in support of the labeling used. Upjohn responded by filing an NADA that removed tetracaine from the product and revised the labeling to comply with the NAS/NRC evaluation. No new efficacy data were required. Submission of applications for identical products having the same conditions of use that are identified by a footnote in the regulation do not need to include certain types of efficacy data as required for approval in § 514.111 (21 CFR 514.111). In lieu of that data, approval may require bioequivalency and safety data as suggested in the guideline for submitting NADA's for NAS/NRC reviewed generic drugs, available from the hearing clerk (HFA-305), Food and Drug Administration, Room 4-65, 5600 Fishers Lane, Rockville, Md. 20857.

In accordance with the freedom of information regulations and § 514.11(e)(2)(ii) of the animal drug regulations (21 CFR 514.11(e)(2)(ii)), a summary of the safety and effectiveness data and information submitted to support approval of this application is released publicly. The summary is available for public examination at the office of the hearing clerk (address noted above), from 9 a.m. to 4 p.m., Monday through Friday, except on Federal holidays.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1), Part 524 is amended by adding new § 524.1484i to read as follows:

§ 524.1484i Neomycin sulfate, hydrocortisone acetate, sterile ointment.

(a) *Specifications.* The drug contains 5 milligrams of neomycin sulfate, equivalent to 3.5 milligrams of neomycin base, and 5 milligrams of hydrocortisone acetate in each gram of ointment.[1]

(b) *Sponsor.* No. 000009 in § 510.600(c) of this chapter.

(c) *Conditions of use.* (1) *Amount.* Apply three or four times daily into the conjunctival sac. With improvement, frequency may be reduced to two or three times daily. For treatment of ear canker and other inflammatory conditions of the external ear canal, fill external ear canal one to three times daily.[1]

9(2) *Indications for use.* For treating infections, allergic, and traumatic keratitis, conjunctivitis, acute otitis externa and, to a lesser degree, chronic otitis externa in dogs and cats.[1]

(3) *Limitations.* All topical ophthalmic preparations containing corticosteroids, with or without an antimicrobial agent, are contraindicated in the initial treatment of corneal ulcers. They should not be used until infection is under control and corneal regeneration is well underway. Incomplete response or exacerbation of corticosteroid responsive lesions may be due to the presence of nonsusceptible organisms or to prolonged use on antibiotic-containing preparations resulting in overgrowth of nonsusceptible organisms, particularly *Monilia.* Federal law restricts this drug to use by or on the order of a licensed veterinarian.[1]

Effective date. This regulation is effective September 12, 1978.

(Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i)).)

Dated: September 5, 1978.

LESTER M. CRAWFORD,
Director, Bureau of Veterinary Medicine.

[FR Doc. 78-25564 Filed 9-11-78; 8:45 am]

[1] These conditions are NAS/NRC reviewed and are deemed effective. Applications for these uses need not include the effectiveness data specified by § 514.111 of this chapter, but may require bioequivalency and safety information.

[6560-01]

SUBCHAPTER E—ANIMAL FEEDS, DRUGS, AND RELATED PRODUCTS

[FRL 964-1; FAP 8H5186/T38]

PART 561—TOLERANCES FOR PESTICIDES IN ANIMAL FEEDS ADMINISTERED BY THE ENVIRONMENTAL PROTECTION AGENCY

N,N-Dimethylpiperidinium Chloride

AGENCY: Office of Pesticide Programs, Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule establishes a feed additive regulation related to the experimental use of the plant growth regulator *N,N*-dimethylpiperidinium chloride. The regulation was requested by BASF Wyandotte Corp. This rule will permit the marketing of cottonseed meal while further data is collected on the subject pesticide.

EFFECTIVE DATE: Effective on September 12, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. Robert Taylor, Product Manager 25, Registration Division (TS-767), Office of Pesticide Programs, EPA, 401 M Street SW., Washington, D.C. 20460, 202-426-2632.

SUPPLEMENTARY INFORMATION: On June 2, 1978, the EPA announced (43 FR 24130) that BASF Wyandotte Corp., Agricultural Chemical Division, 100 Cherry Hill Road, Parsippany, N.J. 07054, had filed a food additive petition (FAP 8H5182, now changed to FAP 8H5186). This petition proposed that 21 CFR Part 193 (herewith corrected to 21 CFR Part 561) be amended to permit the experimental use of the plant growth regulator *N,N*-dimethylpiperidinium chloride involving application of the plant growth regulator to growing cotton with a tolerance limitation of 2 parts per million (ppm) in cottonseed meal in accordance with an experimental use permit that is being issued concurrently under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973, 89 Stat. 761; 7 U.S.C. 136(a) et seq.). No comments were received by the Agency in response to this notice of filing.

The scientific data reported and other relevant material have been evaluated, and it has been determined that the pesticide may be safely used in accordance with the provisions of the experimental use permit which is being issued concurrently under FIFRA. It has further been determined that since residues of the pesticide may result in cottonseed meal from the agricultural uses provided for in the experimental use permit, the feed additive regulation should be established and should include a tolerance limitation. The toxicological data considered in support of the proposed tolerance included rat and rabbit acute oral lethal dose (LD_{50}) studies, a teratology study in rats with a no-observable-effect level (NOEL) of 3,000 ppm, a dominant lethal mutagenicity assay in mice which was negative, and 90-day dog and rat subchronic feeding studies with an NOEL of 1,000 ppm. Using a safety factor of 2,000 for systemic effects, the provisional acceptable daily intake (PADI) is 0.0125 milligram (mg)/kilogram (kg) body weight (bw)/day, or a provisional maximal permissible intake (PMPI) of 0.75 mg/day for a 60-kg man. Since this is an animal feed tolerance, the direct human exposure to the pesticide is zero. An evaluation of human exposure is presented in the notice of establishment of temporary tolerances elsewhere in today's FEDERAL REGISTER.

Other studies included radiotracer metabolism studies in cotton plants, rats, and lactating goats; storage stability tests; and residue studies in cotton forage, cottonseed, process fractions, meat, milk, poultry, and eggs. An adequate analytical method (gas chromatography using a flame ionization detector) is available for enforcement purposes.

No tolerances have previously been established for residues of the pesticide. Its metabolism is adequately understood. The pesticide has not been previously registered and there are no other considerations involved in establishing the feed additive tolerance. (A related document concerning the establishment of temporary tolerances for residues of the pesticide in or on cotton forage at 1.5 ppm, cottonseed at 1 ppm; and meat and poultry at 0.1 ppm and in milk and eggs at 0.05 ppm appears elsewhere in today's FEDERAL REGISTER. The tolerances for residues in meat, milk, eggs, and poultry are adequate to cover secondary residues resulting from the animal feed uses, as delineated in 40 CFR 180.6(a)(2)).

Accordingly, a feed additive regulation is established as set forth below.

Any person adversely affected by this regulation may, on or before October 12, 1978, file written objections with the Hearing Clerk, EPA, Room M-3708, 401 M Street SW., Washington, D.C. 20460. Such objections should be submitted in quintuplicate and specify the provisions of the regulation deemed to be objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are supported by the grounds legally sufficient to justify the relief sought.

Effective on September 12, 1978, 21 CFR Part 561 is amended as set forth below.

(Sec. 409(c)(1), Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346a(d)(2)).)

Dated: September 5, 1978.

EDWIN L. JOHNSON,
Deputy Assistant Administrator for Pesticide Programs.

Part 561 is amended by adding the new § 561.197 to read as follows:

§ 561.197 *N,N*-Dimethylpiperidinium chloride.

(a) A tolerance of 2 parts per million is established for residues of the plant growth regulator *N,N*-dimethylpiperidinium chloride in cottonseed meal resulting from application of the plant growth regulator in accordance with the provisions of an experimental use permit that expires September 5, 1979.

(b) Residues in cottonseed meal not in excess of 2 parts per million resulting from the use described in paragraph (a) of this section remaining after expiration of the experimental program will not be considered to be actionable if the pesticide is legally applied during the term of and in accordance with the provisions of the experimental use permit and feed additive tolerance.

(c) BASF Wyandotte Corp. shall immediately notify the Environmental Protection Agency of any findings from the experimental use that have a bearing on safety. The firm shall also keep records of production, distribution, and performance and on request make the records available to any authorized officer or employee of the Environmental Protection Agency or the Food and Drug Administration.

[4310-02]

Title 25—Indians

CHAPTER I—BUREAU OF INDIAN AFFAIRS, DEPARTMENT OF THE INTERIOR

SUBCHAPTER F—ENROLLMENT

PART 43k—REVISION OF THE FINAL ROLL OF THE MENOMINEE TRIBE OF WISCONSIN

Current Membership Roll; Correction

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Final rule correction.

SUMMARY: The Bureau of Indian Affairs is correcting the erroneous revocation of a paragraph of its regulations governing the revision of the Menominee membership roll. This document rescinds a final rule that was published on May 8, 1978 which deleted part 43k from the regulations (43 FR 19649). The revocation of that rule is necessary because § 43k.14 of part 43k provides for the maintenance of membership rolls until the Menominee Tribe assumes responsibility for the rolls. The tribe has not yet assumed that responsibility and therefore it is necessary to rescind the revocation of 43k.14.

FOR FURTHER INFORMATION CONTACT:

Janet L. Parks, Chief, Branch of Tribal Enrollment Services, Bureau of Indian Affairs, 1951 Constitution Avenue NW., Washington, D.C. 20245, telephone 202-343-6921.

EFFECTIVE DATE: This correction shall become effective September 12, 1978.

SUPPLEMENTARY INFORMATION: A notice revoking certain regulations governing preparation of rolls of Indians was published in the FEDERAL REGISTER, Vol. 43, No. 89, at 19649 on May 8, 1978. One of the regulations revoked was part 43k-revision of the final roll of the Menominee Tribe of Wisconsin. Section 43k.14 provides for the maintenance of the membership roll until the tribe assumes responsibility for the roll. The tribe has not yet assumed that responsibility, and therefore, it is necessary to rescind the revocation of § 43k.14.

It is generally the policy of the Department of the Interior to allow time for interested persons to take part in the rulemaking process. However, since this correction is of an administrative nature, the public rulemaking process is dispensed with under the exception provided in 5 U.S.C. 553(b)(B)(1970).

The revocation of part 43k and 43k.14 of subchapter F, chapter I, of title 25 of the Code of Federal Regulations is rescinded. Section 43k.14, which reads as follows will remain in effect:

§ 43k.14 Current membership roll.

The membership roll of the tribe shall be kept current until such time as the tribe assumes responsibility for the roll by striking therefrom the names of persons who have relinquished in writing their membership in the tribe and of deceased persons upon receipt of a death certificate or other evidence of death acceptable to the staff, and by adding thereto the names of children who meet the qualifications for membership in the tribe set forth in this part.

No further changes are made in the text of subchapter F.

Since this amendment is of an administrative nature, the 30-day deferred effective date is dispensed with under the exception provided in subsection (d)(3) of 5 U.S.C. 553 (1970).

NOTE.—The Bureau of Indian Affairs has determined that this document does not contain a major proposal requiring preparation of an inflation impact statement under Executive Order 11821 and OMB Circular A-107.

The principal author of this notice is Janet L. Parks, Chief, Branch of

Tribal Enrollment Services, Bureau of Indian Affairs.

FORREST J. GERARD,
Assistant Secretary,
Indian Affairs.

[FR Doc. 78-25678 Filed 9-11-78; 8:45 am]

[4310-02]

SUBCHAPTER P—MINING

PART 178—MANAGEMENT OF TRIBAL ASSETS OF UTE INDIAN TRIBE, UINTAH AND OURAY RESERVATION, UTAH, BY THE TRIBE AND THE UTE DISTRIBUTION CORP.

AUGUST 23, 1978.

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Final rule.

SUMMARY: This document provides final regulations for the joint management of the assets of the Ute Indian Tribe not susceptible to equitable and practicable distribution under the Ute Partition Act. The intended effect of the regulation is to insure that the Ute Indian Tribe and the Ute Distribution Corp. will have a voice in the management of the assets in the same proportion that the groups are entitled, respectively, to share in the benefits from those assets.

EFFECTIVE DATE: The regulations are effective October 12, 1978.

FOR FURTHER INFORMATION CONTACT:

Ray Jackson, Realty Officer, Phoenix Area Office, Bureau of Indian Affairs, 3030 North Central Avenue, Phoenix, Ariz. 85011, 602-261-4195, not a toll-free call.

SUPPLEMENTARY INFORMATION: The Assistant Secretary for Indian Affairs' authority to issue these final regulations is sections 27 and 28 of the Act of August 27, 1954 (68 Stat. 868, 25 U.S.C. 677-677aa), 5 U.S.C. 301, sections 463 and 465 of the revised statutes (25 U.S.C. 2 and 9) and 230 DM 1 and 2.

On page 57694 of the December 11, 1975, FEDERAL REGISTER (40 FR 57694), there was published a notice of proposed rulemaking to add a new part 178 to subchapter P of chapter 1 of title 25 of the Code of Federal Regulations. The purpose of those proposed regulations was to provide for a voice in the management of the undistributed assets of the Ute Indian Tribe by the Ute Indian Tribe and by the Ute Distribution Corp. (UDC) in the same proportion that these groups are entitled, respectively, to share in the benefits from those assets. This was to be accomplished by the creation of a committee which would assume all management functions. The management committee was to be composed of seven members; two to be elected by the board of directors of the UDC and five to be members of the Ute Indian Tribe of the Uintah and Ouray Reservation elected by the Tribal Business Committee.

The notice of proposed rulemaking solicited written comments, suggestions, or objections to the proposed regulations. A substantial number of letters and other communications containing objections to the regulations were received. A request was made that a hearing be held in Salt Lake City, Utah, to afford all interested persons an adequate chance to present their views. In response, an informal hearing was held on February 6, 1976, in room 7102 of the Federal Building, Salt Lake City, Utah. All persons who desired to do so were afforded an opportunity to present their views.

A substantial number of communications were received which repeated the same basic objections. A summarization of these issues and our responses thereto is as follows:

1. *Comment:* Section 28 of the Ute Partition Act, which gave the Secretary power to proceed in the best interests of both groups in cases where agreement by both was required by the act but wasn't reached, clearly shows that each group was to have an equal voice. The joint management of the undistributed assets is the only part of the act requiring such joint management.

Response: Section 28 is a general authorization for the Secretary to effectuate the purposes of the act in the best interests of both groups. If it was intended that this authority only pertain to section 10, the language would more logically have been a part of that section, or section 28 would have specifically referred to section 10.

2. *Comment:* The undistributed assets are still held in trust by the Secretary for both groups, and he must protect the interests of both.

Response: The proposed regulations would not prevent the performance of any such responsibility.

3. *Comment:* In the Area Director's proposal, the term, "joint managers," should mean the business committee "and" the board of directors; not "either" one "or" the other.

Response: This largely overlooks the use of this definition in the proposed regulations; however, there is validity in the suggestion in certain contexts. Therefore, the definition has been revised to state that the term may mean both, collectively, or either, individually, as is appropriate within the context where the term is used.

4. *Comment:* In the first sentence of the Area Director's proposed section 178.4, the word, "may," should be "must."

Response: There is no objection to this proposal, and it has been adopted.

5. *Comment:* The term, "board of directors," should be redefined.

Response: The Area Director's definition is adequate to identify the entity in question. The proposed definition is unnecessarily long and is argumentative.

After fully considering all of the comments and objections, a decision has been made that the Area Director's proposed regulations will be adopted with the changes mentioned above.

I have determined that these proposed regulations are not a major Federal action within the scope of the National Environmental Policy Act of 1969, 42 U.S.C. 4223(2)(c).

The following regulations will be effective October 12, 1978.

A new Part 178 is hereby added to subchapter P of title 25, Code of Federal Regulations, as follows:

Sec.
178.1 Definitions.
178.2 Authority and purpose.
178.3 Referral of questions by superintendent.
178.4 Referral of questions by the joint managers.
178.5 Management decisions.
178.6 Method of casting votes.
178.7 Implementation of decision.

AUTHORITY: Secs. 27 and 28 of the Act of August 27, 1954, 68 Stat. 868 (25 U.S.C. 677-677aa); 5 U.S.C. 301; secs. 463, 465 of the Revised Statutes (25 U.S.C. 2 and 9) and 230 DM 1 and 2.

§ 178.1 Definitions.

As used in this part:

"Assets" means all unadjudicated or unliquidated claims against the United States, all gas, oil, and mineral rights of every kind, and all other assets of the Ute Tribe of Uintah and Ouray Reservation as constituted on August 27, 1954, not distributed in accordance with the terms of the Ute Partition Act.

"Business Committee" means the Uintah and Ouray Tribal Business Committee, created pursuant to the provisions of the constitution and bylaws of the Ute Indian Tribe of the Uintah and Ouray Reservation.

"Board of directors" means the board of directors of the Ute Distribution Corp., a corporation organized and existing under the laws of the State of Utah.

"Joint manager" or "joint managers" means the business committee and the board of directors, or either of them, as is appropriate, within the context where one of those terms is used.

"Superintendent" means the superintendent of the Uintah and Ouray Agency, Bureau of Indian Affairs.

"Secretary" means the Secretary of the Interior or a subordinate official acting pursuant to authority delegated by said Secretary.

§ 178.2 Authority and purpose.

In accordance with the Ute Partition Act approved August 27, 1954 (68 Stat. 868; 25 U.S.C. 677-677aa), as amended by the Act of August 2, 1956 (70 Stat. 936), and the Act of September 25, 1962 (76 Stat. 597), assets shall be managed jointly by the business committee and the board of directors. These regulations set out the procedures for exercising such joint management.

§ 178.3 Referral of questions by superintendent.

The superintendent shall refer all questions and problems related to the management of the assets as they come to his attention, together with his analysis of alternative solutions to each question or problem, to the business committee and to the board of directors for resolution. Such referrals shall be in writing and shall be addressed to the joint managers at such addresses as they furnish to the superintendent and to each other from time to time.

§ 178.4 Referral of questions by the joint managers.

The business committee and the board of directors must refer to each other for resolution any questions or problems related to joint management of the assets which they from time to time determine need to be resolved together with the submitting party's proposal, if any, for solution. Such referrals shall be in writing, addressed to the other joint manager at the address furnished in accordance with section 178.3 of this part. Copies of all such referrals shall also be furnished to the superintendent. Either of the parties may request an analysis of alternative solutions to each question or problem referred pursuant to this section, and the superintendent will furnish such analysis within ten working days, or within such longer period as he may notify the parties is required to prepare such analysis.

§ 178.5 Management decisions.

In arriving at management decisions concerning the assets, the business committee shall be entitled to cast 72.83814 votes and the board of directors shall be entitled to cast 27.16186 votes. Any total number of votes cast exceeding 50 shall be sufficient to determine an issue submitted to the joint managers for resolution. A majority of votes cast will decide an issue.

§ 178.6 Method of casting votes.

Within 30 days after an issue and any analysis provided for in §§ 178.4 and 178.5 have been submitted to the joint managers for resolution, they shall each notify the superintendent in writing of the number of votes cast for and against the proposed or alternative solutions. If either of the joint managers fails or refuses to cast his votes and to notify the superintendent thereof within the time specified, the superintendent may conclude that such joint managers' votes have been cast against the proposed solution or solutions; or, if no solutions have been proposed, for the maintenance of the status quo. At the time they notify the superintendent of the votes cast on an issue, each joint manager shall furnish to the superintendent a certified copy of a resolution of the business committee or the board of directors, as the case may be, authorizing such vote.

§ 178.7 Implementation of decision.

The Secretary shall issue such documents as are necessary or expedient to implement the decisions of the joint managers, insofar as such issuance is authorized by law, and he shall execute and/or approve such documents for and on behalf of the joint managers, or either of them, and on behalf of the United States, as necessary. If it becomes necessary for the Secretary to execute an instrument on behalf of one or both of the joint managers and to approve the same instrument as trustee, two different officials having delegated authority from the Secretary shall serve as executing and approving officers, respectively.

NOTE.—The Bureau of Indian Affairs has determined that this document does not contain a major proposal requiring preparation of an inflation impact statement under Executive Order 11821 and OMB Circular A-107.

RICK LAVIS,
Deputy Assistant Secretary,
Indian Affairs.

Title 26—Internal Revenue

CHAPTER I—INTERNAL REVENUE SERVICE, DEPARTMENT OF THE TREASURY

SUBCHAPTER A—INCOME TAX

[T.D. 7564]

PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

SUBCHAPTER F—PROCEDURE AND ADMINISTRATION

PART 301—PROCEDURE AND ADMINISTRATION

Minimum Tax for Tax Preferences

AGENCY: Internal Revenue Service, Treasury.

ACTION: Final regulations.

SUMMARY: This document provides final regulations relating to the imposition of a minimum tax on tax preferences of both individuals and corporations. Changes to the applicable tax law were made by the Tax Reform Act of 1969 and the Excise, Estate, and Gift Tax Adjustment Act of 1970. These regulations provide necessary guidance to the public for compliance with the law and affect all taxpayers who may have any items of tax preference.

DATE: The regulations are generally effective for taxable years ending after December 31, 1969.

FOR FURTHER INFORMATION CONTACT:

Robert Coplan of the Legislation and Regulations Division, Office of the Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, D.C. 20224, Attention: CC:LR:T, 202-566-3287, not a toll-free call.

SUPPLEMENTARY INFORMATION:

BACKGROUND

On December 30, 1970, the FEDERAL REGISTER published proposed amendments to the Income Tax Regulations (26 CFR Part 1) under sections 56 through 58 of the Internal Revenue Code of 1954 (35 FR 19757). The amendments were proposed to conform the regulations to section 301 of the Tax Reform Act of 1969 (83 Stat. 580). On June 24, 1971, the FEDERAL REGISTER published a notice of proposed rulemaking which withdrew portions of the previously proposed regulations (36 FR 12020). Revised provisions were proposed at that time. In addition, a new section of the regulations (§ 1.56-5) was proposed to reflect the amendment made to section 56 of the Code by section 501 of the Excise, Estate, and Gift Tax Adjustment Act of 1970 (84 Stat. 1846). A public hearing was held on August 10, 1971. After consideration of all comments regarding the proposed amendments, those

V 43 / 177 SE 12 78

amendments are adopted as revised by this Treasury decision.

LEGISLATIVE CHANGES REFLECTED IN REGULATIONS

These amendments only reflect changes made by the Tax Reform Act of 1969 and the Excise, Estate, and Gift Tax Adjustment Act of 1970. In addition, changes have been made in § 1.56-1(b) and § 1.56-5(b) to reflect the addition of certain credits by the Revenue Act of 1971 (85 Stat. 497). Amendments to conform the regulations to changes made by other legislation, including the Tax Reform Act of 1976, will be contained in separate documents.

NATURE OF MINIMUM TAX

The minimum tax for tax preferences is in addition to the regular income tax and is imposed with respect to specified items of tax preference. These items of tax preference represent income which is either (a) not subject to current taxation by reason of temporary exclusion or an acceleration of deductions or (b) not subject to full taxation by reason of certain deductions or a special rate of tax.

IMPOSITION AND COMPUTATION OF MINIMUM TAX

Section 1.56-1 of the regulations sets forth the general rules for the imposition and computation of the minimum tax for tax preferences. The rate of the minimum tax is 10 percent. The base of the tax for a taxable year is the sum of a taxpayer's items of tax preference (to the extent they exceed $30,000), reduced by his liability for the year for income tax and certain special taxes.

DEFERRAL OF MINIMUM TAX

Section 1.56-2 of the regulations sets forth rules for the deferral of minimum tax liability in the case of certain net operating losses. Under these rules (which implement section 56(b) of the Code), if a taxpayer has a net operating loss for a taxable year, his liability for minimum tax is deferred to the year (or years) in which the net operating loss is applied to reduce taxable income.

EFFECTIVE DATE AND CROSS-REFERENCES

Section 1.56-3 of the regulations sets forth the effective date of the minimum tax provisions. In general, the minimum tax is applicable to taxable years ending after December 31, 1969. Section 1.56-4 cross-refers to § 1.58-2 through § 1.58-6 for rules relating to certain "conduit" entities (estates, trusts, partnerships, and the like).

CARRYOVER OF MINIMUM TAX

Under sections 56(c) and 1,56-5, a taxpayer may carry forward the excess of its income tax liability for a taxable year (except taxes imposed by sections 56, 72(m)(5)(B), 402(e), 408(f), 531 and 541 over the amount by which its items of tax preference exceed the $30,000 exemption. This excess tax liability may be carried forward for up to 7 years to reduce the taxpayer's minimum tax base for those subsequent years.

REGULATIONS UNDER SECTION 56 UNCHANGED

No material change has been made in the final regulations under section 56 from the provisions proposed in 1970 and 1971.

ITEMS OF TAX PREFERENCE

Section 1.57-1 of the regulations gives detailed definitions for 8 of the 9 items of tax preference listed in section 57(a) as originally enacted. These 8 items are: Accelerated depreciation on real property; accelerated depreciation on personal property subject to a net lease; amortization of certified pollution control facilities; amortization of railroad rolling stock; stock options; additions to reserves for losses on bad debts of financial institutions; depletion; and capital gains. The ninth item, excess investment interest, was repealed by the Tax Reform Act of 1976. Proposed § 1.57-2 deals with that item, but is not being adopted at this time for reasons discussed later in this preamble.

CHANGES MADE IN § 1.57-1 IN RESPONSE TO COMMENTS

Comments were received from the public suggesting that various changes be made to proposed § 1.57-1. The most significant changes made in § 1.57-1 of the final regulations in response to these comments are as follows:

1. Under the proposed regulations, the determination of the depreciation items of tax preference under section 57(a) (2) and (3) is made with respect to each item of section 1250 property or section 1245 property. The final regulations now provide that a taxpayer who uses group, classified, or composite depreciation accounts will determine the amount of this tax preference in the aggregate with respect to all property in the account, provided that the account contains only property placed in service during a single year.

2. For several tax preference items, it is necessary to determine the amount of depreciation which would have been allowable if only the straight line method had been used. The final regulations add rules specifying the useful life to be used in determining the amount of this hypothetical depreciation where the taxpayer elects to apply an asset depreciation period or an asset guideline period to eligible property.

3. The final regulations provide that, where a qualified or restricted stock option is exercised by an estate or heir, the option price of the stock for minimum tax purposes includes all or part of the basis of the option. The rule in § 1.57-1(f)(5)(i) has been expanded to provide that no stock option preference item arises if there is a disposition of the stock in the same taxable year the option is exercised.

4. The preference item in section 57(a)(7) is the amount by which the deduction allowed to financial institutions under section 585 or 593 for a reasonable addition to a reserve for bad debts exceeds the amount that would have been allowable had the institution maintained its bad debt reserve for all taxable years on the basis of actual experience. The last sentence of proposed § 1.57-1(g)(4)(i) did not allow a bank to claim a deduction smaller than that permitted by section 585(b)(3)(A), and then recoup the unclaimed amount in a later year. If a bank in a subsequent year claimed all or part of such an unclaimed deduction, a tax preference item would have been imposed equal to the recouped amount. The final regulations have been changed to permit such a recoupment. The minimum addition to the reserve for bad debts imposed by the regulations under section 585 reduce the effect of this change for taxable years beginning after December 31, 1976. An example has been added to § 1.57-1(g)(4)(i) which generally illustrates the computation of this preference item.

RECOMMENDATIONS NOT ADOPTED

Several recommendations made in the public comments were not adopted in the final regulations. These recommendations were not followed primarily because of conflicts with the statutory language of section 57 and other sections of the Code or administrative problems raised by the application of these recommendations. The more significant suggestions were as follows:

1. Under § 1.57-1(f)(3), stock received pursuant to the exercise of a qualified or restricted stock option is valued in a manner consistent with the principles applicable under section 83(a)(1). Section 83(a)(1) requires that the stock be valued without regard to restrictions (other than restrictions which by their terms will never lapse). One comment urged that the stock should be valued with regard to restrictions or that the taxpayer be allowed an option to defer minimum tax liability until the restrictions lapse. This recommendation was not adopted. The use of section 83 is proper for valuation purposes since it measures the amount of income that would be subject to immediate tax, and therefore the amount that is subject to preferential deferral, but for the benefit provided by section 421. Clarifying language was added to § 1.57-1(f)(3) to indicate that the timing rule of section 83(a)(1) is not being used. For purposes of section 57(a)(6), the fair market value of the stock is determined as of the time the option is exercised.

2. Comments were received recommending that if a taxpayer claims a deduction for depletion smaller than the deduction allowable under section 611, the amount treated as an item of tax preference should be determined on the basis of the deduction claimed, rather than the maximum deduction allowable. This suggestion has not been adopted since section 57(a)(8) defines the depletion item of tax preference as "* * * the excess of the deduction for depletion allowable under section 611 for the taxable year over the adjusted basis of the property at the end of the taxable year * * *" (emphasis added).

EXCESS INVESTMENT INTEREST AND NET LEASE PROVISIONS NOT ADOPTED

Sections 1.57-2 and 1.57-3 relating to excess investment interest and net leases, respectively, are not being adopted at this time. These sections have been left outstanding because amendments made to sections 57 (b) and (c) by the Revenue Act of 1971 were made effective for taxable years beginning after December 31, 1969, the effective date of the Tax Reform Act of 1969. In view of the retroactive nature of these amendments, any necessary changes in §§ 1.57-2 and 1.57-3 will be made in a notice of proposed rulemaking. Because of the similarity of the subject matter, such changes may be incorporated in a notice of proposed rulemaking which will be issued containing proposed regulations under section 163(d).

TAX BENEFIT RULE ADOPTED FOR TAXABLE YEARS BEGINNING BEFORE JANUARY 1, 1976

Section 1.57-4 of the proposed regulations, relating to a limitation on amounts treated as items of tax preference, is being adopted, but will only be effective for taxable years beginning before January 1, 1976, the effective date of the Tax Reform Act of 1976. For taxable years beginning after this date, new regulations will be proposed in a separate document which will implement the tax benefit rule of section 58(h), added by section 301 of the Tax Reform Act of 1976. These new regulations will not necessarily follow all the provisions in § 1.57-4.

RECORDS TO BE RETAINED BY TAXPAYER

Section 1.57-5 of the regulations prescribes the records which are to be maintained and retained to permit a determination of a taxpayer's minimum tax base.

MINIMUM TAX EXEMPTION

Section 1.58-1 of the regulations sets forth rules concerning the minimum tax exemption. In general, a taxpayer's first $30,000 of items of tax preference is exempt from the minimum tax. A married person filing a separate return is entitled to a minimum tax exemption of only $15,000. In the case of a controlled group of corporations, the $30,000 exemption is divided equally among the component members unless they consent to an unequal allocation of the $30,000 exemption.

APPLICATION OF MINIMUM TAX TO CONDUIT ENTITIES

Section 1.58-2 of the regulations contains general rules for conduit entities and special rules for partnerships and partners. Since a partnership as such is not subject to the income tax, it is not itself subject to the minimum tax for tax preferences. However, each partner in computing his items of tax preference, must take into account separately his allocable share of those items of income and deduction of the partnership that enter into the computation of his items of tax preference.

Section 1.58-3 of the regulations, which implements section 58(c)(1) of the Code, contains rules relating to estates and trusts. Code section 58(c)(1) provides that the sum of the items of tax preference of an estate or trust is to be apportioned between the estate or trust and its beneficiaries on the basis of the income of the estate or trust allocable to each. The regulations provide that, for this purpose, "income" is the income received or accrued by the trust or estate which is not subject to current taxation in the hands of the trust or estate or the beneficiary by reason of an item of tax preference.

In response to a comment § 1.58-3(a)(4) has been revised in the final regulations. This section establishes the year in which a beneficiary is to take into account items of tax preference of a trust that are apportioned to him. As proposed, this provision would have required the beneficiary to report his allocable share of tax preference items in the same taxable year in which he receives the income upon which the apportionment of tax preferences is based. The final regulations provide that items of tax preference apportioned to a beneficiary are to be taken into account by him in his taxable year within or with which ends the taxable year of the estate or trust during which it has such items of tax preference. This revision conforms these regulations to the rules set forth in section 652(c) and 662(c) for the reporting of income by a beneficiary.

Section 1.58-4 contains rules for the apportionment of the items of tax preference of an electing small business corporation (sometimes referred to as a "tax-option corporation" or a "subchapter S corporation"). With one exception, the items of tax preference of the corporation are not subject to minimum tax at the level of the corporation. The exception to the general rule pertains to certain capital gains, which are subject to tax at the corporate level under Code section 1378. The corporation is subject to the minimum tax with respect to such capital gains. The items of tax preference not subject to minimum tax at the corporate level are apportioned pro rata among the shareholders. In addition, each shareholder must treat as a capital gain preference item, his distributive share of the corporation's net section 1201 gain less the taxes paid by the corporation under sections 56 and 1378.

A minor clarifying change has been made to the formula contained in § 1.58-4(c)(2) for computing a subchapter S corporation's capital gain preference item. The final regulations indicate that only one of the two exclusions in § 1.58-4(c)(2)(i) could apply to a given computation because of the limitation imposed by section 1378(c), relating to capital gain attributable to property with a substituted basis.

Section 1.58-5 of the regulations provides that participants in a common trust fund are to take into account their proportionate shares of the items of tax preference of the fund. The items of tax preference to be so apportioned are to be determined as if the fund itself were subject to the minimum tax. The participant's proportionate share of such item of tax preference is determined in a manner consistent with § 1.584-2(c) (relating to income of participants in a common trust fund).

Section 1.58-6 provides rules for the apportionment of items of tax preference of a regulated investment company or real estate investment trust to their shareholders or holders of beneficial interest. In general, the items of tax preference are computed at the entity level and apportioned to the shareholders or holders of beneficial interest in the same proportion as the dividends (other than capital gains dividends and, in the case of a real estate investment trust, accelerated depreciation on section 1250 property) paid to each such shareholder or

V 4 3 / 1 7 7

SE 12 78

holder of beneficial interest bear to the taxable income of the company or trust, determined without regard to the dividends paid deduction.

PREFERENCE ITEMS ATTRIBUTABLE TO FOREIGN SOURCES

Sections 1.58-7 and 1.58-8 of the regulations contain special rules concerning items of tax preference attributable to foreign sources. Section 1.58-7 relates to foreign source items of tax preference (other than capital gains and stock options). Such items of tax preference are taken into account for minimum tax purposes only to the extent that they reduce the taxpayer's income tax on income derived from sources within the United States. Under the regulations, foreign-source items of tax preference are considered to reduce the taxpayer's income tax on income from sources within the United States to the extent that the deductions relating to such preferences, in combination with other foreign deductions, exceed the income from such foreign sources and, in effect, offset income from sources within the United States. Under the Code and regulations, items of tax preference are treated as reducing United States income tax before items which are not items of tax preference.

Section 1.58-8 contains rules relating to foreign-source capital gains and stock options. Such items are subject to the minimum tax for tax preferences only if they are accorded preferential treatment under the tax laws of the foreign country (or possession of the United States) to which they are attributable. In prescribing rules for determining whether a foreign country accords preferential treatment of such items, the final regulations follow the rules proposed on June 24, 1971, rather than the rules originally proposed on December 30, 1970.

Several comments objected to the change of position in § 1.58-8 of the proposed regulations published on June 24, 1971. These provisions concern the applicability of the minimum tax to capital gains whose source was a country which imposes no income tax. The amendment of section 58(g) with retroactive application by the Revenue Act of 1971 has statutorily ratified the position taken in the final regulations.

MINOR COMMENTS SUGGESTING CLARIFICATIONS

A number of changes of a clarifying nature were made in the final regulations in response to public comments received which identified particular sections in need of clarification.

REGULATIONS LEFT OUTSTANDING

For the convenience of the reader, the sections of the proposed regulations being left outstanding are listed below:

§ 1.57-2 and § 1.57-3.

DELETION OF SECTIONS MERELY REPRODUCING STATUTORY MATERIAL

As part of the effort to reduce the bulk of the Code of Federal Regulations, these sections of the proposed regulations which merely reproduced various provisions of the Internal Revenue Code are deleted.

For the same reason, several such sections are deleted from the Code of Federal Regulations by this document.

DRAFTING INFORMATION

The principal author of these proposed regulations was Robert B. Coplan of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulation, both on matters of substance and style.

ADOPTION OF AMENDMENTS TO THE REGULATIONS

Accordingly, 26 CFR Part 1 is amended by adopting the regulations proposed in the notice of proposed rulemaking published in the FEDERAL REGISTER on December 30, 1970 (35 FR 19757), as amended by the notice of proposed rulemaking published on June 24, 1971 (36 FR 12020), subject to the following changes:

PARAGRAPH 1. Paragraph 1 of the appendix to the notice of proposed rulemaking of December 30, 1970, is revised to read as follows:

Section 1.5 is deleted.

PAR. 2. Paragraph 2 of the appendix to the notice of proposed rulemaking of December 30, 1970, is revised to read as follows:

Section 1.12 is deleted.

PAR. 3. Paragraph 3 of the appendix to the notice of proposed rulemaking of December 30, 1970, is revised to read as follows:

Section 1.46 is deleted.

PAR. 4. Paragraph (c) of of § 1.46-1, as set forth in the appendix to the notice of proposed rulemaking of December 30, 1970, is revised to read as follows:

§ 1.46-1 Determination of amount.

* * * * *

(c) *Liability for tax.* For the purpose of computing the limitation based on the amount of tax, section 46(a) defines the liability for tax as the income tax imposed for the taxable year by chapter 1, reduced by the sum of certain credits listed in section 46(a). In addition, an increase in tax resulting from the application of section 47 (relating to certain dispositions, etc., of section 38 property) shall not be treated as tax imposed by chapter 1 for purposes of computing the liability for tax. See section 47(c).

* * * * *

PAR. 5. Paragraph 5 of the appendix to the notice of proposed rulemaking of December 30, 1970, is revised to read as follows:

Section 1.51 is deleted.

PAR. 6. Section 1.56, as set forth in paragraph 6 of the appendix to the notice of proposed rulemaking of December 30, 1970, is deleted.

PAR. 7. Paragraph (b)(2)(i) of § 1.56-1, as set forth in the notice of proposed rulemaking of June 24, 1971, is changed by deleting the word "and" at the end of subdivisions (*b*) and (*c*) and by adding subdivisions (*d*) and (*e*). The revised and added provisions read as follows:

§ 1.56-1 Imposition of tax.

* * * * *

(b) *Computation of tax.* * * *

(2) * * *

(i) * * *

(*b*) Section 37 (relating to retirement income),

(*c*) Section 38 (relating to investment credit),

(*d*) Section 40 (relating to expenses of work incentive programs), and

(*e*) Section 41 (relating to contributions to candidates for public office), and

* * * * *

PAR. 8. Section 1.56-1 is amended as follows:

1. Paragraph (c), as set forth in paragraph 6 of the appendix to the notice of proposed rulemaking of December 30, 1970, and redesignated as paragraph (d) in the notice of proposed rulemaking of June 24, 1971, is deleted.

2. The term "section 668" is replaced by the term "section 667" every place that it appears.

PAR. 9. Paragraph (b) of § 1.56-3, as set forth in paragraph 6 of the appendix to the notice of proposed rulemaking of December 30, 1970, is changed by revising the last two sentences in the example to read as follows

§ 1.56-3 Effective date.

* * * * *

(b) *Taxable year beginning in 1969 and ending in 1970.* * * *

Example. * * * Thus, without regard to the proration rules applicable under this section, the taxpayer's minimum tax liability for items of tax preference arising in 1969-70 is $15,000, i.e., 10 percent x ($180,000-$30,000), of which $5,000, i.e., 10 percent × $50,000, is deferred until 1970-71 under the principles of section 56(b) and section 1.56-2. By application of the above formula the taxpayer's actual minimum tax liability is $4,958.90 in 1969-70 and $2,479.45 in 1970-71 determined as follows:

1969-70: 181/365 x $10,000

1970-71: 181/365 x $5,000

PAR. 10. Paragraph (b)(1) of § 1.56-5, as set forth in the notice of proposed rulemaking of June 24, 1971, is changed by deleting the word "and" at the end of subdivision (ii), by deleting the word "over" at the end of subdivision (iii), and by adding subdivisions (iv) and (v). The revised and added provisions read as follows:

§ 1.56-5 Tax carryovers.

* * * * *

(b) *Computation of amount of carryover.* * * *

(1) * * *

(ii) Section 37 (relating to retirement income),

(iii) Section 38 (relating to investment credit),

(iv) Section 40 (relating to expenses of work incentive programs), and

(v) Section 41 (relating to contributions to candidates for public office), over

* * * * *

PAR. 11. Section 1.57, as set forth in paragraph 6 of the appendix to the notice of proposed rulemaking of December 30, 1970, is deleted.

PAR. 12. Section 1.57-1, as set forth in paragraph 6 of the appendix to the notice of proposed rulemaking of December 30, 1970, is changed as follows:

1. Paragraph (a) is reserved.

2. Paragraph (b)(2) is revised by changing the second sentence, by changing so much of the third sentence as precedes the colon, and by inserting, between these two sentences a new sentence.

3. Paragraph (b)(3) is revised by changing the second sentence and deleting the third sentence.

4. Paragraph (b)(4) is revised by adding flush material at the end of subdivision (i) and by revising subdivision (ii).

5. Paragraph (c)(1) is revised by changing the second sentence.

6. Paragraph (c)(3) is revised by changing the second sentence and deleting the third sentence.

7. Paragraph (d)(3) is revised by changing the second sentence and deleting the third sentence.

8. Paragraph (d)(4)(i) is revised.

9. Paragraph (e)(3) is revised by deleting "and the regulations thereunder" and by changing the second sentence and deleting the third sentence.

10. Paragraph (f) is changed by revising the first sentence of subparagraph (2) and by revising subparagraphs (3) and (5)(i).

11. Paragraph (g)(4)(i) is revised by changing the third and seventh sentences and adding an example at the end thereof.

12. Paragraph (i)(1) is revised by inserting a new sentence following the second sentence.

These revised and added provisions read as follows:

§ 1.57-1 Items of tax preference defined.

* * * * *

(a) [Reserved]

(b) *Accelerated depreciation on section 1250 property—* * * *

(2) *Separate items of section 1250 property.* * * * In general, each building (or component thereof, if the taxpayer uses the component method of computing depreciation) is a separate item of section 1250 property. However, for purposes of this section, assets placed in a group, classified, or composite account are to be treated as a single item by a taxpayer, provided that such account contains only property placed in service during a single taxable year. In addition, two or more items may be treated as one item of section 1250 property for purposes of this paragraph where, with respect to each such item: * * *

(3) *Allowable depreciation or amortization.* * * * Such phrase does not include depreciation allowable in the year in which the section 1250 property is disposed of. * * *

(4) *Straight line depreciation.* (i) * * * If an election under § 1.167(a)-11(f), § 1.167(a)-12(e), or § 1.167(a)-12(f) is applicable to the property, the salvage value of the property shall be determined in accordance with such election, and the asset depreciation period (or asset guideline period) applicable to the property pursuant to such election shall be considered to be the useful life of the property for the purposes of this section.

(ii) Where the taxpayer acquires property in a transaction to which section 381(a) applies or from another member of an affiliated group during a consolidated return year and an "accelerated" method of depreciation as described in section 167(b) (2), (3), or (4) or section 167(j)(1) (B) or (C) is permitted (see § 1.381(c)(6)-1 and § 1.1502-12(g)), the depreciation which would have been allowable under the straight line method is determined as if the property had been depreciated under the straight line method since depreciation was first taken on the property by the transferor of such property. In such cases, references in this paragraph to the period for which the property is held or useful life of the property are treated as including the period beginning with the commencement of the original use of the property.

* * * * *

(c) *Accelerated depreciation on section 1245 property subject to a net lease—*(1) *In general.* * * * Except as provided in paragraph (b)(1)(ii) of this section the determination of the excess under section 57(a)(3) is made with respect to each separate item of section 1245 property. * * *

(3) * * * Such phrase does not include depreciation allowable in the year in which the section 1245 property is disposed of. * * *

* * * * *

(d) *Amortization of certified pollution control facilities.* * * *

(3) * * * Such amount, however, does not include amortization allowable in the year in which the pollution control facility is disposed of.

(4) *Otherwise allowable deduction.* (i) The determination of the amount of the depreciation deduction otherwise allowable under section 167 is made as if the taxpayer had depreciated the property under section 167 for each year of its useful life for which the property has been held. This amount may be determined under § 1.167(a)-11(c) if the property is eligible property (as defined in § 1.167(a)-11(b)(2)) and, during the taxable year in which the property was first placed in service, the taxpayer—

(*a*) Has made an election under § 1.167(a)-11(f) with respect to eligible property first placed in service in such taxable year, or

(*b*) Has placed no eligible property in service other than property described in § 1.167(a)-11(b)(5) (iii), (iv), or (v).

The amount determined pursuant to the preceding sentence shall be determined as if the taxpayer had depreciated the property in accordance with § 1.167(a)-11 for all years to which such section applies and during which the taxpayer held the property. This amount may be determined under § 1.167(a)-12(a)(5) if the property is qualified property (as defined in § 1.167(a)-12(a)(3)) and the taxpayer has made an election with respect to such property under § 1.167(a)-12(e). If the taxpayer has made an election under § 1.167(a)-12(f)(1) for a taxable year ending before January 1, 1971, this amount shall be determined for such year in accordance with such election. For purposes of this determination, any method selected by the

V 4 3 / 1 7 7 S E 1 2 7 8

taxpayer which would have been permissible under section 167 for such taxable year, including accelerated methods, may be used. Any additional amount which would have been allowable by reason of section 179 (relating to additional first-year depreciation for small business) may be included provided such amount is reflected in the determination made under this paragraph in subsequent years.

• • • • • •

(e) *Amortization of railroad rolling stock.* • • •

(3) • • • Such amount, however, does not include amortization allowable in the year in which the rolling stock is disposed of.

• • • • • •

(f) *Stock options.* • • •

(2) *Definitions.* See generally § 1.421-7 (e), (f), and (g) for the definitions of "option price," "exercise," and "transfer," respectively; however, in the case of a transfer of a share of stock pursuant to the exercise of a qualified stock option or a restricted stock option after the death of an employee by the estate of the decedent (or by a person who acquired the right to exercise such option by bequest or inheritance or by reason of the death of the decedent), the term "option price" shall, for purposes of this paragraph, include both the consideration paid by the estate (or such person) for such share of stock and so much of the basis of the option as is attributable to such share of stock. • • •

(3) *Fair market value.* In accordance with the principles of section 83(a)(1), the fair market value of a share of stock received pursuant to the exercise of a qualified or restricted stock option is to be determined without regard to restrictions (other than nonlapse restrictions within the meaning of § 1.83-3(h)). Notwithstanding any valuation date given in section 83(a)(1), for purposes of this section, fair market value is determined as of the date the option is exercised.

• • • • • •

(5) *Inapplicability in certain cases.* (i) Section 57(a)(6) is inapplicable if during the same taxable year in which stock is transferred pursuant to the exercise of an option, the transferee makes a disposition (within the meaning of section 425(c)) of such stock. In the case of a nonresident alien, section 57(a)(6) is inapplicable to the extent the stock option is attributable (in accordance with the principles of sections 861 through 863 and the regulations thereunder) to sources without the United States.

• • • • • •

(g) *Reserves for losses on bad debts of financial institutions.* • • •

(4) *Actual experience.* (i) • • • The taxpayer may, however, select a more appropriate balance based on its actual experience during a shorter period subject to the approval of the district director upon examination of the return provided there are unusual circumstances which indicate that such period is more indicative of the taxpayer's actual loss experience. • • • The beginning balance for any subsequent taxable year is the amount of the beginning balance of the preceding taxable year, decreased by bad debt losses during such year, increased by recoveries of bad debts during such year and increased by the lower of the maximum amount determined under section 585(b)(3)(A) for such year or the amount of the deduction allowed for such year. The application of this subdivision (i) may be illustrated by the following example:

Example. The Y Bank, a calendar year taxpayer, uses the reserve method of accounting for bad debts. On December 31, 1969, Y determines the balance of its reserve for bad debts to be $70,000 under the percentage method. On the same date Y's 5-year moving average is $52,000. Y incurs net bad debt losses (bad debt losses less recoveries of bad debts) of $3,000 for each of the years 1970, 1971, and 1972, which it charges to its reserve for bad debts. Y's 6-year moving averages computed under section 585(b)(3)(A) at the close of 1970, 1971, and 1972 are $50,000, $49,000, and $51,000, respectively. Y's preference items are computed as follows based upon additional facts assumed:

	1970	1971	1972
1. Bad debt reserve—percentage method:			
(a) Balance beginning of year (closing balance prior year)	$70,000	$70,000	$66,000
(b) Net bad debts charged to reserve	3,000	3,000	3,000
(c) Subtotal	67,000	67,000	65,000
(d) Deduction allowed	3,000	1,000	4,000
(e) Balance end of year	70,000	68,000	69,000
2. Bad debt reserve—"actual experience":			
(a) Beginning balance (for 1970, 5-year moving average; for other years, closing balance prior year)	52,000	50,000	48,000
(b) Net bad debts charged to reserve	3,000	3,000	3,000
(c) Subtotal	49,000	47,000	45,000
(d) Maximum amount under section 585(b)(3)(A) (6-year moving average minus (c))	1,000	2,000	6,000
(e) Deduction allowed (line 1(d))	3,000	1,000	4,000
(f) Lower of (d) or (e)	1,000	1,000	4,000
(g) Closing balance (line (c) + (f))	50,000	48,000	49,000
3. Preference item under section 57(a)(7):			
(a) Deduction allowed	3,000	1,000	4,000
(b) Maximum amount under section 585(b)(3)(A)	1,000	2,000	6,000
(c) Preference item (excess of (a) over (b))	2,000	0	0

• • • • • •

(i) *Capital gains—(1) Taxpayers other than corporations.* • • • Furthermore, the net long-term capital gain of an estate or trust does not include capital gains described in section 642(c)(4). • • •

PAR. 13. Sections 1.57-2 and 1.57-3, as set forth in paragraph 6 of the appendix to the notice of proposed rulemaking of December 30, 1970, are deleted and the sections are reserved.

PAR. 14. Section 1.57-4, as set forth in the notice of proposed rulemaking of December 30, 1970, is amended as follows:

1. The heading is revised to read, "§ 1.57-4 Limitations on amounts treated as items of tax preference for taxable years beginning before January 1, 1976."

2. Paragraph (a) is revised by inserting "beginning before January 1, 1976" after "If in any taxable year".

PAR. 15. Section 1.58, as set forth in paragraph 6 of the appendix to the notice of proposed rulemaking of December 30, 1970, is deleted.

PAR. 16. Section 1.58-2, as set forth in paragraph 6 of the appendix to the notice of proposed rulemaking of December 30, 1970, is changed by deleting the last two sentences of paragraph (b)(1) and inserting the following in lieu thereof:

§ 1.58-2 General rules for conduit entities; partnerships and partners.

• • • • • •

(b) *Partnerships and partners.* (1) • • • Accordingly, each partner, in computing his items of tax preference, must take into account separately those items of income and deduction of the partnership which enter into the computation of the items of tax preference in accordance with subparagraph (2) of this paragraph.

• • • • • •

PAR. 17. Paragraph (b)(2) of § 1.58-2, as set forth in paragraph 6 of the appendix to the notice of proposed rulemaking of December 30, 1970, is amended as follows:

1. Subdivision (i) is revised by deleting "and § 1.57-2(b)(1)".

2. Subdivision (ii) is revised by deleting "and § 1.57-2(b)(4)".

3. Subdivision (iii) is revised by deleting "and § 1.57-2(b)(5)".

PAR. 18. Section 1.58-3, as set forth in paragraph 6 of the appendix to the notice of proposed rulemaking of December 30, 1970, is changed by revising paragraphs (a) (3) and (4) to read as follows:

§ 1.58-3 Estates and trusts.

• • • • • •

(a) *In general.* • • •

(3) In the case of a charitable remainder annuity trust (as defined in section 664(d)(1) and § 1.664-2) or a charitable remainder unitrust (as defined in section 664(d)(2) and § 1.664-3), the determination of the income not subject to current taxation by reason of an item of tax preference is to be made as if such trust were generally subject to taxation. Where income of such a trust is not subject to current taxation in accordance with this section and is distributed to a beneficiary in a taxable year subsequent to the taxable year is which the trust received or accrued such income, the items of tax preference relating to such income are apportioned to the beneficiary in such subsequent year (without credit for minimum tax paid by the trust with respect to items of tax preference which are subject to the minimum tax by reason of section 664(c)).

(4) Items of tax preference apportioned to a beneficiary pursuant to this section are to be taken into account by the beneficiary in his taxable year within or with which ends the taxable year of the estate or trust during which it has such items of tax preference.

• • • • • •

PAR. 19. Section 1.58-3, as set forth in paragraph 6 of the appendix to the notice of proposed rulemaking of December 30, 1970, is amended as follows:

1. Paragraph (a)(5) is revised by deleting "(as described in § 1.57-2)".

2. Example (1) of paragraph (b) is revised by deleting "(see § 1.57-2)".

3. The fourth sentence of Example (3) in paragraph (b) is revised by deleting "(and § 1.57(b))".

PAR. 20. Paragraph (c) of § 1.58-4, as set forth in paragraph 6 of the appendix to the notice of proposed rulemaking of December 30, 1970, is changed by revising subparagraph (2)(i) and by revising the last sentence of the example set forth in subparagraph (3):

§ 1.58-4 Electing small business corporations.

• • • • • •

(c) *Capital gains.* • • •

(2) • • •

(i) The amount of tax that would be computed under section 1378(b)(2) if the following amount were excluded:

(*a*) That portion of the net section 1201 gain of the corporation described in section 1378(b)(1), or

(*b*) If section 1378(c)(3) applies, that portion of the net section 1201 gain attributable to the property described in section 1378(c)(3), and

• • • • • •

(3) • • •

In addition, each shareholder of X will take into account his distributive share of the $650,000 of net section 1201 gain of X less the taxes paid by X under sections 56 and 1378 on the gain.

PAR. 21. Paragraph (a) of § 1.58-6, as set forth in paragraph 6 of the appendix to the notice of proposed rulemaking of December 30, 1970, is revised by adding the following new sentence at the end thereof:

§ 1.58-6 Regulated investment companies; real estate investment trusts.

(a) *In general.* • • • The minimum tax exemption of the trust or company shall not be reduced because a portion of the trust's or company's items of tax preference are allocated to the shareholders or holders of beneficial interests.

• • • • • •

PAR. 22. Paragraph (a) of § 1.58-7, as set forth in paragraph 6 of the appendix to the notice of proposed rulemaking of December 30, 1970, is revised by adding the following new sentence at the end thereof:

§ 1.58-7 Tax preferences attributable to foreign sources; preferences other than capital gains and stock options.

(a) *In general.* • • • In the case of a taxpayer who deducted foreign taxes under section 164 for a taxable year, the provisions of this section shall be applied (without regard to section 275(a)(4)) as if he had elected the overall foreign tax credit limitation under section 904(a)(2) for such year.

• • • • • •

PAR. 23. Paragraphs (b)(2)(i)(*a*) and (b)(2)(ii) of § 1.58-7, as set forth in paragraph 6 of the appendix to the notice of proposed rulemaking of December 30, 1970, are revised by deleting the following: "and § 1.57-2(a)", "and § 1.57-2(b)(4)", "and § 1.57-2(b)(2)", and "and § 1.57-2(b)(3)".

PAR. 24. Paragraph 9 of the appendix to the notice of proposed rulemaking of December 30, 1970, is revised to read as follows:

Section 1.443 is deleted.

PAR. 25. Paragraph 11 of the appendix to the notice of proposed rulemaking of December 30, 1970, is revised to read as follows:

Section 1.453 is deleted.

PAR. 26. Paragraph 13 of the appendix to the notice of proposed rulemaking of December 30, 1970, is revised to read as follows:

Section 1.511 is deleted.

PAR. 27. Paragraph 20 of the appendix to the notice of proposed rulemaking of December 30, 1970, is revised to read as follows:

Section 1.901 is deleted.

PAR. 28. Paragraph (f) of § 1.901-1, as set forth in paragraph 21 of the appendix to the notice of proposed rulemaking of December 30, 1970, is revised to read as follows:

§ 1.901-1 Allowance of credit for taxes.

• • • • • •

(f) *Taxes against which credit not allowed.* The credit for taxes shall be allowed only against the tax imposed by chapter 1 of the code, but it shall not be allowed against the taxes imposed for the taxable year under the sections listed in section 901(a).

• • • • • •

PAR. 29. Paragraph 22 of the notice of proposed rulemaking of December 30, 1970, is revised to read as follows:

Section 1.1245-2 is amended by inserting after the third sentence of paragraph (a)(7) the following new sentence:

§ 1.1245-2 Definition of recomputed basis.

(a) *General rule.* • • •

(7) *Depreciation or amortization allowed or allowable.* • • • No adjustment is to be made on account of the tax imposed by section 56 (relating to the minimum tax for tax preferences). • • •

• • • • • •

V 43 / 177 SE 12 78

PAR. 30. Paragraph 25 of the appendix to the notice of proposed rulemaking of December 30, 1970, is revised to read as follows:

Section 1.1373 is deleted.

PAR. 31. Paragraph 27 of the appendix to the notice of proposed rulemaking of December 30, 1970, is revised to read as follows:

Section 1.1375 is deleted.

PAR. 32. Paragraph 28 of the appendix to the notice of proposed rulemaking of December 30, 1970, is changed by revising the first sentence to read as follows:

Section 1.1375-1 is amended by revising paragraph (a) and subparagraph (1) of paragraph (b).

PAR. 33. Paragraph (a)(9) of § 1.6012-1, as set forth in paragraph 29 of the appendix to the notice of proposed rulemaking of December 30, 1970, is revised to read as follows:

§ 1.6012-1 Individuals required to make returns of income.

(a) *Individual citizen or resident.* * * *

(9) *Items of tax preference.* For a taxable year ending after December 31, 1969, an individual shall attach form 4625 to the return required by this paragraph if during the year the individual—

(i) Has items of tax preference (described in section 57) in excess of its minimum tax exemption (determined under § 1.58-1) or

(ii) Uses a net operating loss carryover from a prior taxable year in which it deferred minimum tax under section 56(b).

* * * * *

PAR. 34. So much of paragraph (a)(1) of § 1.6012-3 as was set forth in paragraph 31 of the appendix of the notice of proposed rulemaking of December 30, 1970, is revised to read as follows:

§ 1.6012-3 Returns of fiduciaries.

(a) *For estates and trusts.*—(1) *In general.* Every fiduciary, or at least one of the joint fiduciaries, must make a return of income on Form 1041 (or by use of a composite return pursuant to § 1.6012-5) and attach the required form if the estate or trust has items of tax preference (as defined in section 57 and the regulations thereunder) in any amount—

* * * * *

PAR. 35. Paragraph 32 of the appendix to the notice of proposed rulemaking of December 30, 1970, is revised to read as follows:

Section 1.6015(c) is deleted.

PAR. 36. Paragraph 33 of the appendix to the notice of proposed rulemaking of December 30, 1970, is deleted.

PAR. 37. Paragraph (a) of § 1.6031-1, as set forth in paragraph 34 of the appendix to the notice of proposed rulemaking of December 30, 1970, is changed by adding a subparagraph heading to read as follows:

§ 1.6031-1 Return of partnership income.

(a) *In general.*—(1) *General rule.* * * *

PAR. 38. Paragraph 36 of the appendix to the notice of proposed rulemaking of December 30, 1970, is revised to read as follows:

Section 1.6411-1 is amended by adding at the end of paragraph (a) the following new sentence:

§ 1.6411-1 Tentative carryback adjustments.

(a) *In general.* * * * In determining any decrease in tax under §§ 1.6411-1 through 1.6411-4, the decrease in tax is determined net of any increase in the tax imposed by section 56 (relating to the minimum tax for tax preferences).

PAR. 39. Paragraph 37 of the appendix to the notice of proposed rulemaking of December 30, 1970, is revised to read as follows:

Section 1.6654 is deleted.

PAR. 40. Paragraph 38 of the appendix to the notice of proposed rulemaking of December 30, 1970, is deleted.

PAR. 41. Paragraph 39 of the appendix to the notice of proposed rulemaking of December 30, 1970, is deleted.

SUBCHAPTER F—PROCEDURE AND ADMINISTRATION

PART 301—PROCEDURE AND ADMINISTRATION

PAR. 42. Paragraph 40 of the appendix to the notice of proposed rulemaking of December 30, 1970, is revised to read as follows:

Section 301.6015 is deleted.

PAR. 43. Paragraph 41 of the appendix to the notice of proposed rulemaking of December 30, 1970, is revised to read as follows:

Section 301.6654 is deleted.

* * * * *

This Treasury decision is issued under the authority contained in section 7805 of the Internal Revenue Code of 1954 (68A Stat. 917; 26 U.S.C. 7805).

JEROME KURTZ,
Commissioner of Internal Revenue.

Approved: August 22, 1978.

DONALD C. LUBICK,
Assistant Secretary of the Treasury.

PARAGRAPH 1. Section 1.5 is deleted.

PAR. 2. Section 1.12 is deleted.

PAR. 3. Section 1.46 is deleted.

PAR. 4. Section 1.46-1 is amended by revising paragraph (c) to read as follows:

§ 1.46-1 Determination of amount.

* * * * *

(c) *Liability for tax.* For the purpose of computing the limitation based on the amount of tax, section 46(a) defines the liability for tax as the income tax imposed for the taxable year by chapter 1, reduced by the sum of certain credits listed in section 46(a). In addition, an increase in tax resulting from the application of section 47 (relating to certain dispositions, etc., of section 38 property) shall not be treated as tax imposed by chapter 1 for purposes of computing the liability for tax. See section 47(c).

PAR. 5. Section 1.51 is deleted.

§ 1.56-1 Imposition of tax.

(a) *In general.* Section 56(a) imposes an income tax on the items of tax preference (as defined in § 1.57-1) of all persons other than persons specifically exempt from the taxes imposed by chapter 1. The items of tax preference represent income of a person which either is not subject to current taxation by reason of temporary exclusion (such as stock options) or by reason of an acceleration of deductions (such as accelerated depreciation) or is sheltered from full taxation by reason of certain deductions (such as percentage depletion) or by reason of a special rate of tax (such as the rate of tax on corporate capital gains). The tax imposed by section 56 is in addition to the other taxes imposed by chapter 1.

(b) *Computation of tax.* The amount of such tax is 10 percent of the excess (referred to herein as "the minimum tax base") of—

(1) The sum of the taxpayer's items of tax preference for such year in excess of the taxpayer's minimum tax exemption (determined under § 1.58-1) for such year, over

(2) The sum of:

(i) The taxes imposed for such year under chapter 1 other than the taxes imposed by section 56 (relating to minimum tax for tax preferences), by section 531 (relating to accumulated earnings tax), or by section 541 (relating to personal holding company tax), reduced by the sum of the credits allowable under—

(*a*) Section 33 (relating to taxes of foreign countries and possessions of the United States),

(*b*) Section 37 (relating to retirement income),

(c) Section 38 (relating to investment credit),

(*d*) Section 40 (relating to expenses of work incentive programs), and

(*e*) Section 41 (relating to contributions to candidates for public office, and

(ii) The tax carryovers to such taxable year (as described in § 1.58-5).

(c) *Special rule.* For purposes of paragraph (b) of this section where for any taxable year in which a tax is imposed under section 667 (relating to treatment of amounts deemed distributed by a trust in preceding years), that portion of the section 667 tax representing an increase in an earlier year's chapter 1 taxes (as recomputed), which taxes are allowed as a reduction in any such earlier year's minimum tax base, is not allowable as a reduction in the minimum tax base for the current taxable year. The remaining portion of the section 667 tax, representing the taxes imposed by section 56, section 531, and section 541, is not allowable as a reduction in the minimum tax base for any taxable year. Similarly, taxes imposed under section 614(c)(4) (relating to increase in tax with respect to aggregation of certain mineral interests) or under section 1351(d) (relating to recoveries of foreign expropriation losses) for any taxable year are not allowed as a reduction in the minimum tax base for such taxable year to the extent they represent chapter 1 taxes which are allowed as a reduction in a minimum tax base for an earlier taxable year for purposes of the computations under section 614(c)(4) or section 1351(d) or to the extent they represent an increase in the tax imposed by section 56, section 531, or section 541 in an earlier taxable year.

§ 1.56-2 Deferral of tax liability in case of certain net operating losses.

(a) *In general.* Section 56(b) provides for the deferral of liability for the minimum tax where, for the taxable year, the taxpayer has—

(1) A net operating loss for such taxable year any portion of which (under sec. 172) remains as a net operating loss carryover to a succeeding taxable year, and

(2) Items of tax preference in excess of the minimum tax exemptions (hereinafter referred to as "excess tax preferences").

In such a case, an amount of tax equal to the lesser of the tax imposed under section 56(a) (after allowance of the retirement income credit to the extent that such credit cannot be used against the other taxes imposed by chapter 1) or 10 percent of the amount of the net operating loss carryover described in subparagraph (1) of this paragraph is deferred. Such amount is not treated as tax imposed in such taxable year, but is treated as tax imposed in the succeeding taxable year or years in which the net operating loss is used as provided in paragraphs (b) and (c) of this section. Deferral will result in the above case regardless of the character of the tax preference items. Thus, for example, if the taxpayer has $1,030,000 of items of tax preference, including the stock option item of tax preference, and a $750,000 net operating loss available for carryover to subsequent taxable years, the amount of tax imposed for the taxable year under section 56(a) is $100,000 and $75,000 is deferred by application of section 56(b). Therefore, only $25,000 is treated as tax imposed for the taxable year. The provisions of this section are applicable in the case of a net operating loss or comparable item such as an operations loss under section 812 and an unused loss as defined in section 825(b).

(b) *Year of liability.* In any taxable year in which any portion of a net operating loss carryover attributable to the amount of excess tax preferences reduces taxable imcome (in the form of a net operating loss deduction), section 56(b)(2) treats as tax liability imposed in such taxable year an amount equal to 10 percent of such reduction. For this purpose, the portion of such net operating loss which is considered attributable to the amount of excess tax preferences is an amount equal to the lesser of such excess or the amount of the net operating loss carryover described in paragraph (a)(1) of this section. In no case, however, shall the total amount of tax imposed by reason of section 56(b) in subsequent years exceed the amount of the tax that was deferred in the loss year.

(c) *Priority of reduction.* (1) If a portion of a net operating loss is attributable to an amount of excess tax preferences, such portion is considered to reduce taxable income in succeeding taxable years only after the other portion (if any) of such net operating loss is used to reduce taxable income. Accordingly, if the amount of a net operating loss which may be carried to succeeding taxable years is reduced because of a modification required to be made pursuant to section 172(b)(2), such reduction is to be considered to be first from that portion of the net operating loss that is attributable to excess tax preferences. If a portion of a net operating loss carryover which is attributable to an amount of excess tax preferences is not used to reduce taxable income in any succeeding taxable year, no minimum tax will be imposed with respect to such portion.

(2) In the case of taxpayers with deductions attributable to foreign sources which are suspense preferences (as defined in paragraphs (c)(1)(ii) and (2)(ii) of sec. 1.58-7), the amount of such deductions is not included in the portion of the net operating loss not attributable to excess tax preferences. The portion of the net operating loss attributable to excess tax preferences is increased by the amount of suspense preferences which are, in accordance with the provisions of section 1.58-7(c), converted to actual items of tax preference (and not used against the minimum tax exemption of the loss year) in subsequent taxable years. The other portion of the net operating loss is increased by the amount of suspense preferences which reduce taxable income in subsequent taxable years but are not converted to actual items of tax preference (or are so converted but used against the minimum tax exemption of the loss year). See section 1.58-7(c)(1)(iii) example (4).

(d) *Multiple net operating loss carryovers.* In determining whether a net operating loss is used to reduce taxable income in a taxable year to which two or more net operating losses are carried, the ordering rules of section 172(b) and the regulations thereunder are to be applied. Thus, for example, the portion of a net operating loss carried over from an earlier taxable year which is attributable to an amount of excess tax preference is used to reduce taxable income in the carryover year before any portion of any other net operating loss carried over or back from a taxable year subsequent to the earlier taxable year.

(e) *Examples.* The application of this section may be illustrated by the following examples:

Example (1). In 1970, A, a calendar year taxpayer, who is a single individual, has $180,000 of items of tax preference, a $150,000 net operating loss of which $100,000 may be carried forward, and no tax liability under chapter 1 without regard to the minimum tax. His minimum tax computed under section 56(a) is $15,000 (10 percent times ($180,000 minus $30,000)). Under section 56(b)(1) an amount equal to the lesser of the amount determined under section 56(a) ($15,000) or 10 percent of the net operating loss which may be carried forward ($10,000) is treated as a deferred liability. Thus, his minimum tax liability for 1970 is $5,000 ($15,000 minimum tax under section 56(a) minus $10,000 deferred tax liability under section 56(b)). If, in 1971, he has $80,000 of taxable income before the deduction for the 1970 net operating loss, his minimum tax liability is $8,000 (10 percent of the amount by which the net operating loss carryforward from 1970 reduces taxable income) plus any minimum tax liability resulting from items of tax preference arising in 1971. If, by reason of the modifications provided by section 172(b)(2), no portion of the 1970 net operating loss remains as a carryover from 1971, no further minimum tax liability will result from the items of tax preference arising in 1970.

Example (2). In 1970, A, a calendar year taxpayer who is a single individual, has $90,000 of items of tax preference, a $100,000 net operating loss available for car-

ryover to future taxable years, no net operating loss carryovers from prior taxable years, and no tax liability under chapter 1 without regard to the minimum tax. His minimum tax computed under section 56(a) is $6,000 (10 percent times ($90,000 minus $30,000)). Under section 56(b)(1) an amount equal to the lesser of the amount determined under section 56(a) ($6,000) or 10 percent of the net operating loss subject to carryforward ($10,000) is treated as a deferred liability. Thus, A owes no minimum tax in 1970 and the entire $6,000 of minimum tax liability is deferred. Under section 56(b)(2), the portion of the net operating loss attributable to the excess tax preferences described in section 56(b)(1)(B) is $60,000.

(a) In 1971, A has $25,000 of taxable income before the deduction for the 1970 net operating loss. Thus, in 1971, A has no minimum tax liability attributable to the items of tax preference arising in 1970 since, by application of section 56(b)(3), the portion of the 1970 net operating loss carryforward not attributable to the excess described in section 56(b)(1)(B), or $40,000, is considered applied against taxable income before the remaining portion.

(b) In 1972, A has $50,000 of taxable income before the deduction for the remaining 1970 net operating loss. Thus, the first $15,000 of reduction in taxable income is considered as from the portion of the 1970 net operating loss carryforward not attributable to the excess tax preferences described in section 56(b)(1)(B) and the remaining $35,000 of reduction in taxable income is considered attributable to such excess. A's 1972 minimum tax attributable to items of tax preference arising in 1970 is, therefore, $3,500 (10 percent times $35,000).

(c) In 1973, A has $80,000 of taxable income before the deduction for the 1970 net operating loss. The remaining $25,000 of the 1970 net operating loss carryforward is used to reduce taxable income in 1973. Thus, A's 1973 minimum tax liability attributable to items of tax preference arising in 1970 is $2,500 (10 percent times $25,000).

Example (3). In 1971, M Corporation, a Western Hemisphere trade corporation (as defined in sec. 921), reporting on a calendar year basis has $20,000 of taxable income after all deductions including the Western Hemisphere trade deduction allowable under section 922 in the amount of $30,000. In 1970, M Corporation had a net operating loss of $100,000 all of which was available for carryover to 1971 and $60,000 of which was attributable to excess tax preferences. In computing the amount of the 1970 net operating loss carried over to 1972 pursuant to section 172(b), the 1971 Western Hemisphere trade corporation deduction is not taken into account. Thus, M Corporation's recomputed income under section 172(b) is $50,000 ($20,000 taxable income plus $30,000 Western Hemisphere trade corporation deduction). Pursuant to paragraph (c)(1) of this section, $20,000 of the $40,000 portion of the 1970 net operating loss not attributable to excess tax preferences is considered to reduce taxable income in 1971 and $30,000 of the $60,000 portion of the 1970 net operating loss attributable to excess tax preferences is considered reduced pursuant to section 172(b)(2). Thus, M Corporation has no 1971 minimum tax attributable to items of tax preference arising in 1970. Of the $50,000 remaining of the 1970 net operating loss, $30,000 is attributable to excess tax preference.

Example (4). In 1972, A, a calendar year taxpayer who is a single individual, has $25,000 of taxable income resulting from $50,000 of net long-term capital gains. In 1971, A had a net operating loss of $100,000 all of which is available to carryover to 1972 and $60,000 of which is attributable to excess tax preferences. By application of section 172(b) only $50,000 of the 1971 net operating loss is carried over to 1973. Pursuant to paragraph (c) of this section, $25,000 of the $40,000 portion of the 1971 net operating loss not attributable to excess tax preferences is considered to reduce taxable income in 1972. Of the $50,000 remaining of the 1971 net operating loss, $15,000 is not attributable to excess tax preferences and $35,000 is attributable to excess tax preferences. Thus, the $25,000 section 1202 deduction, in effect, reduces the portion of the 1971 net operating loss attributable to excess tax preferences. Because a net operating loss carryover is reduced to the extent of any section 1202 deduction, section 1202 deductions do not normally produce a tax benefit in such circumstances and, pursuant to § 1.57-4, would not be treated as items of tax preference. However, in this case, to the extent the portion of the 1971 net operating loss carryover attributable to excess tax preferences is reduced by reason of the section 1202 deduction, such deduction does result in a tax benefit to the taxpayer and is, therefore, treated as an item of tax preference in 1971. See § 1.57-4(b)(2).

§ 1.56-3 Effective date.

(a) *In general.* The minimum tax is effective for taxable years ending after December 31, 1969.

(b) *Taxable year beginning in 1969 and ending in 1970.* In the case of a taxable year beginning in 1969 and ending in 1970, the amount of the minimum tax shall be an amount equal to the amount determined under section 56 multiplied by the following fraction:

Number of days in the taxable year ending after December 31, 1969 ÷ Number of days in the entire taxable year.

Where, by reason of section 56(b) and § 1.56-2, tax initially imposed in a 1969-70 fiscal year is deferred until a subsequent taxable year or years, the amount of such tax liability in any subsequent taxable year is determined by application of the above fraction. Section 21, relating to computation of tax in years where there is a change in rates, is not applicable to the initial imposition of the minimum tax for tax preferences. The applications of this paragraph may be illustrated by the following example:

Example. The taxpayer uses a June 30 fiscal year. For fiscal 1969-70 the taxpayer has $180,000 of items of tax preference and a $50,000 net operating loss. In fiscal year 1970-71, the taxpayer uses the full net operating loss carryover from 1969-70 to reduce his taxable income by $50,000. Thus, without regard to the proration rules applicable under this section, the taxpayer's minimum tax liability for items of tax preference arising in 1969-70 is $15,000, i.e., 10 percent×($180,000−$30,000), of which $5,000, i.e., 10 percent×$50,000, is deferred until 1970-71 under the principles of section 56(b) and section 1.56-2. By application of the above formula the taxpayer's actual minimum tax liability is $4,958.90 in 1969-70 and $2,479.45 in 1970-71 determined as follows:

1969-70: 181/365×$10,000
1970-71: 181/365×$5,000

§ 1.56-4 Certain taxpayers.

For application of the minimum tax in the case of estates and trusts, electing small business corporations, common trust funds, regulated investment companies, real estate investment trusts, and partnerships, see §§ 1.58-2 through 1.58-6.

§ 1.56-5 Tax carryovers.

(a) *In general.* Section 56(c) provides a 7-year carryover of the excess of the taxes described in paragraph (1) of such section imposed during the taxable year over the items of tax preference described in paragraph (2) of such section for such taxable year for the purpose of reducing the amount subject to tax under section 56(a) in subsequent taxable years.

(b) *Computation of amount of carryover.* The amount of tax carryover described in section 50(c) is the excess (if any) of—

(1) The taxes imposed for the taxable year under chapter 1 other than taxes imposed by section 56 (relating to minimum tax for tax preferences), by section 531 (relating to accumulated earnings tax), or by section 541 (relating to personal holding company tax), reduced by the sum of the credits allowable under—

(i) Section 33 (relating to taxes of foreign countries and possessions of the United States),

(ii) Section 37 (relating to retirement income,

(iii) Section 38 (relating to investment credit),

(iv) Section 40 (relating to expenses of work incentive programs), and

(v) Section 41 (relating to contributions to candidates for public office), over

(2) The sum of the taxpayer's items of tax preference for such year in excess of the taxpayer's minimum tax exemption (determined under § 1.58-1) for such year.

For purposes of section 56(c) and this section, taxes imposed in a taxable year ending on or before December 31, 1969, are not included in the taxes described in subparagraph (1) of this paragraph. In addition, the rules of paragraph (c) of § 1.56-1 are applicable in determining the taxable year for which taxes are imposed under chapter 1 for purposes of paragraph (a)(1) of this section.

(c) *Operation of carryover.* Tax carryovers attributable to the taxable year shall be carried over to each of the 7 succeeding taxable years as follows:

(1) To the first such succeeding taxable year to reduce in the manner described in paragraph (d) of this section the amount subject to tax under section 56(a) for such first succeeding taxable year and

(2) To the extent such amount is not used as a reduction in the amount subject to tax under section 56(a) for such taxable year, such amount (if any) is carried over to each of the succeeding 6 taxable years but only to the extent such amount is not used to reduce the amount subject to tax under section 56(a) in taxable years intervening between the taxable year to which such amount is attributable and the taxable year to which such amount may otherwise be carried over.

(d) *Priority of reduction.* Where tax carryovers attributable to two or more taxable years are carried over to a subsequent taxable year such amounts attributable to the earliest taxable year shall be used to reduce the amount subject to tax under section 56(a) for such subsequent taxable year before any such amounts attributable to a later taxable year.

(e) *Special rules*—(1) *Periods of less than 12 months.* A fractional part of a year which is a taxable year under section 441(b) or 7701(a)(23) is a taxable year for purposes of section 56(c) and this section.

(2) *Electing small business corporations.* A taxable year for which a corporation is an electing small business corporation (as defined in section 1371(b)) shall be counted as a taxable year for purposes of determining the taxable years to which amounts which are available as a carryover under paragraph (a) of this section may be carried whether or not such carryovers arose in a year in which an election was in effect.

(3) *Husband and wife*—(i) *From joint to separate return.* If a joint return is filed by a husband and wife in a taxable year or years to which a tax carryover is attributable but separate returns are filed in any subsequent taxable year to which such carryover may be carried over to reduce the amount subject to tax under section 56(a), such carryover described in paragraph (b) of this section shall be allocated between husband and wife for purposes of reducing the amount subject to tax under section 56(a) for such subsequent taxable year in accordance with the principles of § 1.172-7(d).

(ii) *From separate to joint return.* If separate returns are filed by a husband and wife in a taxable year or years in which a tax carryover is attributable but a joint return is filed in any subsequent taxable year to which such carryover may be carried over to reduce the amount subject to tax under section 56(a), such carryover shall be aggregated for purposes of reducing the amount subject to tax under section 56(a), for such subsequent taxable year.

(4) *Estates and trusts.* In the case of the termination of an estate or trust, tax carryovers attributable to the estate or trust shall not be allowed to the beneficiaries succeeding to the property of the estate or trust.

(5) *Corporate acquisitions.* In the case of a transaction to which section 381(a) applies, the acquiring corporation shall succeed to and take into account, as of the close of the date transfer the tax carryovers attributable to the distributor or distribution or transferor corporation. The portion of such carryovers which may be taken into account under paragraph (b)(2)(ii) of § 1.56-1 for any taxable year shall not exceed the excess of (i) the sum of the items of tax preference for such year resulting from the continuation of the business in which the distributor or transferor corporation was engaged at the time of such transaction and the items of tax preference not related to the continuation of such business which are directly attributable to the assets acquired from the distributor or transferor corporation over (ii) an amount which bears the same ratio to the acquiring corporation's minimum tax exemption for such year as the items of tax preference described in subdivision (i) of this subparagraph bears to all of the acquiring corporation's items of tax preference for such year. This item shall be taken into account by the acquiring corporation subject to the rules in section 381(b) and the regulations thereunder.

(f) *Suspense preferences.* Where an item of tax preference which is a suspense preference (as defined in § 1.58-7) arises in a taxable year in which tax carryovers may be used to reduce the minimum tax base (or in which such carryovers arise the minimum tax liability for that year and the tax carryovers to subsequent taxable years shall be recomputed upon the conversion of the suspense preference in a subsequent year. In lieu of the above, in all cases, since there is no difference in tax consequence, the recomputation may be accomplished by recomputing the minimum tax liability of the taxable year in which the suspense preference arose without reduction of the minimum tax base for the tax carryovers which have been used as a reduction in the minimum tax base in intervening taxable years. If such method is used, the minimum tax liability of the intervening year is not recomputed and any tax carryovers carried from the taxable year in which the suspense preference arose which remain as a carryover in the year of conversion are reduced, in the priority provided in paragraph (d) of this section, to the extent used to reduce an increase in the minimum tax base for the earlier year resulting from the conversion of the suspense preference.

(g) *Taxes imposed in a taxable year beginning in 1969 and ending in 1970.* In the case of a taxable year beginning in 1969 and ending in 1970 the amount of the carryover determined under paragraph (b) of this section is reduced to an amount equal to the amount of such carryover (without regard to this paragraph) multiplied by the following fraction:

Number of days in taxable year ending after December 31, 1969 ÷ Number of days in the entire taxable year.

(h) *Examples.* The provisions of this section may be illustrated by the following examples:

Example (1). A is a single individual who uses a June 30 fiscal year. For fiscal 1968-1969, A had income tax liability under chapter 1 in the amount of $100,000. For fiscal 1969-1970, A had items of tax preference in the amount of $212,500 and income tax liability under chapter 1 (other than taxes imposed under sections 56, 531, and 541) of $365,000.

(a) The chapter 1 tax attributable to fiscal 1968-1969 is not available as a carryover under section 56(c) to reduce the amount subject to tax under section 56(a) since this tax arose in a taxable year ending on or before December 31, 1969.

(b) A portion of the excess of chapter 1 tax over the amount subject to tax under section 56(a) attributable to fiscal year 1969-1970 is available as a carryover as provided in section 56(c) to reduce the amount subject to tax under section 56(a). The amount of this carryover is $91,000 computed as follows:

1. Carryover under paragraph (b) of this section:

Chapter 1 taxes	$365,000
Items of tax preference in excess of exemption	182,500
Total	182,500

2. Reduction pursuant to paragraph (g) of this section:

182/365×$182,500=$91,000

Example (2). A is a calendar year taxpayer who is a single individual. In 1972, A had chapter 1 income tax liability (other than taxes imposed under sections 56, 531, and 541) of $200,000 and $50,000 of items of tax preference. In 1973, A had chapter 1 income tax liability (other than taxes imposed under sections 56, 531, and 541) of $120,000 and $40,000 of items of tax preference. In 1974, A had $400,000 of items of tax preference and no liability for tax under chapter 1 other than under section 56(a). Under section 56(c), the excess of the taxes described in paragraph (1) of that section arising in an earlier taxable year not used to reduce the amount subject to tax under section 56(a) for such taxable year can be carried over as provided in section 56(c) to reduce the amount subject to tax under section 56(a).

(a) The amount of the carryover from 1972 is $180,000 computed as follows:

Carryover under paragraph (b) of this section:	
Chapter 1 taxes	$200,000
Items of tax preference in excess of exemption	20,000
Total	180,000

(b) The amount of the carryover from 1973 is $110,000 computed as follows:

Carryover under paragraph (b) of this section:	
Chapter 1 taxes	$120,000
Items of tax preference in excess of exemption	10,000
Total	110,000

(c) For 1974, the excess of taxes in the preceding taxable years is used to reduce the amount subject to tax under section 56(a). The amount of carryover attributable to excess taxes arising in 1972 is used before such excess arising in 1973. The amount of tax under section 56(a) is $8,000 computed as follows:

1974 tax preferences	$400,000
Less exemption	30,000
	370,000
Less 1972 carryover	180,000
	190,000
Less 1973 carryover	110,000
1974 minimum tax base	80,000
1974 minimum tax ($80,000×10%)	8,000

Example (3). The facts are the same as in example (2) except that in 1974 A had $300,000 of items of tax preference. The amount of the carryover for taxable years after 1974 is computed as follows:

1974 tax preferences	$300,000
Less exemption	30,000
	270,000
Less 1972 carryover	180,000
	90,000
Less 1973 carryover	90,000
Minimum tax base	0
1973 carryover	110,000
Amount used in 1974	90,000
Amount available for taxable years after 1974	20,000

The $20,000 remaining of the 1973 carryover is available to reduce the amount subject to tax under section 56(a) in 1975 or other future taxable years as provided in section 56(c).

Example (4). M Corporation is a calendar year taxpayer. N Corporation uses a June 30 fiscal year. For the fiscal year 1970–1971, N Corporation had excess chapter 1 tax liability as described in paragraph (a) of this section in the amount of $75,000. On January 1, 1972, M Corporation acquired N Corporation in a reorganization described in section 368(a)(1)(A). N Corporation does not use any of such excess chapter 1 tax liability to reduce the amount subject to tax under section 56(a) for the short taxable year beginning on July 1, 1971, and ending on December 31, 1971. Thus, the excess chapter 1 tax liability is available to M Corporation as a carryover under paragraph (a) of this section to reduce the amount subject to tax for the next 6 succeeding taxable years beginning with taxable year 1972 as provided in this section. In applying the carryover to 1972 and succeeding taxable years, the carryover of N Corporation subject to the limitation of § 1.56-5(e)(4) is combined with any carryovers originating with M Corporation in 1970.

§ 1.57-0 Scope.

For purposes of the minimum tax for tax preferences (subtitle A, ch. I, pt. VI), the items of tax preference are:

(a) Excess investment interest,

(b) The excess of accelerated depreciation on section 1250 property over straight line depreciation,

(c) The excess of accelerated depreciation on section 1245 property subject to a net lease over straight line depreciation,

(d) The excess of the amortization deduction for certified pollution control facilities over the depreciation otherwise allowable,

(e) The excess of the amortization deduction for railroad rolling stock over the depreciation otherwise allowable,

(f) The excess of the fair market value of a share of stock received pursuant to a qualified or restricted stock option over the exercise price,

(g) The excess of the addition to the reserve for losses on bad debts of financial institutions over the amount which have been allowable based on actual experience,

(h) The excess of the percentage depletion deduction over the adjusted basis of the property, and

(i) The capital gains deduction allowable under section 1202 or an equivalent amount in the case of corporations.

Accelerated depreciation on section 1245 property subject to a net lease and excess investment interest are not items of tax preference in the case of a corporation, other than a personal holding company (as defined in section 542) and an electing small business corporation (as defined in section 1371(b)). In addition, excess investment interest is an item of tax preference only for taxable years beginning before January 1, 1972. Rules for the determination of the items of tax preference are contained in §§ 1.57-1 through 1.57-5. Generally, in the case of a nonresident alien or foreign corporation, the application of §§ 1.57-1 through 1.57-5 will be limited to cases in which the taxpayer has income effectively connected with the conduct of a trade or business within the United States. Special rules for the treatment of items of tax preference in the case of certain entities and the treatment of items of tax preference relating to income from sources outside the United States are provided in section 58 and in §§ 1.58-1 through 1.58-8.

§ 1.57-1 Items of tax preference defined.

(a) [Reserved.]

(b) *Accelerated depreciation on section 1250 property—(1) In general.* Section 57(a)(2) provides that, with respect to each item of section 1250 property (as defined in section 1250(c)), there is to be included as an item of tax preference the amount by which the deduction allowable for the taxable year for depreciation or amortization exceeds the deduction which would have been allowable for the taxable year if the taxpayer had depreciated the property under the straight line method for each year of its useful life for which the taxpayer has held the property. The determination of the excess under section 57(a)(2) is made with respect to each separate item of section 1250 property. Accordingly, where the amount of depreciation which would have been allowable with respect to one item of section 1250 property if the taxpayer had originally used the straight line method exceeds the allowable depreciation or amortization with respect to such property, such excess may not be used to reduce the amount of the item of tax preference resulting from another item of section 1250 property.

(2) *Separate items of section 1250 property.* The determination of what constitutes a separate item of section 1250 property is to be made on the facts and circumstances of each individual case. In general, each building (or component thereof, if the taxpayer uses the component method of computing depreciation) is a separate item of section 1250 property. However, for purposes of this section, assets placed in a group, classified, or composite account are to be treated as a single item by a taxpayer, provided that such account contains only property placed in service during a single taxable year. In addition, two or more items may be treated as one item of section 1250 property for purposes of this paragraph where, with respect to each such item: (i) The period for which depreciation is taken begins on the same date, (ii) the same estimated useful life has continually been used for purposes of taking depreciation or amortization, and (iii) the same method (and rate) of depreciation or amortization has continually been used. For example, assume a taxpayer constructed a 40-unit rental townhouse development and began taking declining balance depreciation on all 40 units as of January 1, 1970, at a uniform rate and has consistently taken depreciation on all 40 units on this same basis. Although each townhouse is a separate item of section 1250 property, all 40 townhouses may be treated as one item of section 1250 property for purposes of the minimum tax since the conditions of subdivisions (i), (ii), and (iii) of this subparagraph are met. This would be true even if the 40 townhouses comprised two 20-unit developments located apart from each other. However, if the taxpayer constructed an additional development or new section on the existing development for which he began taking depreciation on July 1, 1970, at a uniform rate for all the additional units, the additional units and the original units may not be treated as one item of section 1250 property since the condition of subdivision (i) of this subparagraph is not met. Where a portion of an item of section 1250 property has been depreciated or amortized under a method (or rate) which is different from the method (or rate) under which the other portion or portions of such item have been depreciated or amortized, such portion is considered a separate item of section 1250 property for purposes of this paragraph.

(3) *Allowable depreciation or amortization.* The phrase "deduction allowable for the taxable year for exhaustion, wear and tear, obsolescence, or amortization" and references in this paragraph to "allowable depreciation or amortization" include deductions allowable for the taxable year under sections 162, 167, 212, or 611 for the depreciation or amortization of section 1250 property. Such phrase does not include depreciation allowable in the year in which the section 1250 property is disposed of. For the determination of "allowable depreciation or amortization" for taxable years in which the taxpayer has taken no deduction, see § 1.1016-3(a)(2).

(4) *Straight line depreciation.* (i) For purposes of computing the depreciation which would have been allowable for the taxable year if the taxpayer had depreciated the property under the straight line method for each taxable year of its useful life, the taxpayer must use the same useful life and salvage value as was used for the first taxable year in which the taxpayer depreciated or amortized the property (subject to redeterminations made pursuant to § 1.167(a)-1 (b) and (c)). If, however, for any taxable year, no useful life was used under the method of depreciation or amortization used or an artificial period was used, such as, for example, by application of section 167(k), or salvage value was not taken into account in determining the annual allowances, such as, for example, under the declining balance method, then, for purposes of computing the depreciation which would have been allowable under the straight line method for the taxable year—

(*a*) There is to be used the useful life and salvage value which would have been proper if depreciation had actually been determined under the straight line method (without reference to an artificial life) throughout the period the property was held, and

(*b*) Such useful life and such salvage value is to be determined by taking into account for each taxable year the same facts and circumstances as would have been taken into account if the taxpayer had used such method throughout the period the property was held.

If an election under § 1.167(a)-11(f), § 1.167(a)-12(e), or § 1.167(a)-12(f) is applicable to the property, the salvage value of the property shall be determined in accordance with such election, and the asset depreciation period (or asset guideline period) applicable to the property pursuant to such election shall be considered to be the useful life of the property for the purposes of this section.

(ii) Where the taxpayer acquires property in a transaction to which section 381(a) applies or from another member of an affiliated group during a consolidated return year and an "accelerated" method of depreciation as described in section 167(b) (2), (3), or (4) or section 167(j)(1) (B) or (C) is permitted (see § 1.381(c)(6)-1 and § 1.1502-12(g)), the depreciation which would have been allowable under the straight line method is determined as if the property had been depreciated under the straight line method since depreciation was first taken on the property by the transferor of such property. In such cases, references in this paragraph to the period for which the property is held or useful life of the property are treated as including the period beginning with the commencement of the original use of the property.

(iii) For purposes of section 57(a)(2), the straight line method includes the method of depreciation described in § 1.167(b)-1 or any other method which provides for a uniform proration of the cost or other basis (less salvage value) of the property over the estimated useful life of the property to the taxpayer (in terms of years, hours of use, or other similar time units) or estimated number of units to be produced over the life of the property to the taxpayer. If a method other than the method described in § 1.167(b)-1 is used, the estimated useful life or estimated units of production shall be determined in a manner consistent with subdivision (i) of this subparagraph.

(iv) In the case of property constructed by or improvements made by a lessee, the useful life is to be determined in accordance with § 1.167(a)-4.

(5) *Application for partial period.* If an item is section 1250 property for less than the entire taxable year, the allowable depreciation or amortization includes only the depreciation or amortization for that portion of the taxable year during which the item is section 1250 property and the amount of the depreciation which would have been allowable under the straight line method is determined only with regard to such portion of the taxable year.

(6) *No section 1250 and basis adjustment.* No adjustment is to be made as a result of the minimum tax either to the basis of section 1250 property or with respect to computations under section 1250.

(7) *Example.* The principles of this paragraph may be illustrated by the following example:

Example. The taxpayer's only item of section 1250 property is an office building with respect to which operations were commenced on January 1, 1971. The taxpayer depreciates the component parts of the building on the declining balance method. The useful life and costs of the component parts for depreciation purposes are as follows:

Asset	Useful life	Cost	Salvage value
Building shell	50	$100,000	$50,000
Partitions and walls	10	40,000	
Ceilings	10	20,000	
Electrical system	25	40,000	2,500
Heating and air-conditioning system	25	60,000	2,500

For purposes of computing the item of tax preference under this paragraph for the taxpayer, the partitions, walls, and ceilings may be grouped together and the electrical, heating, and air-conditioning systems may be grouped together since the period for which depreciation is taken began with respect to the assets within these two groups on the same date and the assets within each group have continually had the same useful life and have continually been depreciated under the same method (and rate).

(a) The taxpayer's 1971 item of tax preference under this paragraph would be determined as follows:

(1) Item of 1250 property	(2) Declining balance depreciation	(3) Straight line depreciation	(4) Excess of (2) over (3)
1. Shell	$12,000	$7,000	$5,000
2. Partitions, walls, ceilings	9,000	6,000	3,000
3. Electrical, heating and air-conditioning systems	6,000	3,800	2,200
1971 preference			10,200

(b) Assuming the above facts are the same for 1974, the taxpayer's 1974 item of tax preference under this paragraph would be determined as follows:

(1) Item of 1250 property	(2) Declining balance depreciation	(3) Straight line depreciation	(4) Excess of (2) over (3)
1. Shell	$10,952	$7,000	$3,952
2. Partitions, walls, ceilings	5,529	8,000	None
3. Electrical, heating and air-conditioning systems	4,983	3,800	1,183
1974 preference			5,135

(c) *Accelerated depreciation on section 1245 property subject to a net lease*—(1) *In general.* Section 57(a)(3) provides that, with respect to each item of section 1245 property (as defined in section 1245(a)(3)) which is the subject of a net lease for the taxable year, there is to be included as an item of tax preference the amount by which the deduction allowable for the taxable year for depreciation or amortization exceeds the deduction which would have been allowable for the taxable year if the taxpayer had depreciated the property under the straight line method for each year of its useful life for which the taxpayer has held the property. Except as provided in paragraph (b)(1)(ii) of this section, the determination of the excess under section 57(a)(3) is made with respect to each separate item of section 1245 property. Accordingly, where the amount of depreciation which would have been allowable with respect to one item of section 1245 property if the taxpayer had originally used the straight line method exceeds the allowable depreciation or amortization with respect to such property, such excess may not be used to reduce the amount of the item of tax preference resulting from another item of section 1245 property.

(2) *Separate items of property.* The determination of what constitutes a separate item of section 1245 property must be made on the facts and circumstances of each individual case. Such determination shall be made in a manner consistent with the principles expressed in paragraph (b)(2) of this section.

(3) *Allowable depreciation or amortization.* The phrase "deduction allowable for the taxable year for exhaustion, wear and tear, obsolescence, or amortization" and references in this paragraph to "allowable depreciation or amortization" include deductions allowable for the taxable year under sections 162, 167 (including depreciation allowable under section 167 by reason of section 179), 169, 184, 185, 212, or 611 for the depreciation or amortization of section 1245 property. Such phrase does not include depreciation allowable in the year in which the section 1245 property is disposed of. Amortization of certified pollution control facilities under section 169, and amortization of railroad rolling stock under section 184 are not to be treated as amortization for purposes of section 57(a)(3) to the extent such amounts are treated as an item of tax preference under section 57(a) (4) or (5) (see paragraphs (d) and (e) of this section). For the determination of "allowable depreciation or amortization" for taxable years in which the taxpayer has taken no deduction, see § 1.1016-3(a)(2).

(4) *Straight line method of depreciation.* The determination of the depreciation which would have been allowable under the straight line method shall be made in a manner consistent with paragraph (b)(4) of this section. Such amount shall include any amount allowable under section 167 by reason of section 179 (relating to additional first-year depreciation for small business).

(5) *Application for partial period.* If an item is section 1245 property for less than the entire taxable year or subject to a net lease for less than the entire taxable year the allowable depreciation or amortization includes only the depreciation or amortization for that portion of the taxable year during which the item was both section 1245 property and subject to a net lease and the amount of the depreciation which would have been allowable under the straight line method is to be determined only with regard to such portion of the taxable year.

(6) *Net lease.* Section 57(a)(3) applies only if the section 1245 property is the subject of a net lease for all or part of the taxable year. See § 1.57-3 for the determination of when an item is considered the subject of a net lease.

(7) *No section 1245 and basis adjustment.* No adjustment is to be made as a result of the minimum tax either to the basis of section 1245 property or with respect to computations under section 1245.

(8) *Nonapplicability to corporations.* Section 57(a)(3) does not apply to a corporation other than an electing small business corporation (as defined in section 1371(b)) and a personal holding company (as defined in section 542).

(d) *Amortization of certified pollution control facilities*—(1) *In general.* Section 57(a)(4) provides that, with respect to each certified pollution control facility for which an election is in effect under section 169, there is to be included as an item of tax preference the amount by which the deduction allowable for the taxable year under such section exceeds the depreciation deduction which would otherwise be allowable under section 167. The determination under section 57(a)(4) is made with respect to each separate certified pollution control facility. Accordingly, where the amount of the depreciation deduction which would otherwise be allowable under section 167 with respect to one facility exceeds the allowable amortization deduction under section 169 with respect to such facility, such excess may not be used to offset an item of tax preference resulting from another facility.

(2) *Separate facilities.* The determination of what constitutes a separate facility must be made on the facts and circumstances of each individual case. Generally, each facility with respect to which a separate election is in effect under section 169 shall be treated as a separate facility for purposes of this paragraph. However, if the depreciation or amortization which would have been allowable without regard to section 169 with respect to any part of a facility is based on a different useful life, date placed in service, or method of depreciation or amortization from the other part or parts of such facility, such part is considered a separate facility for purposes of this paragraph. For example, if a building constitutes a certified pollution control facility and various component parts of the building have different useful lives, each group of component parts with the same useful life would be treated as a separate facility for purposes of this paragraph. Two or more facilities may be treated as one facility for purposes of this paragraph where, with respect to each such facility: (i) the initial amortization under section 169 commences on the same date, (ii) the facility is placed in service on the same date, (iii) the estimated useful life which would be the basis for depreciation or amortization other than under section 169 has continually been the same, and (iv) the method of depreciation or amortization which could have been used without regard to section 169 could have continually been the same.

(3) *Amount allowable under section 169.* For purposes of the determination of the amount of the deduction allowable under section 169, see section 169 and the regulations thereunder. Such amount, however, does not include amortization allowable in the year in which the pollution control facility is disposed of.

(4) *Otherwise allowable deduction.* (i) The determination of the amount of the depreciation deduction otherwise allowable under section 167 is made as if the taxpayer had depreciated the property under section 167 for each year of its useful life for which the property has been held. This amount may be determined under § 1.167(a)-(11)(c) if the property is eligible property (as defined in § 1.167(a)-11(b)(2)) and, during the taxable year in which the property was first placed in service, the taxpayer—

(*a*) Has made an election under § 1.167(a)-11(f) with respect to eligible property first placed in service in such taxable year, or

(*b*) Has placed no eligible property in service other than property described in § 1.167(a)-11(b)(5) (iii), (iv), or (v).

The amount determined pursuant to the preceding sentence shall be determined as if the taxpayer had depreciated the property in accordance with § 1.167(a)-11 for all years to which such section applies and during which the taxpayer held the property. This amount may be determined under § 1.167(a)-12(a)(5) if the property is qualified property (as defined in § 1.167(a)-12 (a)(3)) and the taxpayer has made an election with respect to such property under § 1.167(a)-12(e). If the taxpayer has made an election under § 1.167(a)-12(f)(1) for a taxable year ending before January 1, 1971, this amount shall be determined for such year in accordance with such election. For purposes of this determination, any method selected by the taxpayer which would have been permissible under section 167 for such taxable year, including accelerated methods, may be used. Any additional amount which would have been allowable by reason of section 179 (relating to additional first-year depreciation for small business) may be included provided such amount is reflected in the determination made under this paragraph in subsequent years.

(ii) If a deduction for depreciation has not been taken by the taxpayer in any taxable year under section 167 with respect to the facility—

(*a*) There is to be used the useful life and salvage value which would have been proper under section 167.

(*b*) Such useful life and salvage value is determined by taking into account for each taxable year the same facts and circumstances as would have been taken into account if the taxpayer had used such method throughout the period the property has been held, and

(c) The date the property is placed in service is, for purposes of this section, deemed to be the first day of the first month for which the amortization deduction is taken with respect to the facility under section 169.

If, prior to the date amortization begins under section 169, a deduction for depreciation has been taken by the taxpayer in any taxable year under section 167 with respect to the facility, the useful life, salvage value, etc., used for that purpose is deemed to be the appropriate useful life, salvage value, etc., for purposes of this paragraph, with such adjustments as are appropriate in light of the facts and circumstances which would have been taken into account since the time the last such depreciation deduction was taken, unless it is established by clear and convincing evidence that some other useful life, salvage value, or date the property is placed in service is more appropriate.

(iii) For purposes of section 57(a)(4) and this paragraph, if the deduction for amortization or depreciation which would have been allowable had no election been made under section 169 would have been—

(*a*) An amortization deduction based on the term of a leasehold or

(*b*) A depreciation deduction determined by reference to section 611,

such deduction is to be deemed to be a deduction allowable under section 167.

(iv) If a facility is subject to amortization under section 169 for less than the entire taxable year, the otherwise allowable depreciation deduction under section 167 shall be determined only with regard to that portion of the taxable year during which the election under section 169 is in effect.

(v) If less than the entire adjusted basis of a facility is subject to amortization under section 169, the otherwise allowable depreciation deduction under section 167 shall be determined only with regard to that portion of the adjusted basis subject to amortization under section 169.

(5) *No section 1245 and basis adjustment.* No adjustment is to be made as a result of the minimum tax either to the basis of a certified pollution control facility or with respect to computation under sections 1245.

(6) *Relationship to section 57(a)(3).* See paragraph (c)(3) with respect to an adjustment in the amount treated as amortization under that provision where both paragraphs (3) and (4) of section 57(a) are applicable to the same item of property.

(7) *Example.* The principles of this paragraph may be illustrated by the following example:

Example. A calendar year taxpayer has a certified pollution control facility on which an election is in effect under section 169 commencing with January 1, 1971. No part of the facility is section 1250 property. The original basis of the facility is $100,000 of which $75,000 constitutes amortizable basis. The useful life of the facility is 20 years. The taxpayer depreciates the $25,000 portion of the facility which is not amortizable basis under the double declining method and began taking depreciation on January 1, 1971.

(a) The taxpayer's 1971 item of tax preference under this paragraph would be determined as follows:

1. Amortization deduction	$15,000
2. Depreciation deduction on amortizable basis (double declining method)	7,500
1971 preference (excess of 1 over 2)	7,500

(b) If the taxpayer terminated his election under section 169 in 1972 effective as of July 1, 1972, the taxpayer's 1972 item of tax preference would be determined as follows:

1. Amortization deduction	$7,500
2. Depreciation deduction on amortizable basis:	
Full year ($75,000 (original basis) less $7,500 ("depreciation" to 1-1-72) equals adjusted basis of $67,500; multiplied by 0.10 (double declining rate))	6,750
Portion of full year's depreciation attributable to amortization period (one-half)	3,375
1972 preference (excess of 1 over 2)	4.125

(e) *Amortization of railroad rolling stock*—(1) *In general.* Section 57(a)(5) provides that, with respect to each unit of railroad rolling stock for which an election is in effect under section 184, there is to be included as an item of tax preference the amount by which the deduction allowable for the taxable year under such section exceeds the depreciation deduction which would otherwise be allowable under section 167. The determination under section 57(a)(5) is made with respect to each separate unit of rolling stock. Accordingly, where the amount of the depreciation deduction which would otherwise be allowable under section 167 with respect to one unit exceeds the allowable amortization deduction under section 184 with respect to such unit, such excess may not be used to offset an item of tax preference resulting from another unit.

(2) *Separate units of rolling stock.* The determination of what constitutes a separate unit of rolling stock must be made on the facts and circumstances of each individual case. Such determination shall be made in a manner consistent with the manner in which the comparable determination is made with respect to separate certified pollution control facilities under paragraph (d) (2) of this section.

(3) *Amount allowable under section 184.* For purposes of the determination of the amount of the deduction allowable under section 184, see section 184. Such amount, however, does not include amortization allowable in

the year in which the rolling stock is disposed of.

(4) *Otherwise allowable deduction.* The determination of the amount of the depreciation deduction otherwise allowable under section 167 is to be made in a manner consistent with the manner in which the comparable deduction with respect to certified pollution control facilities is determined under paragraph (d)(4) of this section.

(5) *No section 1245 or basis adjustment.* No adjustment is to be made as a result of the minimum tax either to the basis of a unit of railroad rolling stock or with respect to computations under section 1245.

(6) *Relationship to section 57(a)(3).* See paragraph (c)(3) of this section with respect to an adjustment in the amount treated as amortization under that provision where both paragraphs (3) and (5) of section 57(a) are applicable to the same item.

(f) *Stock options*—(1) *In general.* Section 57(a)(6) provides that with respect to each transfer of a share of stock pursuant to the exercise of a qualified stock option or a restricted stock option, there shall be included by the transferee as an item of tax preference the amount by which the fair market value of the share at the time of exercise exceeds the option price. The stock option item of tax preference is subject to tax under section 56(a) in the taxable year of the transferee in which the transfer is made.

(2) *Definitions.* See generally § 1.421–7 (e), (f), and (g) for the definitions of "option price," "exercise," and "transfer," respectively; however, in the case of a transfer of a share of stock pursuant to the exercise of a qualified stock option or a restricted stock option after the death of an employee by the estate of the decedent (or by a person who acquired the right to exercise such option by bequest or inheritance or by reason of the death of the decedent), the term "option price" shall, for purposes of this paragraph, include both the consideration paid by the estate (or such person) for such share of stock and so much of the basis of the option as is attributable to such share of stock. For the definition of a qualified stock option see section 422(b) and § 1.422–2. For the definition of a restricted stock option see section 424(b) and § 1.424–2. The definitions and special rules contained in section 425 and the regulations thereunder are applicable to this paragraph.

(3) *Fair market value.* In accordance with the principles of section 83(a)(1), the fair market value of a share of stock received pursuant to he exercise of a qualified or restricted stock option is to be determined without regard to restrictions (other than nonlapse restrictions within the meaning of § 1.83-3(h)). Notwithstanding any valuation date given in section 83(a)(1), for purposes of this section, fair market value is determined as of the date the option is exercised.

(4) *Foreign source options.* In the case of an option attributable to sources within any foreign country or possession, see section 58(g) and § 1.58–8.

(5) *Inapplicability in certain cases.* (i) Section 57(a)(6) is inapplicable if during the same taxable year in which stock is transferred pursuant to the exercise of an option, the transferee makes a disposition (within the meaning of section 425(c)) of such stock. In the case of a nonresident alien, section 57(a)(6) is inapplicable to the extent the stock option is attributable (in accordance with the principles of sections 861 through 863 and the regulations thereunder) to sources without the United States.

(ii) Section 57(a)(6) is inapplicable if section 421(a) does not apply to the transfer because of employment requirements of section 422(a)(2) or section 424(a)(2).

(6) *Proportionate applicability.* Where, by reason of section 422 (b)(7) and (c)(3) (relating to percentage ownership limitations), only a portion of a transfer qualifies for application of section 421, the fair market value and option price shall be determined only with regard to that portion of the transfer which so qualifies.

(7) *No basis adjustment.* No adjustment shall be made to the basis of the stock received pursuant to the exercise of a qualified or restricted stock option as a result of the minimum tax.

(g) *Reserves for losses on bad debts of financial institutions*—(1) *In general.* Section 57(a)(7) provides that, in the case of a financial institution to which sections 585 or 593 (both relating to reserves for losses on loans) applies, there shall be included as an item of tax preference the amount by which the deduction allowable for the taxable year for a reasonable addition to a reserve for bad debts exceeds the amount that would have been allowable had the institution maintained its bad debt reserve for all taxable years on the basis of the institution's actual experience.

(2) *Taxpayers covered.* Section 57(a)(7) applies only to an institution (or organization) to which section 585 or 593 applies. See sections 585(a) and 593(a) and the regulations thereunder for a description of those institutions.

(3) *Allowable deduction.* For purposes of this paragraph, the amount of the deduction allowable for the taxable year for a reasonable addition to a reserve for bad debts is the amount of the deduction allowed under section 166(c) by reference to sections 585 or 593.

(4) *Actual experience.* (i) For purposes of this paragraph, the determination of the amount which would have been allowable had the institution maintained its reserve for bad debts on the basis of actual experience is the amount determined under section 585(b)(3)(A) and the regulations thereunder. For this purpose, the beginning balance for the first taxable year ending in 1970 is the amount which bears the same ratio to loans outstanding at the beginning of the taxable year as (*a*) the total bad debts sustained during the 5 preceding taxable years, adjusted for recoveries of bad debts during such period, bears to (*b*) the sum of the loans outstanding at the close of such 5 taxable years. The taxpayer may, however, select a more appropriate balance based on its actual experience during a shorter period subject to the approval of the district director upon examination of the return provided there are unusual circumstances which indicate that such period is more indicative of the taxpayer's actual loss experience. Any such selection and approval shall be made in a manner consistent with the selection and approval of a bad debt reserve method under § 1.166–1(b). In the case of an institution which has been in existence for less than 5 taxable years as of the beginning of the first taxable year ending in 1970, the above formula for determining the beginning balance is applied by substituting the number of taxable years for which the institution has been in existence as of the beginning of the taxable year for "5" each time it appears. If any taxable year utilized in the above formula for determining the beginning balance is a short taxable year the amount of the bad debts, adjusted for recoveries, for such taxable year is modified by dividing such amount by the number of days in the taxable year and multiplying the resulting amount by 365. The beginning balance for any subsequent taxable year is the amount of the beginning balance of the preceding taxable year, decreased by bad debt losses during such year, increased by recoveries of bad debts during such year and increased by the lower of the maximum amount determined under section 585(b)(3)(A) for such year or the amount of the deduction allowed for such year. The application of this subdivision (i) may be illustrated by the following example:

Example. The Y Bank, a calendar year taxpayer, uses the reserve method of accounting for bad debts. On December 31, 1969, Y determines the balance of its reserve for bad debts to be $70,000 under the percentage method. On the same date Y's 5-year moving average is $52,000. Y incurs net bad debt losses (bad debt losses less recoveries of bad debts) of $3,000 for each of the years 1970, 1971, and 1972, which it charges to its reserve for bad debts. Y's 6-year moving averages computed under section 585(b)(3)(A) at the close of 1970, 1971, and 1972 are $50,000, $49,000, and $51,000, respectively. Y's preference items are computed as follows based upon additional facts assumed:

	1970	1971	1972
1. Bad debt reserve—percentage method:			
(a) Balance beginning of year (closing balance prior year)	$70,000	$70,000	$68,000
(b) Net bad debts charged to reserve	3,000	3,000	3,000
(c) Subtotal	67,000	67,000	65,000
(d) Deduction allowed	3,000	1,000	4,000
(e) Balance end of year	70,000	68,000	69,000
2. Bad debt reserve—"actual experience":			
(a) Beginning balance (for 1970, 5-year moving average; for other years, closing balance prior year)	52,000	50,000	48,000
(b) Net bad debts charged to reserve	3,000	3,000	3,000
(c) Subtotal	49,000	47,000	45,000
(d) Maximum amount under section 585 (b)(3)(A) (6-year moving average minus (c))	1,000	2,000	6,000
(e) Deduction allowed (line 1(d))	3,000	1,000	4,000
(f) Lower of (d) or (e)	1,000	1,000	4,000
(g) Closing balance (line (c) + (f))	50,000	48,000	49,000
3. Preference item under section 57(a)(7):			
(a) Deduction allowed	3,000	1,000	4,000
(b) Maximum amount under section 585(b)(3)(A)	1,000	2,000	6,000
(c) Preference item (excess of (a) over (b))	2,000	0	0

(ii) In the case of a new institution whose first taxable year ends after 1969, its beginning balance for its reserve for bad debts, for purposes of this paragraph, is zero and its reasonable addition to the reserve for such taxable year is determined on the basis of the actual experience of similar institutions located in the area served by the taxpayer.

(h) *Depletion*—(1) *In general.* Section 57(a)(8) provides that with respect to each property (as defined in section 614), there is to be included as an item of tax preference the amount by which the deduction allowable for the taxable year under section 611 for depletion for the property exceeds the adjusted basis of the property at the end of the taxable year (determined without regard to the depletion deduction for that taxable year). The determination under section 57(a)(8) is made with respect to each separate property. Thus, for example, if one mineral property has an adjusted basis remaining at the end of the taxable year, such basis may not be used to reduce the amount of an item of tax preference resulting from another mineral property.

(2) *Allowable depletion.* For the determination of the amount of the deduction for depletion allowable for the taxable year see section 611 and the regulations thereunder.

(3) *Adjusted basis.* For the determination of the adjusted basis of the property at the end of the taxable year see section 1016 and the regulations thereunder.

(4) *No basis adjustment.* No adjustment is to be made to the basis of property subject to depletion as a result of the minimum tax.

(i) *Capital gains*—(1) *Taxpayers other than corporations.* Section 57(a)(9)(A) provides that, in the case of a taxpayer other than a corporation, there is to be included as an item of tax preference one-half of the amount by which the taxpayer's net long-term capital gain for the taxable year exceeds the taxpayer's net short-term capital loss for the taxable year. For this purpose, for taxable years beginning after December 31, 1971, the taxpayer's net long-term capital gain does not include an amount equal to the deduction allowable under section 163 (relating to interest expense) by reason of subsection (d)(1)(C) of that section, and the excess described in the preceding sentence is reduced by an amount equal to the reduction of disallowed interest expense by reason of section 163(d)(2)(B). Furthermore, the net long-term capital gain of an estate or trust does not include capital gains described in section 642(c)(4). Included in the computation of the taxpayer's capital gains item of tax preference are amounts reportable by the taxpayer as distributive shares of gain or loss from partnerships, estates or trusts, electing small business corporations, common trust funds, etc. See section 58 and the regulations thereunder with respect to the above entities.

Example. For 1971, A, a calendar year individual taxpayer, recognized $50,000 from the sale of securities held for more than 6 months. In addition, A received a $15,000 dividend from X Fund, a regulated investment company, $12,000 of which was designated as a capital gain dividend by the company pursuant to section 852(b)(3)(C). The AB partnership recognized a gain of $20,000 from the sale of section 1231 property held by the partnership. The AB partnership agreement provides that A is entitled to 50 percent of the income and gains of the partnership. A had net short-term capital loss for the year of $10,000. A's 1971 capital gains item of tax preference is computed as follows:

Capital gain recognized from securities	$50,000
Capital gain dividend from regulated investment company	12,000
Distributive share of partnership capital gain	10,000
Total net long-term capital gain	72,000
Less: net short-term capital loss	(10,000)
Excess of net long-term capital gain over net short-term capital loss	62,000
One-half of above excess	31,000

(2) *Corporations.* (i) Section 57(a)(9)(B) provides that in the case of corporations there is to be included as an item of tax preference with respect to a corporation's net section 1201 gain an amount equal to the product obtained by multiplying the excess of the net long-term capital gain over the net short-term capital loss by a fraction. The numerator of this fraction is the sum of the normal tax rate and the surtax rate under section 11 minus the alternative tax rate under section 1201(a) for the taxable year, and the denominator of the fraction is the sum of the normal tax rate and the surtax rate under section 11 for the taxable year. Included in the above computation are amounts reportable by the taxpayer as distributive shares of gain or loss from partnerships, estates or trusts, common trust funds, etc. In certain cases the amount of the net section 1201 gain which results in preferential treatment will be less than the amount determined by application of the statutory formula. Therefore, in lieu of the statutory formula, the capital gains item of tax preference for corporations may in all cases be determined by dividing—

(*a*) The amount of tax which would have been imposed under section 11 if section 1201(a) did not apply minus—

(*b*) The amount of the taxes actually imposed

by the sum of the normal tax rate plus the surtax rate under section 11. In case of foreign source capital gains and losses which are not taken into ac-

count pursuant to sections 58(g)(2)(B) and 1.58-8, the amount determined in the preceding sentence shall be multiplied by a fraction the numerator of which is the corporation's net section 1201 gain without regard to such gains and losses which are not taken into account and the denominator of which is the corporation's net section 1201 gain. The computation of the corporate capital gains item of tax preference may be illustrated by the following examples:

Example (1). For 1971, A, a calendar year corporate taxpayer, has ordinary income of $10,000 and net section 1201 gain of $50,000, none of which is subsection (d) gain (as defined in sec. 1201(d)) and none of which is attributable to foreign sources. A's 1971 capital gain item of tax preference may be computed as follows:

1. Tax under section 11:		
Normal tax (0.22×$60,000)		$13,200
Surtax (0.26×$35,000)		9,100
		22,300
2. Tax under section 1201(a) Normal tax on ordinary income (0.22×$10,000	$2,200	
Tax on net section 1201 gain (0.30×$50,000)	15,000	17,200
3. Excess		5,100
4. Normal tax rate plus surtax rate		.48
5. Capital gains preference (line 3 divided by line 4)		10,625

Example (2). For 1971, A, a calendar year corporate taxpayer, has a loss from operations of $30,000 and net section 1201 gain of $150,000, none of which is subsection (d) gain (as defined in sec. 1201(d)) and none of which is attributable to foreign sources. A's 1971 capital gain item of tax preference may be computed as follows:

1. Tax under section 11:		
Normal tax (0.22×$120,000)		$26,400
Surtax (0.26×$95,000)		24,700
		51,100
2. Tax under section 1201(a) Normal tax on ordinary income	None	
Tax on net section 1201 gain (0.30×$150,000)	45,000	45,000
3. Excess		6,100
4. Normal tax rate plus surtax rate		.48
5. Capital gain preference (line 3 divided by line 4)		12,708

(ii) In the case of organizations subject to the tax imposed by section 511(a), mutual savings banks conducting a life insurance business (see sec. 594), life insurance companies (as defined in sec. 801), mutual insurance companies to which part II of subchapter L applies, insurance companies to which part III of subchapter L applies, regulated investment companies subject to tax under part I of subchapter M, real estate investment trusts subject to tax under part II of subchapter M, or any other corporation not subject to the taxes imposed by sections 11 and 1201(a), the capital gains item of tax preference may be computed in accordance with subdivision (i) of this subparagraph except that, in lieu of references to section 11, there is to be substituted the section which imposes the tax comparable to the tax imposed by section 11 and, in lieu of references to section 1201(a), there is to be substituted the section which imposes the alternative or special tax applicable to the capital gains of such corporation.

(iii) For purposes of this paragraph, where the net section 1201 gain is not in any event subject to the tax comparable to the normal tax and the surtax under section 11, such as in the case of regulated investment companies subject to tax under subchapter M, such comparable tax shall be computed as if it were applicable to net section 1201 gain to the extent such gain is subject to the tax comparable to the alternative tax under section 1201(a). Thus, in the case of a regulated investment company subject to tax under subchapter M, the tax comparable to the normal tax and the surtax would be the tax computed under section 852(b)(1) determined as if the amount subject to tax under section 852(b)(3) were included in investment company taxable income. The principles of this subdivision (iii) may be illustrated by the following example:

Example. M, a calendar year regulated investment company, in 1971, has investment company taxable income (subject to tax under sec. 852(b)(1)) of $125,000 and net long-term capital gain of $800,000. M company has no net short-term capital loss but has a deduction for dividends paid (determined with reference to capital gains only) of $700,000. M's 1971 capital gains item of tax preference is computed as follows:

1. Section 852(b)(1) tax computed as if it were applicable to all income including capital gains:			
Amount subject to section 852(b)(1)		$125,000	
Net section 1201 gain	$800,000		
Less: Dividends paid deduction	700,000		
Net section 1201 gain subject to tax at the company level		100,000	
		225,000	
Normal tax (0.22×$225,000)			$49,500
Surtax (0.26×200,000)			52,000
			101,500
2. Tax comparable to section 1201(a) tax section 852(b)(1) tax:			
Normal tax (0.22×125,000)	$27,500		
Surtax (0.26×100,000)	26,000	$53,500	
Section 852(b)(3) tax (0.30×100,000)		30,000	
			$83,500
3. Excess			18,000
4. Normal tax rate plus surtax rate			.48
5. Capital gains preference (line 3 divided by line 4)			37,500

(iv) For the computation of the capital gains item of tax preference in the case of an electing small business corporation (as defined in sec. 1371(b)), see section 1.58-4(c).

(3) *Nonresident aliens, foreign corporations.* In the case of a nonresident alien individual or foreign corporation, there shall be included in computing the capital gains item of tax preference under section 57(a)(9) only those capital gains and losses included in the computation of income effectively connected with the conduct of a trade or business within the United States as provided in section 871(b) or 882.

§ 1.57-2 [Reserved]

§ 1.57-3 [Reserved]

§ 1.57-4 Limitation on amounts treated as items of tax preference for taxable years beginning before January 1, 1976.

(a) *In general.* If in any taxable year beginning before January 1, 1976, a taxpayer has deductions in excess of gross income and all or a part of any item of tax preference described in § 1.57-1 results in no tax benefit due to modifications required under section 172(c) or section 172(b)(2) in computing the amount of the net operating loss or the net operating loss to be carried to a succeeding taxable year, then, for purposes of section 56(a)(1), the sum of the items of tax preference determined under section 57(a) (and § 1.57-1) is to be limited as provided in paragraph (b) of this section.

(b) *Limitation.* The sum of the items of tax preference, for purposes of section 56(a)(1) and § 1.56-1(a), is limited to an amount determined under subparagraphs (1) and (2) of this paragraph.

(1) *Loss year.* If the taxpayer has no taxable income for the taxable year without regard to the net operating loss deduction, the amount of the limitation is equal to—

(i) In cases where the taxpayer does not have a net operating loss for the taxable year, the amount of the recomputed income (as defined in paragraph (c) of this section) or

(ii) In cases where the taxpayer has a net operating loss for the taxable year, the amount of the net operating loss (expressed as a positive amount) increased by the recomputed income or decreased by the recomputed loss for the taxable year (as defined in paragraph (c) of this section,

plus the amount of the taxpayer's stock option item of tax preference (as described in § 1.57-1(f)).

(2) *Loss carryover and carryback years.* Except in cases to which subparagraph (1)(ii) of this paragraph applies, if, in any taxable year to which a net operating loss is carried, a capital gains deduction is disallowed under section 172(b)(2) in computing the amount of such net operating loss, which may be carried to succeeding taxable years, the amount of the limitation is equal to the amount, if any, by which the sum of the items of tax preference (computed with regard to subparagraph (1)(i) of this paragraph) exceeds the lesser of—

(i) The amount by which such loss is reduced because of a disallowance of the capital gains deduction in such taxable year, or

(ii) The capital gains deduction.

The amount determined pursuant to the preceding sentence shall be increased by the amount, if any, that such reduction is attributable to that portion of such a net operating loss described in section 56(b)(1)(B) and § 1.56-2(a)(2) (relating to excess tax preferences).

(c) *Recomputed income or loss.* For purposes of this section, the phrase "recomputed income or loss" means the taxable income or net operating loss for the taxable year computed without regard to the amounts described in § 1.57-1 except paragraph (i)(2) of that section (relating to corporate capital gains) and without regard to the net operating loss deduction. For this purpose, the reference to the amounts described in § 1.57-1 is a reference to that portion of the deduction allowable in computing taxable income under the appropriate section equal to the amount which is determined in each paragraph of § 1.57-1. For example, the amount described in § 1.57-1(h) (relating to excess of percentage depletion over basis) is that portion of the deduction allowable for depletion under section 611 which is equal to the amount determined under § 1.57-1(h). For purposes of this paragraph, the amount described in § 1.57-1(i)(1) (relating to capital gains) is to be considered as the amount of the deduction allowable for the taxable year under section 1202.

(d) *Determination of preferences reduced.* When, pursuant to paragraph (b)(1) of this section, the sum of the items of tax preference (determined without regard to this section) are reduced, such reduction is first considered to be from the capital gains item of tax preference (described in § 1.57-1(i)(1)) and each item of tax preference relating to a deduction disallowed in computing the net operating loss pursuant to section 172(d), pro rata. The balance of the reduction, if any, is considered to be from the remaining items of tax preference, pro rata. For purposes of this subparagraph, deductions not attributable to the taxpayer's trade or business which do not relate to items of tax preference are considered as being applied in reducing gross income not derived from such trade or business before such deductions which do relate to items of tax preferences.

(e) *Examples.* The principles of this section may be illustrated by the following examples in each of which the deduction for the personal exemption is disregarded and the taxpayer is an individual who is a calendar year taxpayer.

Example (1). The taxpayer has the following items of income and deduction for 1970:

Gross income (all business income)	$120,000
Deductions:	
Nonbusiness deductions	30,000
Items of tax preference (excess accelerated depreciation on real property held in taxpayer's business)	80,000
Other business deductions	50,000

Based on the above figures, the taxpayer has a net operating loss of $10,000 (business deductions of $130,000 less business income of $120,000, the nonbusiness deductions having been disallowed by reason of section 172(d)(4)). The limitation on the amount treated as items of tax preference is computed as follows:

Tax preferences			$80,000
Net operating loss		$10,000	
Recomputed income or loss:			
Gross income	$120,000		
Deductions other than tax preference items	80,000		
Recomputed income		40,000	
Sum of net operating loss and recomputed income		50,000	
Stock options preference		0	
Limitation			50,000

Thus, the minimum tax computed under section 56(a) would be 10 percent of $20,000 (items of tax preference of $50,000 less the minimum tax exemption of $30,000), $1,000 of which would be deferred tax liability pursuant to section 56(b).

Example (2). Assume the same facts as in example (1) except that the other business deductions are $130,000, resulting in a net operating loss of $90,000. The limitation on the amount treated as items of tax preference is computed as follows:

Tax preferences			$80,000
Net operating loss		$90,000	
Recomputed income or loss:			
Gross income	$120,000		
Deductions other than tax preference items	160,000		
	(40,000)		
Disallowance of nonbusiness deductions under sec. 172(d)	30,000		
Recomputed loss		10,000	
Net operating loss less recomputed loss		80,000	
Stock options preference		0	
Limitation			80,000

Thus, the minimum tax computed under section 56(a) would be 10 percent of $50,000 (items of tax preference of $80,000 less the minimum tax exemption of $30,000), all of which will be deferred tax liability pursuant to section 56(b).

Example (3). The taxpayer has the following items of income and deduction for 1970:

Gross income (all from business):			
Ordinary			$50,000
Net section 1201 gains			120,000
Deductions:			
Items of tax preference:			
Excess amortization of certified pollution control facilities		$45,000	
Capital gains deduction		60,000	105,000
Other business deductions			75,000

In addition, the taxpayer has a $55,000 item of tax preference resulting from qualified stock options. Based on the above figures, the taxpayer has no taxable income and no net operating loss as the capital gains deduction is dissallowed in determining the net operating loss pursuant to section 172(d). The limitation on the amount treated as items of tax preference is computed as follows:

Tax preferences		$160,000
Net operating loss		0
Recomputed income or loss:		
Gross income	$170,000	
Deductions other than tax preference items	75,000	
Recomputed income	$95,000	
Plus: Stock options preference	55,000	
Limitation		150,000

Thus, the minimum tax computed under section 56 would be 10 percent of $120,000 (items of tax preference of $150,000 less the minimum tax exemption of $30,000).

Example (4). Assume the same facts as in example (3) except that the taxpayer has a net operating loss carryover from 1969 of $80,000. The taxpayer has $160,000 of tax preferences which are limited to $150,000 pursuant to § 1.57-4(b)(1). In order to determine the amount of the 1969 net operating loss which remains as a carryover to 1971, the 1970 taxable income is redetermined in accordance with section 172(b)(2) and the regulations thereunder, as follows:

Gross income—1970		$170,000
Deductions:		
Capital gains deduction disallowed Business deductions	$120,000	120,000
Taxable income for section 172(b)(2)		50,000

Thus, the 1969 net operating loss which remains as a carryover to 1971 is $30,000. Pursuant to paragraph (b)(2) of this section, the limitation on the amount treated as items of tax preference is computed as follows:

Items of tax preference computed with regard to § 1.57-4(b)(1) (per example (3))		$150,000
Less: Lesser of capital gains deduction ($60,000) or amount of reduction in carryover due to its disallowance ($50,000)		50,000
Limitation		100,000

Thus, the minimum tax computed under section 56 would be 10 percent of $70,000 (items of tax preference of $100,000 less the minimum tax exemption of $30,000).

Example (5). The taxpayer has the following items of income and deduction for the taxable year 1970 without regard to any net operating loss deduction:

Gross income (all from business)		
Ordinary	$50,000	
Net section 1201 gain	40,000	$90,000
Deductions:		
Capital gains deduction	20,000	
Medical expenses ($4,100 actually paid but allowable only to the extent in excess of 3 percent of adjusted gross income of $70,000).	2,000	
Other itemized deductions	40,000	62,000
Taxable income (before net operating loss deduction)		28,000

In addition, the taxpayer has an item of tax preference of $35,000 resulting from qualified stock options. In 1973, the taxpayer has a net operating loss of $60,000 (no portion of which is attributable to excess tax preferences pursuant to § 1.56-2) which is carried back to 1970 resulting in no taxable income in 1970. In order to determine the amount of the 1973 net operating loss which remains as a carryover to 1971, the 1970 taxable income is redetermined, in accordance with section 172(b)(2) and the regulations thereunder, as follows:

Gross income		$90,000
Deductions:		
Capital gains deduction disallowed		
Medical expenses ($4,100 actually paid but allowable only to the extent in excess of 3 percent of adjusted gross income of $90,000).	$1,400	
Other itemized deductions	40,000	$41,400
Taxable income for section 172(b)(2)		48,600

The limitation on the amount treated as items of tax preference is computed as follows:

Items of tax preference:		
Capital gains	$20,000	
Stock options	35,000	55,000
Less:		
Lesser of capital gains deduction ($20,000) or amount of reduction in carryover due to its disallowance ($20,600)		(20,000)
Limitation		35,000

Thus, the minimum tax for 1970 under section 56 would be 10 percent of $5,000 (items of tax preference of $35,000 less the minimum tax exemption of $30,000).

Example (6). Assume the same facts as in example (5) except that the 1973 net operating loss was $45,000. In this case, the $20,600 increase in the 1970 taxable income as redetermined, results in a decrease of $17,000 (i.e., the remaining 1973 net operating loss after an initial decrease of $28,000 resulting from the 1970 taxable income before redetermination). The limitation on the amount treated as items of tax preference is computed as follows:

Items of tax preference computed without regard to this section		$55,000
Less: Lesser of capital gains deduction ($20,000) or amount of reduction in carryover due to its disallowance ($17,000)		(17,000)
Limitation		38,000

Thus, the minimum tax for 1970 under section 56 would be 10 percent of $8,000 (items of tax preference of $38,000 less the minimum tax exemption of $30,000).

Example (7). The taxpayer has the following items of income and deduction for 1973 without regard to any net operating loss deduction:

Gross income (all from business):		
Ordinary	$100,000	
Net section 1201 gains	120,000	$220,000
Deductions:		
Items of tax preference:		
Excess amortization of certified pollution control facilities	45,000	
Capital gains deduction	60,000	
	105,000	
Other business deductions	75,000	$180,000
Taxable income (before net operating loss deduction)		40,000

In 1972, the taxpayer had a net operating loss of $70,000 which is carried forward to 1973; $20,000 of this net operating loss is attributable to excess tax preferences. In order to determine the amount of the 1972 net operating loss which remains as a carryover to 1974, the 1973 taxable income is redetermined, in accordance with section 172(b)(2) and the regulations thereunder, as follows:

Gross income	$220,000
Deductions:	
Capital gains deduction	disallowed
Business deductions	120,000
Taxable income per sec. 172(b)(2)	100,000

In this case, the $60,000 increase in the 1972 taxable income as redetermined and the $30,000 decrease in the amount of the 1973 net operating loss remaining as a carryover to 1974 (i.e., the remaining 1972 net operating loss after an initial decrease of $40,000 resulting from the 1973 taxable income before redetermination) is entirely attributable to the disallowance of the capital gains deduction. The limitation on the amount treated as items of tax preference is computed as follows:

Items of tax preference computed without regard to this section:		
Capital gains	$60,000	
Excess amortization of certified pollution control facilities	45,000	
	105,000	
Less: Lesser of capital gains deduction (60,000) or amount of reduction in carryover due to its disallowance ($30,000)		(30,000)
		75,000
Plus: Amount of reduction of carryover (due to disallowance of capital gains deduction) attributable to excess tax preferences		20,000
Limitation		95,000

§ 1.57-5 Records to be kept.

(a) *In general.* The taxpayer shall have available permanent records of all the facts necessary to determine with reasonable accuracy the amounts described in § 1.57-1. Such records shall include:

(1) In the case of amounts described in paragraph (a) of § 1.57-1: the amount and nature of indebtedness outstanding for the taxable year and the date or dates on which each such indebtedness was incurred or renewed in any form; the amount expended for property held for investment during any taxable year during which such indebtedness was incurred or renewed; and the manner in which it was determined that property was or was not held for investment.

(2) In the case of amounts described in paragraphs (b), (c), (d), (e), and (h) of § 1.57-1:

(i) The dates, and manner in which, the property was acquired and placed in service,

(ii) The taxpayer's basis on the date the property was acquired and the manner in which the basis was determined,

(iii) An estimate of the useful life (in terms of months, hours of use, etc., whichever is appropriate) of the property on the date placed in service or an estimate of the number of units to be produced by the property on the date the property is placed in service, whichever is appropriate, and the manner in which such estimate was determined,

(iv) The amount and date of all adjustments by the taxpayer to the basis of the property and an explanation of the nature of such adjustments, and

(v) In the case of property which has an adjusted basis reflecting adjustments taken by another taxpayer with respect to the property or taken by the taxpayer with respect to other property, the information described in subdivisions (i) through (iv) above, with respect to such other property or other taxpayer.

(3) In the case of amounts described in paragraph (f) of § 1.57-1, the fair market value of the shares of stock at the date of exercise of the option and the option price and the manner in which each was determined.

(4) In the case of amounts described in paragraph (g) of § 1.57-1, the amount of debts written off and the amount of the loans outstanding for the taxable year and the 5 preceding taxable years or such shorter or longer period as is appropriate.

(b) *Net operating losses.* The taxpayer shall have available permanent records for the first taxable year in which a portion of a net operating loss was attributable to items of tax preference (within the meaning of § 1.56-2 (b)) and each succeeding taxable year in which there is a net operating loss or a net operating loss carryover a portion of which is so attributable. Such records shall include all the facts necessary to determine with reasonable accuracy the amount of deferred tax liability under section 56, including the amount of the net operating loss in each taxable year in which there are items of tax preference in excess of the minimum tax exemption (as determined under § 1.58-1), the amount of the items of tax preference for each such taxable year, the amount by which each such net operating loss reduces taxable income in any taxable year, and the amount by which each such net operating loss is reduced in any taxable year.

§ 1.58-1 Minimum tax exemption.

(a) *In general.* For purposes of the minimum tax for tax preferences (subtitle A, chapter 1A, part VI), the minimum tax exemption is $30,000 except as otherwise provided in this section.

(b) *Husband and wife.* In the case of a married individual filing a separate return, section 58(a) provides that the minimum tax exemption is $15,000. This rule applies without regard to whether the married individual is living together with or apart from his spouse and without regard to whether or not his spouse has any items of tax preference.

(c) *Members of controlled groups*—(1) *Amount of exemption*—(i) *General rule.* Under section 58(b), if a corporation is a component member of a controlled group of corporations on December 31 (as defined in section 1563 (a) and (b) and the regulations thereunder), the minimum tax exemption for such taxable year which includes such December 31 is an amount equal to—

(*a*) $30,000 divided by the number of corporations which are component members of such group on December 31, or

(*b*) If an apportionment plan is adopted under subparagraph (3) of this paragraph, such portion of the $30,000 as is apportioned to such member in accordance with such plan.

(ii) *Consolidated returns.* The minimum tax exemption of a controlled group all of whose component members join in the filing of a consolidated return is $30,000. If there are component members of the controlled group which do not join in the filing of a consolidated return, and there is no apportionment plan effective under subparagraph (3) of this paragraph apportioning the $30,000 amoung the component members filing the consolidated return and the other component members of the controlled group, each component member of the controlled group (including each component member which joins in filing the consolidated return) is treated as a separate corporation for purposes of equally apportioning the $30,000 amount under subdivision (i)(*a*) of this subparagraph. In such case, the minimum tax exemption of the corporations filing the consolidated return is the sum of the amounts apportioned to each component member which joins in the filing of the consolidated return.

(2) *Certain short taxable years.* If the return of a corporation is for a short period which does not include a December 31, and such corporation is a component member of a controlled group of corporations with respect to such short period, the minimum tax exemption of such corporation for such short period is an amount equal to $30,000 divided by the number of corporations which are component members of such group on the last day of such short period. The minimum tax exemption so determined is also subject to the rules of section 443(d) (relating to reduction in the amount of the exemption for short periods) and the regulations thereunder. For purposes of this subparagraph, the term "short period" does not include any period if the income for such period is required to be included in a consolidated return under § 1.1502-76(b). The determination of whether a corporation is a component member of a controlled group of corporations on the last day of a short period is made by applying the definition of "component member" contained in section 1563(b) and § 1.1563-1 as if the last day of such short period were a December 31.

(3) *Apportionment of minimum tax exemption*—(i) *Apportionment plan.* (*a*) (In general.) In the case of corporations which are component members of a controlled group of corporations on a December 31, a single minimum tax exemption may be apportioned among such members if all such members consent, in the manner provided in subdivision (ii) of this subparagraph, to an apportionment plan with respect to such December 31. Such plan must provide for the apportionment of a fixed dollar amount to one or more of such members, but in no event may the sum of the amount so apportioned exceed $30,000. An apportionment plan is not considered as adopted with respect to a particular December 31 until each component member which is required to consent to the plan under subdivision (ii)(*a*) of this subparagraph files the original of a statement described in such subdivision (or, the original of a statement incorporating its consent is filed on its behalf). In the case of a return filed before a plan is adopted, the minimum tax exemption for purposes of such return is to be equally apportioned in

V 43 177

accordance with subparagraph (1) of this paragraph. If a valid apportionment plan is adopted after the return is filed and within the time prescribed in (*b*) of this subdivision (i), such return must be amended (or a claim for refund should be made) to reflect the change from equal apportionment.

(*b*) (Time for adopting plan.) A controlled group may adopt an apportionment plan with respect to a particular December 31 only if, at the time such plan is sought to be adopted, there is at least 1 year remaining in the statutory period (including any extensions thereof) for the assessment of the deficiency against any corporation the tax liability of which would be increased by the adoption of such plan. If there is less than 1 year remaining with respect to any such corporation, the district director or the director of the service center with whom such corporation files its income tax return will ordinarily, upon request, enter into an agreement to extend such statutory period for the limited purpose of assessing any deficiency against such corporation attributable to the adoption of such apportionment plan.

(c) (Years for which effective.) (*1*) The amount apportioned to a component member of a controlled group of corporations in an apportionment plan adopted with respect to a particular December 31 constitutes such member's minimum tax exemption for its taxable year including the particular December 31, and for all taxable years including succeeding December 31's, unless the apportionment plan is amended in accordance with subdivision (iii) of this subparagraph or is terminated under (c)(*2*) of this subdivision (i). Thus, the apportionment plan (including any amendments thereof) has a continuing effect and need not be renewed annually.

(*2*) If an apportionment plan is adopted with respect to a particular December 31, such plan terminates with respect to a succeeding December 31, if: the controlled group goes out of existence with respect to such succeeding December 31 within the meaning of paragraph (b) of § 1.1562-5, any corporation which was a component member of such group on the particular December 31 is not a component member of such group on such succeeding December 31, or any corporation which was not a component member of such group on the particular December 31 is a component member of such group on such succeeding December 31. An apportionment plan, once terminated with respect to a December 31, is no longer effective. Accordingly, unless a new apportionment plan is adopted, the minimum tax exemption of the component members of the controlled group for their taxable years which include such December 31 and all December 31's thereafter will be determined under subparagraph (1) of this paragraph.

(*3*) If an apportionment plan is terminated with respect to a particular December 31 by reason of the addition or withdrawal of a component member, each corporation which is a component member of the controlled group on such particular December 31 must, on or before the date it files its income tax return for the taxable year which includes such particular December 31, notify the district director or the director of the service center with whom it files such return to such termination. If an apportionment plan is terminated with respect to a particular December 31 by reason of the controlled group going out of existence, each corporation which was a component member of the controlled group on the preceding December 31 must, on or before the date it files its income tax return for the taxable year which includes such particular December 31, notify the district director or the director of the service center with whom it files such return to such termination.

(ii) *Consents to plan—(a) General rule.* (*1*) The consent of a component member (other than a wholly-owned subsidiary) to an apportionment plan with respect to a particular December 31 is to be made by means of a statement, signed by any person who is duly authorized to act on behalf of the consenting member, stating that such member consents to the apportionment plan with respect to such December 31. The statement must set forth the name, address, taxpayer identification number, and taxable year of the consenting component member, the amount apportioned to such member under the plan, and the internal revenue district or service center where the original of the statement is to be filed. The consent of more than one component member may be incorporated in a single statment. The original of a statement of consent is to be filed with he district director or the director of the service center with whom the component member of the group on such December 31 which has the taxable year ending first on or after such date filed its return for such taxable year. If two or more component members have the same such taxable year, a statement of consent may be filed with the district director or the director of the service center with whom the return for any such taxable year is filed. The original of a statement of consent is to have attached thereto information (referred to in this subdivision as "group identification") setting forth the name, address, taxpayer identification number, and taxable year of each component member of the controlled group on such December 31 (including wholly-owned subsidiaries) and the amount apportioned to each such member under the plan. If more than one original statement is filed, a statement may incorporate the group identification by reference to the name, address, taxpayer identification number, and taxable year of the component member of the group which has attached such group identification to the original of its statement.

(*2*) Each component member of the group on such December 31 (other than wholly-owned subsidiaries) must attach a copy of its consent (or a copy of the statement incorporating its consent) to the income tax return, amended return, or claim for refund filed with its district director or director of the service center for the taxable year including such date. Such copy must either have attached thereto information on group identification or must incorporate such information by reference to the name, address, taxpayer identification number, and taxable year of the component member of the group which has attached such information to its income tax return, amended return, or claim for refund filed with the same district director or director of the service center for the taxable year including such date.

(*b*) *Wholly-owned subsidiaries.* (*1*) Each component member of a controlled group which is a wholly-owned subsidiary of such group with respect to a December 31 is deemed to consent to an apportionment plan with respect to such December 31, provided each component member of the group which is not a wholly-owned subsidiary consents to the plan. For purposes of this paragraph, a component member of a controlled group is considered to be a wholly-owned subsidiary of the group with respect to a December 31, if, on each day preceding such date and during its taxable year which includes such date, all of its stock is owned directly by one or more corporations which are component members of the group on such December 31.

(*2*) Each wholly-owned subsidiary of a controlled group with respect to a December 31 must attach a statement containing the information which is required to be set forth in a statement of consent to an apportionment plan with respect to such December 31 to the income tax return, amended return, or claim for refund filed with its district director or director of the service center for the taxable year which includes such date. Such statement must either have attached thereto information on group identification or incorporate such information by reference to the name, address, taxpayer identification number, and tax-

able year of a component member of the group which has attached such information to its income tax return, amended return, or claim for refund filed with the same district director or director of the service center for the taxable year including such date.

(iii) *Amendment of plan.* An apportionment plan adopted with respect to a December 31 by a controlled group of corporations may be amended with respect to such December 31 or with respect to any succeeding December 31 for which the plan is effective under subdivision (i)(c) of this subparagraph. An apportionment plan must be amended with respect to a particular December 31 and the amendments to the plan are effective only if adopted in accordance with the rules prescribed in this paragraph for the adoption of an original plan with respect to such December 31.

(iv) *Component members filing consolidated return.* If the component members of a controlled group of corporations on a December 31 include corporations which join the filing of a consolidated return, the corporations filing the consolidated return are treated as a single component member for purposes of this subparagraph. Thus, for example, only one consent executed by the common parent to an apportionment plan filed pursuant to this section is required on behalf of the component members filing the consolidated return.

(d) *Estates and trusts.* Section 58(c)(2) provides that, in the case of an estate or trust, the minimum tax exemption applicable to such estate or trust is an amount which bears the same ratio to $30,000 as the portion of the sum of the items of tax preference apportioned to the estate or trust bears to the full sum before apportionment. For example, if one-third of the sum of the items of tax preference of a trust are subject to tax at the trust level after apportionment under section 58(c)(1) and § 1.58-3, the trust's minimum tax exemption is $10,000. See § 1.58-3 for rules with respect to the apportionment of items of tax preference of an estate or trust.

(e) *Short taxable year.* See section 443(d) and § 1.443-1(d) with respect to reduction in the amount of the minimum tax exemption in the case of a short taxable year.

§ 1.58-2 General rules for conduit entities; partnerships and partners.

(a) *General rules for conduit entities.* Sections 1.58-3 through 1.58-6 provide rules under which items of tax preference of an estate, trust, electing small business corporation, common trust fund, regulated investment company, or real estate investment trust (referred to in this paragraph as the "conduit entity") are treated as items of tax preference of the beneficiaries, shareholders, participants, etc. (referred to in this paragraph as the "distributees"). Where an item of tax preference of a conduit entity is so apportioned to a distributee, the item of tax preference retains its character in the hands of the distributee and is adjusted to reflect: (1) The separate items of income and deduction of the distributee and (2) the tax status of the distributee as an individual, corporation, etc. For example, if a trust has $100,000 of capital gains for the taxable year, all of which are distributed to A, an individual, the item of tax preference apportioned to A under section 57(a)(9) (and § 1.57-1(i)(1) is $50,000. If, however, A had a net capital loss for the taxable year of $60,000 without regard to the distribution from the trust, the trust tax preference would be adjusted in the hands of A to reflect the separate items of income and deduction passed through to the distributee, or, in this case, to reflect the net section 1201 gain to A of $40,000. Thus, A's capital gains items of tax preference would be $20,000. By application of this rule, A, in effect, treats capital gains distributed to him from the trust the same as his other capital gains in computing his capital gains item of tax preference. If A had been a corporation, the trust tax preference would be adjusted both to reflect the capital loss and to reflect A's tax status by recomputing the capital gains item of tax preference (after adjustment for the capital loss) under section 57(a)(9)(B) and § 1.57-1(i)(2). Similarly, if depreciation on section 1245 property subject to a net lease (as defined in section 57(a)(3) and § 1.57-1(c)) is apportioned from a conduit entity to a corporation (other than a personal holding company or electing small business corporation), the amount so apportioned to the corporation is not treated as an item of tax preference to such corporation since such item is not an item of tax preference in the case of a corporation (other than a personal holding company or an electing small business corporation).

(b) *Partnerships and partners.* (1) Section 701 provides that a partnership as such is not subject to the income tax imposed by chapter 1. Thus, a partnership as such is not subject to the minimum tax for tax preferences. Section 702 provides that, in determining his income tax, each partner is to take into account separately his distributive share of certain items of income, deductions, etc. of the partnership and other items of income, gain, loss, deduction, or credit of the partnership to the extent provided by regulations prescribed by the Secretary or his delegate. Accordingly, each partner, in computing his items of tax preference, must take into account separately those items of income and deduction of the partnership which enter into the computation of the items of tax preference in accordance with subparagraph (2) of this paragraph.

(2) Pursuant to section 702, each partner must, solely for purposes of the minimum tax for tax preferences (to the extent not otherwise required to be taken into account separately under section 702 and the regulations thereunder), take into account separately in the manner provided in subchapter K and the regulations thereunder those items of income and deduction of the partnership which enter into the computation of the items of tax preference specified in section 57 and the regulations thereunder. A partner must, for this purpose, take into account separately his distributive share of:

(i) Investment interest expense (as defined in section 57(b)(2)(D) determined at the partnership level;

(ii) Investment income (as defined in section 57(b)(2)(B) determined at the partnership level;

(iii) Investment expenses (as defined in section 57(b)(2)(C)) determined at the partnership level;

(iv) With respect to each section 1250 property (as defined in section 1250(c)), the amount of the deduction allowable for the taxable year for exhaustion, wear and tear, obsolescence, or amortization and the deduction which would have been allowable for the taxable year had the property been depreciated under the straight line method each taxable year of its useful life (determined without regard to section 167(k)) for which the partnership has held the property;

(v) With respect to each item of section 1245 property (as defined in section 1245(a)(3)) which is subject to a net lease, the amount of the deduction allowable for exhaustion, wear and tear, obsolescence, or amortization and the deduction which would have been allowable for the taxable year had the property been depreciated under the straight line method for each taxable year of its useful life for which the partnership has held the property;

(vi) With respect to each certified pollution control facility for which an election is in effect under section 169, the amount of the deduction allowable for the taxable year under such section and the deduction which would have been allowable under section 167 had no election been in effect under section 169;

(vii) With respect to each unit of railroad rolling stock for which an election is in effect under section 184, the amount of the deduction allowable for the taxable year under such section and the deduction which would

SEP 12 78

V 43 / 177 SE 12 78

have been allowable under section 167 had no election been in effect under section 184;

(viii) In the case of a partnership which is a financial institution to which section 585 or 593 applies, the amount of the deduction allowable for the taxable year for a reasonable addition to a reserve for bad debts and the amount of the deduction that would have been allowable for the taxable year had the institution maintained its bad debt reserve for all taxable years on the basis of actual experience; and

(ix) With respect to each mineral property, the deduction for depletion allowable under section 611 for the taxable year and the adjusted basis of the property at the end of the taxable year (determined without regard to the depreciation deduction for the taxable year).

If, pursuant to section 743 (relating to optional adjustment to basis), the basis of partnership property is adjusted with respect to a transferee partner due to an election being in effect under section 754 (relating to manner of electing optional adjustment), items representing amortization, depreciation, depletion, gain or loss, and the adjusted basis of property subject to depletion, described above, shall be adjusted to reflect the basis adjustment under section 743.

(3) The minimum tax is effective for taxable years ending after December 31, 1969. Thus, subparagraph (2) of this paragraph is inapplicable in the case of items of income or deduction paid or accrued in a partnership's taxable year ending on or before December 31, 1969.

§ 1.58–3 Estates and trusts.

(a) *In general.* (1) Section 58(c)(1) provides that the sum of the items of tax preference of an estate or trust shall be apportioned between the estate or trust and the beneficiary on the basis of the income of the estate or trust allocable to each. Income for this purpose is the income received or accrued by the trust or estate which is not subject to current taxation either in the hands of the trust or estate or the beneficiary by reason of an item of tax preference. The character of the amounts distributed is determined under section 652(b) or 662(b) and the regulations thereunder.

(2) Additional computations required by reason of excess distributions are to be made in accordance with the principles of sections 665–669 and the regulations thereunder.

(3) In the case of a charitable remainder annuity trust (as defined in section 664(d)(1) and § 1.664-2) or a charitable remainder unitrust (as defined in section 664(d)(2) and § 1.664-3), the determination of the income not subject to current taxation by reason of an item of tax preference is to be made as if such trust were generally subject to taxation. Where income of such a trust is not subject to current taxation in accordance with this section and is distributed to a beneficiary in a taxable year subsequent to the taxable year in which the trust received or accrued such income, the items of tax preference relating to such income are apportioned to the beneficiary in such subsequent year (without credit for minimum tax paid by the trust with respect to items of tax preference which are subject to the minimum tax by reason of section 664(c)).

(4) Items of tax preference apportioned to a beneficiary pursuant to this section are to be taken into account by the beneficiary in his taxable year within or with which ends the taxable year of the estate or trust during which it has such items of tax preference.

(5) Where a trust or estate has items of income or deduction which enter into the computation of the excess investment interest item of tax preference, but such items do not result in an item of tax preference at the trust or estate level, each beneficiary must take into account, in computing his excess investment interest, the portion of such items distributed to him. The determination of the portion of such items distributed to each beneficiary is made in accordance with the character rules of section 652(b) or section 662(b) and the regulations thereunder.

(6) Where, pursuant to subpart E of part 1 of subchapter J (sections 671–678), the grantor of a trust or another person is treated as the owner of any portion of the trust, there shall be included in computing the items of tax preference of such person those items of income, deductions, and credits against tax of the trust which are attributable to that portion of the trust to the extent such items are taken into account under section 671 and the regulations thereunder. Any remaining portion of the trust is subject to the provisions of this section.

(b) *Examples.* The principles of this section may be illustrated by the following examples in each of which it is assumed that none of the distributions are accumulation distributions (see sections 665–669 and the regulations thereunder):

Example (1). Trust A, with one income beneficiary, has the following items of income and deduction without regard to the deduction for distributions:

Income:	
Business income	$200,000
Investment income	20,000
	220,000
Deductions:	
Business deductions (nonpreference)	100,000
Investment interest expense	80,000
	180,000

Based on the above figures, the trust has $100,000 of taxable income without regard to items which enter into the computation of excess investment interest and the deduction for distributions. The trust also has $60,000 of excess investment interests, resulting in $40,000 of distributable net income. Thus, $60,000 of the $100,000 of noninvestment income is not subject to current taxation by reason of the excess investment interest.

(*a*) If $40,000 is distributed to the beneficiary, the beneficiary will normally be subject to tax on the full amount received and the "sheltered" portion of the income will remain at the trust level. Thus, none of the excess investment interest item of tax preference is apportioned to the beneficiary.

(*b*) If the beneficiary receives $65,000 from the trust, the beneficiary is still subject to tax on only $40,000 (the amount of the distributable net income) and thus, is considered to have received $25,000 of business income "sheltered" by excess investment interest. Thus, $25,000 of the $60,000 of excess investment interest of the trust is apportioned to the beneficiary.

Example (2). Trust B has $150,000 of net section 1201 gain.

(*a*) If none of the gain is distributed to the beneficiaries, none of the capital gains item of tax preference is apportioned to the beneficiaries.

(*b*) If all or a part of the gain is distributed to the beneficiaries, a proportionate part of the capital gains item of tax preference is apportioned to the beneficiaries. If any of the beneficiaries are corporations the capital gains item of tax preference is adjusted in the hands of the corporations as provided in § 1.58–2(a).

Example (3). Trust C has taxable income of $200,000 computed without regard to depreciation on section 1250 property and the deduction for distributions. The depreciation on section 1250 property held by the trust is $160,000. The trust instrument provides for income to be retained by the trust in an amount equal to the depreciation on the property determined under the straight line method (which method has been used for this purpose for the entire period the trust has held the property) which, in this case is equal to $100,000. The $60,000 excess of the accelerated depreciation of $160,000 over the straight line amount which would have resulted had the property been depreciated under that method for the entire period for which the trust has held the property is an item of tax preference pursuant to section 57(a)(2). Of the remaining $100,000 of net income of the trust (after the reserve for depreciation), 80 percent is distributed to the beneficiaries. Pursuant to sections 167(h) and 642(e), 80 percent of the remaining $60,000 of depreciation deduction (or $48,000) is taken as a deduction directly by the beneficiaries and "shelters" the income received by the beneficiaries. Thus, the full $48,000 deduction taken by the beneficiaries is "excess accelerated depreciation" on section 1250 property and is an item of tax preference in the hands of the beneficiaries. None of the remaining $12,000 of "excess accelerated depreciation" is apportioned to the beneficiaries since this amount "shelters" income retained at the trust level.

Example (4). G creates a trust the ordinary income of which is payable to his adult son. Ten years from the date of the transfer, corpus is to revert to G. G retains no other right or power which would cause him to be treated as an owner under subpart E of part 1 of subchapter J (section 671 and following). Under the terms of the trust instrument and applicable local law capital gains must be applied to corpus. During the taxable year 1970 the trust has $200,000 income from dividends and interest and a net long-term capital gain of $100,000. Since the capital gain is held or accumulated for future distribution to G, he is treated under section 677(a)(2) as an owner of a portion of the trust to which the gain is attributable. Therefore, he must include the capital gain in the computation of his taxable income in 1970 and the capital gain item of tax preference is treated as being directly received by G. Accordingly, no adjustment is made to the trust's minimum tax exemption by reason of the capital gain.

Example (5). For its taxable year 1971 the trust referred to in example (4) has taxable income of $200,000 computed without regard to depreciation on section 1250 property and the deduction for distributions. The depreciation on section 1250 property held by the trust is $160,000. The trust instrument provides for income to be retained by the trust in an amount equal to the depreciation on the property determined for purposes of the Federal income tax. If the property had been depreciated under the straight line method for the entire period for which the trust held the property the resulting depreciation deduction would have been $100,000. The $60,000 excess is, therefore, an item of tax preference pursuant to section 57(a)(2) and § 1.57–1(d). Since this amount of "income" is held or accumulated for future distributions to G, he is treated under section 677(a)(2) as an owner of a portion of the trust to which such income is attributable. Therefore, section 671 requires that in computing the tax liability of the grantor the income, deductions, and credits against tax of the trust which are attributable to such portion shall be taken into account. Thus, the grantor has received $160,000 of income and is entitled to a depreciation deduction in the same amount. The $60,000 item of tax preference resulting from the excess depreciation is treated as being directly received by G as he has directly received the income sheltered by that preference. Accordingly, no adjustment is made to the trust's minimum tax exemption by reason of such depreciation.

§ 1.58–4 Electing small business corporations.

(a) *In general.* Section 58(d)(1) provides rules for the apportionment of the items of tax preference of an electing small business corporation among the shareholders of such corporation. Section 58(d)(2) provides rules for the imposition of the minimum tax on an electing small business corporation with respect to certain capital gains. For purposes of section 58(d) and this section, the items of tax preference are computed at the corporate level as if section 57 generally applied to the corporation. However, the items of tax preference so computed are treated as items of tax preference of the shareholders of such corporation and not as items of tax preference of such corporation (except as provided in paragraph (c) of this section). The items of tax preference specified in section 57(a)(1) and § 1.57–1(a) (excess investment interest) and section 57(a)(3) and § 1.57–1(c) (accelerated depreciation on section 1245 property subject to a net lease), while generally inapplicable to corporations, are included as items of tax preference in the case of an electing small business corporation.

(b) *Apportionment to shareholders.* (1) The items of tax preference of an electing small business corporation, other than the capital gains item of tax preference described in paragraph (c) of this section, are apportioned pro rata among the shareholders of such corporation in a manner consistent with section 1374(c)(1). Thus, with respect to the items of tax preference of the electing small business corporation, there is to be treated as items of tax preference of each shareholder a pro rata share of such items computed as follows:

(i) Divide the total amount of such items of tax preference of the corporation by the number of days in the taxable year of the corporation, thus determining the daily amount of such items of tax preference.

(ii) Determine for each day the shareholder's portion of the daily amount of each such item of tax preference by applying to such amount the ratio which the stock owned by the shareholder on that day bears to the total stock outstanding on that day.

(iii) Total the shareholder's daily portions of each such item of tax preference of the corporation for it taxable year.

Amounts taken into account by shareholders in accordance with this paragraph are considered to consist of a pro rata share of each item of tax preference of the corporation. Thus, for example, if the corporation has $50,000 of excess investment interest and $150,000 of excess accelerated depreciation on section 1250 property and a shareholder, in accordance with this paragraph, takes into account $60,000 of the total $200,000 of tax preference items of the corporation, one-fourth ($50,000÷$200,000) of the $60,000, or $15,000, taken into account by the shareholder is considered excess investment interest and three-fourths of the $60,000, or $45,000, is considered excess accelerated depreciation on section 1250 property.

(2) Items of tax preference apportioned to a shareholder pursuant to subparagraph (1) of this paragraph are taken into account by the shareholder for the shareholder's taxable year in which or with which the taxable year of the corporation ends, except that, in the case of the death of a shareholder during any taxable year of the corporation (during which the corporation is an electing small business corporation), the items of tax preference of the corporation for such taxable year are taken into account for the final taxable year of the shareholder.

(c) *Capital gains.* (1) Capital gains of an electing small business corporation, other than those capital gains subject to tax under section 1378, do not result in an item of tax preference at the corporate level since, in applying the formula specified in sections 57(a)(9)(B) and 1.57–1(i)(2), the rate of tax on capital gains (and the resulting tax) at the corporate level is zero. Under section 1375 (a) shareholders of an electing small business corporation take into account the capital gains of the corporation (including capital gains subject to tax under sec. 1378). Therefore, the computation of the capital gains item of tax preference at the shareholder level, with respect to such capital gains, is taken into account automatically by operation of sections 57(a)(9) and 1.57–1(i). To avoid double inclusion of the capital gains item of tax preference by a shareholder with respect to capital gains subject to tax under section 1378, the capital gains item of tax preference which results at the corporate level by reason of section 58 (d)(2) is not treated under section 58 (d)(1) as an item of tax preference of the shareholders of the corporation.

(2) The capital gains item of tax preference of an electing small business corporation subject to the tax imposed by section 1378 is the excess of the amount of tax computed under section 1378(b)(2) over the sum of—

(i) The amount of tax that would be computed under section 1378(b)(2) if the following amount were excluded:

(*a*) That portion of the net section 1201 gain of the corporation described in section 1378(b)(1), or

(*b*) If section 1378(c)(3) applies, that portion of the net section 1201 gain attributable to the property described in section 1378(c)(3), and

(ii) The amount of tax imposed under section 1378

divided by the sum of the normal tax rate and the surtax rate under section 11 for the taxable year.

(3) The principles of this paragraph may be illustrated by the following example.

Example. Corporation X is a calendar year taxpayer and an electing small business corporation. For its taxable year 1971 the corporation has net section 1201 gain of $650,000 and taxable income of $800,000 (including the net section 1201 gain). Although X's election under section 1372(a) has been in effect for its three immediately preceding taxable years, X is subject to the tax im-

posed by section 1378 for 1971 since it has net section 1201 gain (in the amount of $200,000) attributable to property with a substituted basis. The tax computed under section 1378(b)(1) is $187,500 (30 percent of ($650,000 minus $25,000)) and under section 1378(b)(2) is $377,500 (22 percent of $800,000 plus 26 percent of $775,000). By reason of the limitation imposed by section 1378(c) the tax actually imposed by section 1378 is $60,000 (30 percent of $200,000, the net section 1201 gain). The tax computed under section 1378(b)(2) with the modification required under subparagraph (2)(i) of this paragraph is $281,500 (22 percent of $600,000 plus 26 percent of $576,000). Thus, the 1971 capital gains item of tax preference X is $75,000 computed as follows:

1. Tax computed under 1378(b) (2)	$377,500
2. Tax computed under 1378(b) (2) with modification	281,500
3. Excess	96,000
4. Tax actually imposed under 1378	60,000
5. Difference	36,000
6. Normal tax rate plus surtax rate	.48
7. Tax preference (line 5 divided by line 6)	$75,000

In addition each shareholder of X will take into account his distributive share of the $650,000 of net section 1201 gain of X less the taxes paid by X under sections 56 and 1378 on the gain.

§ 1.58–5 Common trust funds.

Section 58(e) provides that each participant in a common trust fund (as defined in sec. 584 and the regulations thereunder) is to treat as items of tax preference his proportionate share of the items of tax preference of the fund computed as if the fund were an individual subject to the minimum tax. The participant's proportionate share of the items of tax preference of the fund is determined as if the participant has realized, or incurred, his pro rata share of items of income, gain, loss, or deduction of the fund directly from the source from which realized or incurred by the fund. The participant's pro rata share of such items is determined in a manner consistent with section 1.584-2(c). Items of tax preference apportioned to a participant pursuant to this paragraph are taken into account by the participant for the participant's taxable year in which or with which the taxable year of the trust ends.

§ 1.58–6 Regulated investment companies; real estate investment trusts.

(a) *In general.* Section 58(f) provides rules with respect to the determination of the items of tax preference of regulated investment companies (as defined in sec. 851) and their shareholders and real estate investment trusts (as defined in sec. 856) and their shareholders, or holders of beneficial interest. In general, the items of tax preference of such companies and such trusts are determined at the company or trust level and the items of tax preference so determined (other than the capital gains item of tax preference (secs. 57(a)(9) and 1.57-1(l)) and, in the case of a real estate investment trust, accelerated depreciation on section 1250 property (secs. 57(a)(2) and 1.57-1(b)) are treated as items of tax preference of the shareholders, or holders of beneficial interest, in the same proportion that the dividends (other than capital gains dividends) paid to each such shareholder, or holder of beneficial interest, bear to the taxable income of such company or such trust determined without regard to the deduction for dividends paid. In no case, however, is such proportion to be considered in excess of 100 percent. For example, if a regulated investment company has items of tax preference of $500,000 for the taxable year, none of which resulted from capital gains, and distributes dividends in an amount equal to 90 percent of its taxable income, each shareholder treats his share of 90 percent of the company's items of tax preference, or (a proportionate share of) $450,000, as items of tax preference of the shareholder. The remaining $50,000 constitutes items of tax preference of the company. Amounts treated under this paragraph as items of tax preference of the shareholders, or holders of beneficial interest, are deemed to be derived proportionately from each item of tax preference of the company or trust, other than the capital gains item of tax preference and, in the case of a real estate investment trust, accelerated depreciation on section 1250 property. Such amounts are taken into account by the shareholders, or holders of beneficial interest, in the same taxable year in which the dividends on which the apportionment is based are includible in income. The minimum tax exemption of the trust or company shall not be reduced because a portion of the trust's or company's items of tax preference are allocated to the shareholders or holders of beneficial interests.

(b) *Capital gains.* Section 58(g)(1) provides that a regulated investment company or real estate investment trust does not treat as an item of tax preference the capital gains item of tax preference under section 57(a)(9) (and sec. 1.57-1(i)) to the extent that such item is attributable to amounts taken into income by the shareholders of such company under section 852(b)(3) or by the shareholders or holders of beneficial interest of such trust under section 857(b)(3). Thus, such a company or trust computes its capital gains item of tax preference on the basis of its net section 1201 gain less the sum of (1) the capital gains dividend (as defined in sec. 852(b)(3)(C) or sec. 857(b)(3)(C)) for the taxable year of the company or trust plus (2), in the case of a regulated investment company, that portion of the undistributed capital gains designated, pursuant to section 852(b)(3)(D), and the regulations thereunder, by the company to be includible in the shareholder's return as long-term capital gains for the shareholders's taxable year in which the last day of the company's taxable years falls. Amounts treated under section 852(b)(3) or 857(b)(3) as long-term capital gains of shareholders, or holders of beneficial interest, are automatically included, pursuant to sections 57(a)(9) and 1.57-1(i), in the computation of the capital gains item of tax preference of the shareholders, or holders of beneficial interest.

(c) *Accelerated depreciation on section 1250 property.* In the case of a real estate investment trust, all of the items of tax preference resulting from accelerated depreciation on section 1250 property held by the trust (section 57(a)(2) and § 1.57-1(b)) are treated as items of tax preference of the trust, and, thus, none are treated as items of tax preference of the shareholder, or holder of beneficial interest.

§ 1.58–7 Tax preferences attributable to foreign sources; preferences other than capital gains and stock options.

(a) *In general.* Section 58(g)(1) provides that except in the case of the stock options item of tax preference (section 57(a)(6) and § 1.57-1(f)) and the capital gains item of tax preference (section 57(a)(9) and § 1.57-1(i)), items of tax preference which are attributable to sources within any foreign country or possession of the United States shall, for purposes of section 56, be taken into account only to the extent that such items reduce the tax imposed by chapter 1 (other than the minimum tax under section 56) on income derived from sources within the United States. Items of tax preference from sources within any foreign country or possession of the United States reduce the chapter 1 tax on income from sources within the United States to the extent the deduction relating to such preferences, in combination with other foreign deductions, exceed the income from such sources and, in effect, offset income from sources within the United States. Items of tax preference, for this purpose, are determined after application of § 1.57-4 (relating to limitation on amounts treated as items of tax preference). In the case of a taxpayer who deducted foreign taxes under section 164 for a taxable year, the provisions of this section shall be applied) without regard to section 275(a)(4)) as if he had elected the overall foreign tax credit limitation under section 904(a)(2) for such year.

(b) *Preferences attributable to foreign sources—(1) Preferences other than excess investment interest.* Except in the case of excess investment interest (see subparagraph (2) of this paragraph), an item tax preference to which this section applies is attributable to sources within a foreign country or possession of the United States to the extent such item is attributable to a deduction properly allocable or apportionable to an item or class of gross income from sources within a foreign country or possession of the United States under the principles of section 862(b), or section 863, and the regulations thereunder. Where, in the case of income partly from sources within the United States and partly from sources within a foreign country or possession of the United States, taxable income is computed before apportionment to domestic and foreign sources, and is then apportioned by processes or formulas of general apportionment (pursuant to section 863(b) and the regulations thereunder), deductions attributable to such taxable income are considered to be proportionately from sources within the United States and within the foreign country or possession of the United States on the same basis as taxable income.

(2) *Excess investment interest—(i) Per-country limitation.* (*a*) In the case of a taxpayer on the per-country foreign tax credit limitation under section 904(a) for the taxable year, excess investment interest (as defined in section 57(b)(1)), and the resulting item of tax preference, is attributable to sources within a foreign country or a possession of the United States to the extent that investment interest expense attributable to income from sources within such foreign country or possession of the United States exceeds the net investment income from sources within such foreign country or such possession. For this purpose, net investment income from within a foreign country or possession of the United States is the excess (if any) of the investment income from sources within such country or possession over the investment expenses attributable to income from sources within such country or such possession. For the definition of investment interest expense see section 57(b)(2)(D); for the definition of investment income see section 57(b)(2)(B); for the definition of investment expense see section 57(b)(2)(C).

(*b*) If the taxpayer's excess investment interest computed on a worldwide basis is less than the taxpayer's total separately determined excess investment interest (as defined in this subdivision (*b*)), the amount of the taxpayer's excess investment interest from each foreign country or possession is the amount which bears the same relationship to the taxpayer's excess investment interest from each such country or possession, determined without regard to this subdivision (*b*), as the taxpayer's worldwide excess investment interest bears to the taxpayer's total separately determined excess investment interest. For purposes of this subdivision (*b*), the taxpayer's total separately determined excess investment interest is the sum of the total excess investment interest determined without regard to this subdivision (*b*) plus the taxpayer's excess investment interest from sources within the United States determined in a manner consistent with (*a*) of this subdivision (i).

(ii) *Overall limitation.* In the case of a taxpayer who has elected the overall foreign tax credit limitation under section 904(a)(2) for the taxable year, excess investment interest (as defined in section 57(b)(1)), and the resulting item of tax preference, is attributable to sources within any foreign country or possession of the United States to the extent that investment interest expense attributable to income from such sources exceeds the sum of (*a*) the net investment income from such sources plus (*b*) the excess, if any, of net investment income from sources within the United States over investment interest expense attributable to sources within the United States. For this purpose, net investment income from sources within any foreign country or possession of the United States is the excess (if any) of the investment income from all such sources over the investment expenses attributable to income from such sources. For the definition of investment interest expense see section 57(b)(2)(D) for the definition of investment income see section 57(b)(2)(B); for the definition of investment expense see section 57(b)(2)(C).

(iii) *Allocation of expenses.* The determination of the investment interest expense and investment expenses attributable to a foreign country or possession of the United States is made in a manner consistent with subparagraph (1) of this paragraph.

(iv) *Attribution of certain interest deductions to foreign sources.* Where net investment income from sources within any foreign country or possession has the effect of offsetting investment interest expense attributable to income from sources within the United States, the deductions for the investment interest expense so offset are, for purposes of § 1.58-7(c) (relating to reduction in taxes on United States source income), treated as deductions attributable to income from sources within the foreign country or possession from which such net investment income is derived. Such an offset will occur where there is an excess of investment interest expense attributable to income from sources within the United States over net investment income from such sources and (*a*) in the case of a taxpayer on the per-country foreign tax credit limitation, an excess of net investment income from sources within a foreign country or possession of the United States over investment interest expense from within such foreign country or possession, or (*b*) in the case of a taxpayer who has elected the overall foreign tax credit limitation, there is an excess of net investment income from sources within foreign countries or possessions of the United States over investment interest expense attributable to income from within such sources.

(v) *Separate limitation on interest income.* Where a taxpayer has income described in section 904(f)(2) (relating to interest income subject to the separate foreign tax credit limitation) or expenses attributable to such income, the determination of the excess investment interest resulting therefrom must be determined separately with respect to such income and the expenses properly allocable or apportionable thereto in the same manner as such determination is made in the case of a taxpayer on the per-country foreign tax credit limitation for the taxable year (see subdivision (i) of this subparagraph).

(vi) *Examples.* The principles of this subparagraph may be illustrated by the following examples in each of which the taxpayer is an individual and a citizen of the United States:

Example (1). The taxpayer's only items of income and deduction relating to excess investment interest are as follows:

	United States	France	Germany	Total
Investment income from sources within	$150,000	$120,000	$180,000	$450,000
Investment expenses relating to income from sources within	(100,000)	(90,000)	(120,000)	(310,000)
Net investment income	50,000	30,000	60,000	140,000
Investment interest expense relating to income from sources within	(110,000)	(70,000)	(50,000)	(230,000)
(Excess) of investment interest expense over net investment income	(60,000)	(40,000)	*10,000	(90,000)

*Excess of net investment income over investment interest expense.

(a) If the taxpayer has elected the overall foreign tax credit limitation, his excess investment interest from sources within any foreign countries or possessions of the United States determined under subdivision (ii) of this subparagraph is computed as follows:

Investment interest:			
French	($70,000)		
German	(50,000)		($120,000)
Net investment income:			
Investment income:			
French	120,000		
German	180,000	$300,000	
Less:			
Investment expenses:			
French	(90,000)		
German	(120,000)	(210,000)	90,000
Excess of U.S. net income over investment interest expenses:			
Total foreign excess investment interest			(30,000)

(b) If the taxpayer is on the per-country foreign tax credit limitation, his excess investment interest from France and Germany determined under subdivision (i)(*a*) of this subparagraph is $40,000 and zero, respectively. Since the taxpayer's worldwide excess investment interest ($90,000) is less than his total separately determined excess investment interest ($60,000 (United States) plus $40,000 (French) plus zero (German), or $100,000), the limitation in subdivision (i)(*b*) of this subparagraph applies and the excess investment interest attributable to France is limited as follows:

Total worldwide excess ($90,000)/Total separately determined excess ($100,000) × French excess ($40,000)=$36,000

The taxpayer's total excess investment interest attributable to sources within any foreign country or possession of the United States is, thus, $36,000 ($36,000 (French) plus zero (German)). The taxpayer's excess investment interest attributable to sources within the United States is $54,000

($90,000/$100,000×$60,000).

Since, in making the latter determination, $6,000 of the $60,000 of U.S. investment interest expense in excess of U.S. net investment income is, in effect, offset by German net investment income, for purposes of § 1.58-7(c), $6,000 of interest deductions attributable to income from sources within the United States are, pursuant to subdivision (iv) of this subparagraph, treated as deductions attributable to income from sources within Germany.

Example (2). Assume the same facts as in example (1) except that the items of income and deduction in Germany and the United States are reversed. The worldwide excess investment interest, thus, remains $90,000 and the items of income and deduction relating to excess investment interest are as follows:

	United States	France	Germany	Total
Investment income from sources within	$180,000	$120,000	$150,000	$450,000
Investment expenses relating to income from sources within	(120,000)	(90,000)	(100,000)	(310,000)
Net investment income	60,000	30,000	50,000	140,000
Investment interest expense relating to income from sources within	(50,000)	(70,000)	(110,000)	(230,000)
(Excess) of investment interest expense over net investment income	10,000	(40,000)	(60,000)	(90,000)

(a) If the taxpayer has elected the overall limitation, his excess investment interest from sources within any foreign countries or possessions of the United States determined under subdivision (ii) of this subparagraph is determined as follows:

Foreign investment interest:			
French	($70,000)		
German	(110,000)		($180,000)
Foreign net investment income:			
French	120,000		
German	150,000	$270,000	
Less:			
Investment expenses:			
French	(90,000)		
German	(100,000)	(190,000)	80,000
Excess of U.S. net investment income over U.S. investment interest expense			10,000
Excess investment interest attributable to foreign sources			(90,000)

(b) If the taxpayer has not elected the overall foreign tax credit limitation, his excess investment interest from France and Germany determined under subdivision (i) of this subparagraph (without regard to the limitation to worldwide excess investment interest) is $40,000 and $60,000 respectively, and his total separately determined excess investment interest is, thus, $10,000. Since the total separately determined excess would exceed the worldwide excess, the limitation to the worldwide excess in subdivision (i) applies and the excess investment interest is determined as follows:

France:

$90,000/$100,000×$40,000=$36,000

Germany:

$90,000/$100,000×$60,000=$54,000

Total excess investment interest attributable to sources within any foreign countries and possessions—$90,000.

Example (3). Assume the same facts as in example (1) except that the taxpayer, in addition has investment income, investment expenses, and investment interest subject to the separate limitation under section 904(f).

(a) If the taxpayer has elected the overall foreign tax credit limitation, his excess investment interest from sources within any foreign countries or possessions of the United States determined under subdivision (ii) of this subparagraph is the same as in (a) of example (1) of this subdivision (vi). He then treats such amounts as separately determined excess investment interest attributable to a single foreign country as determined under subdivision (i) of this subparagraph and proceeds as in (b) of example (1) of this subdivision (vi) treating items of income and deduction subject to section 904(f) and from each separate foreign country or possession separately in making the additional determinations under subdivisions (i) and (iv) of this subparagraph.

(b) If the taxpayer has not elected the overall foreign tax credit limitation, his excess investment interest from sources within any foreign country or possession of the United States would be determined in the same manner as in (b) of example (1) treating items of income and deduction which are subject to section 904(f) and from each separate foreign country or possession separately in making the determinations under subdivisions (i) and (iv) of this subparagraph.

(c) *Reduction in taxes on United States source income*—(1) *Overall limitation*—(i) *In general.* If a taxpayer is on the overall foreign tax credit limitation under section 904(a)(2), the items of tax preference determined to be attributable to foreign sources under paragraph (b) of this section reduce the tax imposed by chapter 1 (other than the minimum tax imposed under section 56) on income from sources within the United States for the taxable year to the extent of the smallest of the following three amounts:

(*a*) Items of tax preference (other than stock options and capital gains) attributable to sources within a foreign country or possession of the United States,

(*b*) The excess (if any) of the total deductions properly allocable or apportionable to items or classes of gross income from sources within foreign countries and possessions of the United States over the gross income from such sources, or

(*c*) Taxable income from sources within the United States.

See § 1.58-7(b)(2)(iv) with respect to the attribution of certain interest deductions to foreign sources in cases involving the excess investment interest item of tax preference.

(ii) *Net operating loss.* Where there is an overall net operating loss for the taxable year, to the extent that the lesser of the amounts determined under (*a*) or (*b*) of subdivision (i) of this subparagraph exceeds the taxpayer's taxable income from sources within the United States (and, therefore do not offset taxable income from sources within the United States for the taxable year) the amount of such excess is treated as "suspense preferences." Suspense preferences are converted to actual items of tax preference, arising in the loss year and subject to the provisions of section 56, as the net operating loss is used in other taxable years, in the form of a net operating loss deduction under section 172, to offset taxable income from sources within the United States. Suspense preferences which, in other taxable years, reduce taxable income from sources within any foreign country or possession of the United States lose their character as suspense preferences and, thus, are never converted into actual items of tax preference. The amount of the suspense preferences which are converted into actual items of tax preference is equal to that portion of the net operating loss attributable to the suspense preferences which offset taxable income from sources within the United States in taxable years other than the loss year. The determination of the component parts of the net operating loss and the determination of the amount by which the portion of the net operating loss attributable to suspense preferences offsets taxable income from sources within the United States is made on a year-by-year basis in the same order a the net operating loss is used in accordance with section 172(b). Such determination is made by applying deductions attributable to U.S. source income first against such income and deductions attributable to foreign source income first against such foreign source income and in accordance with the following principles:

(*a*) Deductions attributable to items or classes of gross income from sources within the United States offset taxable income from sources within the United States before any remaining portion of the net operating loss;

(*b*) Deductions attributable to items or classes of gross income from sources within foreign countries or possessions of the United States offset taxable income from such sources before any remaining portion of the net operating loss;

(*c*) Deductions described in (*b*) of the subdivision (ii) which are not suspense preferences (referred to in this subparagraph as "other foreign deductions") offset taxable income from sources within foreign countries and possessions of the United States before suspense preferences; and

(*d*) Suspense preferences offset taxable income from sources within the United States before other foreign deductions.

For purposes of the above computations, taxable income is computed with the modifications specified in section 172(b)(2) or section 172(c), whichever is applicable. However, the amount of suspense preferences which are converted into actual items of tax preference in accordance with the above principles is reduced to the extent suspense preferences offset increases in taxable income from sources within the United States due to the modifications specified in section 172(b)(2) or section 172(c). For this purpose, suspense preferences are considered to offset an increase in taxable income due to the section 172(b)(2) modifications only after reducing taxable income computed before the section 172(b)(2) or section 172(c) modifications.

(iii) *Examples.* The principles of this subparagraph may be illustrated by the following examples. In each example the taxpayer is an individual citizen of the United States and has elected the overall foreign tax credit limitation. Personal deductions and exemptions are disregarded for purposes of these examples.

Example (1). In 1974, the taxpayer has the following items of income and deduction:

United States taxable income:			
Gross income		$750,000	
Deductions		(250,000)	$500,000
Foreign source loss:			
Gross income		200,000	
Deductions:			
Preference items (excess of percentage depletion over basis)	$550,000		
Other	50,000	(600,000)	(400,000)
Overall taxable income			100,000

Pursuant to subdivision (i) of this subparagraph the smallest of (a) the items of tax preference attributable to the foreign sources ($550,000), (b) the foreign source loss ($400,000), or (c) the taxable income from sources within the United States ($500,000) reduces the tax imposed by chapter 1 (other than the minimum tax) on income from sources within the United States. Thus, $400,000 of the $550,000 of excess depletion is treated as an item of tax preference in 1974 subject to the minimum tax.

Example (2). Assume the same facts as in example (1) except that the gross income from sources within the United States is $350,000 resulting in U.S. taxable income of $100,000 and an overall net operating loss of $300,000. Pursuant to subdivision (i) of this subparagraph, $100,000 of the $550,000 excess depletion would be treated as an item of tax preference in 1974 subject to the minimum tax. In addition, pursuant to subdivision (ii) of this subparagraph, the excess of the items of tax preference from foreign sources ($550,000) or the foreign source loss ($400,000), whichever is less, over the U.S. taxable income ($100,000), or, in this example, $300,000, is treated as suspense preferences.

(a) If, in 1971, the taxpayer's total items of income and deduction result in $350,000 of taxable income all of which is from sources within the United States, the entire $300,000 net operating loss, all of which is attributable to suspense preferences, is used to offset U.S. taxable income. Accordingly, the full $300,000 of suspense preferences are converted into actual items of tax preference arising in 1974 and are subject to tax under section 56.

(b) If the $350,000 in 1971 is modified taxable income resulting from the denial of a section 1202 capital gains deduction of $175,000 by reason of section 172(b)(2), the $300,000, otherwise treated as actual items of tax preference, is reduced by $125,000, i.e., the extent to which the suspense preferences offset U.S. taxable income attributable to the increase in taxable income resulting from the denial of the section 1202 deduction.

Example (3). In 1974, the taxpayer has the following items of income and deduction:

United States loss:			
Gross income		$75,000	
Deductions		(225,000)	
			($150,000)
Foreign loss:			
Gross income		400,000	
Deductions:			
Preference items (excess of accelerated depreciation on sec. 1250 property over straight-line amount)	$200,000		
Other	550,000	(750,000)	
			(350,000)
Overall net operating loss			(500,000)

Since the nonpreference deductions reduce the foreign source income before the preference portion, the $350,000 foreign source loss consists of $200,000 of suspense preferences and $150,000 of other deductions. In 1971, 1972, and 1973 the taxpayer had taxable income from sources within the United States of $100,000, $200,000, and $300,000, respectively and taxable income from sources within foreign countries of $80,000 each year. Of the $200,000 of suspense preferences, $150,000 are converted into actual items of tax preference, subject to the minimum tax in 1974, determined as follows:

[In thousands of dollars]

Year—Explanation	Taxable income		U.S. deductions	Foreign deductions	
	U.S. source	Foreign source		Suspense preferences	Other
1971 End of year balance before section 58(g) computations	100	80	150	200	150
1. U.S. deductions against U.S. income	(100)		(100)		
2. Other foreign deductions against foreign income			(80)		(80)
1972 End of year balance before section 58(g) computations	200	80	50	200	70
1. U.S. deductions against U.S. income	(50)		(50)		
2. Other foreign deductions against foreign income			(70)		(70)
3. Suspense preferences against foreign income			(10)	(10)	
4. Suspense preferences against U.S. income	*(150)			*(150)	
1973 End of year balance before section 58(g) computations	300	80		40	
1. U.S. deductions against U.S. income		Not applicable.			
2. Other foreign deductions against foreign income			Not applicable.		
3. Suspense preference against foreign income			(40)	(40)	
4. Suspense preferences against U.S. income			Not applicable.		
Balances	300		40		

*Suspense preferences converted to actual items of tax preference.

Example (4). In 1970, the taxpayer's total items of income and deduction, all of which are attributable to foreign sources, are as follows:

Foreign loss:		
Gross income		$400,000
Deductions:		
Preferences (excess of accelerated depreciation on section 1250 property over straight-line)	$200,000	
Net operating loss		350,000

Pursuant to subdivision (i) of this subparagraph, none of the preferences attributable to foreign sources reduce the tax imposed by chapter 1 (other than the minimum tax) on taxable income from sources within the United States. Pursuant to subdivision (ii) of this subparagraph, the $200,000 portion of the net operating loss resulting from the excess accelerated depreciation constitutes suspense preferences. No part of the net operating loss that is carried back to previous years is reduced in such previous years. In 1971 and 1972, the taxpayer's income (before the net operating loss deduction) consists of the following:

1971 taxable income:	
United States	$180,000
Foreign	70,000
Total	230,000
1972 taxable income:	
United States	25,000
Foreign	105,000
Total	130,000

(a) In 1971, the conversion of suspense preferences into actual items of tax preference under section 58(g) (and this paragraph) and the imposition of the minimum tax on 1970 items of tax preference under section 56(b) and ($ 1.56-2) are determined as follows:

Conversion of suspense preferences:

1970 NET OPERATING LOSS

[In thousands of dollars]

	U.S. taxable income	Foreign taxable income	U.S. deductions	Suspense preferences	Other foreign deductions
Total	$160	$70		$200	$150
1. U.S. deductions against U.S. income	Not applicable				
2. Other foreign deductions against foreign income		70			(70)
3. Suspense preference against foreign income	Not applicable				
4. Suspense preference against U.S. income	*(160)			(160)	
Balance to 1972				40	80

*Suspense preferences converted into actual items of tax preference.

Imposition of minimum tax on 1970 items of tax preference:

1970 NET OPERATING LOSS

[In thousands of dollars]

	1971 taxable income	Nonpreference portion	Preference portion	Suspense portion
Total	$230	$150		$200
1. 1971 conversion of suspense preferences pursuant to sec. 58(g)		[1]30	$130	(160)
Adjusted NOL		180	130	40
2. Nonpreference portion against taxable income	(180)	(180)		
3. Preference portion against taxable income	[2](50)		(50)	
Balance to 1972			80	40

[1]Represents the 1970 minimum tax exemption.
[2]Imposition of 1970 minimum tax (10 pct.×$50,000=$5,000).

(b) In 1972, the conversion of suspense preferences into actual items of tax preferences under section 58(g) (and this paragraph) and the imposition of the minimum tax on 1970 items of tax preference under section 56(b) (and § 1.56-2) are determined as follows:

Conversion of suspense preferences:

1970 NET OPERATING LOSS

[In thousands of dollars]

	U.S. taxable income	Foreign taxable income	U.S. deductions	Suspense preferences	Other foreign deduction
Total	$25	$105		$40	$80
1. U.S. deduction against U.S. income			Not applicable		
2. Other foreign deductions against foreign income		(80)		(25)	(80)
3. Suspense preferences against foreign income		(25)		(15)	
4. Suspense preference against U.S. income	[1](15)				
Balance	10				

[1]Suspense preferences converted into actual items of tax preference.

Imposition of minimum tax on 1970 items of tax preference:

1970 NET OPERATING LOSS

[In thousands of dollars]

	[2]1972 taxable income	Nonpreference portion	Preference portion	Suspense portion
Total	$130	$80		$40
1. 1972conversion of suspense preferences pursuant to sec. 58(g)		$25	15	(40)
Adjusted NOL		25	95	
2. Nonpreference portion against taxable income	(25)	(25)		
3. Preference portion against taxable income	[3](95)		(95)	
Balance	10			

[1]Imposition of 1970 minimum tax (10 pct.×$95,000=$9,500).

(2) *Per-country limitation.*—(i) *In general.* If a taxpayer is on the per-country foreign tax credit limitation for the taxable year, the amount by which the items of tax preference to which this section applies reduce the tax imposed by chapter 1 (other than the minimum tax under section 56) on income from sources within the United States is determined separately with respect to each foreign country or possession of the United States. Such determination is made in a manner consistent with subparagraph (1) of this paragraph as modified in subdivision (ii) of this subparagraph. In applying subparagraph (1)(i) of this paragraph to a taxpayer on the per-country limitation, if the total potential preference amounts (as defined in this subdivision (i)) exceed the taxpayer's taxable income from sources within the United States, then, for

purposes of subparagraph (1)(i)(c) of this paragraph (relating to the U.S. taxable income limitation on the amount treated as a reduction of U.S. taxable income), the taxable income from sources within the United States which is reduced by potential preference amounts with respect to each foreign country or possession is an amount which bears the same relationship to such income as the potential preference amount with respect to such foreign country or possession bears to the total of the potential preference amounts with respect to all foreign countries and possessions. For purposes of this subparagraph, the potential preference amount with respect to a foreign country or possession is the lesser of the amount of foreign source preference (described in subparagraph (1)(i)(*a*) of this paragraph) attributable to such country or possession or the amount of foreign source loss (described in subparagraph (1)(i)(*b*) of this paragraph) attributable to such country or possession.

(ii) *Net operating loss.* Where there is an overall net operating loss for the taxable year and the total of the potential preference amounts with respect to all foreign countries and possessions exceeds the taxpayer's taxable income from sources within the United States, the amount of such excess is treated as "suspense preferences". The suspense preferences are converted into actual items of tax preference, arising in the loss year and subject to the provisions of section 56, as the net operating loss is used in other taxable years, in the form of a net operating loss deduction under section 172, to offset taxable income from sources within the United States. Suspense preferences attributable to a foreign country or possession which, in other taxable years, reduce taxable income from sources within such country or possession or offset taxable income from sources within any other foreign country or possession loose their character as suspense preferences and, thus, are never converted into actual items of tax preference. The amount of the suspense preferences which are converted into actual items of tax preference is equal to that portion of the net operating loss attributable to the suspense preferences which offsets taxable income from sources within the United States in taxable years other than the loss year. The determination of the component parts of the net operating loss and the determination of the amount by which the portion of the net operating loss attributable to the suspense preferences offsets taxable income from sources within the United States is made on a year-by-year basis in the same order as the net operating loss is used in accordance with section 172(b). Such determination is made by applying deductions attributable to United States source income first against such income and applying deductions attributable to income from sources within a foreign country or possession of the United States first against income from sources within such country or possession and in accordance with the following principles:

(*a*) Deductions attributable to items or classes of gross income from sources within the United States offset taxable income from sources within the United States before any remaining deductions;

(*b*) Deductions attributable to items or classes of gross income from sources within any foreign country or possession of the United States which are not suspense preferences (referred to in this paragraph as "other foreign deductions") offset taxable income from sources within such country or possession before any remaining deductions;

(*c*) Suspense preferences attributable to items or classes of gross income from sources within a foreign country or possession offset any remaining taxable income from sources within such foreign country or possession after application of (*b*) of this subdivision (ii) before any remaining deductions;

(*d*) Suspense preferences from each foreign country and possession (remaining after application of (c) of this subdivision (ii)) offset taxable income from sources within the Unted States (remaining after application of (*a*) of this subdivision (ii)) before other foreign deductions pro rata on the basis of the total of such suspense preferences;

(*e*) Other foreign deductions from each foreign country and possession (remaining after application of (*b*) of this subdivision (ii)) offset taxable income from sources within the United States (remaining after application (*a*) and (*b*) of this subdivision (ii)) pro rata on the basis of the total of such other foreign deductions;

(*f*) Deductions attributable to income from sources within the United States (remaining after application of (*a*) of this subdivision (ii)) offset taxable income from sources within any foreign country or possession before any foreign deductions;

(*g*) Other foreign deductions from each foreign country and possession (remaining after application of (*b*) and (*e*) of this subdivision (ii)) offset taxable income from sources within any other foreign countries or possessions (remaining after application of (*f*) of this subdivision (ii)) pro rata on the basis of the total of such other foreign deductions; and

(*h*) Suspense preferences (remaining after the application of (*c*) and (*d*) of this subdivision (ii)) offset taxable income from sources within any foreign country or possession (remaining after the application of (*f*) and (*g*) of this subdivision (ii)) pro rata on the basis of the total of such suspense preferences.

For purposes of the above computations, taxable income is computed with the modifications specifed in section 172(b)(2) or section 172(c), whichever is applicable. However, the amount of suspense preferences which are converted into actual items of tax preference in accordance with the above principles is reduced to the extent the suspense preferences offset increases in taxable income from sources within the United States due to the modifications specified in section 172(b)(2) or section 172(c). For this purpose, suspense preferences are considered to offset an increase in taxable income due to section 172(b)(2) or section 172(c) modifications only after reducing taxable income computed before such modifications.

(iii) *Examples.* The principles of this subparagraph may be illustrated by the following examples in each of which the per-country foreign tax credit limitation is applicable. For purposes of these examples, personal deductions and exemptions are disregarded.

Example (1). The taxpayer has the following items of income and deduction for the taxable year 1971:

	United States	France	Germany	United Kingdom
Gross income	$180,000	$165,000	$50,000	$75,000
Deductions:				
Preference				(45,000)
Other	(120,000)	(125,000)	(80,000)	(100,000)
Taxable income (or loss)	60,000	40,000	(30,000)	(70,000)

(a) Pursuant to subdivision (i) of this subparagraph, the potential preference amount in the case of the United Kingdom is the lesser of the preferences attributable to the United Kingdom ($45,000) or the excess of deductions over gross income from sources within the United Kingdom ($70,000) and the potential preference amounts in the case of France and Germany are zero in both cases since the preferences attributable to both countries are zero. Since the total potential preference amounts ($45,000) is less than the taxable income from sources within the United States ($60,000), no modification of U.S. taxable income is required. Thus, the amount by which the U.K. preferences reduce the tax on taxable income from sources within the United States, determined in a manner consistent with subparagraph (1)(i) of this paragraph, is the smallest of (1) the items of tax preference attributable to the United Kingdom ($45,000), (2) the excess of deductions over gross income attributable to the United Kingdom ($70,000), or (3) taxable income from sources within the United States ($60,000). The full $45,000 of U.K. preference items are, therefore, taken into account as items of tax preference in 1971 and subject to the minimum tax. Since there is no net operating loss, subdivision (ii) of this subparagraph does not apply.

(b) If the French taxable income is $15,000 instead of $40,000, a $25,000 net operating loss (on a worldwide basis) results. The determination of the foreign preference items taken into account pursuant to subdivision (i) of this subparagraph is the same as in (a) of this example. Subdivision (ii) of this subparagraph again does not apply since the total potential preference amounts ($45,000) is less than the U.S. taxable income ($60,000).

Example (2). For the taxable year 1972, the taxpayer has a net operating loss of $35,000 consisting of the following items of income and deduction:

	United States	France	Germany	United Kingdom	Belgium
Gross income	$250,000	$50,000	$60,000	$5,000	$45,000
Deductions:					
Preferences		(35,000)	(70,000)	(95,000)	
Other	(100,000)	(75,000)	(30,000)		(40,000)
Taxable income (or loss)	150,000	(60,000)	(40,000)	(90,000)	5,000

(a) Pursuant to subdivision (i) of this subparagraph the potential preference amount with respect to each country is the lesser of the amount shown as preferences with respect to such country or the amount of the loss from such country. Thus, the potential preference amounts in this case are:

France	$35,000
Germany	40,000
United Kingdom	90,000
Belgium	0
Total	165,000

Since the total of the potential preference amounts exceeds the U.S. taxable income, in applying the principles of subparagraph (1)(i) of this paragraph, U.S. taxable income which is reduced by potential preference amounts with respect to each country is a pro-rata amount based on the total potential preference amounts as follows:

	(a) Preferences	(b) Loss	(c) U.S. taxable income	(d) Smallest of (a), (b), or (c)
France	$35,000	$60,000	$81,818	$31,818
Germany	70,000	40,000	36,364	36,364
United Kingdom	95,000	90,000	81,818	81,818
Belgium				
Total				150,000

France (35,000/165,000×$150,000)—$31,818
Germany (40,000/165,000×$150,000)—$36,364
United Kingdom (90,000/165,000×$150,000)— $81,818
Belgium (0/165,000×$150,000)—$0
Total—$150,000.

The amount by which the foreign preference items offset U.S. taxable income pursuant to subdivision (i) of this subparagraph is then determined as follows:

Thus, $150,000 of the total foreign preference items will be taken into account pursuant to subdivision (i) of this subparagraph as items of tax preference in 1972 and subject to the provisions of section 56.

(b) Pursuant to subdivision (ii) of this subparagraph, the 1972 net operating loss of $35,000 will consist of suspense preferences of $15,000 and other foreign deductions of $20,000 attributable to each foreign country as shown below and determined as follows:

Explanation	United States	Deductions: France Preferences	France Other	Germany Preferences	Germany Other	United Kingdom preferences	Belgium other
	$100,000	$35,000	$75,000	$70,000	$30,000	$95,000	$40,000
1. U.S. deductions against U.S. income ($250,000)	(100,000)						
2. Other foreign deductions against foreign income (per-country) [1]			(50,000)		(30,000)		(40,000)
3. Suspense preferences against remaining foreign income (per-country)					(30,000)		(5,000)
4. Suspense preferences against remaining U.S. income:							
France (35,000/165,000×$150,000)		(31,818)					
Germany (40,000/165,000×$150,000)					(36,364)		
U.K. (90,000/165,000×$150,000)						(81,818)	
5. Other foreign deductions against remaining U.S. income (0)			Not applicable.				
6. U.S. deductions against other foreign income			Not applicable.				
7. Other foreign deductions against remaining foreign income ($5,000)			(5,000)				
8. Suspense preferences against remaining foreign income (0):			Not applicable.				
Balance (components of NOL)		3,182	20,000	3,636		8,182	

[1] Foreign income amounts before step 2 are: France—$50,000; Germany—$60,000; United Kingdom—$5,000; Belgium—$45,000.

Example (3). In 1973, the taxpayer has taxable income (computed without regard to the net operating loss deduction) from the following sources and in the following amounts:

United States	France	Germany	United Kingdom
$100,000	$60,000	$20,000	$30,000

In addition, the taxpayer has a net operating loss deduction of $235,000 resulting from a 1972 net operating loss consisting of the following amounts:

Deductions attributable to income from sources within the United States	$25,000
Suspense preferences attributable to income from sources within France	$75,000
Deductions other than suspense preferences attributable to income from sources within France	$85,000
Deductions other than suspense preferences attributable to sources within the Netherlands	$50,000

(*a*) Pursuant to subdivision (ii) of this subparagraph, the converted suspense preferences and the remaining portions of the 1972 net operating loss carried over to 1974 are computed as follows:

[In thousands of dollars]

	1973 income				1972 net operating loss			
	United States	France	Germany	United Kingdom	United States	French suspense preferences	French other deductions	Dutch other deductions
	100	60	20	30	25	75	85	50
U.S. deductions against U.S. income	(25)				(25)			
Other foreign deductions against foreign income (per-country)		(60)					(60)	
Suspense preferences against remaining foreign income (per-country)				Not applicable.				
Suspense preferences against remaining U.S. income	(75)					(75)		
Other foreign deductions against remaining U.S. income				Not applicable.				
U.S. deductions against remaining foreign income				Not applicable.				
Other foreign deductions against remaining foreign income:								
French ($25,000/75,000 × $50,000)			(16.7)				(16.7)	
Dutch ($50,000/75,000 × $50,000)			(33.3)				(33.3)	
Suspense preferences against remaining foreign income				Not applicable.				
Balance (1972 carryover to 1974)					8.3			16.7

[1] Suspense preferences converted to actual items of tax preference.

(*b*) If, in 1972, there had been no items of tax preference without regard to the suspense preferences, the conversion of the suspense preferences in 1973 would result in a 1972 minimum tax liability under section 56(a) of $4,500 (10 percent × ($75,000−$30,000)), all of which would have been deferred by reason of section 56(b). Further, by application of section 56(b) and § 1.56-2, $20,000 of the $45,000 preference portion of the 1972 net operating loss would be treated as having reduced taxable income in 1973 resulting in the imposition in 1973 of $2,000 of the deferred 1972 minimum tax liability.

(3) *Separate limitation under section 904(f).* In the case of a taxpayer subject to the separate limitation on interest income under section 904(f), the provisions of this paragraph shall be applied in the same manner as in subparagraph (2) of this paragraph. If the taxpayer has elected the overall foreign tax credit limitation, subparagraph (2) of this paragraph shall be applied as if all income from sources within any foreign countries or possessions of the United States and deductions relating to income from such sources other than income or deductions subject to the separate limitation under section 904(f) were from a single foreign country.

(4) *Carryover of excess taxes.* For rules relating to carryover of excess taxes described in paragraph (1) of section 56(c) when suspense preferences are converted to actual items of tax preference, see § 1.56-5(f).

(5) *Character of amounts.* Where the amounts from sources within a foreign country or possession of the United States (or all such countries or possessions in the case of a taxpayer who has elected the overall foreign tax credit limitation) which are treated as reducing chapter 1 tax on income from sources within the United States or as suspense preferences are less than the total items of tax preference described in subparagraph (1)(i)(*a*) of this paragraph attributable to such sources, the amounts so treated are considered derived proportionately from each such item of tax preference.

§ 1.58-8 Capital gains and stock options.

(a) *In general.* Section 58(g)(2) provides that the items of tax preference specified in section 57(a)(6), and § 1.57-1(b) (stock options), and section 57(a)(9), and § 1.57-1(i) (capital gains), which are attributable to sources within any foreign country or possession of the United States shall not be taken into account as items of tax preference if, under the tax laws of such country or possession, preferential treatment is not accorded:

(1) In the case of stock options, to the gain, profit, or other income realized from the transfer of shares of stock pursuant to the exercise of an option which is under United States tax law a qualified or restricted stock option (under section 422 or section 424); and

(2) In the case of capital gains, to gain from the sale or exchange of capital assets (or property treated as capital assets under United States tax law).

Where capital gains are not accorded preferential treatment within a foreign country, capital losses as well as capital gains from such country are not taken into account for purposes of the minimum tax.

(b) *Source of capital gains and stock options.* Generally, in determining whether the capital gain or stock option item of tax preference is attributable to sources within any foreign country or possession of the United States, the principles of sections 861-863 and the regulations thereunder are applied. Thus, the stock option item of tax preference, representing compensation for personal services, is attributable, in accordance with § 1.861-4, to sources within the country in which the personal services were performed. Where the capital gain item of tax preference represents gain from the purchase and sale of personal property, such gain is attributable, in accordance with § 1.861-7, entirely to sources within the country in which the property is sold. In accordance with paragraph (c) of § 1.861-7, in any case in which the sales transaction is arranged in a particular manner for the primary purpose of tax avoidance, all factors of the transaction, such as negotiations, the execution of the agreement, the location of the property, and the place of payment, will be considered, and the sale will be treated as having been consummated at the place where the substance of the sale occurred.

(c) *Preferential treatment.* For purposes of this section, gain, profit, or other income is accorded preferential treatment by a foreign country or possession of the United States if (1) recognition of the income, for foreign tax purposes, is deferred beyond the taxpayer's taxable year or comparable period for foreign tax purposes which coincides with the taxpayer's U.S. taxable year in cases where other items of profit, gain, or other income may not be deferred; (2) it is subject to tax at a lower effective rate (including no rate of tax) than other items of profit, gain, or other income, by means of a special rate of tax, artifical deductions, exemptions, exclusions, or similar reductions in the amount subject to tax; (3) it is subject to no significant amount of tax; or (4) the laws of the foreign country or possession by any other method provide tax treatment for such profit, gain, or other income more beneficial than the tax treatment otherwise accorded income by such country or possession. For the purpose of the preceding sentence, gain, profit, or other income is subject to no significant amount of tax if the amount of taxes imposed by the foreign country or possession of the United States is equal to less than 2.5 percent of the gross amount of such income.

(d) *Examples.* The principles of this section may be illustrated by the following examples:

Example (1). The Bahamas imposes no income tax on individuals or corporations, whether resident or nonresident. Since capital gains are subject to no tax in the Bahamas, capital gains are considered to be accorded preferential treatment and will be taken into account for purposes of the minimum tax.

Example (2). In France, except in certain cases involving the sale of large blocks of stock, a nonresident individual is not subject to tax on isolated capital gains transactions. Since such capital gains are not subject to tax in France, they are considered to be accorded preferential treatment irrespective of the treatment accorded other capital gains in France and such gains will be taken into account for purposes of the minimum tax.

Example (3). In Germany, in the case of the sale within 1 taxable year of 1 percent or more of the shares of a corporation in which an individual taxpayer is regarded as holding a substanital interest, the gains on the sale of the large block of stock will be taxed as extraordinary income at one-half the ordinary income tax rate. Since these gains are taxed as a reduced rate of tax in comparison to other income, they are considered to be accorded preferential treatment and will be taken into account for purposes of the minimum tax.

Example (4). In Belgium, gains derived by an individual in the course of regular speculative transactions are taxed as ordinary income, but with an upper limit of 30 percent. Rates of tax on individuals in Belgium range from approximately 30 percent to approximately 60 percent. Since the gains on speculative transactions are taxed at a maximum rate which is more beneficial then the rates accorded to other income, such gains are considered to be accorded preferential treatment and will be taken into account for purposes of the minimum tax.

Example (5). In France, gains derived by a company on the sale of fixed assets held for less than 2 years are treated as short-term gains. The excess of short-term gains in any fiscal year is taxed at the full company tax rate of 50 percent. However, this tax may be paid in equal portions over the 5 years immediately following the realization of such short-term gains. Since recognition of the short-term gains for tax purposes is subject to deferral over a 5-year period, such gains are considered to be accorded preferential treatment and will be taken into account for purposes of the minimum tax.

Example (6). Also in France, in the case of the sale or exchange by a company of depreciable assets and nondepreciable asset owned for at least 2 years, the excess of long-term capital gains over long-term capital losses in a fiscal year is subject to an immediate tax at the reduced rate of 10 percent. Such excess, reduced by the 10-percent tax, is carried in a special reserve account on the taxpayer's books. If the excess is reinvested in other fixed asset within a stated period, no further tax is due. If the amounts in the special reserve are distributed, they will be treated as ordinary income for the fiscal year in which the distribution is made. Since such gains (other than those distributed in the same fiscal year they are realized) are subject to deferral or a reduced rate of tax, they are (except to the extent distributed in the year of realization) considered to be accorded preferential treatment and are taken into account for purposes of the minimum tax.

Example (7). In Sweden, in the case of gains derived by an individual on the sale of shares or bonds held for 5 years or less, 25 percent of the gains are taxed if the holding period is 4 to 5 years, 50 percent of the gain is taxed if the holding period is 3 to 4 years, and 75 percent of the gain is taxed if the holding period is 2 to 3 years. The gain is fully taxable at ordinary income rates if held for less than 2 years. Thus, gains on shares or bonds held for 2 years or more are considered accorded preferential treatment in Sweden since they are either subject to exemption or treatment comparable to the U.S. capital gains deduction and are taxed at a reduced rate. Thus, such gains are taken into account for purposes of the minimum tax.

Example (8). Pursuant to Article XIV of the United States-United Kingdom Income Tax Convention, a resident of the United States is exempt from United Kingdom tax on most capital gains. Since such capital gains are exempt from United Kingdom taxation, they are considered to be accorded preferential treatment and are taken into account for purposes of the minimum tax.

Example (9). An individual resident of the United States, is desirous of selling his stock in a corporation listed on the New York Stock Exchange. He requests the stock certificates from his broker in the United States, travels to a foreign country, delivers the certificates to a broker in that country, and has the foreign broker execute the sale which takes place on the New York Stock Exchange. Since the sale was consummated in the United States, pursuant to paragraph (b) of this section and § 1.861-7, the resulting capital gain item of tax preference is attributable to sources within the United States.

Example (10). Two individuals, both residing in the United States, negotiate and reach agreement in New York City for the sale of stock of a closed corporation. Prior to the transfer of the stock, in order to avoid imposition of the minimum tax, both individuals travel to a foreign country which does not accord preferential treatment to capital gains, but imposes a 5-percent rate of income tax which would be fully creditable against U.S. tax under sections 901 and 904 if the capital gains were sourced in that country. The stock is actually transferred and consideration paid in the foreign country. Since the primary purpose of consummating the sale in the foreign country was the avoidance of tax, pursuant to paragraph (b) of this section, and § 1.861-7(c), the resulting capital gain item of tax preference will be considered attributable to sources within the country in which the substance of sale took place or, in this case, the United States.

PAR. 7. Section 1.381(c)(1)-1(a) is amended by adding new subparagraph (3) immediately after subparagraph (2) of that section. The amended provision reads as follows:

§ 1.381(c)(1)-1 Net operating loss carryovers in certa incorporate acquisitions.

(a) *Carryover requirement.* • • •

(3) For purposes of the tax imposed under section 56, the acquiring corporation succeeding to and taking into account any net operating loss carryovers of the distributor or transferor corporation shall also succeed to and take into account along with such net operating loss carryforward any deferred tax liability under section 56(b) and the regulations thereunder attributable to such net operating loss carryover.

• • • • •

PAR. 8. Section 1.382(b)-1 is amended by adding new paragraph (h) immediately after paragraph (g). The amended provision reads as follows:

§ 1.382(b)-1 Change in ownership as the result of a reorganization.

• • • • •

(h) *Minimum tax for tax preferences.* For purposes of the tax imposed under section 56, the acquiring corporation succeeding to and taking into account any net operating loss carryovers of the transferor corporation shall also succeed to and take into account along with such net operating loss carryover any deferred tax liability under section 56(b) and the regulations thereunder attributable to such net operating loss carryover. Any reduction of net operating loss effected pursuant to section 382 and the regulations thereunder shall, for purposes of section 56(b) and the regulations thereunder and section 1.58-7, be deemed to reduce the portions of such net operating loss described in such provisions proportionately.

Par. 9. Section 1. 443 is deleted.

PAR. 10. Section 1.443-1 is amended by redesignating paragraph (d) as paragraph (e) and by adding new paragraph (d) immediately after paragraph (c). These amended provisions read as follows:

V 43 / 177 SE 12 78

§ 1.443-1 Returns for period of less than 12 months.

• • • • • •

(d) *Adjustment in exclusion for computing minimum tax for tax preferences.* (1) If a return is made for a short period on account of any of the reasons specified in subsection (a) of section 443, the $30,000 amount specified in section 56 (relating to minimum tax for tax preferences), modified as provided by section 58 and the regulations thereunder, shall be reduced to the amount which bears the same ratio to such specified amount as the number of days in the short period bears to 365.

(2) *Example.* The provisions of this paragraph may be illustrated by the following example:

Example. A taxpayer who is an unmarried individual has been granted permission under section 442 to change his annual accounting period files a return for the short period of 4 months ending April 30, 1970. The $30,000 amount specified in section 56 is reduced as follows:

$120/365 \times \$30,000 = \$9,835.89$.

(e) *Cross references.* • • •

PAR. 11. Section 1.453 is deleted.

PAR. 12. Section 1.453-7 is amended by revising subparagraphs (2) and (3) of paragraph (b). These amended provisions read as follows:

§ 1.453-7 Change from accrual to installment method by dealers.

• • • • • •

(b) *Adjustment to tax.* • • •

(2) The tax determined in any of the steps provided in subparagraph (1) of this paragraph shall be the tax imposed by chapter 1, subtitle A of the Internal Revenue Code of 1954 other than the tax imposed by section 56 (relating to the minimum tax for tax preferences); or chapter 1, not including subchapter D, relating to excess profits, nor subchapter E, relating to tax on self-employment income, of the Internal Revenue Code of 1939.

(3) The computation of the adjustment provided in section 453(c)(2) may be illustrated by the following example, the principles of which are equally applicable to sales under a revolving credit plan which are reported on the installment method:

ADJUSTMENTS IN TAX ON CHANGE TO INSTALLMENT METHOD

	Taxable years (prior to change)		Adjustment years (after change)	
	Year 1	Year 2	Year 3	Year 4
Gross profit from installment sales (receivable in periodic payments over 5 yr)	$100,000	$50,000	[1]$20,000 [2]10,000 [3]80,000	[4]$12,000 [5]8,000 [6]40,000 [7]90,000
Other income	80,000	200,000	90,000	90,000
Gross income	180,000	250,000	200,000	240,000
Deductions	60,000	50,000	50,000	80,000
Taxable income	120,000	200,000	150,000	180,000
Tax rate assumed (percentage of tax, other than tax imposed by sec. 56)	30	50	40	40
Tax would be	36,000	100,000	60,000	72,000

Computation of adjustment in year 3		Lesser tax portions
Year 1 items		
In year 3 (portion of tax)	20,000/200,000×60,000=$6,000	
In year 1 (portion of tax)	20,000/180,000×36,000=$4,000	$4,000
Year 2 items		
In year 3 (portion of tax)	10,000/200,000×60,000=$3,000

PAR. 13. Section 1.511 is deleted.

PAR. 14. There is inserted immediately after § 1.511-3 the following new section:

§ 1.511-4 Minimum tax for tax preferences.

The tax imposed by section 56 applies to an organization subject to tax under section 511 with respect to items of tax preference which enter into the computation of unrelated business taxable income. For this purpose, only those items of income and those deductions entering into the determination of the tax imposed by this section are considered in the determination of the items of tax preference under section 57. For rules relating to the minimum tax for tax preferences, see sections 56 through 58 and the regulations thereunder.

PAR. 15. Section 1.614-3 is amended by revising subdivisions (iii), (iv), and (v) of subparagraph (3) of paragraph (g) to read as follows:

§ 1.614-3 Rules relating to separate operating mineral interests in the case of mines.

• • • • • •

(g) *Special rule as to deductions under section 615(a) prior to aggregation.* • • •

(3) *Recomputation of tax.* • • •

(iii) *Effect of recomputation with respect to items based on amount of income.* In making the recomputation of tax under this subparagraph for any taxable year, any deduction, credit, or other allowance which is based upon the adjusted gross income or taxable income of the taxpayer for such year shall be recomputed taking into account the adjustment required under subdivision (ii) of this subparagraph. For example, if a corporate taxpayer's taxable income is increased under the provisions of such subdivision, then the amount of charitable contributions which may be deducted under the limitation contained in section 170(b)(2) shall be correspondingly increased for purposes of the recomputation. Moreover, the effect that the recomputation of any deduction, credit, or other allowance for a taxable year has on the tax imposed for any other taxable year shall also be taken into account for purposes of the recomputation of tax under this subparagraph. Any change in items of tax preferences (as defined in section 57 and the regulations thereunder) must also be taken into account for purposes of the recomputation under this subparagraph.

(iv) *Effect of recomputation with respect to a net operating loss and a net operating loss deduction.* If the recomputation of tax under this subparagraph for the taxable year for which the recomputation is required to be made results in a reduction of a net operating loss for such year, then the taxpayer shall take into account the effect of such reduction on the tax imposed by chapter 1 of the Internal Revenue Code of 1954 (or by corresponding provisions of the Internal Revenue Code of 1939) for any taxable year affected by such reduction. If the recomputation of tax for the taxable year for which the recomputation is required to be made results in an increase in taxable income as defined in section 172(b)(2) for such year, then the taxpayer shall take into account the effect of such increase on the tax imposed by chapter 1 of the Internal Revenue Code of 1954 (or by corresponding provisions of the Internal Revenue Code of 1939) for any taxable year affected by such increase. Furthermore, in making the recomputation of tax for any taxable year for which the recomputation is required to be made, the taxpayer shall take into account any change in the net operating loss deduction for such year resulting from the recomputation of tax for any other taxable year for which a recomputation is required to be made. For provisions relating to the net operating loss deduction, see section 172 and the regulations thereunder. For rules relating to the effect of the net operating loss deduction on the minimum tax for tax preferences see section 56 and the regulations thereunder and § 1.58-7.

(v) *Determination of increase in tax.* If the taxpayer elects to form an aggregation or aggregations for a taxable year under section 614(c)(1) and if a recomputation of tax is required to be made under this paragraph for any prior taxable year or years, then the taxpayer shall compute the difference between the tax, including the tax imposed by section 56 (relating to the minimum tax for tax preferences), as recomputed under this subparagraph for such prior taxable year or years (and other taxable years affected by the recomputation) and the tax liability previously determined (computed without regard to section 614(c)(4)) with respect to such prior taxable year or years (and other taxable years affected by the recomputation). If the taxpayer is subsequently required to make a recomputation with respect to any taxable year or years for which he has previously made a recomputation, then the taxpayer shall compute the difference between the tax as subsequently recomputed for such taxable year or years (and other taxable years affected by the subsequent recomputation) and the tax as previously recomputed for such taxable year or years (and other taxable years affected by the subsequent recomputation). For treatment of the increase in tax resulted from the recomputation of tax under this subparagraph, see subparagraph (4) of this paragraph.

• • • • • •

PAR. 16. Section 1.642(h)-1 is amended by revising paragraph (b) to read as follows:

§ 1.642(h)-1 Unused loss carryovers on termination of an estate or trust.

• • • • • •

(b) The net operating loss carryover and the capital loss carryover are the same in the hands of a beneficiary as in the estate or trust, except that the capital loss carryover in the hands of a beneficiary which is a corporation is a short-term loss irrespective of whether it would have been a long-term or short-term capital loss in the hands of the estate or trust. The net operating loss carryover and the capital loss carryover are taken into account in computing taxable income, adjusted gross income, and the tax imposed by section 56 (relating to the minimum tax for tax preferences). The first taxable year of the beneficiary to which the loss shall be carried over is the taxable year of the beneficiary in which or with which the estate or trust terminates. However, for purposes of determining the number of years to which a net operating loss, or a capital loss under paragraph (a) of § 1.1212-1, may be carried over by a beneficiary, the last taxable year of the estate or trust (whether or not a short taxable year) and the first taxable year of the beneficiary to which a loss is carried over each constitute a taxable year, and, in the case of a beneficiary of an estate or trust that is a corporation, capital losses carried over by the estate or trust to any taxable year of the estate or trust beginning after December 31, 1963, shall be treated as if they were incurred in the last taxable year of the estate or trust (whether or not a short taxable year). For the treatment of the net operating loss carryover when the last taxable year of the estate or trust is the last taxable year to which such loss can be carried over, see § 1.642(h)-2.

• • • • • •

PAR. 17. Section 1.642(h)-2 is amended by revising paragraph (a) to read as follows:

§ 1.642(h)-2 Excess deductions on termination of an estate or trust.

(a) If, on the termination of an estate or trust, the estate or trust has for its last taxable year deductions (other than the deductions allowed under section 642(b) (relating to personal exemption) or section 642(c) (relating to charitable contributions)) in excess of gross income, the excess is allowed under section 642(h)(2) as a deduction to the beneficiaries succeeding to the property of the estate or trust. The deduction is allowed only in computing taxable income and must be taken into account in computing the items of tax preference of the beneficiary; it is not allowed in computing adjusted gross income. The deduction is allowable only in the taxable year of the beneficiary in which or with which the estate or trust terminates, whether the year of termination of the estate or trust is of normal duration or is a short taxable year. For example: Assume that a trust distributes all of its assets to B and terminates on December 31, 1954. As of that date it has excess deductions, for example, because of corpus commissions on termination, of $18,000. B, who reported on the calendar year basis, could claim the $18,000 as a deduction for the taxable year 1954. However, if the deductions (when added to his other deductions) exceeds his gross income, the excess may not be carried over to the year 1955 or subsequent years.

• • • • • •

PAR. 18. Section 1.682(b)-1 is amended by revising paragraph (a) to read as follows:

§ 1.682(b)-1 Application of trust rules to alimony payments.

(a) For the purpose of the application of subparts A through D (section 641 and following), part I, subchapter J, chapter 1 of the Code, the wife described in section 682 or section 71 who is entitled to receive payments attributable to property in trust is considered a beneficiary of the trust, whether or not the payments are made for the benefit of the husband

V 43 / 177 SEP 12 78

in discharge of his obligations. A wife treated as a beneficiary of a trust under this section is also treated as the beneficiary of such trust for purposes of the tax imposed by section 56 (relating to the minimum tax for tax preferences). For rules relating to the treatment of items of tax preference with respect to a beneficiary of a trust, see § 1.58-3.

* * * * * *

PAR. 19. Section 1.702-1 is amended by adding new paragraph (e) immediately after paragraph (d). As amended this provision reads as follows:

§ 1.702-1 Income and credits of partner.

* * * * * *

(e) *Cross reference.* For special rules in accordance with the principles of section 702 applicable solely for the purpose of the tax imposed by section 56 (relating to the minimum tax for tax preferences) see § 1.58-2(a).

PAR. 20. Section 1.901 is deleted.

PAR. 21. Section 1.901-1 is amended by revising paragraph (f) to read as follows:

§ 1.901-1 Allowance of credit for taxes.

* * * * * *

(f) *Taxes against which credit not allowed.* The credit for taxes shall be allowed only against the tax imposed by chapter 1 of the Code, but it shall not be allowed against the taxes imposed for the taxable year under the sections listed in section 901(a).

* * * * * *

PAR. 22. Section 1.1245-2 is amended by inserting after the third sentence of paragraph (a)(7) the following new sentence:

§ 1.1245-2 Definition of recomputed basis.

(a) *General rule.* * * *

(7) *Depreciation or amortization allowed or allowable.* * * * No adjustment is to be made on account of the tax imposed by section 56 (relating to the minimum tax for tax preferences). * * *

* * * * * *

PAR. 23. Section 1.1341-1(b) is amended by revising subdivision (ii) of subparagraph (1) to read as follows:

§ 1.1341-1 Restoration of amounts received or accrued under claim of right.

* * * * * *

(b) *Determination of tax.* (1) * * *

(ii) The tax for the taxable year computed under section 1341(a)(5), that is, without taking such deduction into account, minus the decrease in tax (net of any increase in tax imposed by section 56, relating to the minimum tax for tax preferences) (under chapter 1 of the Internal Revenue Code of 1954, under chapter 1 (other than subchapter E) and subchapter E of chapter 2 of the Internal Revenue Code of 1939, or under the corresponding provisions of prior revenue laws) for the prior taxable year (or years) which would result solely from the exclusion from gross income of all or that portion of the income included under a claim of right to which the deduction is attributable. For the purpose of this subdivision, the amount of the decrease in tax is not limited to the amount of the tax for the taxable year. See paragraph (i) of this section where the decrease in tax for the prior taxable year (or years) exceeds the tax for the taxable year.

* * * * * *

PAR. 24. Section 1.1372-1 is amended by revising paragraph (a) and subparagraph (1) of paragraph (b). These amended provisions read as follows:

§ 1.1372-1 Election by small business corporation.

(a) *Eligibility.* Under section 1372, an eligible small business corporation may elect not to be subject to the taxes imposed by chapter 1 of the Code (other than the tax imposed by section 1378 for taxable years beginning after April 14, 1966, and the tax imposed by section 56 for taxable years ending after December 31, 1969). The qualifications of a small business corporation must be met as of the first day of the first taxable year of the corporation for which the election is to be effective and on the date of election, unless the election is made after such first day, in which case the qualifications need not exist prior to the date of election. For example, the existence of a corporate shareholder or a nonresident alien as a shareholder prior to the date of election does not preclude qualification. However, if the election is made for a taxable year beginning before September 3, 1958, the qualifications must be met on such date and on each day after such date and before the date of the election. The election by a small business corporation is valid only if all the shareholders in the corporation on the first day of the first taxable year for which the election is to be effective, or on the day of election, whichever is later, consent to such election. See § 1.1372-3, relating to shareholders' consent.

(b) *Effect of election—(1) Effect on corporation.* The effect on a small business corporation of a valid election under section 1372 is to exempt such corporation from the taxes imposed by chapter 1 of the Code (other than the tax imposed by section 1378 for taxable years beginning after April 14, 1966, and the tax imposed by section 56 for taxable years ending after December 31, 1969) with respect to taxable years of the corporation for which the election is in effect and to subject the corporation with respect to such taxable years and all of its subsequent taxable years to section 1377, relating to special rules for computing the earnings and profits of an election small business corporation.

* * * * * *

PAR. 25. Section 1.1373 is deleted.

PAR. 26. Section 1.1373-1 is amended by revising paragraph (b) to read as follows:

§ 1.1373-1 Corporation undistributed taxable income taxed to shareholders.

* * * * * *

(b) *Determination of amount included by shareholders.* To determine the amount each shareholder must include in his gross income as provided in paragraph (a) of this section it is necessary to—

(1) Compute the taxable income of the electing small business corporation for its taxable year in accordance with the provisions of paragraph (c) of this section.

(2) Determine in accordance with paragraph (d) of this section the amount of money distributed as dividends during the taxable year out of earnings and profits of such year.

(3) Determine in accordance with §§ 1.56-1 through 1.56-4 the amount of tax imposed by section 56 for the taxable year.

(4) Determine in accordance with §§ 1.1378-1 through 1.1378-3 the amount of tax imposed by section 1378 for the taxable year.

(5) Subtract the sum of the amounts determined in subparagraphs (2), (3), and (4) of this paragraph from the amount computed in subparagraph (1) of this paragraph. The result is the undistributed taxable income for the taxable year.

(6) Determine in accordance with paragraph (e) of this section the amount that would be treated as a dividend to such shareholder if an amount of money equal to such undistributed taxable income were distributed pro rata to the shareholders of the corporation on the last day of the taxable year of the corporation in a distribution which is not in exchange for stock.

* * * * * *

PAR. 27. Section 1.1375 is deleted.

PAR. 28. Section 1.1375-1 is amended by revising paragraph (a) and subparagraph (1) of paragraph (b). These amended provisions read as follows:

§ 1.1375-1 Special rules applicable to capital gains.

(a) *In general.* The amount includable by a shareholder in gross income as dividends received from an electing small business corporation during any taxable year of such coprporation shall be treated as long-term capital gain to the extent, if any, of such shareholder's pro rata share of the excess of the corporation's net long-term capital gain over its net short-term capital loss for such taxable year. For this purpose, such excess shall be reduced by the amount of the taxes imposed by sections 56 and 1378 on the income of the corporation for the taxable year, and the amount of such excess so reduced shall not exceed the taxable income (as defined in section 1373(d) of the corporation for the taxable year. This capital gain treatment applies both to actual distributions of dividends and to amounts treated as dividends pursuant to section 1373(b); however, it applies only to the extent that a dividend is out of earnings and profits of the current taxable year of the corporation. Furthermore, this capital gain treatment applies whether or not the shareholder held any stock in the corporation at the close of the taxable year of the corporation.

(b) *Determination of pro rata share.* * * *

(1) The excess of the corporation's net long-term capital gain over its net short-term capital loss for the taxable year, reduced by the amount of tax, if any, imposed by sections 56 and 1378 on the income of the corporation for such year;

* * * * * *

PAR. 29. Section 1.6012-1 is amended by adding new subparagraph (9) immediately after subparagraph (8) of paragraph (a). The amended provisions read as follows:

§ 1.6012-1 Individuals required to make returns of income.

(a) *Individual citizen or resident.* * * *

(9) *Items of tax preference.* For a taxable year ending after December 31, 1969, an individual shall attach Form 4625 to the return required by this paragraph if during the year the individual—

(i) Has items of tax preference (described in section 57) in excess of its minimum tax exemption (determined under § 1.58-1) or

(ii) Uses a net operating loss carryover from prior taxable year in which it deferred minimum tax under section 56(b).

* * * * * *

PAR. 30. Section 1.6012-2 is amended by redesignating paragraph (i) as paragraph (j) and by adding new paragraph (i) immediately after paragraph (h). The amended provision reads as follows:

§ 1.6012-2 Corporations required to make returns of income.

* * * * * *

(i) *Items of tax preference—(1) In general.* Every corporation required to make a return under this section and having items of tax preference (described in section 57 and the regulations thereunder) in any amount shall file the required form relating to such items as part of such return.

(2) *Organizations with unrelated business income and foreign corporations.* Regardless of the provisions of paragraphs (e) and (g) of this section, any organization described in either such paragraph having items of tax preference (described in section 57 and the regulations thereunder) in any amount entering into the computation of unrelated business income is required to make a return on form 990-T or form 1120F, respectively, and to attach the required form as part of such return.

(j) *Other provisions.* * * *

PAR. 31. Section 1.6012-3 is amended by revising subparagraph (1) of paragraph (a) to read as follows:

§ 1.6012-3 Returns of fiduciaries.

(a) *For estates and trusts—(1) In general.* Every fiduciary, or at least one of joint fiduciaries, must make a return of income on form 1041 (or by use of a composite return pursuant to § 1.6012-5) and attach the required form if the estate or trust has items of tax preference (as defined in section 57 and the regulations thereunder) in any amount—

* * * * * *

PAR. 32. Section 1.6015(c) is deleted.

Par. 34. Section 106031-1 is amended by revising paragraph (a) to read as follows:

§ 1.6031-1 Return of partnership income.

(1) *General rule.* Except as provided in paragraphs (b) and (d) of this section with respect to certain organizations excluded from the application of subchapter K, chapter 1 of the Code, and certain partnerships having no U.S. business, an unincorporated organization defined as a partnership in section 761(a), through or by means of which any business, financial operation, or venture is carried on, shall make a return for each taxable year on form 1065. For purposes of filing a partnership return, an unincorporated organization will not be considered, within the meaning of section 761 (a), to carry on a business, financial operation, or venture as a partnership before the first taxable year in which such organization receives income or incurs any expenditures treated as deductions for Federal income tax purposes. Such return shall state specifically the items of partnership gross income and the deductions allowable by subtitle A of the Code and shall include the names and addresses of all the partners and the amount of the distributive shares of income, gains, loss, deduction, or credit (including any items which enter into the determination of the tax imposed by section 56) allocated to each partner. Such return shall be made for the taxable year of the partnership, irrespective of the taxable years of the partners. For taxable years of a partnership and of a partner, see section 706 and § 1.706-1. For signing of a partnership return, see § 1.6063-1.

* * * * * *

PAR. 35. Section 1.6032-1 is amended by revising such section to read as follows:

§ 1.6032-1 Returns of banks with respect to common trust funds.

Every bank (as defined in section 581) maintaining a common trust fund shall make a return of income of the common trust fund, regardless of the amount of its taxable income. If a bank maintains more than one common trust fund, a separate return shall be made for each. No particular fund is prescribed for making the return under this section, but form 1065 may be used if it is designated by the bank as the return or common trust fund. The return shall be made for the taxable year of the common trust fund and shall be filed on or before the 15th day of the fourth month following the close of such taxable year with the district director for the district in which in which the income tax return of the bank is filed. Such return shall state specifically with respect to the fund the items of gross income and the deductions allowed by subtitle A of the Code, shall include each participant's name and address, the participant's proportionate share of taxable income or net loss (exclusive of gains and losses from sales of exchanges of capital assets), the participant's proportionate share of gains and losses from sales or exchanges of capital assets, and the participant's share of items which enter into the determination of the tax imposed by section 56. See § 1.584-2 and § 1.58-5. A copy of the plan of the common trust fund must be filed with the return. If, however, a copy of such plan has once been filed with a return, it need not again be filed if the return contains a statement showing when and where it was filed. If the plan is

V 4 3 / 1 7 7

amended in any way after such copy has been filed, a copy of the amendment must be filed with the return for the taxable year in which the amendment was made. For the signing of a return of a bank with respect to common trust funds, see § 1.6062-1, relating to the manner prescribed for the signing of a return of a corporation.

PAR. 36. Section 1.6411-1 is amended by adding at the end of paragraph (a) the following new sentence:

§ 1.6411-1 Tentative carryback adjustments.

(a) *In general.* * * * In determining any decrease in tax under §§ 1.6411-1 through 1.6411-4, the decrease in tax is determined net of any increase in the tax imposed by section 56 (relating to the minimum tax for tax preferences).

* * * * * *

PAR. 37. Section 1.6654 is deleted.

* * * * * *

PAR. 40. Section 301.6015 is deleted.
SEC. 41. Section 301.6654 is deleted.

[3710-08]

Title 32—National Defense

CHAPTER V—DEPARTMENT OF THE ARMY

PART 581—PERSONNEL REVIEW BOARDS

Procedures and Standards of the Army Discharge Review Board

AGENCY: Army Discharge Review Board.

ACTION: Final rule.

SUMMARY: Revised rules of procedure of the Army Discharge Review Board in implementation of Department of Defense Directive 1332.28 were published in the FEDERAL REGISTER on April 13, 1978 (43 FR 15572). The following specific modifications are made in further compliance with Department of Defense Directive 1332.28 as directed by the Assistant Secretary of Defense (Manpower, Reserve Affairs and Logistics).

EFFECTIVE DATE: September 8, 1978.

FOR FURTHER INFORMATION CONTACT:

Col. Albert A. Covington, 202-697-3166.

WILLIAM E. WEBER,
Colonel, IN, President, Army Discharge Review Board.

Accordingly, the rules of procedure of the Army Discharge Review Board are amended as follows:

(a) In paragraph (d)(2)(ii), delete last sentence.

(b) In paragraph (i)(1)(ii), delete last phrase starting with "when" and place a period after "question".

(c) In paragraph (i)(5), delete in the second sentence, "The record of the votes of board members, and minority opinions, if any," and substitute, "The decisional document (see Appendix E)".

(d) In paragraph (i)(6), add the following at the end of the paragraph: Any other privileged or classified material contained in or appended to any documents required by this agreement to be furnished the applicant and counsel/representative or made available for public inspection and copying may be deleted therefrom, only if a written statement of the basis for the deletions is provided the applicant and counsel/representative and made available for public inspection. It is not intended that the statement be so detailed as to reveal the nature of the withheld material.

(e) In paragraph 3m of Appendix B, change the period to a comma, and add the following at the end of the second sentence: "subject to reasonable limitations based upon available space."

(f) In paragraph 3n(5) of Appendix B, in the first sentence after "Applicants" add "who present sworn or unsworn statements".

(g) In paragraph 3o(1) of Appendix B, add the following sentence at the end: "A DD Form 293 provided for this purpose must be completed or amended prior to the ADRB's decision."

(h) In paragraph 4 of Appendix B, add the following paragraph:

"k. As a general matter, like cases should receive like treatment. However, the existence of certain similarities between a particular case and a past case decided by a Board does not necessarily require that the two be decided identically because there may be differences that require differing results. For example, differing results may be compelled by factual distinctions, differing equities, changes in policy, the credibility of witnesses and other evidence."

(i) In paragraph 3c(2)(c) of Appendix C, add a comma and "although not amounting to prejudicial error, may have" after the second "which" in the first sentence.

(j) In paragraph 2d of Appendix D, place a period after the word "them" in the last sentence and delete the final words contained in the parenthesis.

(k) In paragraph 2n of Appendix D, delete the last sentence.

[FR Doc. 78-25585 Filed 9-11-78; 8:45 am]

[1410-1]

Title 37—Patents, Trademarks and Copyrights

CHAPTER III—COPYRIGHT ROYALTY TRIBUNAL

PART 303—ACCESS TO PHONORECORD PLAYERS (JUKEBOXES)

Regulations for Copyright Owner Access to Phonorecord Players (Jukeboxes) and Certain Establishments

AGENCY: Copyright Royalty Tribunal (CRT).

ACTION: Final rule.

SUMMARY: Copyright Royalty Tribunal adopts rule whereby persons who may reasonably be expected to have claims resulting from public performance of nondramatic musical works by coin-operated phonorecord players may have access to such establishments and to the phonorecord players to determine the proportion of contribution of the musical works of such person to the earnings of the phonorecord players for which fees have been deposited. The rule requires the recording in the offices of the Copyright Royalty Tribunal of current listings of locations where licensed phonorecord players are placed, and the number of players at such locations. The rule establishes the regulations required by 17 U.S.C. 116(c)(5) to assist the functions of the Copyright Royalty Tribunal, as provided in 17 U.S.C. 801(b).

EFFECTIVE DATE: October 10, 1978.

FOR FURTHER INFORMATION CONTACT:

Thomas C. Brennan, Chairman, Copyright Royalty Tribunal, 202-653-5175.

SUPPLEMENTARY INFORMATION: 17 U.S.C. 116(c)(5) requires the CRT to promulgate regulations "under which persons who can reasonably be expected to have claims may, during the year in which performances take place, without expense to or harassment of operators or proprietors of establishments in which phonorecord players are located, have such access to such establishments and to the phonorecord players located therein and such opportunity to obtain information with respect thereto as may be

reasonably necessary to determine, by sampling procedures or otherwise, the proportion of contribution of the musical works of each such person to the earnings of the phonorecord players for which fees shall have been deposited."

On December 8, 1977 the CRT issued an advance notice of proposed rulemaking concerning access to phonorecord (jukebox) players (42 FR 62019). On May 12, 1978 the CRT published a proposed rule on this subject (43 FR 20513). A public hearing on the proposed rule was conducted on June 21, 1978. Under the rules of the CRT, interested persons were permitted to make formal statements, present witnesses, and cross-examine witnesses. Additional written materials were received by the CRT prior to the closing of the hearing record. Both the hearing and the comment period afforded interested persons a full opportunity to present all relevant jurisdictional and policy issues.

Enforcement of the Copyright Act—The proceedings of the CRT and the public records of the Copyright Office of the Library of Congress establish that the number of jukeboxes licensed in accordance with the provisions of section 116 of the Copyright Act and the regulations of the Copyright Office is substantially less than the number of jukeboxes estimated to be in operation at the time of the proceedings in the Congress on the Copyright Act. While there are no accurate statistics as to the number of jukeboxes currently performing copyrighted musical compositions, the record suggests that a number of jukeboxes have not been licensed. The CRT has determined that this situation is not relevant to the proceedings of the CRT. While the failure of jukebox operators to pay the required royalty fees will reduce the total royalty fees to be distributed by the CRT, the Congress has not granted any authority to the CRT to enforce those provisions of the Copyright Act applying to the licensing of jukeboxes. If jukebox operators are not in compliance with the Copyright Act, the Copyright Act provides a remedy for injured copyright owners. If the remedy is not adequate or effective, relief should be sought in the Congress.

Legislative history—Since the representatives of jukebox operators and the manufacturers of jukeboxes have raised jurisdictional issues, as to a portion of the proposed rule, the CRT has carefully reviewed the protracted proceedings in the Congress which resulted in section 116. It is clear from these proceedings and the specific language in 17 U.S.C. 116(c)(5) that the Congress did not intend—in fact undertook to preclude—the imposition on jukebox operators of burdensome record-keeping requirements. The Congress however, did not bar the CRT from requiring any information of licensed jukebox operators.

Section 303.3 of the rule requires licensed jukebox operators to record with the CRT the location of establishments in which they have placed jukeboxes, and the number of such boxes. The value of such listings for distribution purposes was not unknown to the Congress. Certain versions of the copyright revision legislation included specific language providing that licensed jukebox operators list the locations of establishments. It has been suggested that the absence of this language from the enacted legislation indicates that Congress has determined that such listings are not useful for distribution purposes, and that such a requirement was excluded from the rulemaking power granted to the CRT. We do not so read the legislative history. The Senate and House committee reports accompanying the copyright revision legislation are detailed and clearly reflect the legislative intent when the Congress had so resolved. The Congress in the reports (Senate Rept. 94-473 p. 99 and House Rept. 94-1476 p. 115) has directly stated what it intended to exclude from the scope of the CRT's rulemaking jurisdiction. We conclude that the legislative history establishes only that the Congress intended to preclude the CRT from requiring jukebox operators to maintain records as to the copyrighted musical compositions being peformed, or to require the installation in jukeboxes of metering devices for counting the play of particular recordings.

Chapter 8 of title 17 establishes the CRT and enumerates the purposes for which this agency has been constituted. One of these purposes is "To afford the copyright owner a fair return for his creative work." The Congress contemplated that controversy may exist as to the distribution of royalty fees. Having constituted the CRT to resolve such disputes, it is not plausible that the Congress determined to deny copyright owners and the CRT every practical and effective means of obtaining information as to musical works actually being performed by jukeboxes. There can be no right of access to an establishment if one does not know where the establishment is located.

In resolving disputes, the CRT may well find it necessary to conduct an independent review of data submitted by claimants to establish the shares of copyright owners. The Congress surely did not intend that Commissioners walk the streets of New York or Chicago looking for establishments with licensed jukeboxes. How could private establishments with licensed jukeboxes be located? We conclude that the rule is within the grant of our rulemaking authority under the Copyright Act.

Impact of rule upon jukebox operators.—The testimony presented by jukebox operators and other representatives of the jukebox industry alleged that the proposed rule will require some operators "to add one full-time employee to their staff just to handle this extra work." The testimony of a witness claimed that "every operator I have talked to says he cannot live with these requirements." Another witness testified that the published rule would require an employee's full time for one and a half days each week.

We do not find this testimony creditable. The proposed rule should not have required any jukebox operator to hire a single employee or have consumed any significant work time of an employee. The CRT has determined that the objectives of the rule can be accomplished by further reducing the reporting requirements. As adopted, the rule will require a jukebox operator to file once a year a report if the operator has placed a jukebox in a previously unreported location, or altered the number of jukeboxes at a location.

Access to the interior of a jukebox.—The proposed rule as published provided for certain access to the interior of a jukebox if it was "essential to obtain accurate information concerning the performance of musical works." The testimony reflected that this section of the proposed rule may be burdensome to jukebox operators while of doubtful value at the present time to the CRT and copyright owners. Without prejudice to any future action on the issue, this section of the proposed rule has been deleted.

The rule and the Freedom of Information Act.—The Amusement and Music Operators Association and the manufacturers of jukeboxes assert that the location of establishments in which licensed jukeboxes are placed is confidential "commercial" information to be regarded as a listing of customers. It is further claimed that even if the information is required by the CRT it could not be made available to copyright owners, or otherwise publicly disclosed because of the Freedom of Information Act. The fourth exemption to the Freedom of Information Act embraces "trade secrets and commercial or financial information obtained from a person and privileged or confidential."

We have not found these arguments convincing, especially in the particular situation before us. We are not imposing a regulation on an industry that is operating according to the economic laws of the marketplace. The Congress

SEP 12 78

V 43 / 177 SE 12 78

determined that the performance of copyrighted musical compositions by jukeboxes should require the payment of a royalty fee. As an accommodation to the jukebox industry, the Congress enacted a statutory compulsory license, and further provided that the operators of jukeboxes would not be required to pay fees to individual copyright owners, but would merely be required to deposit the royalty fee with the Register of Copyrights. No jukebox operator is required to obtain a certificate from the Copyright Office. A jukebox operator may elect to obtain licenses from the performing rights societies and other copyright owners, or refrain from the performance of copyrighted musical compositions. Having chosen to avail itself of the statutory compulsory license, a jukebox operator cannot be said to be transacting a private commercial venture, at least as it relates to the payment and distribution of royalty fees under the provisions of the Copyright Act.

Moreover, independent of the obligations assumed by a jukebox operator who seeks a section 116 license, we find that the location of jukeboxes is not confidential "commercial" information. If another person, including a competitor, devoted the time and effort necessary, a location listing could be prepared for a particular area. We conclude on the record before us that the disclosure of the location listings to certain copyright owners will not cause substantial harm to the competitive position of a jukebox operator. We hold that the disclosure of such listings to performing rights societies as defined in 17 U.S.C. 116(e)(3) and the copyright owner of a musical composition whose work may be performed by a jukebox operator under the compulsory license is not precluded by any Federal statute, and promotes the purposes of the Congress in enacting section 116 of the Copyright Act.

Even assuming that the location listings come within the scope of exemption (4) of the Freedom of Information Act, the CRT is not barred from the disclosure of such information, at least to performing rights societies and other copyright owners. While the law in this area is evolving, the better view, as reflected in judicial decisions, legislative materials and academic commentary is that the agency has discretion as to whether exempt information should be disclosed. The courts have identified several factors which may be considered by the agency in balancing the benefits of disclosure against the possible damage to the submitter of the information. We find in this situation that the application of these factors would support the disclosure of location listings to copyright owners of musical compositions. The location lists would be filed with the CRT to assist in the execution of a specific governmental function, no promises of total confidentiality have been made by the agency, and the persons to whom the information would be disclosed have a direct and valid interest in the information, namely, to use the information to meet the requirements of the Copyright Act for the filing of claims to jukebox royalty fees.

It was not within the scope of this proceeding to consider whether the disclosure of location listings to appropriate copyright owners should be subject to any conditions or protective safeguards. Such issues may be explored in a future proceeding.

We express no opinion at this time as to whether the disclosure of location listings may, or should be, restricted to the copyright owners of musical compositions. We observe, however, that the CRT presently is not aware that any person, other than performing rights societies and other copyright owners of musical compositions, would have a valid claim to such information. This subject may be further considered in an appropriate future rulemaking proceeding.

The Privacy Act.—It has been argued that the Privacy Act (5 U.S.C. 552(b)(5)) prohibits the disclosure, even to copyright owners, of location listings of jukeboxes. Nothing in the Privacy Act or its legislative history supports such a conclusion. The concern of the Congress in enacting that legislation was to protect an individual from the "dissemination of personal information by Federal agencies" and "to provide certain safeguards for an individual against an invasion of personal privacy."

The Federal Reports Act.—It has been argued that "nothing in the Tribunal's enabling statute gives it the authority to deviate from the letter and spirit of * * * the Federal Reports Act." The Federal Reports Act provides that "Information needed by Federal agencies shall be obtained with a minimum burden upon business enterprises, especially small business enterprises, and other persons required to furnish the information, at a minimum cost to the Government." (44 U.S.C. 3501.)

It has not been held that the Federal Reports Act applies to independent agencies of the legislative branch. However, the rule as adopted is consistent with the objectives of that statute. The information required to be furnished is not otherwise available to the Federal Government, and is to be obtained "with a minimum burden upon business enterprises."

Use of trade charts.—Certain testimony and statements presented during this proceeding advocated the use of trade charts as a fair and expeditious means for determining the respective shares of copyright owners. In determining that location listings are necessary to provide effective access by copyright owners to establishments in which jukeboxes are located, the CRT at this time refrains from any judgment as to the value of trade charts for distribution purposes.

Denial of right of access.—Section 116(c)(5) provides that any person who alleges that "he or she has been denied the access permitted under the regulations prescribed by the Copyright Royalty Tribunal may bring an action in the U.S. District Court for the District of Columbia for the cancellation of the compulsory license of the phonorecord player to which such access has been denied." We hold that a licensed jukebox operator who does not comply with all the provisions of this rule is denying copyright owners the access granted by the Copyright Act and the regulations of the CRT, and that such operator is not complying with the requirements of the statutory compulsory license.

Since the matter is not before us, we did not consider if there are judicial means, other than a suit brought by a copyright owner under section 116(c)(5), to enforce this regulation of the CRT.

Accordingly, pursuant to 17 U.S.C. 116(c)(5), the purposes of the Copyright Royalty Tribunal set forth in 17 U.S.C. 801(b), and the phonorecord player royalty distribution jurisdiction provided in 17 U.S.C. 801(b)(3), 37 CFR chapter III is amended by adding a new part 303, reading as follows:

Sec.
303.1 General.
303.2 Access to establishments and phonorecord players.
303.3 Recording of location listing in Copyright Royalty Tribunal.

Authority: (17 U.S.C. 116(c)(5); 17 U.S.C. 801(b).)

§ 303.1 General.

This regulation prescribes the procedures pursuant to 17 U.S.C. 116 by which persons who can reasonably be expected to have claims to royalty fees paid by the operators of coin-operated phonorecord players under the compulsory license established by 17 U.S.C. 116 may have access to the establishments in which such phonorecord players are located and to the phonorecord players located therein to obtain information which may be reasonably necessary to determine the proportion of contribution of the musical works of each such person to the earnings of the phonorecord players for which fees shall have been deposited. The terms "operator" and "coin-operated phonorecord player" have the meanings given to them by paragraph (3) of section 116 of title 17.

§ 303.2 Access to establishments and phonorecord players.

A person, or authorized representatives of such person, who can reasonably be expected to have claims to royalty fees paid by the operators of phonorecord players shall have access to the establishments in which such phonorecord players are located during customary business hours on regular business days. Such access shall be only for the purpose of obtaining information concerning the performance of musical works by the phonorecord players. The right of access shall be exercised in such a manner as not to cause any significant interference with the normal functioning of an establishment.

§ 303.3 Recording of location listings in Copyright Royalty Tribunal.

(a) Not later than November 1, 1978, every operator of a phonorecord player who has filed in the Copyright Office an application for a phonorecord player compulsory license according to the requirements of 17 U.S.C. 116 and the regulations of the Copyright Office and been issued prior to October 1, 1978 a Copyright Office phonorecord player certificate, shall record in the offices of the Copyright Royalty Tribunal a list identifying the location or locations where licensed phonorecord players of the operator are placed, and the number of phonorecord players at any location with more than one such player.

(b) Every operator of a phonorecord player who subsequent to October 1, 1978, obtains his initial Copyright Office phonorecord certificate shall record in the office of the Copyright Royalty Tribunal within thirty days after the issuance of the initial certificate a list identifying the location or locations where licensed phonorecord players of the operator are placed, and the number of phonorecord players at any location with more than one such player.

(c) On October 1 of each year every operator of a phonorecord player who alters the number of licensed phonorecord players at a location reported under paragraph (a) or (b) of this section, or who has provided a licensed phonorecord player or players to a location not previously reported to the Copyright Royalty Tribunal shall report to the Copyright Royalty Tribunal the revised number of phonorecord players or that new location and the number of licensed phonorecord players at the location.

(d) The location listing required under this section shall include the full address of the location, including a specific number and street name or rural route.

Approved: September 6, 1978.

THOMAS C. BRENNAN,
Chairman,
Copyright Royalty Tribunal.

PART 305—CLAIMS TO PHONORECORD PLAYER (JUKEBOX) ROYALTY FEES

Regulations for Copyright Owners Filing Claims to Phonorecord Player (Jukebox) Royalty Fees

AGENCY: Copyright Royalty Tribunal (CRT).

ACTION: Final rule.

SUMMARY: Copyright Royalty Tribunal adopts rule prescribing procedures whereby persons claiming to be entitled to compulsory license fees for public performances of nondramatic musical works by coin-operated phonorecord players (jukeboxes) shall file claims with the Copyright Royalty Tribunal. The rule prescribes the content and time of filing of such claims. The rule is necessary to implement section 116(c)(2) of the Act for the General Revision of the Copyright Law.

EFFECTIVE DATE: October 10, 1978.

FOR FURTHER INFORMATION CONTACT:

Thomas C. Brennan, Chairman, Copyright Royalty Tribunal, 202-653-5175.

SUPPLEMENTARY INFORMATION: Section 116(c)(2) of the Act for the General Revision of the Copyright Law requires the Copyright Royalty Tribunal to adopt regulations whereby persons claiming to be entitled to compulsory license fees for the performance of nondramatic musical works by coin-operated phonorecord players may file claims to such fees. The Tribunal in the FEDERAL REGISTER of February 14, 1978 (43 FR 6262) published an advance notice of progposed rulemaking. A proposed rule was published in the FEDERAL REGISTER of July 28, 1978 (43 FR 32826). Comments on the proposed rule were requested not later than August 21, 1978.

No objection to the proposed rule has been received. The American Society of Composers, Authors and Publishers proposed a technical amendment, which has been adopted. The amendment revises §§ 305.2 and 305.3(a) to clarify the application of that language to the membership structure of the American Society of Composers, Authors and Publishers.

Certain comments submitted during this rulemaking proceeding discussed the use of trade charts as a means for determining the respective shares of copyright owners to the jukebox royalty fees. In adopting this rule as to the content of claims to jukebox royalty fees, the Tribunal expresses no opinion as to the value of any method of resolving disputes concerning the distribution of jukebox royalties. Such determinations should be made, if necessary, in a jukebox distribution proceeding.

Accordingly, pursuant to 17 U.S.C. 116(c)(2), 37 CFR chapter III is amended by adding a new part 305, reading as follows:

Sec.
305.1 General.
305.2 Time of filing.
305.3 Content of claims.
305.4 Justification of claims.
305.5 Forms.

AUTHORITY: 17 U.S.C. 116(c)(2).

§ 305.1 General.

This regulation prescribes procedures pursuant to 17 U.S.C. 116(c)(2), whereby persons claiming to be entitled to compulsory license fees for public performances of nondramatic musical works by means of coin-operated phonorecord players shall file claims with the Copyright Royalty Tribunal.

§ 305.2 Time of filing.

During the month of January in each year every person claiming to be entitled to phonorecord player fees for performances of nondramatic musical works during the preceding calendar year shall file a claim with the Copyright Royalty Tribunal. Claimants may file jointly or as a single claim. A performing rights society shall not be required to obtain from its members or affiliates separate authorizations, apart from their standard membership or affiliation agreements, for purposes of this filing and fee distribution.

§ 305.3 Content of claims.

The claims filed shall include the following information:

(a) The full legal name of the person or entity claiming compulsory license fees. Performing rights societies are not required to include lists of members or affiliates to whom distributions would be made by such societies.

(b) The full address, including a specific number and street name or rural route, of the place of business of the person or entity.

(c) A specific agreement to accept as final the determination of the Copyright Royalty Tribunal in any controversy concerning the distribution of

royalty fees, except for the judicial review provided in 17 U.S.C. 116.

§ 305.4 Justification of claims.

(a) Not later than the first day of November of each year, every person or entity which has filed a claim pursuant to § 305.2 shall file with the Copyright Royalty Tribunal a statement claiming the proportionate share of compulsory license fees to which such person or entity believes it is entitled. The statement shall include a detailed justification for the requested entitlement and shall also include such specific information as the Copyright Royalty Tribunal may require by regulation or order.

(b) The entitlement justification statement required by subsection (a) need not be filed with the Copyright Royalty Tribunal if it has been determined by the Tribunal that there is no controversy as to the distribution of royalty fees.

§ 305.5 Forms.

The Copyright Royalty Tribunal does not provide printed forms for the filing of claims.

Approved: September 6, 1978.

THOMAS C. BRENNAN,
Chairman, Copyright Tribunal Royalty.

Title 40—Protection of Environment

CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

SUBCHAPTER C—AIR PROGRAMS

[FRL 963-1]

PART 81—AIR QUALITY CONTROL REGIONS, CRITERIA AND CONTROL TECHNIQUES

Section 107—Attainment Status Designations

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) was required under the Clean Air Act Amendments of 1977, to publish on a State-by-State, pollutant-by-pollutant basis the attainment status of all areas within the States in relation to the national ambient air quality standards (NAAQS). Both the States and EPA can initiate changes to these designations, but any State redesignation must be submitted to EPA for concurrence. This rulemaking discusses comments received in response to the Administrator's determination of the attainment status of EPA Region III States in relation to the national ambient air quality standards (Mar. 3, 1978, 43 FR 8962). This rulemaking also corrects typographical errors that appeared in the March 3, 1978 final rulemaking; announces designation changes with respect to total suspended particulates (TSP), sulfur dioxide (SO_2), carbon monoxide (CO_2), and photochemical oxidants; and reaffirms the Administrator's designation of attainment status for those areas for which redesignation is not necessary. EPA will accept comments whenever information not previously considered is submitted.

EFFECTIVE DATE: September 12, 1978.

ADDRESS: Comments on these designations should be addressed to: Mr. Howard R. Heim, Chief, Air Programs Branch, U.S. Environmental Protection Agency, Region III, Curtis Building, 10th Floor, Sixth and Walnut Streets, Philadelphia, Pa. 19106.

Copies of the associated support material are available for public inspection during normal business hours at the following locations: U.S. Environmental Protection Agency, Region III, Curtis Building, 10th Floor, Sixth and Walnut Streets, Philadelphia, Pa. 19106, or Public Information Reference Unit, Room 2922, EPA Library, U.S. Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT:

Mr. Harold A. Frankford (3AH12), U.S. Environmental Protection Agency, Region III, Curtis Building, Sixth and Walnut Streets, Philadelphia, Pa. 19106, phone 215-597-8392.

SUPPLEMENTARY INFORMATION: On March 3, 1978 (49 FR 8962), the Administrator of the Environmental Protection Agency published designations of attainment and nonattainment in each State for the following air pollutants: total suspended particulates (TSP), sulfur dioxide (SO_2), carbon monoxide, photochemical oxidants, and oxides of nitrogen (NO_2). These designations of attainment and nonattainment are required under section 107(d) of the Clean Air Act as amended. The public was invited to comment on the Administrator's designations, with comments due by May 2, 1978.

During the public comment period, EPA Region III received comments concerning both general and specific issues relating to the designation process.

COMMENTS RELATING TO TYPOGRAPHICAL ERRORS

The District of Columbia, Pennsylvania, and West Virginia submitted comments pointing out typographical errors with respect to designation of attainment and nonattainment areas for TSP. For the District of Columbia, the boundaries for the areas considered attainment and nonattainment for primary standards are redefined in this notice to correct the typographical error. For Pennsylvania, the remainder of the south-central Pennsylvania intrastate air quality control region (AQCR) should be designated as attainment for TSP. In addition, that portion of the Beaver Valley air basin which is located in the northwest Pennsylvania interstate AQCR was inadvertently designated as an attainment area. The correct designation is nonattainment for primary standards. The change for West Virginia corrects the name of the Falls and Kanawha Magisterial Districts to the Valley Magisterial District.

COMMENTS RELATING TO CARBON MONOXIDE

Comments with respect to the designations for carbon monoxide for the National Capital interstate AQCR were submitted by the State of Maryland, Commonwealth of Virginia, and the Metropolitan Washington Council of Governments (MWCOG). The State of Maryland requested that only "areas of high traffic density" in the Maryland portion of the National Capital interstate AQCR be designated nonattainment while the remaining areas in the Maryland portion of the National Capital interstate AQCR be designated "unclassifiable or attainment." The comments submitted by MWCOG recommended that only the portion of Fairfax County inside the Capital Beltway (I-495) be designated nonattainment while the portion of Fairfax County outside of the Capital Beltway be designated "unclassifiable or attainment." The Commonwealth of Virginia requested that Arlington County be designated as a nonattainment area.

Because of the nature of carbon monoxide, violations of the national standards are likely to occur at areas of high traffic density. However, EPA does not at the present time have enough information to delineate specific boundaries of nonattainment for CO in the Maryland and the Fairfax County, VA. portions of the National Capital interstate AQCR. Therefore, the Administrator deems it appropriate to designate a general "area of high traffic density" as nonattainment for carbon monoxide without designating specific boundaries. However, in the attainment plans to be submitted by the States on January 1, 1979, the States are encouraged to address in more specific detail the nonattainment areas for carbon monoxide and the type of measures required to meet the

national ambient air quality standards.

COMMENTS RELATING TO PHOTOCHEMICAL OXIDANTS

At the time of the March 3, 1978 designations, EPA Region III followed a policy of designating an entire AQCR as exceeding the primary standard (nonattainment) for photochemical oxidants if there was at least one monitor in the AQCR showing nonattainment. This policy is consistent with national guidance issued by EPA. Comments in support of statewide or AQCR-wide nonattainment designations were received from the city of Philadelphia, the State of New Jersey, and the State of Maryland. Comments in support of designation of smaller areas around a nonattainment monitor (such as the county or urbanized area) were received from the Commonwealth of Virginia; Carroll County, Md.; and the Bethlehem Steel Corp. Although EPA strongly encourages statewide or AQCR-wide designation of nonattainment for oxidants, there is sufficient flexibility in the national guidance to allow the following policy regarding the minimum geographical areas necessary to be designated as nonattainment for oxidants:

1. Where a nonattainment monitor exists in an urbanized area with a 1970 census population greater than 200,000, the entire urbanized area is to be designated as nonattainment.

2. In all other areas with a nonattainment monitor, the minimum area to be designated as nonattainment is the county containing the nonattainment monitor.

The Commonwealth of Virginia formally requested that oxidant nonattainment designations for Virginia be revised in accordance with this policy. The designations published today reflect the changes requested by Virginia.

Although there are areas of EPA Region III formally designated as "unclassifiable or attainment," the Administrator believes that most of these areas will be nonattainment for photochemical oxidants when monitoring data become available. Monitoring data required to be submitted with applications of new sources for prevention of significant deterioration (PSD) permits (sec. 165) will be used by the Administrator to make future determinations of the attainment status for photochemical oxidants. Should an area be determined to be nonattainment in the future, the State would then be required to develop an attainment plan.

COMMENTS RELATING TO SULFUR DIOXIDE

EPA's policy relating to designations for sulfur dioxide permit the use of either modeling or monitoring to determine the attainment status. Comments opposed to the use of modeling to make attainment status determinations were received from Allegheny Power Service Corp., Pennsylvania Power & Light Co., and Westvaco Corp. Other recommendations of designation changes were received as follows:

1. The Pennsylvania Department of Environmental Resources requested the following changes:

a. The status of the Beaver Valley air basin in the southwest Pennsylvania intrastate air quality control region should be changed from attainment to unclassifiable.

b. The status of the Beaver Valley air basin in the northwest Pennsylvania interstate air quality control region should be changed from attainment to unclassifiable.

2. The Westvaco Corp. has requested that the unclassifiable designation for election district No. 8, Luke, Md, and the Piedmont Magisterial District in West Virginia be revised to attainment.

The Administrator concurs with the request of the Pennsylvania Department of Environmental Resources and today's publication reflects the changes in the Beaver Valley air basin. However, the Administrator has not changed the status of election district No. 8 in Luke, Md., and the Piedmont Magisterial District in West Virginia pending a final decision on a request which is presently under consideration to revise the Maryland State implementation plan (SIP). The State of Maryland originally submitted this request on July 16, 1975, seeking an exception for the Westvaco Corp. from the Maryland sulfur-in-fuel regulations. At that time, the effective State regulation which was part of the federally enforceable SIP required the use of fuel containing a maximum of 1 percent sulfur by weight. Maryland's request for an exception would have allowed Westvaco Corp. to burn coal with a higher sulfur content at its Luke, Md. mill. At the same time, Westvaco Corp. would have been allowed to emit a maximum of 58 tons per day of sulfur dioxide (SO_2) from all fuel burning equipment at the Luke facility. The State of Maryland, on behalf of Westvaco Corp., submitted a modeling analysis intended to demonstrate that the requested exception would not result in violations of the national ambient air quality standards (NAAQS) for SO_2. Upon review of the analysis, EPA determined that it underpredicted the impact of SO_2 emissions on the area surrounding the Luke mill. Therefore, EPA concluded that the analysis did not provide a demonstration that air quality standards would be attained or maintained if the exception were to be approved as a SIP revision. Subsequent meetings were held with the State of Maryland and Westvaco Corp. in an attempt to resolve differences between Westvaco Corp.'s modeling approach submitted in support of the requested exception and the technical approach which EPA believed to be appropriate. Although these discussions resulted in the resolution of some minor differences, the more significant technical issues remained in dispute. Therefore, on February 28, 1977, EPA notified the State of Maryland that the request for an exception was not approvable as a revision of the Maryland SIP.

On November 18, 1977, the State of Maryland submitted an amended request for an exception on behalf of Westvaco Corp. The amended submission would grant an exception to Westvaco Corp. to emit a maximum 49 tons per day of SO_2 from all fuel burning equipment at the Luke mill instead of the 58 tons per day previously requested. After evaluating the revised submission, EPA continued to believe that the modeling analysis submitted on behalf of Westvaco Corp. did not demonstrate that the 49 tons per day limitation would not violate the NAAQS for SO_2. Accordingly, on March 6, 1978 (43 FR 9162) the Regional Administrator published notice of a proposed disapproval of the State of Maryland's request for an exception for Westvaco Corp.'s Luke mill as a revision of the Maryland SIP. The notice of proposed rulemaking afforded all interested parties 30 days from the date of publication in which to comment upon the proposal. Subsequently, Westvaco Corp. has sought five separate extensions of the public comment period on the grounds that more time was needed to prepare its comments. In each case EPA has extended the public comment period to accommodate Westvaco Corp. Most recently, the public comment period has been extended to September 8, 1978.

During this lengthly public comment period EPA has received information from numerous interested parties, including Westvaco Corp.; moreover, additional information may yet be submitted. Until conclusion of the public comment period on September 8, 1978, and exhaustive review of the information submitted, the Administrator will not finally determine whether the exception for Westvaco Corp.'s Luke mill is approvable as a revision of the Maryland SIP. Likewise, until completion of the review of all of the technical information generated by this rulemaking proceeding and the making of a final decision, the Admin-

istrator believes it would be appropriate to defer any further action regarding the classification of the Luke, Md. Piedmont Magisterial District, West Virginia area. Therefore, the Administrator intends to retain the unclassified status for this area as promulgated in the March 3, 1978 FEDERAL REGISTER pending a final decision on the proposed revision of the Maryland SIP. Retention of the designation as unclassified will have no impact on the final decision concerning the proposed SIP revision. However, the final decision on the SIP revision will serve to resolve any dispute concerning the area's designation, and redesignation will then be appropriate.

COMMENTS RELATING TO TOTAL SUSPENDED PARTICULATES

EPA policy regarding the designation of attainment status for total suspended particulates (TSP) permits the use of either monitoring or modeling. The most current four calendar quarters of data can be utilized. However, if the current four quarters show attainment, then the previous four quarters must also be evaluated. If the previous four quarters show nonattainment, then the area must be designated as nonattainment. EPA policy also allows the disqualification of monitors that may be unduly influenced by fugitive dust, including urban street dust.

The Bethlehem Steel Corp. submitted comments objecting to designations for the following areas:

1. Allentown, Bethlehem, Easton air basin in the northeast Pennsylvania interstate AQCR: The Company requested that the designation of nonattainment for primary standards be revised to attainment.

2. Harrisburg air basin in the south-central intrastate AQCR: The Company requested that the designation of nonattainment for primary standards be revised to attainment.

3. Zone 472 of regional planning district (RPD) 331 in the Metropolitan Baltimore intrastate AQCR: The Company requested that the designation of nonattainment for primary standards be revised to nonattainment for secondary standards. The FEDERAL REGISTER notice which appeared on March 3, 1978 incorrectly listed this zone twice, once as nonattainment for secondary standards and again as nonattainment for primary standards.

4. Zones 470 and 471 of RPD 331 in the Metropolitan Baltimore intrastate AQCR: The Company requested that the designation of nonattainment for secondary standards be revised to attainment.

The State of Maryland submitted revised designations for the Metropolitan Baltimore intrastate AQCR. These revisions are based on a review of more current data and a review of monitor locations.

West Virginia submitted additional information and requested that the designation of nonattainment for primary standards for the Kanawha Valley intrastate AQCR be revised to attainment.

The Metropolitan Washington Council of Governments recommended that:

1. The unclassifiable designation for the city of Fairfax and county of Fairfax be revised to attainment.

2. The unclassifiable designation for the city of Alexandria be revised to nonattainment for secondary standards.

In consultation with the Pennsylvania Department of Environmental Resources, the Administrator has determined that it is not appropriate to revise the nonattainment designations for the Allentown, Bethlehem, Easton air basin and the Harrisburg air basin. A review of the monitoring sites in the Allentown, Bethlehem, Easton air basin has resulted in a determination that at least one monitor in that air basin shows nonattainment. Although there is some question about the adequacy of the monitoring site in the Harrisburg air basin, Pennsylvania is conducting additional studies and, if appropriate, will request a revision to the nonattainment status at a later date.

The Administrator concurs with the changes requested by the State of Maryland. The notice published today reflects those changes. In consultation with the State of Maryland, the Administrator has determined that zones 470, 471, and 472 should remain as nonattainment for secondary standards.

EPA has carefully reviewed the information submitted by West Virginia. It is the Administrator's determination that the Kanawha Valley intrastate AQCR should remain as nonattainment for primary standards. This decision is based on the fact that, although the current four quarters of data indicate that the standard is being attained, the previous four quarters show violations of the annual standard.

In response to the comments from the Metropolitan Washington Council of Governments, the Administrator believes that it is appropriate to retain the unclassifiable designation for the cities of Fairfax and Alexandria and the county of Fairfax due to unresolved questions about the adequacy of Virginia's particulate monitoring network.

FUTURE EPA ACTIONS

Although this action is being taken as a final rule, EPA will consider comments at any time and make appropriate changes in attainment designations. Comments should be sent to Mr. Howard R. Heim, Chief, Air Programs Branch, U.S. Environmental Protection Agency, Region III, Curtis Building, 10th Floor, Sixth and Walnut Streets, Philadelphia, Pa. 19106.

Dated: September 1, 1978.

DOUGLAS M. COSTLE,
Administrator.

Part 81 of chapter I, title 40 of the Code of Federal Regulations is amended to read as follows:

Subpart C—Section 107 Attainment Status Designations

* * * * *

Sec.
81.308 Delaware.

Title 46—Shipping

CHAPTER IV—FEDERAL MARITIME COMMISSION

SUBCHAPTER B—REGULATIONS AFFECTING MARITIME CARRIERS AND RELATED ACTIVITIES

[General Order 4, Amdt. 4]

PART 510—LICENSING OF INDEPENDENT OCEAN FREIGHT FORWARDERS

Approval of Reporting Requirements

AGENCY: Federal Maritime Commission.

ACTION: Final rule.

SUMMARY: Rules providing for the licensing of persons including individuals, corporations, partnerships, and associations as independent ocean freight forwarders are amended to reflect an extension of existing General Accounting Office clearance for the reporting and recordkeeping requirements contained therein. The amendment is necessary to comply with GAO regulations.

EFFECTIVE DATE: September 12, 1978.

FOR FURTHER INFORMATION CONTACT:

Francis C. Hurney, Secretary, Federal Maritime Commission, 1100 L Street NW., Washington, D.C. 20573, 202-523-5725.

SUPPLEMENTARY INFORMATION: 44 U.S.C. 3512 requires the General Accounting Office to review certain collections of information from 10 or more persons undertaken by independent Federal regulatory agencies.

This Commission has received clearance from the U.S. General Accounting Office for the reporting and recordkeeping requirements contained in 46 CFR Part 510 (General Order 4). Title 4 CFR, § 10.12, Notification of General Accounting Office Action, requires that notice of such clearance appear in the agency's regulations.

The clearance information is presently included in General Order 4; however, it must be amended to reflect the more specific wording of GAO's latest clearance approval. Accordingly, the clearance information statements presently appearing as the last sentence of the authority citations in subparts A and B are hereby deleted and replaced within the following statement:

The reporting requirements contained in §§ 510.5(a)(4), 510.5(c), 510.5(f), and 510.26 and the recordkeeping requirements contained in §§ 510.23(k), 510.24(e), and 510.25 of General Order 4 have been approved by the U.S. General Accounting Office under No. B-180233 (RO543).

Effective date: Notice, public procedure, and delayed effective date are not necessary for the promulgation of this amendment because of its nonsubstantive nature. Accordingly, this amendment shall be effective September 12, 1978.

By the Commission, August 30, 1978.

FRANCIS C. HURNEY,
Secretary.

[FR Doc. 78-25639 Filed 9-11-78; 8:45 am]

[6730-01]

[General Order 11, Amdt. 3]

PART 512—FINANCIAL REPORTS BY COMMON CARRIERS BY WATER IN THE DOMESTIC OFFSHORE TRADES

Approval of Reporting Requirements

AGENCY: Federal Maritime Commission.

ACTION: Final rule.

SUMMARY: Rules for financial reports submitted by vessel operating common carriers and nonvessel operating common carriers engaged in the operation of cargo vessels or in the common carriage of property in the domestic offshore trades are amended to reflect an extension of existing General Accounting Office clearance for the reporting requirements contained therein. The amendment is necessary to comply with GAO regulations.

EFFECTIVE DATE: September 12, 1978.

FOR FURTHER INFORMATION CONTACT:

Francis C. Hurney, Secretary, Federal Maritime Commission, 1100 L Street NW., Washington, D.C. 20573, 202-523-5725.

SUPPLEMENTARY INFORMATION: 44 U.S.C. 3512 requires the General Accounting Office to review certain collections of information from 10 or more persons undertaken by independent Federal regulatory agencies.

This Commission has received clearance from the U.S. General Accounting Office for the reporting requirements contained in 46 CFR Part 512, Subparts A and B, Title 4 CFR, § 10.12, Notification of General Accounting Office Action, requires that notice of such clearance appear in the agency's regulations. GAO rules have been amended to eliminate the requirement that expiration dates appear in the clearance statement. To reflect this change, and also to effectuate a change in wording of GAO's previous clearance statement, the following amendment is made to part 512. The clearance information sentence immediately following 46 CFR 512.25 "Forms and Reports," is hereby deleted. In lieu thereof, the following clearance statement will be placed at the end of the authority citation at the beginning of part 512:

The reporting requirements contained in subparts A and B, General Order 11 have been approved by the U.S. General Accounting Office under No. B-180233(R0191).

Effective date: Notice, public procedure, and delayed effective date are not necessary for the promulgation of this amendment because of its nonsubstantive nature. Accordingly, this amendment shall be effective September 12, 1978.

By the Commission, August 30, 1978.

FRANCIS C. HURNEY,
Secretary.

Title 50—Wildlife and Fisheries

CHAPTER I—UNITED STATES FISH AND WILDLIFE SERVICE, DEPARTMENT OF THE INTERIOR

PART 32—HUNTING

Opening of Ouray National Wildlife Refuge, Utah, to Migratory Game Bird Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to migratory game bird hunting of Ouray National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional opportunity to the public.

DATES: October 7, 1978 through January 7, 1979.

FOR FURTHER INFORMATION CONTACT:

Refuge Manager, Ouray National Wildlife Refuge, 447 East Main Street, Suite 4, Vernal, Utah 84078, telephone 801-789-0351.

SUPPLEMENTARY INFORMATION:

§ 32.12 Special regulations; migratory game birds; for individual wildlife refuge areas.

Migratory game bird hunting is permitted on the Ouray National Wildlife Refuge, Utah, only on the areas designated by signs as being open to hunting. These areas, comprising 1,375 acres, are delineated on maps available at the refuge headquarters and from the office of the Regional Director, U.S. Fish and Wildlife Service, 134 Union Boulevard, P.O. Box 25486, Denver, Colo. 80215. Migratory game bird hunting shall be in accordance with all applicable State regulations subject to the following conditions:

1. Ducks, mergansers and coots only may be hunted. Goose hunting is not permitted.

2. Vehicle travel within the refuge will be restricted to designated routes and parking areas.

The provisions of this special regulation supplement the regulations which govern migratory game bird hunting on wildlife refuge areas generally which are set forth in title 50 Code of Federal Regulations, part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an economic impact statement under Executive Order 11949 and OMB Circular A-107.

HERBERT G. TROESTER,
Refuge Manager, Ouray National Wildlife Refuge, Vernal, Utah.

SEPTEMBER 5, 1978.

[FR Doc. 78-25624 Filed 9-11-78; 8:45 am]

§ 32.22 Special regulations; upland game; for individual wildlife refuge areas.

Hunting of fox shall be in accordance with all applicable State regulations subject to the following conditions: (1) Hunting is permitted from 12:00 noon to sunset November 17, 1978 and from one-half hour before sunrise to sunset November 18, 1978 through the closing date of the state season.

(2) During the deer gun season red fox may be taken only by those hunters possessing a valid deer hunting license for the refuge and only on that part of the refuge open to deer hunting.

The provisions of these special regulations supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in title 50 Code of Federal regulations, part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an economic impact statement under Executive Order 11949 and OMB Circular A-107.

JOHN R. FOSTER,
Refuge Manager.

AUGUST 23, 1978.

[FR Doc. 78-25631 Filed 9-11-78; 8:45 am]

[4310-55]

PART 32—HUNTING

Opening of Arrowwood National Wildlife Refuge, North Dakota, to Upland Game Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulations.

SUMMARY: The Director has determined that the opening to upland game hunting of Arrowwood National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: Season dates November 17, 1978 through the closing of the state season.

FOR FURTHER INFORMATION CONTACT:

John R. Foster, Refuge Manager, Arrowwood National Wildlife Refuge, Pingree, N. Dak. 58476. Phone, 701-285-3341.

SUPPLEMENTARY INFORMATION:

[4310-55]

PART 32—HUNTING

Opening of Arrowwood National Wildlife Refuge, N. Dak., to Upland Game Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to upland game hunting of Arrowwood National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: Season dates November 27, 1978 through the closing of State seasons.

FOR FURTHER INFORMATION CONTACT:

John R. Foster, Refuge Manager, Arrowwood National Wildlife Refuge, Pingree, N. Dak. 58476. Phone, 701-285-3341.

SUPPLEMENTARY INFORMATION:

§ 32.22 Special regulations; upland game; for individual wildlife refuge areas.

Upland bird hunting is permitted on the Arrowwood National Wildlife Refuge, N. Dak. for sharptail grouse, Hungarian partridge and ring-necked pheasant. Hunting shall be in accordance with all applicable State regulations subject to the following condition:

(1) Hunting is permitted from sunrise to sunset November 27, 1978 through the closing date of the State seasons.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in title 50 Code of Federal Regulations, part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an economic impact statement under Executive Order 11949 and OMB Circular A-107.

JOHN R. FOSTER,
Refuge Manager.

PART 32—HUNTING

Opening of Chase Lake National Wildlife Refuge, N. Dak., to Big Game Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to deer hunting of Chase Lake National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: Season dates September 1, 1978, through September 29, 1978.

FOR FURTHER INFORMATION CONTACT:

John R. Foster, Refuge Manager, Arrowwood National Wildlife Refuge, Pingree, N. Dak. 58476, phone 701-285-3341.

SUPPLEMENTARY INFORMATION:

§ 32.32 Special regulations: Big game; for individual wildlife refuge areas.

Bow deer hunting at Chase Lake National Wildlife Refuge, N. Dak., shall be in accordance with all applicable State regulations subject to the following condition:

(1) Hunting is permitted from 12 noon to sunset September 1, 1978, and one-half hour before sunrise to sunset daily through September 29, 1978.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an economic impact statement under Executive Order 11949 and OMB Circular A-107.

JOHN R. FOSTER,
Manager.

AUGUST 28, 1978.

PART 32—HUNTING

Opening of Long Lake National Wildlife Refuge, N. Dak., to Big Game Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to deer hunting of Long Lake National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreation opportunity to the public.

DATES: Season dates November 17, 1978, through November 26, 1978.

FOR FURTHER INFORMATION CONTACT:

John R. Foster, Refuge Manager, Arrowwood National Wildlife Refuge, Pingree, N. Dak. 58476, phone 701-285-3341.

SUPPLEMENTARY INFORMATION:

§ 32.32 Special regulations: Big game; for individual wildlife refuge areas.

Deer hunting is permitted on the Long Lake National Wildlife Refuge, N. Dak., only on the areas designated by signs as being open to deer hunting. These areas comprising 19,500 acres are delineated on maps available at the refuge headquarters and from the office of the Regional Director, P.O. Box 25486, Denver Federal Center, Denver, Colo. 80225. Hunting shall be in accordance with all applicable State regulations subject to the following condition:

(1) Hunting is permitted from 12 noon to sunset November 17, 1978, and from sunrise to sunset November 18, 1978, through November 26, 1978.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an economic impact statement under Executive Order 11949 and OMB Circular A-107.

PART 32—HUNTING

Opening of Slade National Wildlife Refuge, N. Dak., to Big Game Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to big game hunting of Slade National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: Season dates November 17, 1978, through November 26, 1978.

FOR FURTHER INFORMATION CONTACT:

John R. Foster, Refuge Manager, Arrowwood National Wildlife Refuge, Pingree, N. Dak. 58476, phone 701-285-3341.

SUPPLEMENTARY INFORMATION:

§ 32.32 Special regulations: big game; for individual wildlife refuge areas.

Deer hunting is permitted on Slade National Wildlife Refuge, N. Dak., only on the areas designated by signs as being open to deer hunting. These areas comprising 2,840 acres are delineated on maps available at the refuge headquarters and from the office of the Regional Director, P.O. Box 25486, Denver, Colo. 80225. Hunting shall be in accordance with all applicable State regulations subject to the following condition:

(1) Hunting is permitted from 12 noon to sunset November 17, 1978, and from sunrise to sunset November 18, 1978, through November 26, 1978.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an economic impact statement under Executive Order 11949 and OMB Circular A-107.

PART 32—HUNTING

Opening of Arrowwood National Wildlife Refuge, N. Dak., to Big Game Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to deer hunting of Arrowwood National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: Season dates November 17, 1978, through November 26, 1978.

John R. Foster, Refuge Manager, Arrowwood National Wildlife Refuge, Pingree, N. Dak. 58476, phone 701-285-3341.

SUPPLEMENTARY INFORMATION:

§ 32.32 Special regulations: big game; for individual wildlife refuge areas.

Deer hunting is permitted on the Arrowwood National Wildlife Refuge, N. Dak., only on the areas designated by signs as being open to deer hunting. These areas comprising 14,814 acres are delineated on maps available at the refuge headquarters and from the office of the Regional Director, P.O. Box 25486, Denver Federal Center, Denver, Colo. 80225. Hunting shall be in accordance with all applicable State regulations subject to the following conditions:

(1) Hunting is permitted from 12 noon to sunset November 17, 1978, and from sunrise to sunset November 18, 1978, through November 26, 1978.

(2) From 12 noon November 17, 1978, through sunset November 19, 1978, hunting is permitted by special refuge permit only, thereafter hunting is permitted to anyone possessing a valid State license for the unit encompassing the refuge.

(3) That part of the refuge lying north of the gravel road, known as the Kensal-Edmunds Road, will be closed to deer hunting.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an economic impact statement under Executive Order 11949 and OMB Circular A-107.

Title 50—Wildlife and Fisheries

CHAPTER VI—FISHERY CONSERVATION AND MANAGEMENT, NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION, DEPARTMENT OF COMMERCE

PART 652—ATLANTIC SURF CLAM AND OCEAN QUAHOG FISHERIES

Amendment

AGENCY: National Oceanic and Atmospheric Administration/Commerce.

ACTION: Amendment.

SUMMARY: This amendment adjusts downward the catch quota for surf clams for the third quarter of 1978. The amount of surf clams taken in excess of the quota for the second quarter of 1978 (26,606 bushels) is subtracted from the quota for the third quarter of 1978 (550,000 bushels), resulting in a new third quarter surf clam quota of 523,394 bushels.

EFFECTIVE DATE: September 11, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. William G. Gordon, Regional Director, Northeast Region, National Marine Fisheries Service, 14 Elm Street, Gloucester, Mass. 01930, telephone 617-281-3600.

SUPPLEMENTARY INFORMATION: Section 652.6(1) of the surf clam and ocean quahog fishery management plan published on February 17, 1978 (43 FR 6952), provides that when the surf clam quota for any particular quarter is exceeded the Regional Director shall subtract that excess amount from the next succeeding quarter.

Catch statistics through June 30, 1978, indicate that the amended quota of 529,107 bushels of surf clams for the second quarter was exceeded by 26,606 bushels. Consequently, the Regional Director has determined that 26,606 bushels is subtracted from the third quarter quota of 550,000 bushels.

The new third quarter quota of surf clams is 523,394 bushels.

Pursuant to § 652.6(2), the Assistant Administrator for Fisheries is publishing this adjustment of the third quarterly quota.

Signed at Washington, D.C., this 7th day of September 1978.

WINFRED H. MEIBOHM,
Associate Director, National Marine Fisheries Service.

Title 7—Agriculture

CHAPTER III—ANIMAL AND PLANT HEALTH INSPECTION SERVICE, DEPARTMENT OF AGRICULTURE

PART 301—DOMESTIC QUARANTINE NOTICES

Subpart—Japanese Beetle Quarantine and Regulations

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: This action is being taken to finalize amendments to the Japanese beetle quarantine and regulations. The intended effect of this action is to delete all references to regulated articles, other than means of conveyance, from the regulations. This action is being taken because the Department believes that the States have sufficient capability to control the spread of Japanese beetles by means of the articles which are being deleted.

EFFECTIVE DATE: September 12, 1978.

FOR FURTHER INFORMATION CONTACT:

E. E. Crooks, 301-436-8249.

SUPPLEMENTARY INFORMATION: On April 21, 1978, the Department proposed to delete all references to presently regulated articles and to regulate only the interstate movement of aircraft which posed a threat to spread the Japanese beetle into certain States (43 FR 16984). Also, a notice of the Department's intent to prepare a draft environmental impact statement (DEIS) on the Japanese beetle program at airports was published in the FEDERAL REGISTER on April 21, 1978.

The comments which were received regarding the proposal primarily concerned the treatment of aircraft with insecticides. However, a number of the comments did address the deletion of presently regulated articles. One comment questioned if all States have the current capability to prevent the spread of the Japanese beetle by means other than regulated aircraft. As was maintained in the preamble of the proposal, it it believed the States have this capability.

Four of the comments recommended delay of the proposed revision until this fall when the current shipping season for plant material is over in order to allow for a more orderly change in the regulation of the nursery industry. It has been determined that the revisions in the regulations will be made effective upon publication, since it is not anticipated that any State regulation will be any more stringent than the Federal regulations. Also, nurserymen are as capable of meeting State regulations as they are Federal regulations pertaining to nursery stock, and the Department does not anticipate that the mechanics of complying with this change in the regulatory structure will constitute a substantial burden upon the nursery industry. Further, the removal of the quarantine requirements with respect to the regulated articles which are being deleted would aid the nursery industry because the Federal requirements for treatement or inspection of nursery stock will not have to be complied with, and it is anticipated that only a limited number of States will impose regulations on commodities which can spread the Japanese beetle. Consequently, the elimination of the Federal quarantine with respect to the regulated articles being deleted should reduce cost to the shipper.

One of the comments recommended retention of the current Japanese beetle quarantine and regulations so there would not be piecemeal State regulations with which to comply. However, as noted previously, such regulation will be imposed in a limited number of States, and variations in these regulations should not be extensive. To further avoid any problems in this regard, the Department has written a "model" State Japanese beetle quarantine which has been provided to State plant regulatory officials. The adoption of this "model" will further serve to create uniformity in this area.

Another comment requested that the final regulations establish additional authority for individual States to enact Japanese beetle quarantines for articles other than aircraft. The individual States retain the authority to enact Japanese beetle quarantines so long as the State quarantines do not regulate the same products or articles covered by the Federal quarantine and regulations. Since the Federal quarantine and regulations with respect to the Japanese beetle would only pertain to means of conveyance, the States would therefore be free to exercise their own authority with regard to the regulation of other articles for the purposes of Japanese beetle control.

Due to the fact that the environmental impact statement (EIS) regarding the treatment of aircraft and airports under the Japanese beetle quarantine program has not yet been finalized, the provisions of the present regulations concerning the movement and, when appropriate, the treatment, of means of conveyance are not being amended at this time. Consequently, the comments which concerned the treatment of aircraft under the proposed program have not been addressed in this final rule. However, the Department will address the comments regarding the treatment of aircraft in any final rule altering those provisions of the regulations concerning means of conveyance. Such final rule will not be published until the final EIS is issued.

Nursery stock generally moves interstate in the spring and fall, and the current Japanese beetle quarantine and regulations have imposed certain restrictions on the interstate movement of nursery stock. As indicated in the proposal, the Department believes such regulations to be unnecessary because the States have the capabilility to prevent the spread of the Japanese beetle by the regulated articles that are being deleted. Therefore, in order to remove such unnecessary regulations and thereby avoid unnecessary expense to the nursery industry, those parts of the regulations which concern regulated articles other than means of conveyance are deleted.

Accordingly, the Japanese beetle quarantine and regulations (7 CFR 301.48 et seq.) are revised as follows:

1. Section 301.48(b) is amended to read as follows:

§ 301.48 Quarantine; restriction on interstate movement of specified regulated articles.

* * * * * *

(b) *Quarantine restrictions on interstate movement of specified regulated articles.* No common carrier or other person shall move interstate from any quarantined State any of the following articles (defined in § 301.48-1(n) as regulated articles), except in acccordance with the conditions prescribed in this subpart:

(1) When moved from any generally infested area, or any area outside the regulated areas, in a quarantined State:

(i) Any means of conveyance of any character whatsoever, when it is determined by an inspector that they present a hazard of spread of the Japanese beetle, and the person in possession thereof has been so notified.

(2) When moved from any suppressive area in a quarantined State:

(i) Any means of conveyance of any character whatsoever, when it is determined by an inspector that they present a hazard of spread of the Japanese beetle, and the person in possession thereof has been so notified.

§ 301.48-2 [Amended]

2. In § 301.48-1, paragraphs (b), (k), and (s) are deleted and the paragraphs of the section are relettered accordingly. Existing paragraphs (c) through (j) are relettered (b) through (i), (l) through (r) is relettered (j) through (p), and (t) through (v) is relettered (q) through (s).

§ 301.48-31 [Amended]

3. In § 301.48-3, paragraph (b) is deleted and the introductory paragraph of paragraph (a) is amended to read as follows:

(a) Any regulated articles may be moved interstate from any quarantined State under the following conditions:

4. In § 301.48-3, footnotes 5 and 6 are deleted.

These amendments relieve certain restrictions previously imposed and therefore should be made effective promptly in order to be of maximum benefit to the persons subject to the restrictions that are being relieved. Accordingly, it is found, under the administrative procedure provisions of 5 U.S.C. 553, that further notice and other public procedure with respect to this amendment are unnecessary, and good cause is found for making it effective less than 30 days after publication in the FEDERAL REGISTER.

NOTE.—The plant protection and quarantine programs, Animal and Plant Health Inspection Service, has determined that this document does not contain a major proposal requiring preparation of an economic impact statement under Executive Order 11821, as amended, and OMB Circular A-107.

Done at Washington, D.C., this 11th day of September 1978.

T. G. DARLING,
Acting Deputy Administrator, Plant Protection and Quarantine Programs, Animal and Plant Health Inspection Service.

[FR Doc. 78-25809 Filed 9-11-78; 10:02 am]

proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

Foreign Agricultural Service

[7 CFR Part 6]

SECTION 22 IMPORT QUOTAS

Proposed Revision of Regulations; Correction

AGENCY: Foreign Agricultural Service, USDA.

ACTION: Proposed rulemaking: correction.

SUMMARY: This document corrects a notice of proposed rulemaking issued in FEDERAL REGISTER Volume 43, No. 171, page 39110, issued September 1, 1978, relating to the proposed revision of the regulations governing Section 22 Import Quotas.

DATES: Not applicable.

FOR FURTHER INFORMATION CONTACT:

Bryant H. Wadsworth, Head, Dairy and Import Group, Dairy, Livestock and Poultry Division, Foreign Agricultural Service, Room 6621 South Agricultural Building, U.S. Department of Agriculture, Washington, D.C. 20250, 202-447-5270.

SUPPLEMENTARY INFORMATION: Section 6.30 Delegation of Authority was inadvertently omitted from page 39115 of Volume 43, No. 171 of the FEDERAL REGISTER issued September 1, 1978.

The Section is hereby added as follows:

§ 6.30 Delegation of Authority.

The powers vested in the Administrator, FAS, insofar as such powers relate to the functions vested in the Licensing Authority by the regulation are hereby delegated to the Licensing Authority.

Signed this 6th day of September 1978.

THOMAS R. HUGHES,
Administrator, FAS.

[3128-01]

DEPARTMENT OF ENERGY

[10 CFR Part 1004]

FREEDOM OF INFORMATION

Proposed Rules

AGENCY: Department of Energy.

ACTION: Notice of proposed rulemaking.

SUMMARY: These regulations would prescribe the procedures to be followed and the substantive principles to be applied by the Department of Energy in the processing of freedom of Information Act requests. They represent the Department's implementation of its responsibilities under the Freedom of Information Act, 5 U.S.C. 552.

DATE: Comments by October 12, 1978.

ADDRESS: Written comments should be directed to the following address: U.S. Department of Energy, Public Hearing Management, 2000 M Street NW., Room 2313, Box VP, Washington, D.C. 20461.

FOR FURTHER INFORMATION CONTACT:

Milton Jordan, Office of Administrative Services, Room 2109, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461, 202-566-6964.

William D. Luck, Office of General Counsel, Room 6144, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461, 202-566-9296.

John Treanor, Office of Administrative Services, Room 2121, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461, 202-566-9840.

SUPPLEMENTARY INFORMATION:

I. Background.
II. Discussion.
III. Revocations.
IV. Other procedural considerations.
V. Comments.

I. BACKGROUND

The Department of Energy (DOE) was established by the Department of Energy Organization Act (Pub. L. 95-91) (the Act), which became effective on October 1, 1977, pursuant to Executive Order 12009, dated September 13, 1977 (42 FR 46267, Sept. 15, 1977). The Act transfers to and vests in the DOE the functions of the former Federal Energy Administration (FEA), the former Energy Research and Development Administration (ERDA), the former Federal Power Commission (FPC), and specified functions of several other agencies. These proposed regulations represent a consolidation, with some procedural adaptation, of the Freedom of Information Act (FOIA) regulations previously followed by the FEA and ERDA. These regulations would apply to all Freedom of Information requests addressed to the Department except they would specifically exclude the Federal Energy Regulatory Commission (FERC). The FERC will establish and publish separate regulations to apply to that independent collegial body.

II. DISCUSSION

These regulations would establish policies and procedures that decentralize the administration of the Department's FOIA program, and vest certain threshold decisions and administrative responsibilities in the Director of Administration. The Director of Administration, through designated freedom of information officers, would be responsible for the initial processing of requests, including the identification of the office or offices within the Department that have custody of records likely to be responsive to the request. The freedom of information officer would do the following: Make decisions pertaining to the validity of the requests under these regulations, as well as decisions pertaining to the payment of fees. Identification, collection, and review of records to determine releasability, as well as preparation of responses to requests, are placed within the responsibility and authority of the authorizing official in the programamtic office or offices having the record.

Appeals of initial decisions, whether from the headquarters or any field office, would continue to be directed only to the Department headquarters (to the division of FOI and Privacy Acts Activities). Authority to make determinations on appeals would be vested in the Office of Hearings and Appeals.

The Freedom of Information Act defines the substantive limits within which Federal agencies administer their FOIA programs. These substantive provisions (pertaining, for example, to time limitations for response, the elements of a proper request, the provision for fees and fee waivers, and provisions exempting information from disclosure) are reflected in these proposed regulations and, in most practical respects, represent a continuation of parallel provisions appearing in the regulations of the Department's predecessor agencies. The proposed regulations, however, include additional guidance pertaining to several aspects of the FOIA program. First: Since the functions transferred to the Department from the former ERDA include security and classification responsibilities under the Atomic Energy Act of 1954, the proposed regulations include detailed provisions for the processing of requests involving classified information. Responses to all such requests would be processed only with the consultation and concurrence of the Director of the Office of Classification.

Second: The proposed regulations address in some detail the Department's policy pertaining to the waiver of fees. Section 1004.9 would provide for waiver of fees where the service to be performed will be of benefit primarily to the public as opposed to the requester, and lists several possible factors that may be considered by the Freedom of Information Officer in making this determination.

Third: The proposed regulations address the matter of the Department's handling of private business and foreign government proprietary information. Section 1004.11 would provide that documents submitted to the Department in connection with identified regulatory matters are to be handled in a manner consistent with procedures followed by the former FEA in administering these programs. This includes prior notice to the submitting party of the DOE intention to release material determined to be nonexempt. For other records submitted to the Department that may be considered as protected from disclosure as private business records, these proposed regulations also provide for notification, prior to any intended disclosure, to the person who submitted the information. Section 1004.11 also sets forth several criteria to be followed by the Department in evaluating private business and foreign government information to determine whether it is exempt from disclosure pursuant to the FOIA.

III. REVOCATIONS

These regulations would supersede Freedom of Information regulations for the former ERDA (10 CFR Part 709) and the former FEA (10 CFR Part 202). Therefore, pursuant to the authority vested in the Secretary of the DOE by sections 644 and 705 of the DOE Organization Act (42 U.S.C. 7254 and 7295), the above cited regulations are to be revoked.

IV. OTHER PROCEDURAL CONSIDERATIONS

As these proposed regulations do not affect the quality of the environment, the provisions of section 7(c)(1) of the Federal Energy Administration Act of 1974 (Pub. L. 93-275), as amended, have been determined to be inapplicable. Additionally, the DOE has determined that this document does not contain a major proposal requiring preparation of a regulatory analysis under Executive Order 12044.

V. COMMENTS

To the extent that section 501 of the DOE Organization Act (42 U.S.C. 7191) is applicable to these regulations, it has been determined that no substantial issue of fact or law exists and that these regulations are unlikely to have a substantial impact on the Nation's economy or large numbers of individuals or businesses. Therefore, these regulations are to be promulgated in accordance with section 553 of Title 5, United States Code. Written comments should be directed to: U.S. Department of Energy, Public Hearing Management, 2000 M Street NW., Room 2313, Box VP, Washington, D.C. 20461.

Comments should be identified on the outside envelope and on the documents with the designation "Freedom of Information Act Regulations." Ten copies should be submitted. Any information or data considered by the person furnishing it to be confidential must be so identified and submitted in writing, one copy only. The DOE reserves the right to determine the confidential status of the information or data and to treat it according to its determination. Comments should be provided by October 12, 1978. Comments received will be available for public inspection in the DOE Reading Room, 20 Massachusetts Avenue NW., between the hours of 8:30 a.m. and 5 p.m., Monday through Friday.

(Department of Energy Organization Act, Pub. L. 95-91, Executive Order 12009, 42 FR 46267, Freedom of Information Act, Pub. L. 89-487, as amended by Pub. L. 93-502 and Pub. L. 94-409)

Issued in Washington, D.C., on September 6, 1978.

WILLIAM S. HEFFELFINGER,
Director of Administration.

In consideration of the foregoing, it is proposed to amend 10 CFR to add a new part 1004 to read as set forth below.

PART 1004—FREEDOM OF INFORMATION

Sec.
1004.1 Purpose and scope.

AUTHORITY: Department of Energy Organization Act, Pub. L. 95-91, E.O. 12009, 42 FR 46267; Freedom of Information Act, Pub. L. 89-487 as amended by Pub. L. 93-502 and Pub. L. 94-409.

§ 1004.1 Purpose and scope.

This part contains the regulations of the Department of Energy (DOE) implementing 5 U.S.C. 552, Pub. L. 89-487, as amended by Pub. L. 93-502, 88 Stat. 1561, and by Pub. L. 94-409, 90 Stat. 1241. The regulations of this part provide information concerning the procedures by which records may be obtained from all offices within the DOE, excluding the Federal Energy Regulatory Commission (FERC). Records of the DOE made available pursuant to the requirements of 5 U.S.C. 552 shall be furnished to members of the public as prescribed by this part. Officers and employees of the DOE may furnish to the public, informally and without compliance with procedures prescribed herein, information and records of types which were furnished customarily in the regular performance of their duties to the public by the predecessor agencies to the DOE. Persons seeking information or records of the DOE may find it useful to consult with a DOE freedom of information officer before invoking the formal procedures set out below. To the extent permitted by other laws, the DOE will make available records which it is authorized to withhold under 5 U.S.C. 552 unless it determines that such disclosure is not in the public interest.

§ 1004.2 Definitions.

As used in this part:

(a) "Appeal Authority" means the Office of Hearings and Appeals.

(b) "Authorizing or Denying Official" means that DOE officer or employee, as identified by the Directorate of Administration by separate directive, having custody of or responsibility for records requested under 5 U.S.C. 552. The term refers in DOE headquarters to officials who report directly to a secretarial officer. In the field, the term refers to the head of a field location identified in § 1004.2(d) or the head of a field office which reports through one of these locations.

(c) "Department" or "Department of Energy (DOE)" means all organizational entities which are a part of the executive department created by Title II of the DOE Organization Act, Pub. L. 95-91. This specifically excludes the

Federal Energy Regulatory Commission (FERC).

(d) "Field Offices" means each of the following DOE components:

(1) Regional enforcement offices of the Economic Regulatory Administration;

(2) Regional representatives of the Secretary;

(3) Operations offices;

(4) Power marketing administrations;

(5) Energy research centers; and

(6) Any other operational component of the DOE not physically located at the DOE headquarters as defined in paragraph (g) of this section.

(e) "Freedom of Information Officer" means the person designated to administer the Freedom of Information Act at the following DOE locations:

(1) Alaska Power Administration, P.O. Box 50, Juneau, Alaska 88801.
(2) Albuquerque Operations Office, P.O. Box 5400, Albuquerque, N.Mex 87115.
(3) Bartlesville Energy Research Center, P.O. Box 1398, Bartlesville, Okla. 74003.
(4) Bonneville Power Administration, P.O. Box 3621, Portland, Oreg. 97208.
(5) Chicago Operations Office, 9800 South Cass Avenue, Argonne, Ill. 60439.
(6) Grand Forks Energy Research Center, P.O. Box 8213, University Station, Grand Forks, N. Dak. 58201.
(7) Headquarters, Department of Energy, Washington, D.C. 20545.
(8) Idaho Operations Office, 550 2d Street, Idaho Falls, Idaho 83401.
(9) Laramie Energy Research Center, P.O. Box 3395, University Station, Laramie, Wyo. 82070.
(10) Morgantown Energy Research Center, P.O. Box 880, Morgantown, W. Va. 26505.
(11) Nevada Operations Office, P.O. Box 14100, Las Vegas, Nev. 89114.
(12) Oak Ridge Operations Office, P.O. Box E, Oak Ridge, Tenn. 37830.
(13) Pittsburgh Energy Research Center, 4800 Forbes Avenue, Pittsburgh, Pa. 15213.
(14) Region I, Analex Building, Room 700, 150 Causeway Street, Boston, Mass. 02114.
(15) Region II, 26 Federal Plaza, Room 3206, New York, N.Y. 10007.
(16) Region III, 1421 Cherry Street, 10th Floor, Philadelphia, Pa. 19102.
(17) Region IV, 1655 Peachtree Street NE., 8th floor, Atlanta, Ga. 30309.
(18) Region V, 175 West Jackson Boulevard, Room A-333, Chicago, Ill. 60604.
(19) Region VI, P.O. Box 35228, 2626 West Mockingbird Lane, Dallas, Tex. 75235.
(20) Region VII, Twelve Grand Building, 1150 Grand Avenue, Kansas City, Mo. 64106.
(21) Region VIII, P.O. Box 26247, Belmar Branch, 1075 South Yukon Street, Lakewood, Colo. 80226.
(22) Region IX, 111 Pine Street, 3d floor, San Francisco, Calif. 94111.
(23) Region X, 1992 Federal Building, 915 Second Avenue, Seattle, Wash. 98174.
(24) Richland Operations Office, P.O. Box 550, Richland, Wash. 99352.
(25) San Francisco Operations Office, 1333 Broadway, Wells Fargo Building, Oakland, Calif. 94616.
(26) Savannah River Operations Office, P.O. Box A, Aiken, S.C. 29801.
(27) Southeastern Power Administration, Elberton, Ga. 30635.
(28) Southwestern Power Administration, P.O. Drawer 619, Tulsa, Okla. 74101.
(29) Western Area Power Administration, P.O. Box 3402, Golden, Colo. 80401.

(f) "General Counsel" means the General Counsel provided for in section 202(b) of the DOE Organization Act, or any DOE attorney designated as having responsibility for counseling the Department on Freedom of Information Act matters.

(g) "Headquarters" means all DOE facilities functioning within the Washington metropolitan area except FERC.

(h) "Office" means any administrative or operating unit of the DOE, including those in field offices.

(i) "Secretarial Officer" means the DOE Secretary; the Deputy Secretary; the Under Secretary; Assistant Secretaries; the Administrators of the Energy Information Administration and the Economic Regulatory Administration; the Inspector General; the General Counsel; the Director, Office of Hearings and Appeals; the Director, Office of Energy Research; the Director of Administration; the Director of Procurement and Contracts Management; and the Controller.

§ 1004.3 Public reading facilities.

(a) The DOE headquarters will maintain, in public reading facilities, the materials which are required by 5 U.S.C. 552(a)(2) to be made available for public inspection and copying. The principal public reading facility will be located at the DOE Energy Library, 1000 Independence Avenue SW., Washington, D.C.

(b) Each of the designated field offices will maintain in public reading facilities certain materials maintained in the headquarters facility and other materials associated with the particular field offices.

(c) Each of these public reading facilities will maintain and make available for public inspections and copying current indices of the materials at that facility which are required to be indexed by 5 U.S.C. 552(a)(2).

§ 1004.4 Elements of a request.

(a) *Addressed to the freedom of information officer.* A request for a record of the DOE which is not customarily made available and which is not available in a public reading facility as described in § 1004.3 shall be addressed to the appropriate headquarters or field freedom of information officer, Department of Energy, at a location listed in § 1004.2(e) and both the envelope and the letter shall be clearly marked "Freedom of Information Request." Except as provided in § 1004.9(c), a request which is so addressed and marked will be considered to be received by the DOE for purposes of 5 U.S.C. 552(a)(6) upon receipt by the freedom of information officer. A request under 5 U.S.C. 552 which is not so addressed and marked also shall be considered to be received upon actual receipt by the appropriate freedom of information officer. Requests delivered after regular business hours of the freedom of information officer are deemed received on the next regular business day.

(b) *Request should be in writing and for reasonably described records.* A request for access to records should be submitted in writing and should reasonably describe the records requested to enable DOE personnel to locate them with a reasonable amount of effort. Where possible, specific information regarding dates, titles, file designations, and other information which may help identify the records should be supplied by the requester, including the names and titles of any DOE officers or employees who have been contacted regarding the request prior to filing a written request. If the request relates to a matter in pending litigation, the court and its location should be identified to aid in locating the documents. If the records are known to be in a field office of the DOE, the request should so state and should identify the field office concerned.

(c) *Categorical requests.*—(1) *Must meet reasonably described records requirement.* A request for all records falling within a reasonably specific category shall be regarded as conforming to the statutory requirement that records be reasonably described if it can reasonably be determined which particular records are sought in the request. The request must enable the DOE to identify and locate the records sought by a process that is not unreasonably burdensome or disruptive of DOE operations.

(2) *Assistance in reformulating nonconforming request.* If it is determined that a request does not reasonably describe the records sought, as specified in subparagraph (1) of this paragraph, the response shall specify the reasons why the request failed to meet the requirements of subparagraph (1) of this paragraph and shall extend to the requester an opportunity to confer with knowledgeable DOE personnel in an attempt to restate the request or reduce the request to manageable proportions by reformulation and by agreeing on an orderly procedure for the production of the records. If a response is given by DOE stating that additional information is needed from the requester to render records reasonably described, any reformulated request submitted by the requester shall

be treated as an initial request for purposes of time for DOE response.

(d) *Nonexistent records.* (1) 5 U.S.C. 552 does not require the compilation or creation of a record for the purpose of satisfying a request for records. If a requested record is known to have been destroyed or otherwise disposed of, or if no such record was ever known to exist, the requester shall be so notified.

(2) 5 U.S.C. 552 does not require the DOE to honor a request for a record not yet in existence, even where such a document may be expected to come into existence at a later time.

(e) *Assurance of willingness to pay fees.* A request shall include assurances to pay: (1) whatever fees will be assessed in accordance with § 1004.9 of this part, or (2) those fees not exceeding some specified dollar amount, or shall otherwise address the issue of fees in accordance with § 1004.9. No request shall be deemed to have been received until the DOE has received either a reasonable deposit or some other assurance of willingness to bear fees anticipated to be associated with the processing of the request.

(f) *Requests for records or information of other agencies.* (1) Some of the records in the files of the DOE have been obtained from other Federal agencies or contain information obtained from other Federal agencies.

(2) Where an entire document originated in another Federal agency, the authorizing official will refer the request to the originating agency and so inform the requester. A requester who does not object to the referral within 5 days will be deemed to have consented.

(3) Requests for DOE records containing information received from another agency, or records prepared jointly by DOE and other agencies, will be treated as requests for DOE records except that coordination will be effected by the authorizing official with the appropriate official of the other agency. Such coordination will be done on an expedited basis, for the purpose of determining whether the other agency official wishes to deny the request and obtaining the certification, signature, and identity of the other agency's responsible official. The notice of determination to the requester, in the event part of all of the record is recommended for denial by the other agency, shall cite the other agency denial official, as well as the appropriate DOE denying official is a denial by DOE is also involved.

(4) For purposes of this section and § 1004.5, the FERC shall be considered an agency other than the DOE.

§ 1004.5 Processing requests for records.

(a) Freedom of information officers shall be responsible for processing written requests for records submitted pursuant to this part. Upon receiving such a request, the freedom of information officer shall, except as provided in paragraph (c) of this section, ascertain which authorizing official or officials have responsibility for, custody of, or concern with the records requested. The freedom of information officer shall review the request, consulting with the authorizing official(s) where appropriate, to determine its compliance with § 1004.4. Where a request complies with § 1004.4, the freedom of information officer shall forward the request to the authorizing official for action and acknowledge receipt of the request to the requester.

(b) The authorizing official shall promptly identify and review the records encompassed by the request (or, where the requested material consists of multiple submissions of identical items, representative samples of such items). The authorizing official shall prepare a written response either: (1) granting the request, (2) denying the request, (3) granting it in part and denying it in part, or (4) replying with a response stating that the request has been referred to another agency under § 1004.4(f) or § 1004.6(e).

(c) Where a request involves records which are in the custody of or the concern or more than one authorizing official, the freedom of information officer shall identify all authorizing official and forward the request to the authorizing official that can reasonably be expected to have custody of the majority of the responsive records. This authorizing official shall prepare a DOE response to the request consistent with paragraph (b) of this section, which shall identify any other authorizing official or officials having responsibility for the denial of records.

(d) *Time for processing requests.* (1) Action pursuant to paragraph (b) of this section shall be taken within 10 working days of receipt of a request for DOE records ("receipt" is defined in § 1004.4(a)), except that if unusual circumstances require an extension of time before a decision on a request can be reached, and the person requesting records is promptly informed in writing by the authorizing official, setting forth the reasons for such extension and the date on which a determination is expected to be dispatched, then the authorizing official may take an extension not to exceed 10 working days.

(2) for purposes of this section and § 1004.8(b), the term "unusual circumstances" means:

(i) The need to search for and collect the requested records from field facilities or other establishments that are separate from the offices processing the request;

(ii) The need to search for, collect and appropriately examine a voluminous amount of separate and distinct records which are demanded in a single request; or

(iii) The need for consultation, which shall be conducted with all practicable speed, with another agency having a substantial interest in the determination of the request or among two or more components of the department having substantial subject-matter interest therein.

(3) The requester must be promptly notified in writing of the extension, the reasons for the extension, and the date on which a determination is expected to be dispatched.

(4) If no determination has been dispatched at the end of the 10-day period, or the last extension thereof, the requester may deem to have exhausted his administrative remedies, giving rise to a right of review in a district court of the United States as specified in 5 U.S.C. 552(a)(4). When no determination can be dispatched within the applicable time limit, the responsible authorizing official shall nevertheless continue to process the request; on expiration of the time limit he shall inform the requester of the reason for the delay, of the date on which a determination may be expected to be dispatched, and of his right to seek remedy through the courts; and he may ask the requester to forego such action until a determination is made.

(5) Nothing in this part shall preclude the authorizing official and a requester from agreeing to an extension of time for the initial determination on a request. Any such agreement shall be confirmed in writing and shall clearly specify the total time agreed upon for the initial determination.

§ 1004.6 Requests for classified records.

(a) All requests for classified records shall be subject to the provisions of this part with the special qualifications noted below.

(b) All requests for records made in accordance with this part, except those requests for access to classified records which are made specifically pursuant to the mandatory review provisions of Executive Order 11652 or any successor thereto, shall be automatically considered a Freedom of Information Act request under this part.

(c) Concurrence of the Director of Classification shall be required on all responses involving requests for classified records. The Director of Classification shall be informed of the request by the freedom of information officer and the authorizing official to whom the action is assigned and shall advise the office originating the records, or having cognizance or responsibility for the records, and consult with such

office or offices prior to making a determination under this section.

(d) The written notice of a determination to deny records, or portions of records, which contain both classified material and other exempt material, shall be concurred in by the Director of Classification who shall be the denying official for the classified portion of such records in accordance with §§ 1004.5(c) and 1004.7(b)(2). If other DOE officials or appropriate officials of other agencies are responsible for denying any portion of the record, their names and titles or positions shall be listed in the notice of denial in accordance with §§ 1004.5(c) and 1004.7(b)(2) and it shall be clearly indicated what portion or portions they were responsible for denying.

(e) Requests for DOE records containing classified information received from another agency, and requests for classified documents originating in another Federal agency, shall be coordinated with or referred to the other agency consistent with the provisions of § 1004.4(f). Coordination or referral of information or documents subject to this section shall be effected by the Director of Classification (in consultation with the authorizing official) with the appropriate official of the other agency.

§ 1004.7 Response by authorizing officials: Form and content.

(a) *Form of grant.* When a requested record has been identified and will be made available, and where applicable fees are $25 or less or where it has been determined that the payment of applicable fees should be waived, the records shall be made available promptly. Where the applicable fees are in excess of $25, the records shall not be made available until all charges are paid in full.

(b) *Form of denial.* A reply denying a request for a record shall be in writing and shall be sent certified or registered mail, return receipt requested. It shall be signed by the authorizing official pursuant to § 1004.5 (b) or (c) and shall include:

(1) *Reason for denial.* A statement of the reason for denial, containing as applicable:

(i) *Exemption category.* A reference to the specific exemption under the Freedom of Information Act authorizing the withholding of the record, and to the extent consistent with the purposes of the exemption, a brief explanation of how the exemption applies to the record withheld, and a statement of why a discretionary release is not appropriate.

(ii) *Notification that record cannot be located or does not exist.* If a requested record is known to have been destroyed or otherwise disposed of, or if no such record was ever known to exist, the requester shall be so notified.

(2) *Persons responsible for denial.* A statement setting forth the name and the title or position of each denying official and identifying the portion of the denial for which each denying official is responsible.

(3) *Segregation of nonexempt material.* A statement of notation addressing the issue of whether there is any segregable nonexempt material in the documents or portions thereof identified as being denied.

(4) *Administrative appeal and judicial review.* A statement that the denial may be appealed within 30 calendar days to the Office of Hearings and Appeals, and that judicial review will be thereafter available either in the district in which the requester resides or has a principal place of business or in which the records are situated or in the District of Columbia.

§ 1004.8 Appeals from initial denials.

(a) *Appeal to Office of Hearings and Appeals.* When the authorizing official has denied a request for records in whole or in part or has responded that there are no documents responsive to the request, consistent with § 1004.4(d)(1), or when the freedom of information officer has denied a request for waiver of fees consistent with § 1004.9, the requester may, within 30 calendar days of its receipt, appeal the determination to the Office of Hearings and Appeals.

(b) *Elements of appeals.* The appeal shall be in writing, addressed to the headquarters freedom of information officer, and both the envelope and letter shall be clearly marked "Freedom of Information Appeal." The appeal should contain a concise statement of grounds upon which it is brought and a description of the relief sought. It should also include a discussion of all relevant authorities, including, but not limited to, DOE (and predecessor agency) rulings, regulations, interpretations and decisions on appeals and any judicial determinations being relied upon to support the appeal. A copy of the letter that is the subject of the appeal shall be submitted with the appeal.

(c) *Receipt of appeal.* Upon receiving an appeal, the headquarters freedom of information officer shall forward the appeal to the appeal authority. An appeal will be considered to be received for purposes of 5 U.S.C. 552(a)(6) upon receipt by the appeal authority.

(d) *Action within 20 working days.* (1) The appeal authority shall act upon the appeal within 20 working days of its receipt, and more rapidly if practicable, except that if unusual circumstances (as defined in § 1004.5(d)(2) require an extension of time before a decision on a request can be reached, the appeal authority may extend the time for final action for an additional 10 working days less the number of days of any statutory extension which may have been taken by the authorizing official during the period of initial determination.

(2) The requester must be promptly notified in writing of the extension, setting forth the reasons for the extension, and the date on which a determination is expected to be dispatched.

(3) If no determination on the appeal has been dispatched at the end of the 20-day period or the last extension thereof, the requester is deemed to have exhausted his administrative remedies, giving rise to a right of review in a district court of the United States as specified in 5 U.S.C. 552(a)(4). When no determination can be dispatched within the applicable time limit, the appeal will nevertheless continue to be processed; on expiration of the time limit the requester shall be informed of the reason for the delay, of the date on which a determination may be expected to be dispatched, and of his right to seek judicial review in the U.S. district court in the district in which he resides or has his principal place of business, the district in which the records are situated, or the District of Columbia. The requester may be asked to forego judicial review until determination of the appeal.

(4) Nothing in this part shall preclude the appeal authority and a requester from agreeing to an extension of time for the decision on an appeal. Any such agreement shall be confirmed in writing and shall clearly specify the total time agreed upon for the appeal decision.

(e) *Form of action on appeal.* The appeal authority's action on an appeal shall be in writing, and shall set forth his name and title. A denial in whole or in part of a request on appeal shall set forth the exemptions relied on, a brief explanation consistent with the purpose of the exemption of how the exemption applies to the records withheld, and the reasons for asserting it and a statement of why a discretionary release is not appropriate. It shall also contain a statement that it constitutes final agency action on the request and that judicial review will be available either in the district in which the requester resides or has a principal place of business or in which the records are situated or in the District of Columbia. Documents determined by the appeal authority to be documents subject to release shall be made promptly available to the requester upon payment of any applicable fees.

(f) *Classified records.* The Secretary of Energy or his designee will make the final determination concerning appeals involving classified records.

§ 1004.9 Fees for provision of records.

(a) *When charged.* User fees pursuant to 5 U.S.C. 552, as amended, and 31 U.S.C. 483a, shall be charged according to the schedule contained in paragraph (b) of this section for services rendered in responding to requests for DOE records under this subpart, unless the freedom of information officer determines, in conformity with the provisions of 5 U.S.C. 552, as amended, and 31 U.S.C. 483a, that waiver of payment of such charges, or a portion thereof, is in the public interest.

(1) Such a determination shall ordinarily not be made unless the service to be performed will be of benefit primarily to the public as opposed to the requester. In making this determination, the freedom of information officer, in consultation with the authorizing official, may consider several factors, including, but not necessarily limited to, the following:

(i) The current public interest in subject matter to which the documents pertain.

(ii) The status of the requester as a representative of the news media.

(iii) The status of the requester as a representative of a bona fide public interest group.

(iv) The status of the requester as an indigent person.

(v) The status of the requester as an historian or academician.

(vi) Whether the requester is engaged in administrative proceedings or litigation with the Government.

(vii) Whether the requester is making the request to further purely private commercial interests.

(2) Fees shall not be charged where they would amount, in the aggregate, for a request or series of related requests, to less than $25. Where fees in excess of $25 are to be charged, fees will be assessed for the full amount.

(3) Ordinarily, fees for search shall not be charged if the records requested are not found, or if all of the records located are withheld as exempt. However, if the time expended in processing the request is substantial, and if the requester has been notified of the estimated cost pursuant to paragraph (c) of this section and has been specifically advised that it cannot be determined in advance whether any records will be made available, fees for search may be charged.

(b) *Services charged for, and amount charged.* For the services listed below, expended in locating or making available records or copies thereof, the following charges shall be assessed:

(1) *Copies.* For copies of documents (maximum of five (5) copies of any one document will be supplied), $0.10 per copy of each page.

(2) *Certification.* For certification of true copies, each, $1.

(3) *Clerical searches.* Charges will be $2.25 for each quarter hour spent by clerical personnel in searching for and producing a requested record.

(4) *Nonclerical searches.* Where a search cannot be performed by clerical personnel (for example, where the task of determining which records fall within a request and collecting them requires the time of professional or managerial personnel), charges for the search may be made at a rate in excess of the clerical rate; specifically, when higher level personnel are required, charges will be $4.50 per each one quarter hour.

(5) *Examination and related tasks in screening records.* No charge shall be made for time spent in resolving legal or policy issues affecting access to records of known contents. In addition, no charge shall be made for the time involved in examining records to determine whether they are exempt from mandatory disclosure and should be withheld as a matter of policy.

(6) *Computerized records.* Fees for services in processing requests maintained in whole or in part in computerized form shall be in accordance with this section so far as practicable. Services of personnel in the nature of a search will be charged for at rates prescribed in paragraph (b)(4) of this section unless the level of personnel involved permits rates in accordance with paragaph (b)(3) of this section. A charge may be made for the computer time involved, based upon the actual cost to the Government. A charge may also be made for any substantial amounts of special supplies or materials used to contain, present, or make available the output of computers, based upon the actual cost to the Government. Nothing in this paragraph shall be construed to entitle any person, as of right, to any services in connection with computerized records, other than services to which such person may be entitled under 5 U.S.C. 552 and under the provisions, not including this paragraph (b), of this section.

(7) *Other nonpaper records.* Fees for services in processing requests where the records are maintained on microfiche, microfilm, recording tape, or in any other nonpaper form, shall be assessed at the actual cost to the Government.

(8) *Transcripts.* Transcripts by a reporting firm under contract with DOE may be purchased directly from the reporting firm or DOE at the cost of reproduction as provided for in the DOE contract with the reporting firm.

(9) *Copyrighted material.* Material which has been copyrighted will not be reproduced in violation of the copyright laws.

(c) *Notice of anticipated fees in excess of $25.* Unless the requester specifically states that he is willing to pay whatever fees are assessed by DOE for meeting the request, or, alternatively, specifies an amount in excess of $25 which he is willing to pay and which in fact covers the anticipated fees for meeting the request, a request that is expected to involve assessed fees in excess of $25 will not be deemed to have been received until the requester is advised of the anticipated cost, agrees to bear it, and makes any advance deposit required. Such notification shall be made by the freedom of information officer consistent with § 1004.4(e).

§ 1004.10 Exemptions.

(a) 5 U.S.C. 552 exempts from all of its publication and disclosure requirements nine categories of records which are described in Paragraph (b) of that section. These categories include such matters as national defense and foreign policy information; investigatory records; internal procedures and communications; materials exempted from disclosure by other statutes; confidential, commercial, and financial information; and matters involving personal privacy.

(b) Specifically, the exemptions in 5 U.S.C. 552(b) apply to matters that are—

(1) Specifically authorized under criteria established by an Executive order to be kept secret in the interests of the national defense or foreign policy and are in fact properly classified pursuant to such Executive order.

(2) Related solely to the internal personnel rules and practices of an agency;

(3) Specifically exempted from disclosure by statute (other than 5 U.S.C. 552(b)): *Provided,* That such statute: (i) requires that the matters be withheld from the public in such a manner as to leave no discretion on the issue, or (ii) establishes particular criteria for withholding or refers to particular types of matters to be withheld. Restricted data and formerly restricted data under the Atomic Energy Act of 1954, as amended (42 U.S.C. 2011 et seq.), are covered by this exemption;

(4) Trade secrets and commercial or financial information obtained from a person and privileged or confidential;

(5) Interagency or intraagency memorandums or letters which would not be available by law to a party other than an agency in litigation with the agency;

(6) Personnel and medical files and similar files the disclosure of which

would constitute a clearly unwarranted invasion of personal privacy;

(7) Investigatory records compiled for law enforcement purposes, but only to the extent that the production of such records would: (i) interfere with enforcement proceedings, (ii) deprive a person of a right to a fair trial or an impartial adjudication, (iii) constitute an unwarranted invasion of personal privacy, (iv) disclose the identity of a confidential source and, in the case of a record compiled by a criminal law enforcement authority in the course of a criminal investigation, or by an agency conducting a lawful national security intelligence investigation, confidential information furnished only by the confidential source, (v) disclose investigative techniques and procedures, or (vi) endanger the life or physical safety of law enforcement personnel;

(8) Contained in or related to examination, operating, or condition reports prepared by, on behalf of, or for the use of an agency responsible for the regulation or supervision of financial institutions; or

(9) Geological and geophysical information and data, including maps, concerning wells.

(c) Any re- nably segregable nonexempt portion of a record will be provided to a requester. The DOE will delete portions which are exempt under the exceptions listed above only if it is determined that such deletions are required by law or are in the public interest.

§ 1004.11 Handling of proprietary information of a private business, foreign government, or an international organization.

(a) *Documents submitted to the Department in connection with regulatory programs.* Regulatory documents pertaining to international voluntary agreements (pursuant to section 252 of the Energy Policy and Conservation Act), the mandatory petroleum allocation, mandatory petroleum pricing, oil imports, mandatory Canadian crude oil allocation, coal conversion, appliance labeling, and industrial programs shall be handled consistent with the following:

(1) If any person submitting a document with the DOE claims that some or all the information contained in the document is exempt from the mandatory public disclosure requirements of the Freedom of Information Act (5 U.S.C. 552), is information referred to in 18 U.S.C. 1905, or is otherwise exempt by law from public disclosure, and if such person requests the DOE not to disclose such information, such person shall submit together with the document a second copy of the document from which has been deleted the information for which such person wishes to claim confidential treatment. The person shall indicate in the original document that it is confidential or contains confidential information and should submit a statement specifying the justification for nondisclosure of the information for which confidential treatment is claimed. If the person states that the information comes within the exemption in 5 U.S.C. 552(b)(4) for trade secrets and commercial or financial information, such person shall include a statement specifying why such information is privileged or confidential. If the person submitting a document does not submit a second copy of the document with the confidential information deleted, DOE may assume that there is no objection to public disclosure of the document in its entirety.

(2) The DOE retains the right to make its own determination with regard to any claim of confidentiality. Notice of the decision by the DOE to deny such claim, in whole or in part, and an opportunity to respond shall ordinarily be given to a person claiming confidentiality of information no less than five (5) days prior to its intended public disclosure.

(b) *Notification.* Where documents submitted to DOE that are not covered by paragraph (a) of this section, come within or might come within exemption 4 of the Freedom of Information Act (§ 1004.10(b)(4)), the person who submitted the information shall be promptly notified and provided an opportunity to identify material that the person believes is exempt from disclosure pursuant to exemption 4. Notice of the decision by DOE to deny a claim of exemption, in whole or in part, and an opportunity to respond shall be given to a person claiming confidentiality of information no less than five (5) days prior to its intended public disclosure.

(c) *Criteria for withholding.* Except as otherwise provided in paragraph (a) of this section, criteria to be applied in determining whether information is exempt from disclosure pursuant to exemption 4 of the Freedom of Information Act (§ 1004.10(b)(4)) include:

(1) Whether the information has been held in confidence by the person to whom it pertains;

(2) Whether the information is of a type customarily held in confidence by the person to whom it pertains and whether there is a reasonable basis therefor;

(3) Whether the information was transmitted to and received by the Department in confidence;

(4) Whether the information is available in public sources;

(5) Whether disclosure of the information is likely to impair the Government's ability to obtain similar information in the future; or

(6) Whether disclosure of the information is likely to cause substantial harm to the competitive position of the person from whom the information was obtained.

§ 1004.12 Computation of time.

Except as otherwise noted, in computing any period of time prescribed or allowed by this part, the day of the event from which the designated period of time begins to run is not to be included; the last day of the period so computed is to be included; and Saturdays, Sundays, and legal public holidays are excepted.

FEDERAL TRADE COMMISSION

[16 CFR Part 13]

(File No. 7223348)

KAUFMAN AND BROAD, INC., ET AL

Consent Agreement: Extension of Time To File Public Comments

AGENCY: Federal Trade Commission.

ACTION: Extension of time to file public comments.

SUMMARY: On July 7, 1978 notice of the Federal Trade Commission's provisional acceptance of a consent agreement from Kaufman and Broad, Inc. was published in the FEDERAL REGISTER, 43 FR 29304. The final date on which comments on the agreement would be accepted was September 5, 1978. This notice extends the comment period to October 5, 1978.

DATE: Comments must be received on or before October 5, 1978.

ADDRESS: Comments should be directed to: Office of the Secretary, Federal Trade Commission, 6th Street and Pennsylvania Avenue NW., Washington, D.C.

FOR FURTHER INFORMATION CONTACT:

Paul W. Turley, Director, Chicago Regional Office, 55 East Monroe Street, Suite 1437, Chicago, Ill. 60603, 312-353-4423.

SUPPLEMENTARY INFORMATION: Pursuant to rule 2.34 of the Commission's rules of practice 16 CFR 2.34, interested persons are afforded 60 days to comment on the proposed order. In this proceeding, the comment period was scheduled to end on September 5, 1978. The Commission has received a number of comments from consumers that require Privacy Act clearances before these comments may be placed on the public record.

The Commission has determined that an extension of 30 days is in the public interest. Accordingly, all comments pursuant to rule 2.34 must be filed no later than October 5, 1978.

By direction of the Commission dated September 5, 1978.

CAROL THOMAS,
Secretary.

ZAYRE CORP.

Consent Agreement With Analysis To Aid Public Comment

AGENCY: Federal Trade Commission.

ACTION: Provisional consent agreement.

SUMMARY: In settlement of alleged violations of Federal law prohibiting unfair acts and practices and unfair methods of competition, this provisionally accepted consent agreement, among other things, would require a Framingham, Mass., discount department store chain to cease inducing or receiving discriminatory promotional allowances, services or facilities from its suppliers; and would prohibit the firm from boycotting or decreasing its purchases from recalcitrant suppliers. The company would also be required to maintain specified records for a 5-year period; and bear all costs of any trade show it sponsors, organizes, or directs.

DATE: Comments must be received on or before November 9, 1978.

ADDRESS: Comments should be directed to Office of the Secretary, Federal Trade Commission, Sixth Street and Pennsylvania Avenue NW., Washington, D.C. 20580.

FOR FURTHER INFORMATION CONTACT:

William M. Gibson, Director, Boston Regional Office, Federal Trade Commission, 150 Causeway Street, Room 1301, Boston, Mass. 02114, 617-223-6621.

SUPPLEMENTARY INFORMATION: Pursuant to section 6(f) of the Federal Trade Commission Act, 38 Stat. 721, 15 U.S.C. 46 and § 2.34 of the Commission's rules of practice (16 CFR 2.34), notice is hereby given that the following consent agreement containing a consent order to cease and desist and an explanation thereof, having been filed with and provisionally accepted by the Commission, has been placed on the public record, together with material submitted to the Commission that is not exempt from public disclosure under the Freedom of Information Act, for a period of sixty (60) days. Public comment is invited. Such comments or views will be considered by the Commission and will be available for inspection and copying at its principal office in accordance with § 4.9(b)(14) of the Commission's rules of practice (16 CFR 4.9(b)(14)).

ZAYRE CORP.

[File No. 731 0044]

AGREEMENT CONTAINING CONSENT ORDER TO CEASE AND DESIST

The Federal Trade Commission having initiated an investigation of certain acts and practices of Zayre Corp., a corporation, hereinafter sometimes referred to as proposed respondent, and it now appearing that Zayre Corp. is willing to enter into an agreement containing an order to cease an desist from the use of the acts and practices being investigated.

It is hereby agreed by and between Zayre Corp., a corporation, by its duly authorized officer, and its attorney, and counsel for the Federal Trade Commission that:

1. Proposed respondent Zayre Corp. is a corporation, organized, existing and doing business under and by virtue of the laws of the State of Delaware, with its office and principal place of business located at 770 Cochituate Road, Framingham, Mass.

2. Proposed respondent admits all the jurisdictional facts set forth in the draft of complaint here attached.

3. Proposed respondent waives:

(a) Any further procedural steps;

(b) The requirement that the Commission's decision contain a statement of findings of fact and conclusions of law; and

(c) All rights to seek judicial review or otherwise to challenge or contest the validity of the order entered pursuant to this agreement.

4. This agreement shall not become a part of the official record of the proceeding unless and until it is accepted by the Commission. If this agreement is accepted by the Commission, it, together with the draft of complaint contemplated thereby, will be placed on the public record for a period of sixty (60) days and information in respect thereto publicly released; and such acceptance may be withdrawn by the Commission if comments or views submitted to the Commission disclose facts or considerations which indicate that the order contained in the agreement is inappropriate, improper, or inadequate.

5. This agreement is for settlement purposes only and does not constitute an admission by proposed respondent that the law has been violated as alleged in the draft of complaint here attached.

6. This agreement contemplates that, if it is accepted by the Commission, and if such acceptance is not subsequently withdrawn by the Commission pursuant to the provisions of § 2.34 of the Commission's rules, the Commission may, without further notice to proposed respondent, (1) issue its complaint corresponding in form and substance with the draft of complaint here attached and its decision containing the following order to cease and desist in disposition of the proceeding and (2) make information public in respect thereto. When so entered, the order to cease and desist shall have the same force and effect and may be altered, modified, or set aside in the same manner and within the same time provided by statute for other orders. The order shall become final upon service. Receipt of the complaint and decision containing the agreed-to order at proposed respondent's address as stated in this agreement shall constitute service. Proposed respondent waives any right it may have to any other manner of service. The complaint may be used in construing the terms of the order.

7. No agreement, understanding, representation, or interpretation not contained in the order or the agreement may be used to vary or contradict the terms of the order.

8. The proposed respondent has read the proposed complaint and order contemplated hereby and understands that once the order has been issued, it will be required to file one or more compliance reports, showing that it has fully complied with the order and that it may be liable for a civil penalty in the amount provided by law for each violation of the order after it becomes final.

ORDER

I.

It is ordered, That Zayre Corp., a corporation, its successors and assigns, and its officers, and respondent's agents, representatives, and employees, directly or through any corporation, subsidiary, division, or other device in connection with the purchase in or affecting commerce, or receipt of merchandise on consignment in or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, as amended, of products for resale by the respondent, or in connection with any other transaction between respondent and its various suppliers involving or pertaining to the regular business of the respondent in purchasing, promoting, advertising, distributing, and/or selling: Books, phonograph records, photo finishing, photo film, photo equipment, franchise cosmetics, candy, health and beauty aids, home and office stationery, greeting cards, gift wrap, paper goods, party goods, and candles in or affecting commerce, as "commerce" is

V 4 3 / 1 7 7

defined in the Federal Trade Commission Act, as amended, do forthwith cease and desist from:

1. Inducing and receiving, receiving, or contracting for the receipt of, any promotional allowance, payment, or other thing of value, solicited by respondent from any supplier, including any consignor or vendor, as compensation for or in consideration of any advertising or promotional service, furnished by or through respondent in connection with promotions originating with or sponsored by respondent, and involving the respondent's sale or offering for sale of the above-listed products, when respondent knows or should know that such compensation is not affirmatively offered or otherwise made available by such supplier, including any consignor or vendor, on proportionally equal terms to all of its customers competing with respondent, including any customer who purchases from any intermediary and competes with respondent in the resale of any such product of any such supplier.

2. Inducing and receiving, receiving, or contracting for the receipt of, the furnishing of any service or facility solicited by respondent from any supplier, including any consignor or vendor, in connection with promotions originating with or sponsored by respondent, and involving respondent's sale or offering for sale of the above-listed products, when respondent knows or should know that such service or facility is not affirmatively offered or otherwise made available by such supplier, including any consignor or vendor, on proportionally equal terms to all of its customers competing with respondent, including any customer who purchases from any intermediary and competes with respondent in the resale of any such product of any such supplier.

3. Eliminating or boycotting or decreasing purchases from any supplier or suppliers because of such suppliers' refusal to grant any allowance or payment in connection with the processing, handling, sale, or offering for sale of the above-listed products, or refusal to furnish any service or facility connected with respondent's sale or offering for sale of any such product, when respondent knows or should know that such allowance, payment, service, or facility is not affirmatively offered or otherwise made available by such supplier, including any consignor or vendor, on proportionally equal terms to all of its customers competing with respondent, including any customer who purchases from any intermediary and competes with respondent in the resale of any such product of any such supplier.

II.

It is further ordered, That respondent shall not organize, direct, or sponsor any trade show unless respondent bears the full cost of the operating expense of any such trade show.

III.

It is further ordered, That, for a period of five (5) years from the date of service upon it of this order, respondent shall establish and maintain at its general office in Framingham, Mass., a separate file containing each offered promotional allowance, payment, or other thing of value, induced and received within the meaning of paragraph I of this order. The file shall be maintained alphabetically, according to suppliers, with all offers and related materials pertaining to each supplier filed chronologically, within that supplier's portion of the file. the information shall be maintained for the effective period of this order. The file shall be made available to employees of the Federal trade Commission, for inspection and copying, upon written notice of ten (10) calendar days.

IV.

It is further ordered, That respondent, within thirty (30) days after the date of service upon it of this order, shall distribute a copy of this order to each of its officers and managers of each of its divisions and subsidiaries.

V.

It is further ordered, That respondent notify the Commission at least thirty (30) days prior to any proposed change in the corporate respondent, such as dissolution, assignment, or sale, resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries, or any other change in the corporation that may affect compliance obligations arising out of this order.

VI.

It is further ordered, That the respondent herein shall, within sixty (60) days after service upon it of this order, file with the Commission a report, in writing, setting forth in detail the manner and form in which it has compiled with this order.

ZAYRE CORP.

[File No. 731 0044]

ANALYSIS OF PROPOSED CONSENT ORDER TO AID PUBLIC COMMENT

The Federal Trade Commission has accepted an agreement to a proposed consent order from Zayre Corp. ("Zayre"). The proposed consent order and material submitted by Zayre to the Commission that is reasonably related to the merits of the order and is not exempt from disclosure under the Freedom of Information Act have been placed on the public record for sixty (60) days for reception of comments by interested persons. Comments received during this period will become part of the public record. After sixty (60) days, the Commission will again review the agreement and the comments received and will decide whether it should withdraw from the agreement or make final the agreement's proposed order.

The proposed complaint alleges that Zayre has knowingly induced and received, or received, discriminatory allowances and services in connection with a trade show which was organized, directed, and conducted by Zayre and which was attended by Zayre's officials and employees. The trade show, held in Miami Beach, Fla., in July 1972, was not open to the public. The proposed complaint further alleges that Zayre has threatened to eliminate or boycott or decrease purchases from, or has eliminated or boycotted or decreased purchases from, suppliers which refused to participate in the aforementioned trade show.

The proposed complaint also alleges that Zayre has knowingly solicited and induced from a major supplier substantial sums as discriminatory payments for services in connection with the resale of certain products in the regular course of its business during the years 1972, 1973, and 1974.

The proposed consent order prohibits Zayre, in connection with the purchase of certain products, from inducing and receiving, receiving or contracting for the receipt of any discriminatory promotional allowance from any supplier when Zayre knows or should know that such compensation is not affirmatively offered by such supplier on proportionally equal terms to all competing customers. A similar proscription is imposed upon inducing and receiving discriminatory services or facilities solicited by Zayre from any supplier.

Further, Zayre is prohibited from boycotting or decreasing purchases from any supplier because the supplier refuses to grant any discriminatory allowance or payment in connection with the processing, handling, sale, or offering for sale of the covered products. Zayre also is barred from organizing, directing, or sponsoring any trade show unless it bears the full cost of the trade show.

The order requires proposed respondent to maintain, for a period of 5 years, a file containing each offered promotional allowance, payment or other thing of value, induced and received within the intent and meaning of the order, and to make this file available to Commission staff upon written request.

The purpose of this analysis is to facilitate public comment on the proposed order, and it is not intended to constitute an official interpretation of the agreement and proposed order or to modify in any way their terms.

CAROL M. THOMAS,
Secretary.

[FHWA Docket No. 78-10]

DESIGN STANDARDS FOR HIGHWAYS

Corrections to Proposed Rule

AGENCY: Federal Highway Administration, DOT.

ACTION: Technical corrections to proposed rule.

SUMMARY: This document corrects a notice of proposed rulemaking relating to design standards for highways (geometric design standards for resurfacing, restoration, and rehabilitation (R-R-R) projects), because of in advertent omissions.

EFFECTIVE DATE: September 12, 1978.

FOR FURTHER INFORMATION CONTACT:

Seppo I. Sillan, Highway Design Division, Office of Engineering, 202-426-0321; or Lee J. Burstyn, Office of the Chief Counsel, 202-426-0790, Federal Highway Administration, 400 Seventh Street SW., Washington, D.C. 20590.

In FR Doc. 78-23353, appearing in the issue of Wednesday, August 23, 1978, the following changes should be made:

1. On page 37558, in the second column under "DEFINITIONS" the last sentence of the first paragraph is corrected to read: "R-R-R work may or may not include changes to geometric features, such as minor widening, flattening curves, or improving sight distances."

2. On page 37559, in the second column, the last paragraph under the heading "DESIGN SPEED" should read: "It is not intended that elaborate speed studies be conducted for R-R-R projects. A few simple representative measurements will be adequate."

3. On page 37460, in table I—"Roadway and surfacing widths," the word "narrow" in the footnote should read "narrower."

4. On page 37561, in the second column under the heading "SAFETY APPURTENANCES" the third and new fourth sentences should read: "The upgrading should be accomplished through a systematic program based on priorities. Implementation of a R-R-R project should not preempt such program priorities by requiring low priority improvements to be a part of the R-R-R project."

5. On page 37561, in the third column, under the heading "Appendix A" the terms "V" and "R" in the basic equation should be in lower case letters for consistency with the definitions. Also, change "h" to "r" in the definition of radius of curve in feet.

(Authority: 23 U.S.C. 315; 49 CFR 1.48(b).)

Issued on: August 31, 1978.

ENVIRONMENTAL PROTECTION AGENCY

[FRL 963-5]

[40 CFR Part 65]

STATE AND FEDERAL ADMINISTRATIVE ORDERS PERMITTING A DELAY IN COMPLIANCE WITH STATE IMPLEMENTATION PLAN REQUIREMENTS

Proposed Delayed Compliance Order for U.S. Air Force, 928th Tactical Airlift Group, Chicago, Ill.

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: EPA proposes to issue an administrative order to the U.S. Air Force (Air Force), 928th, Tactical Airlift Group. The order requires the Air Force to bring air emissions from its building 1 heating plant in Chicago, Ill., into compliance with certain regulations contained in the federally approved Illionis State implementation plan (SIP). Because the Air Force is unable to comply with these regulations at this time, the proposed order would establish an expeditious schedule requiring final compliance by July 1, 1979. Source compliance with the order would preclude suits under the Federal enforcement and citizen suit provision of the Clean Air Act for violation of the SIP regulations covered by the order. The purpose of this notice is to invite public comment and to offer an opportunity to request a public hearing on EPA's proposed issuance of the order.

DATES: Written comments must be received on or before October 12, 1978, and requests for a public hearing must be received on or before September 27, 1978. All requests for a public hearing should be accompanied by a statement of why the hearing would be beneficial and a text or summary of any proposed testimony to be offered at the hearing. If there is significant public interest in a hearing, it will be held after 21 days prior notice of the date, time, and place of the hearing has been given in this publication.

ADDRESSEES: Comments and requests for a public hearing should be submitted to James O. McDonald, Director, Enforcement Division, EPA, Region V, 230 South Dearborn Street, Chicago, Ill. 60604. Material supporting the order and public comments received in response to this notice may be inspected and copied (for appropriate charges) at this address during normal business hours.

FOR FURTHER INFORMATION CONTACT:

Louise Gross, Enforcement Attor-

ney, at the above address, telephone 312-353-2082.

SUPPLEMENTARY INFORMATION: The Air Force operates a heating plant in Chicago, Ill. The proposed order addresses emissions from its two boilers at this facility, which are subject to Illinois Pollution Control Board rule 203. The regulation limits the emissions of particulate matter and is part of the federally approved Illinois State implementation plan. The order requires final compliance with the regulation by July 1, 1979, and the source has consented to its terms. The source has agreed to meet the order's increments during the period of this informal rulemaking and has already satisfied particular increments contained in the order.

The proposed order satisfies the applicable requirements of section 113(d) of the Clean Air Act (the Act). If the order is issued, source compliance with its terms would preclude further EPA enforcement action under section 113 of the Act against the source for violations of the regulation covered by the order during the period the order is in effect. Enforcement against the source under the citizen suit provisions of the Act (section 304) would be similarly precluded.

Comments received by the date specified above will be considered in determining whether EPA should issue the order. Testimony given at any public hearing concerning the order will also be considered. After the public comment period and any public hearing, the Administrator of EPA will publish in the FEDERAL REGISTER the Agency's final action on the order in 40 CFR Part 65.

The provisions of 40 CFR Part 65 will be promulgated by EPA soon, and will contain the procedure for EPA's issuance, approval, and disapproval of an order under section 113(d) of the Act. In addition, part 65 will contain sections summarizing orders issued, approved, and disapproved by EPA. A prior notice proposing regulations for part 65, published at 40 FR 14876 (Apr. 2, 1975), will be withdrawn, and replaced by a notice promulgating these new regulations.

(42 U.S.C. 7413, 7601.)

Dated: August 30, 1978.

VALDAS V. ADAMKUS,
Acting Regional Administrator, Region V.

In consideration of the foregoing, it is proposed to amend 40 CFR Chapter 1, as follows:

PART 65—DELAYED COMPLIANCE ORDERS

1. By adding § 65.180 to read as follows:

§ 65.180 Federal delayed compliance orders issued under section 113(d) (1), (3), and (4) of the act.

[Order No. EPA-5-78-A]

U.S. ENVIRONMENTAL PROTECTION AGENCY

ORDER

In the matter of U.S. Air Force Reserve, 928th Tactical Airlift Group, Chicago, Ill., proceeding under section 113(d) of the Clean Air Act, as amended.

The following order is issued this date pursuant to section 113(d) of the Clean Air Act, as amended, 42 U.S.C. section 7401 et seq. (hereinafter referred to as "the Act"). Public notice, opportunity for public hearing and 30 days notice to the State of Illinois have been provided pursuant to section 113(d)(1) of the Act. This order contains a schedule for compliance, interim control requirements, continuous emission monitoring requirements and reporting requirements. Final compliance is required as expeditiously as practicable, but no later than July 1, 1979.

On November 23, 1977, Dale S. Bryson, Acting Director, Enforcement Division, Region V, U.S. Environmental Protection Agency (hereinafter referred to as the "U.S. EPA"), pursuant to authority duly delegated to him by the Administrator of the U.S. EPA, issued a notice of violation, pursuant to section 113(a)(1) of the Act, to the U.S. Air Force Reserve (hereinafter referred to as "the Air Force"), 928th Tactical Airlift Group, Chicago, Ill., upon a finding that the heating plant in building I was found to be in violation of the applicable Illinois implementation plan, as defined in section 110(d) of the Act. The notice cited boilers 1 and 2 for violation of Illinois Rule 203 (hereinafter referred to as Rule 203), as demonstrated by the facility's air pollution emissions report, emission factor calculations and material contained in the Office of Federal Activities file. A copy of this notice was sent to the State of Illinois.

After a thorough Investigation of all relevant facts, It is determined that the Air Force is presently unable to comply with the Illinois implementation plan, that the schedule for compliance set forth in this order is as expeditious as practicable, and that the terms of this order comply with section 113(d) of the Act. Therefore, it is hereby ordered that:

1. The Air Force shall achieve compliance with Rule 203 at the 928th Tactical Airlift Group in accordance with the following schedule:

A. Award contract for construction of new oil-fired heating plant—has been commenced prior to the issuance of this order.

B. Begin construction of new plant—Has been commenced prior to the issuance of this order.

C. Complete construction of new plant—November 15, 1978.

D. Complete emission testing—June 1, 1979.

E. Demonstrate compliance with Illinois Rule 203—July 1, 1979.

II. The Air force shall achieve and demonstrate final compliance with Rule 203 at the 928th Tactical Airlift Group by July 1, 1979.

III. Pursuant to the authority granted in sections 113(d)(1)(C) and 114(a) of the Clean Air Act, the Air Force shall install a continuous monitoring system for the measurement of opacity on each effluent boiler stack following any control devices, at the new heating plant. The continuous monitoring system shall be installed, calibrated, maintained, and operated in accordance with the procedures set forth in 40 CFR section 60.13 and appendix B of 40 CFR Part 60, and shall be properly calibrated and operational upon achievement of final compliance with Rule 203.

The Air Force is required to submit a written report every calendar quarter giving the nature and cause of any emissions in violation of Illinois Rule 203 and corrective action taken. Negative reports will be submitted. The reports shall include the magnitude and duration of all violating emissions.

In addition, all data resulting from the operation of the continuous monitoring system shall be stored for a period of 2 years and made available for inspection by the U.S. EPA or its agent upon its request. Malfunctions or periods in which the continous monitoring system is not in operation shall be reported immediately, along with proposed corrective action.

IV. Pursuant to section 113(d)(7) of the Act, during the period in which this order is in effect, the Air Force shall minimize particulate emissions so that in no case shall the heating plant emissions exceed the present emission level of 1.44 pounds of particulate matter per million Btu of heat input. Such a limit is determined to be reasonable and is the best practicable interim system of emission reduction (taking into account the requirement with which the source must ultimately comply in section I, above) for the period during which this order is in effect.

V. The Air Force shall submit reports to the U.S. EPA detailing progress made with respect to each requirement of this order. Such reports shall be submitted within ten (10) days of the completion of such requirement. In addition, no later than July 1, 1979, the Air Force shall certify to the U.S. EPA that the 928th Tactical Airlift Group is in final compliance with Rule 203.

VI. All submissions and notifications to the U.S. EPA pursuant to this order shall be made to the Chief, Air Compliance Section, U.S. EPA, Region V, 230 South Dearborn Street, Chicago, Ill. 60604.

VII. Nothing in this order shall be construed so as to the affect the Air Force's responsibility to comply with any other Federal, State, or local regulations.

VIII. Nothing in this order shall be construed as a waiver by the Administrator of any rights or remedies under the Clean Air Act, including, but not limited to, section 303 of the Act, 42 U.S.C. section 7603.

IX. The Air Force is hereby notified that its failure to achieve final compliance by July 1, 1979, may result in a requirement to pay a noncompliance penalty under section 120. In the event of such failure the Air Force will be formally notified, pursuant to section 120(b)(3) and any regulations promulgated thereunder, of its noncompliance.

X. Should events occur which cause or are likely to cause delays in the achievement of the actions called for in this order, the Air force shall have the right to request that this order be modified by the U.S. EPA. If and until such a modification is made, however, the Air force shall remain subject to this order.

XI. This order is effective upon FEDERAL REGISTER promulgation.

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Part 63]

[Docket No. 78-218]

SPANISH INTERNATIONAL NETWORK

AGENCY: Federal Communications Commission.

ACTION: Order extending time.

SUMMARY: Order extending time to file reply comments from September 11, 1978, to September 15, 1978, concerning FCC C.C. Docket No. 78-218.

DATE: Comments must be received by September 15, 1978.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Joel S. Winnik, Common Carrier Bureau, Federal Communications Commission, Washington, D.C. 20554, 202-632-7265.

Request of Spanish International Network for authorized user status under the Communications Satellite Act of 1962 (43 FR 33942), C.C. Docket No. 78-218.

ORDER

Adopted: September 1, 1978.

Released: September 1, 1978.

By the Chief, Common Carrier Bureau:

The deadline for filing reply comments in this matter is hereby extended from September 11, 1978, until September 15, 1978.

JOSEPH A. MARINO,
Acting Chief, Common Carrier Bureau.

DEPARTMENT OF AGRICULTURE

Farmers Home Administration

PROGRAM REGULATIONS, ADMINISTRATIVE NOTICES AND FARMS

Mailing List

AGENCY: Farmers Home Administration, USDA.

ACTION: Notice.

SUMMARY: The Farmers Home Administration (FmHA) is establishing a mailing list for program regulations, administrative notices, and forms. The list is being established as a result of inquiries from interested individuals and groups. The intended effect of this action is to make FmHA Program regulations more readily available even though such regulations are also usually issued verbatim in the daily issue of the FEDERAL REGISTER.

EFFECTIVE DATE: September 12, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. Joseph H. Linsley, Chief, Directives Management Branch, Phone 202-447-4057.

SUPPLEMENTARY INFORMATION: On April 27, 1978, the Farmers Home Administration (FmHA) published a Notice in the FEDERAL REGISTER (43 FR 17988) indicating that we were considering establishing a mailing list on Program Issuances. Comments were invited on our proposal.

We have received 29 written comments all of which are favorable toward establishment of the mailing list. The major controversy was our proposed charges for the mailing list services. Several commenters thought that our charges should be reduced or eliminated for certain organizations such as nonprofit groups. These arguments were carefully evaluated and we have decided to reduce the charge for new regulations and forms, amendments to existing regulations and forms, and new Administrative Notices from $75.00 per year to $40.00 per year for public and nonprofit organizations. Therefore, the charges established are as follows:

1. $250.00 for the complete set of program regulations, Administrative Notices, and forms.

2. $40.00/yr. for public and nonprofit organizations to receive new regulations and forms, amendments to existing regulations and forms, and new Administrative Notices. This charge is for a calendar year or any part thereof. Payment of $40.00 in 1978 will cover services for the remainder of 1978 and 1979.

3. $75.00/yr. for individuals and groups other than public and nonprofit organizations to receive new regulations and forms, amendments to existing regulations and forms, and new Administrative Notices. This charge is for a calendar year or any part thereof. Payment of $75.00 in 1978 will cover services for the remainder of 1978 and 1979.

To receive mailing list services, please notify the Director, Finance Office, 1520 Market Street, St. Louis, Mo. 63103, Attention: RCMS, in writing. The letter should indicate the complete mailing address (including ZIP code) to which you wish the material sent. A check, bank draft, or money order for the full amount for the services desired made payable to the "Treasury of the United States" should accompany the request. Public and nonprofit organizations should include evidence of their status to qualify for the $40.00 annual charge. Please allow a minimum of 3 weeks for delivery.

To remain on the list after the initial subscription, please send the full payment for the next year's services to the above address not later than December 20.

One time requests for a copy of a specific regulation, Administrative Notice, or form should be directed to our Freedom of Information Officer, Mr. James Bryan, USDA, FmHA, 14th St. and Independence Avenue SW., Washington, D.C. 20250, telephone 202-447-2211. Charges for these requests will be based upon the Department's fee schedule as published in the FEDERAL REGISTER on April 4, 1978 (43 FR 14002).

Dated: September 1, 1978.

DENTON E. SPRAGUE,
Deputy Administrator,
Farmers Home Administration.

[3410-15]

Rural Electrification Administration

COPPER VALLEY RURAL ELECTRIC ASSOCIATION, INC.

Solomon Gulch Project

Notice is hereby given that the Rural Electrification Administration (REA) proposes to provide financing to Copper Valley Rural Electric Association, Inc., for construction of the Solomon Gulch project. The Solomon Gulch project is a hydroelectric generating project located in the vicinity of Valdez, Alaska. The proposed project would consist of a rockfill dam at the site of an existing low dam at the outlet of Solomon Lake, two rockfill dikes, a reservoir with a surface area of 600 acres, a steel Penstock, a powerhouse containing two generating units with a capacity of 6,000 kW each, a 138-kV transmission line extending approximately 104 miles to Glennallen, a 25 kV-line approximately 5 miles in length to Valdez, and appurtenant facilities.

As a part of its licensing process, the Federal Energy Regulatory Commission (FERC), as lead agency, published a final environmental impact statement concerning this project on March 3, 1978. The Commission staff and REA staff consulted and cooperated in the preparation of both the draft and the final EIS. While REA participated in the preparation of the EIS with the intent of using it in complying with REA's responsibilities under NEPA, REA was not mentioned in the FERC FEDERAL REGISTER notices announcing the availability of the draft and final EIS's.

REA hereby provides formal notification that it intends to utilize the subject final environmental impact statement in its decisionmaking process regarding financing the Solomon Gulch project. In REA's judgment, the final EIS satisfactorily addresses its comments and suggestions and is responsive to all considerations thus far made known to REA.

The statement is available for public inspection at the Federal Energy Regulatory Commission, Office of Public Information, Room 1000, 825 North Capitol Street NE., Washington, D.C. 20426, and its San Francisco regional office, 555 Battery Street, San Francisco, Calif. 94111. Copies may be ordered from the FERC, Office of Public Information.

Final REA action with respect to this matter may be taken after September 27, 1978, but only after Rea has reached satisfactory conclusions with respect to its environmental effects and after procedural requirements set forth in the National Environmental Policy Act of 1969 have been met.

Dated at Washington, D.C., this 5th day of September 1978.

DAVID A. HAMIL,
Administrator, Rural Electrification Administration.

ARCHITECTURAL AND TRANSPORTATION BARRIERS COMPLIANCE BOARD

NATIONAL ADVISORY COMMITTEE ON AN ACCESSABLE ENVIRONMENT

Public Meeting

Notice is hereby given, pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463) that the fourth and final 1978 meeting of the National Advisory Committee on an Accessible Environment will be held on September 23 and 24, 1978. The September 23 meeting, from 8:30 a.m. to 5 p.m., and the September 24 meeting, from 9 a.m. to 5 p.m., will be held at the Copley Plaza Hotel, Copley Square, Boston, Mass. The September 23 meeting, from 10 a.m. to 3 p.m., will feature a public awareness session.

The National Advisory Committee on an Accessible Environment is established under the 1974 amendments to the Rehabilitation Act (Pub. L. 93-516, 29 U.S.C. 792, et seq.). The Committee is established to provide advice, guidance, and recommendations to the Architectural and Transportation Barriers Compliance Board in carrying out its functions.

The meeting of the Committee shall be open to the public. On the first morning, the Committee will prepare for the public awareness session. The public awareness session will feature a presentation about the implications of new Rehabilitation legislation on the Architectural and Transportation Barriers Compliance Board status, function, and enforcement responsibilities. In addition, the NACAE will sponsor three concurrent sessions about mobility handicaps, communication barriers, and low visibility disabilities. Public comments and participation are invited. Following the public awareness session, the NACAE will evaluate the usefulness and intent of public awareness sessions held on this and previous occasions.

The primary focus of the September 24 meeting will be the preparation of the annual NACAE report on its activities. Members will discuss their accomplishments, goals which were not attained, and make recommendations for future participation.

Persons interested in attending the meeting should contact Ms. Laurinda Steele, Coordinator, Architectural and Transportation Barriers Compliance Board, Mary E. Switzer Building, Room 1010, 330 C Street SW., Washington, D.C. 20201, telephone 202-245-1801. TTY 202-245-1593.

ROBERT JOHNSON,
Executive Director, Architectural and Transportation Barriers Compliance Board.

[6320-01]

CIVIL AERONAUTICS BOARD

[Docket 30635; Order 78-8-205]

ARIZONA SERVICE INVESTIGATION

Order To Show Cause

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 31st day of August 1978.

In our principal decision in this case, we have decided to authorize Sky West Aviation to provide subsidized service at Page, Ariz. and Cochise Airlines to provide subsidized service at various Arizona and California communities. Our awards are part of a broader program to insure reliable small community service at a reasonable cost to the Federal taxpayer. As part of our plan we have made permissive certain authority now held by local service airlines and authorized Sky West and Cochise to continue to engage in separate commuter operations. It is our judgment that these actions, coupled with the award of Federal subsidy, will improve air service to the entire area.

We now believe that an award to Sky West to serve points authorized to Cochise, on a subsidy ineligible basis, will help insure that our expectation of improved service comes to pass. The possibility of such an award was not formally at issue in the *Arizona Service Investigation* so we propose such authority in this order.

To begin with, we believe that the grant of permissive subsidy ineligible certificate authority to each carrier in the markets authorized on a subsidy eligible basis to the other will serve as a competitive prod to the other to fulfill its certificate responsibilities. Second, the availability of a certificate potential replacement carrier should help minimize administrative delay in the event that the primary subsidized carrier falters—an eventuality which we do not expect but for which we should nonetheless provide. Finally, we see no detriment in the grant of such certificate authority since Sky West would in any event be authorized under section 416 of the Act to provide the service. In all these circumstances, we find that the public convenience and necessity require that Sky West Aviation be authorized on a subsidy ineligible basis to provide certificate service at Yuma, Kingman, Prescott, and Winslow, Ariz. and Blythe and El Centro, Calif. and between the Grand Canyon and Phoenix and Flagstaff and Phoenix and that the carrier is fit, willing, and able to provide the service.

Accordingly, *It is ordered*, That:

1. All interested persons be directed to show cause why the Board should not issue an order making final the tentative findings and conclusions stated here;

2. Any interested persons having objection to the issuance of an order making final the proposed findings, conclusions, and certificate amendments set forth here shall, within 30 days after the date of service of this order, file with the Board and serve on all persons listed in paragraph 5 below a statement of objections together with a summary of testimony, statistical data, and such evidence as is expected to be relied on to support the stated objections; answers may be filed 15 days thereafter;

3. If timely and properly supported objections are filed, full consideration will be accorded the matters or issues raised in the objections before further action is taken by the Board;

4. In the event no objections are filed, all further procedural steps will be deemed to have been waived, and the case will be submitted to the Board for final action;

5. A copy of this order be served upon all the parties to the *Arizona Service Investigation*, Docket 30635.

This order shall be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board:[1]

PHYLLIS T. KAYLOR,
Secretary.

[FR Doc. 78-25657 Filed 9-11-78; 8:45 am]

[1] All members concurred except member O'Mella who concurred and dissented and attached his concurring and dissenting statement to the Opinion 78-8-195.

[6320-01]

[Docket 32953; Order 78-8-191]

CERTAIN FOREIGN AIR CARRIERS

Temporary Amendment to Permits; Order Vacating Findings

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 31st day of August 1978.

By Order 78-6-216, adopted June 30, 1978, the board directed all interested persons to show cause why it should not, subject to the approval of the President, amend on a temporary basis the foreign air carrier permits held by carriers listed in the attachment to that order by adding the following paragraph to each carrier's permit:

Effective upon the occurrence of a 1978 West Coast maritime work stoppage and continuing until five days after the end of such stoppage, no term, restriction, or condition of this permit shall preclude the holder from (1) operating charter flights of property where more than one person charters the capacity of an aircraft for air freight; (2) chartering excess freight capacity on charter flights of persons and their accompanying baggage for the carriage of air freight to one or more persons; (3) operating charters on behalf of authorized air freight forwarders as defined in Part 296 of the Economic Regulations; and (4) operating an unlimited number of planeload cargo charter flights and charter flights described in (1)-(3) above, *provided* that this paragraph shall be effective only for operations in markets affected by the work stoppage where one point is within the United States or its territories and the other point is outside of the U.S. or its territories.[1]

The possibility of a West Coast maritime work stoppage arose because at midnight, on June 30, the International Longshoremen's and Warehousemen's Union's (independent) contract with its employers on the West Coast expired. In the event a new contract was not reached and a work stoppage subsequently occurred, we concluded that the resultant disruption in the movement of cargo goods would be substantial, and that it warranted the proposed temporary emergency cargo air authority to help alleviate hardships on shippers and the public generally.

A new contract agreement now has been reached between the ILWU and its employers on the West Coast. Consequently, there is no longer a need for the temporary permit amendments proposed in Order 78-6-216.

Accordingly, *It is ordered*, That: The Board's tentative findings and conclusions in Order 78-6-216 be vacated.

This order will be published in the FEDERAL REGISTER.

[1] Order 78-6-216 directed interested persons to file statements in opposition to or in support of the proposed action within 15 days. No one filed an answer.

By the Civil Aeronautics Board: [2]

PHYLLIS T. KAYLOR,
Secretary.

ENVIRONMENTAL PROTECTION AGENCY

[FRL 964-2; PP 8G2022/T155]

Establishment of Temporary Tolerances

N,N-DIMETHYLPIPERIDINIUM CHLORIDE

BASF Wyandotte Corp., Agricultural Chemical Div., 100 Cherry Hill Road, Parsippany, N.J. 07054, has submitted a pesticide petition (PP 8G2022) to the Environmental Protection Agency (EPA). This petition requests that temporary tolerances be established for residues of the plant growth regulator *N,N*-dimethylpiperidinium chloride in or on the raw agricultural commodities cotton forage at 1.5 parts per million (ppm); cottonseed at 1 ppm; in the meat, fat, and meat byproducts of cattle, goats, hogs, horses, poultry, and sheep at 0.1 ppm; and in milk and eggs at 0.05 ppm.

Establishment of these temporary tolerances will permit the marketing of the above raw agricultural commodities when treated in accordance with an experimental use permit that is being issued concurrently under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended (86 Stat. 973, 89 Stat. 751; 7 U.S.C. 136(a) et seq.).

An evaluation of the scientific data reported and other relevant material has shown that the requested tolerances are adequate to cover residues resulting from the proposed experimental use, and it has been determined that the temporary tolerances will protect the public health. (A related document concerning the establishment of a feed additive regulation for residues of the subject pesticide in cottonseed meal appears elsewhere in today's FEDERAL REGISTER.) The temporary tolerances are established for the pesticide, therefore, with the following provisions:

1. The total amount of the pesticide to be used must not exceed the quantity authorized by the experimental use permit.

2. BASF Wyandotte Corp. must immediately notify the EPA of any findings from the experimental use that have a bearing on safety. The firm must also keep records of production, distribution, and performance and on request make the records available to any authorized officer or employee of the EPA or the Food and Drug Administration.

These temporary tolerances expire September 5, 1979. Residues not in excess of 1.5 ppm remaining in or on cotton forage: 1 ppm remaining in or on cottonseed; 0.1 ppm remaining in the meat, fat, and meat byproducts of cattle, goats, hogs, horses, poultry, and sheep; and 0.05 ppm remaining in milk and eggs after this expiration date will not be considered actionable if the pesticide is legally applied during the term of and in accordance with the provisions of the experimental use permit and temporary tolerances. These temporary tolerances may be revoked if the experimental use permit is revoked or if any scientific data or experience with this pesticide indicates such revocation is necessary to protect the public health. Inquiries concerning this notice may be directed to Herbicide/Fungicide Branch, Registration Division (TS-767), Office of Pesticide Programs, Room 320, East Tower, 401 M Street SW., Washington, D.C. 20460, 202-426-2632.

(Sec. 408(j) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346a(j).)

Dated: September 5, 1978.

HERBERT S. HARRISON,
Acting Director, Registration Division.

FEDERAL MARITIME COMMISSION

Agreements Filed

The Federal Maritime Commission hereby gives notice that the following agreements have been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of each of the agreements and the justifications offered therefor at the Washington office of the Federal Maritime Commission, 1100 L Street NW., Room 10218; or may inspect the agreements at the field offices located at New York, N.Y.; New Orleans, La.; San Francisco, Calif.; Chicago, Ill.; and San Juan, P.R. Interested parties may submit comments on each agreement, including requests for hearing, to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, by October 2, 1978. Comments should include facts and arguments concerning the approval, modification, or disapproval of the proposed agreement. Comments shall discuss with particularity allegations that the agreement is unjustly discriminatory or unfair as between carriers, shippers, exporters, importers, or ports, or between exporters from the United States and their foreign competitors, or operates to the detriment of the commerce of the United States, or is contrary to the public interest, or is in violation of the act.

A copy of any comments should also be forwarded to the party filing the agreements and the statement should indicate that this has been done.

Agreement No. 10265-1. Filing party: Neal M. Mayer, Esq., Coles & Goertner, 1000 Connecticut Avenue NW., Washington, D.C. 20036. Summary: Agreement No. 10265-1, between Companhia de Navegacao Lloyd Brasileiro and Companhia de Navegacao Maritime Nacional, modifies the basic cooperative working agreement to expand its geographic scope to the trades between Argentina and the United States and Uruguay and the United States.

Agreement No.: T-3699. Filing party: Leslie E. Still, Jr., Senior Deputy City Attorney, Office of the City Attorney of Long Beach, Harbor Administration Building, P.O. Box 570, Long Beach, Calif. 90801. Summary: Agreement No. T-3699, between city of Long Beach, (City) and Madison Interseas (San Francisco), Inc., d.b.a. Mercantile & Marine Terminals (Madison), provides for the 10-year, exclusive terminal lease consisting of a transit shed and open paved area to be used as a public utility wharfinger business. Madison does not have the exclusive right to perform stevedoring services upon the leased premises or the sole and exclusive right to operate a public shipping terminal at the port. When the premises are not in use by Madison, City's general manager may, with Madison's consent, make temporary assignments to other persons as provided in the Port of Long Beach Tariff. Madison will receive credit in computing its minimum obligation from the collection of tariff charges pursuant to the temporary assignments. All charges assessed by Madison will be reasonable and conform as nearly as possible with the charges published in the Port of Long Beach Tariff and will be subject to review and control by City. As compensation, Madison will pay to City all revenues from dockage, wharfage, wharf demurrage and wharf storage and other applicable tariff charges from its operations up to a minimum obligation of $275,000 per annum after which City and Madison will divide the revenues. Upon approval, Agreement No. T-3699 will supersede Agreement No. T-1985, as amended.

Agreement No.: T-3701. Filing party: Eldered N. Bell, Jr., Sea-Land Service, Inc., 10 Parsonage Road, P.O. Box 900, Edison, N.J. 08817. Summary: Agreement No. T-3701, between the Port of Houston Authority (Port) and Sea-Land Service, Inc. (Sea-Land), provides for the Port's 20-year lease (with a 10-year renewal option) to Sea-Land of certain premises at the Port's Barbours Cut Terminal, to be used to con-

duct a proprietary or contract marine terminal. Sea-Land shall not conduct a public container terminal upon the leased premises. In addition, the Port grants Sea-Land preferential berthing rights to one of three assigned berths, at the Port's discretion. The Port retains secondary berthing rights to occupy portions of the berth not occupied by Sea-Land. Vessels of other carriers desiring to use the assigned berth as a lay berth shall be assigned by either the Port or Sea-Land and shall be liable for all applicable charges of the Port's tariff. Sea-Land grants to Port the right to grant another carrier the preferential right to utilize the assigned berth for 1 day a week and as compensation for this, Port shall pay Sea-Land 50 percent of dockage fees and 6 percent of wharfage fees collected by Port from the vessels of other carriers occupying the assigned berth. Container cranes to be utilized by vessels of other carriers at the assigned berth may be supplied by either the Port or Sea-Land at rental rates not lower than those established in the Port's tariff, and the revenues therefrom shall be retained by the respective crane owner. The Port or Sea-Land may contract with such other carrier to provide a reduced crane rental on the basis of a guaranteed annual minimum use of its cranes. As compensation for the use of the facilities, Sea-Land shall pay Port an annual rental amount, comprising a land rental and an improvement rental, subject to minimum and maximum payments, as described in the agreement.

By Order of the Federal Maritime Commission.

Dated: September 6, 1978.

FRANCIS C. HURNEY,
Secretary.

[FR Doc. 78-25622 Filed 9-11-78; 8:45 am]

[6730-01]

PETITIONS FILED

The Federal Maritime Commission hereby gives notice that the following petition(s) have been filed with the Commission for approval pursuant to section 14b of the Shipping Act, 1916, as amended (75 Stat. 762, 46 U.S.C. 813a).

Interested parties may inspect and obtain a copy of the petition(s) and the justification(s) offered therefor at the Washington office of the Federal Maritime Commission, 1100 L Street NW., Room 10218; or may inspect the petition(s) at the field offices located at New York, N.Y.; New Orleans, La; San Francisco, Calif.; Chicago, Ill.; and San Juan, P.R. Interested parties may submit comments on the petition(s), including requests for hearing, to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, by October 2, 1978. Comments should include facts and arguments concerning the approval, modification, or disapproval of the proposed petition(s). Comments shall discuss with particularity allegations that the petition is unjustly discriminatory or unfair as between carriers, shippers, exporters, importers, or ports, or between exporters from the United States and their foreign competitors, or operates to the detriment of the commerce of the United States, or is contrary to the public interest, or is in violation of the act.

A copy of any comments should also be forwarded to the party filing the petition(s) and the statement should indicate that this has been done.

Agreement No. 9982-DR-3. Filing party: Howard A. Levy, Esq., Suite 727, 17 Battery Place, New York, N.Y. 10004. Summary: Agreement No. 9982 DR-3 modifies the Scandinavia Baltic/U.S. North Atlantic Westbound Conference's Exclusive Patronage (Dual Rate) Contract System to extend the duration of its Dual Rate System for an indefinite term beyond December 19, 1978.

By Order of the Federal Maritime Commission.

Dated: September 6, 1978.

FRANCIS C. HURNEY,
Secretary.

[Fact Finding Investigation No. 10]

POSSIBLE UNLAWFUL ACTION OF CARRIERS AND CONFERENCES IN TREATMENT OF OVERLAND/COMMON POINT (OCP) CARGO

Extension of Investigation

By order of August 23, 1977, the Federal Maritime Commission instituted fact finding investigation No. 10. This non-adjudicatory proceeding was instituted to develop facts relating to the effects of a proposed phaseout of the Overland Common Point (OCP) rates by the Trans-Pacific Freight Conference of Japan/Korea (TPFC-J/K) and to determine how the legitimate needs of the public might be protected.

The TPFC-J/K notified the Commission through normal tariff filing procedures of its intention to eliminate the publication of OCP rates over a period of time relating to three future general rate increase actions. This decision raised the question of possible violations of section 15, 16 First, and/or 17 of the Shipping Act, 1916, which prompted the Commission to institute a fact finding proceeding.

Fact Finding Investigation No. 10 was initially instituted for a period of one year ending August 23, 1978. The several public proceedings held under this investigation have produced an unforeseen volume of pertinent data and shipper/carrier testimony. This material requires an additional period of time for it to be fully considered and reflected in a report to this Commission.

Therefore, it is ordered, that pursuant to sections 22 and 27 of the Shipping Act, 1916, (46 U.S.C. 821 and 826) and section 214(a) of the Merchant Marine Act of 1936 (46 U.S.C. 1124(a)), fact finding investigation No. 10 is extended to October 31, 1978.

It is further ordered, that Notice of this Order be published in the FEDERAL REGISTER.

By the Commission.

Dated: September 7, 1978.

FRANCIS C. HURNEY,
Secretary.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Center for Disease Control

IMMUNIZATION PRACTICES ADVISORY COMMITTEE

Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), the Center for Disease Control announces the following Committee meeting:

Name: Immunization Practices Advisory Committee.
Dates: October 3-4, 1978.
Place: Room 207, Building 1, Center for Disease Control 1600 Clifton Road NE., Atlanta, Ga. 30333.
Time: 8:30 a.m.
Type of meeting: Open.
Contact person: H. Bruce Dull, M.D.; Executive Secretary of Committee, Building 1, Room 2118, Center for Disease Control, 1600 Clifton Road NE., Atlanta, Ga. 30333, phone 404-633-3311, extension 3701. FTS 236-3701.
Purpose: The Committee is charged with advising on the appropriate uses of immunizing agents for public health practice.
Agenda: The Committee will review existing recommendations on measles and rubella vaccines and proceed with their updating.

Agenda items are subject to change as priorities dictate.

The meeting is open to the public for observation and participation. A roster of members and other relevant information regarding the meeting may be obtained from the contact person listed above.

Dated: September 5, 1978.

WILLIAM H. FOEGE,
Director,
Center for Disease Control.

Food and Drug Administration

[Docket No. 78F-0243]

ABBOTT LABORATORIES

Filing of Food Additive Petition

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: Abbott Laboratories has filed a petition (FAP 7B3321) proposing to amend the food additive regulations to provide for the safe use of 4-(diiodomethylsulfonyl) toluene as a componeht in rubber articles intended for repeated use in contact with food.

FOR FURTHER INFORMATION CONTACT:

John J. McAuliffe, Bureau of Foods (HFF-334), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C Street SW., Washington, D.C. 20204, 202-472-5690.

SUPPLEMENTARY INFORMATION: Pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (section 409(b)(5), 72 Stat. 1786 (21 U.S.C. 348(b)(5))), notice is given that a petition (FAP 7B3321) has been filed by Abbott Laboratories, North Chicago, Ill. 60064, proposing that § 177.2600 *Rubber articles intended for repeated use* (21 CFR 177.2600) be amended for the safe use of 4-(diiodomethylsulfonyl) toluene as a component in rubber articles intended for repeated use in contact with food.

The environmental impact analysis report and other relevant material have been reviewed, and it has been determined that the proposed use of the additive will not have a significant environmental impact. Copies of the environmental impact analysis report may be seen in the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Room 4-65, 5600 Fishers Lane, Rockville, Md. 20857, between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: September 1, 1978.

SANFORD A. MILLER,
Director, Bureau of Foods.

Food and Drug Administration

MERCK SHARP & DOHME

Sulfathalidine Boluses; Withdrawal of Approval of New Animal Drug Application

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: This document withdraws approval of new animal drug application (NADA) 5-456 providing for use of sulfathalidine boluses that contain 4 grams of phthalylsulfathiazole in each bolus for the treatment of scours, infectious diarrhea, and enteritis in cattle and white scours in swine. The manufacturer has requested this action.

EFFECTIVE DATE: September 12, 1978.

FOR FURTHER INFORMATION CONTACT:

Donald A. Gable, Bureau of Veterinary Medicine (HFV-114), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857, 301-443-3420.

SUPPLEMENTARY INFORMATION: Under the Federal Food, Drug, and Cosmetic Act (sec. 512(e), 82 Stat. 345-347 (21 U.S.C. 360b(e))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1) and redelegated to the Director of the Bureau of Veterinary Medicine (21 CFR 5.84), the following notice is issued:

In a notice published in the FEDERAL REGISTER of July 22, 1970 (35 FR 11713), the Food and Drug Administration, after evaluating a report received from the National Academy of Science/National Research Council Drug Efficacy Study Group, concluded that sulfathalidine boluses were probably effective for the treatment of certain bacterial intestinal infections, such as calf scours and infectious enteritis of pigs. The announcement further stated that: (1) Additional data were necessary to support claims made for use of the drug in horses, (2) label changes were necessary, (3) the disease claims for the preparation must be restricted to diseases involving the gastrointestinal tract, (4) disease claims should be properly qualified, and (5) data should demonstrate that the bolus disintegrates in the gastrointestinal tract of the medicated species to produce the desired effect.

In response to the notice, the firm Merck Sharp & Dohme research Laboratories, Division of Merck & Co., Inc., P.O. Box 2000, Rahway, N.J. 07065, filed additional data which were evaluated and found to be incomplete, and additional data were requested. However, in a May 19, 1978, letter, the firm advised that it had evaluated the requirements necessary for approval of the product and had decided to discontinue distribution. In the letter, Merck Sharp & Dohme Research Laboratories requested that approval of the NADA be withdrawn and waived an opportunity for hearing.

In accordance with § 514.115 *Withdrawal of approval of applications* (21 CFR 514.115), notice is given that approval of NADA 5-456 and all supplements thereto is hereby withdrawn, effective September 12, 1978.

Dated: September 5, 1978.

LESTER M. CRAWFORD,
Director, Bureau of Veterinary Medicine.

[FR Doc. 78-25566 Filed 9-11-78; 8:45 am]

[4110-35]

Health Care Financing Administration

PHARMACEUTICAL REIMBURSEMENT BOARD

Proposed MAC's and Announcement of Public Hearing

AGENCY: Health Care Financing Administration (HCFA), HEW.

ACTION: Notice.

SUMMARY: In accordance with 45 CFR S19.5 (as amended at 43 FR 35310-11, Aug. 9, 1978), the Pharmaceutical Reimbursement Board proposes maximum allowable cost (MAC) limits on the drugs specified below and announces a public hearing with regard to these proposed MAC's.

DATES: Hearing—November 1, 1978 (9 a.m. to 5 p.m.) and November 2, 1978 (9 a.m. to 5 p.m.) and November 2, 1978 (9 a.m. to 5 p.m.). End of comment period—October 12, 1978. End of period for submission of requests to appear at the hearing—October 17, 1978.

PLACE OF HEARING: Auditorium, Hubert H. Humphrey Building, 200 Independence Avenue SW., Washington, D.C. 20201.

FOR FURTHER INFORMATION CONTACT:

Peter Rodler, Executive Secretary, Pharmaceutical Reimbursement Board, 3076 Switzer Building, 330 C Street SW., Washington, D.C. 20201, 202-472-3821.

SUPPLEMENTARY INFORMATION: The Pharmaceutical Reimbursement Board has been established within the Health Care Financing Administration for the purpose of setting a MAC for multiple-source drugs for which reimbursement is provided under medicaid, medicare, and other programs administered by the Department. Pursuant

V 43 / 177 SEP 12 78 UMI

to 45 CFR S19.5 (as amended at 43 FR 35310-11, Aug. 9, 1978), the Pharmaceutical Reimbursement Board proposes the following MAC limits:

Acetaminophen with codeine tablets, 30 mg, $0.0780 per tablet.
Acetaminophen with codeine tablets, 60 mg, $0.1545 per tablet.
Hydrochlorothiazide tablets, 25 mg, $0.0250 per tablet.
Hydrochlorothiazide tablets, 50 mg, $0.0306 per tablet.
Probenecid tablets, 0.5 g, $0.0644 per tablet.

The Board originally identified these multiple-source drugs as drugs for which significant amounts of Federal funds are expended and for which there are significantly different prices. The Food and Drug Administration has advised the Board that there is no regulatory action, either pending or under consideration, that would be a reason for delaying or withholding the establishment of MAC's on the drugs listed above. In making the initial determination of the lowest unit price at which each of the drugs is widely and consistently available from any formulator or labeler, the Board made use of a HCFA-sponsored survey of drugstore sales by IMS America, offers to sell as found in the Red Book, several comments from manufactures, and State MAC limits on these drugs already in effect in certain States. The FDA advice and the economic data listed above are available for inspection at the Office of Pharmaceutical Reimbursement and a limited number of copies are available upon request.

Interested persons and organizations are invited to submit in writing comments on the proposed MAC's. All comments received on or before October 12, 1978, will be considered and will be maintained for public inspection at the Office of Pharmaceutical Reimbursement.

A public hearing on the proposed MAC's will be held November 1 and 2, 1978. Persons or organizations wishing to make presentations must submit to the Board's executive secretary by October 17, 1978, at least 20 copies of the proposed oral presentation in its entirety, together with all supporting studies and materials and the names and addresses of proposed participants. The Board will grant every request to appear when the presentation is relevant to the proposed MAC.

Dated: September 6, 1978

PETER RODLER,
Executive Secretary,
Pharmaceutical Reimbursement Board.

Health Services Administration

MATERNAL AND CHILD HEALTH RESEARCH GRANTS REVIEW COMMITTEE

Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), announcement is made of the following National Advisory body scheduled to meet during the month of October 1978:

Name: Maternal and child health research grants review committee.
Date and Time: October 4-6, 1978, 9 a.m.
Place: Conference Room M, Parklawn Building, 5600 Fishers Lane, Rockville, Md. 20857.
Open October 4, 9 a.m. to 10 a.m.
Closed for remainder of meeting.
Purpose: The Committee is charged with the review of all research grant applications in the program areas of maternal and child health administered by the Bureau of Community Health Services.

Agenda: The Committee will be performing the review of grant applications for Federal assistance. This meeting will be open to the public from 9 to 10 a.m., October 4 for the Opening Remarks. The remainder of the meeting will be closed to the public for the review of grant applications, in accordance with the provisions set forth in section 552b(c)(6), Title 5, U.S. Code and the Determination by the Administrator, Health Services Administration, pursuant to Pub. L. 92-463.

Anyone wishing to obtain a roster of the members, minutes of meeting, or other relevant information should contact Gontran Lamberty, Dr. P.H., Bureau of Community Health Services, Room 7-15, Parklawn Building, 5600 Fishers Lane, Rockville, Md. 20857, Telephone 301-443-2190.

Agenda items are subject to change as priorities dictate.

Dated: September 1, 1978.

WILLIAM H. ASPDEN, JR.,
Associate Administrator for Management.

REPORT ON BIOASSAY OF HYDRAZOBENZENE FOR POSSIBLE CARCINOGENICITY

Availability

Hydrazobenzene (CAS 530-50-7) has been tested for cancer-causing activity with rats and mice in the Carcinogenesis Program, Division of Cancer Cause and Prevention, National Cancer Institute. A report is available to the public.

Summary: A bioassay of technical-grade hydrazobenzene for possible carcinogenicity was conducted using Fischer 344 rats and B6C3F1 mice. Hydrazobenzene was administered in the feed, at either of two concentrations, to groups of 50 male and 47 to 50 female animals of each species. The time-weighted average dietary concentrations used in the rat bioassay were 0.008, 0.004, and 0.01 percent for low-dose males, high-dose males, low-dose females, and high-dose females, respectively. The time-weighted average dietary concentrations used in the mouse bioassay were 0.008, 0.04, 0.004, and 0.04 percent for low-dose males, high dose males, low-dose females, and high-dose females, respectively. After a 78-week period of compound administration, observation of the rats continued for an additional 17 or 18 weeks. For each species, 47 to 50 animals of each sex were placed on test as controls.

In both species, adequate numbers of animals in all groups survived sufficiently long to be at risk from late-appearing tumors.

Under the conditions of this bioassay, hydrazobenzene was carcinogenic to Fischer 344 rats of both sexes, causing increased incidences of hepatocellular carcinoma and Zymbal's gland squamous-cell neoplasms in male rats, neoplastic nodules of the liver in female rats, and mammary adenocarcinomas in female rats. Hydrazobenzene was also carcinogenic to female B6C3F1 mice, causing an increased incidence of hepatocellular carcinomas. The compound was not carcinogenic to male B6C3F1 mice.

Single copies of the report are available from the Office of Cancer Communications, National Cancer Institute, Building 31, Room 10A21, National Institutes of Health, Bethesda, Md. 20014.

(Catalogue of Federal Domestic Assistance Program Number 13.393, Cancer Cause and Prevention Research)

Dated: August 31, 1978.

DONALD S. FREDRICKSON,
Director, National Institutes of Health.

[FR Doc. 78-25215 Filed 9-11-78; 8:45 am]

[4110-08]

REPORT ON BIOASSAY OF L-TRYPTOPHAN FOR POSSIBLE CARCINOGENICITY

Availability

L-tryptophan (CAS 73-22-3) has been tested for cancer-causing activity with rats and mice in the Carcinogenesis Program, Division of Cancer Cause and Prevention, National Cancer Institute. A report is available to the public.

Summary: A bioassay of the amino acid L-tryptophan for possible carcinogenicity was conducted by administering the test chemical in feed to Fischer 344 rats and B6C3F1 mice.

Groups of 35 rats and 35 mice of each sex were administered L-tryptophan at one of two doses, either 25,000 or 50,000 p.p.m., 5 days per week for 78 weeks, and then observed for 26 or 27 weeks. Matched controls consisted of groups of 15 rats or 15 mice of each sex. All surviving rats and mice were killed at 104 or 105 weeks.

L-tryptophan had little toxic effect on the rats; mean body weight loss was minimal and survival of dosed groups of both sexes was high. In the mice, mean body weights of dosed animals were lower than those of controls throughout most of the bioassay, particularly in the females. Sufficient numbers of rats were at risk to termination of the study for development of late-appearing tumors, and sufficient numbers of mice were at risk beyond 52 weeks of the study for development of tumors.

It is concluded that under the conditions of this bioassay, L-tryptophan was not carcinogenic for Fischer 344 rats or B6C3F1 mice.

Single copies of the report are available from the Office of Cancer Communications, National Cancer Institute, Building 31, Room 10A21, National Institutes of Health, Bethesda, Md. 20014.

SICKLE CELL DISEASE ADVISORY COMMITTEE

Amended Meeting

Notice is hereby given of a change in meeting dates and room assignment of the Sickle Cell Disease Advisory Committee, National Heart, Lung, and Blood Institute, which was published in the FEDERAL REGISTER on July 25, 1978, 43 FR 32190.

This committee was to have convened at 8:30 a.m. on September 14 and 15, 1978 in Conference Room 7, Building 31. This has been changed to November 2 and 3, 1978, Conference Room 10, C-Wing, Building 31, National Institutes of Health, Bethesda, Md.

The entire meeting will be open to the public from 8:30 a.m. to 5 p.m. on both days. All other items remain the same.

Dated: September 6, 1978.

SUZANNE L. FREMEAU,
Committee Management Officer, National Institutes of Health.

Office of Education

NATIONAL ADVISORY COUNCIL ON THE EDUCATION OF DISADVANTAGED CHILDREN

Amendment

This notice is to amend the first paragraph of the notice of the meeting of the National Advisory Council on the Education of Disadvantaged Children which appeared in the FEDERAL REGISTER on Friday, August 25, 1978, page 38115. The Council meeting scheduled for September 16, 1978, from 8:30 a.m.-1:30 p.m., will be held in the Colony Room of the Ramada Inn located at 7621 Kingston Pike, Knoxville, Tenn. 37919, 615-693-8111.

The National Advisory Council on the Education of Disadvantaged Children is established under section 148 of the Elementary and Secondary Act (20 U.S.C. 2411) to advise the President and the Congress on the effectiveness of compensatory education to improve the educational attainment of disadvantaged children.

Signed at Washington, D.C., on September 6, 1978.

ROBERTA LOVENHEIM,
Executive Director.

Social Security Administration

REDELEGATIONS OF AUTHORITY TO IMPLEMENT THE PROVISIONS OF SECTION 405 OF PUB. L. 95-216

Section 405 of Pub. L. 95-216, enacted on December 20, 1977, authorizes and directs the Secretary of Health, Education, and Welfare (the Secretary) to pay States amounts equal to the amounts expended by States for erroneous State-administered State supplementary payments made to aged, blind, or disabled individuals where it has been determined by the Secretary, through an audit by the Department of Health, Education, and Welfare, which has been reviewed and concurred in by the Department's Inspector General, that: Such erroneous State payments were paid during calendar year 1974, pursuant to an agreement with the particular State under section 212(a) of Pub. L. 93-66, or paid by that State as an optional State supplementation, as defined in section 1616 of the Social Security Act; such erroneous payments were made as a result of the State's good faith reliance on erroneous or incomplete information supplied by the Department of Health, Education, and Welfare through the State data exchange, or good faith reliance on incorrect supplemental security income benefit payments made by the Department of Health, Education, and Welfare; and recovery of such State payments would be impossible or unreasonable.

Authority to perform the functions vested in the Secretary by section 405 of Pub. L. 95-216 has been delegated to the Commissioner of Social Security (the Commissioner), with authority to redelegate (43 FR 25385-6, dated June 12, 1978). Accordingly, notice is hereby given that the Acting Commissioner has redelegated the subject authority to the Deputy Commissioner of Social Security and the Social Security Administration's Associate Commissioner for Program Operations, without authority to further redelegate. These redelegations are effective as of the date that this general notice thereof is published in the FEDERAL REGISTER. Any actions taken by the Deputy Commissioner of Social Security or the Associate Commissioner for Program Operations prior to the date that notice of these redelegations is published in the FEDERAL REGISTER which, in effect, involve the exercise of authority formally redelegated by this document, are hereby affirmed and ratified.

Dated: August 31, 1978.

ROBERT P. BYNUM,
Acting Commissioner of Social Security.

Fish and Wildlife Service

RECEIPT OF APPLICATION FOR PERMIT

Notice is hereby given that an applicant has applied in due form for a permit to take sea otters as authorized by the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361-1407), and the regulations governing the taking and importing of marine mammals (50 CFR Part 18), and section 10 of the Endangered Species Act of 1973 (Pub. L. 93-205).

1. Applicant: a. Name—John L. Bengston. b. Address—Department of Ecology and Behavioral Biology, University of Minnesota, 108 Zoology Building, Minneapolis, Minn. 55455.

2. Type of permit: Marine mammal/scientific research—Endangered species/scientific research.

3. Name and number of animals: West Indian manatee (*Trichechus Manatus*), 15.

V 43 / 177 SEP 12 78

4. Type of activity: Capture, tag with radio transmitter, and paint mark, collect blood and urine specimens, and release.

5. Location of activity: St. John's River drainage in Florida.

6. Period of activity: December 15, 1978, to December 15, 1980. history which is critical to understanding the ecology of manatees.

Concurrent with the publication of this notice in the FEDERAL REGISTER the Federal Wildlife Permit Office is forwarding copies of this application to the Marine Mammal Commission and the Committee of Scientific Advisers.

The application has been assigned file No. PRT 2-3167. Written data or views, or requests for copies of the complete application or for a public hearing on this application should be submitted to the Director, U.S. Fish and Wildlife Service (WPO), Washington, D.C. 20240, within 30 days of the publication of this notice. Those individuals requesting a hearing should set forth the specific reasons why a hearing on this particular application would be appropriate. The holding of such hearing is at the discretion of the Director.

All statements and opinions contained in this application are summaries of those of the applicant and do not necessarily reflect the views of the U.S. Fish and Wildlife Service.

Documents submitted in connection with the above application are available for review during normal business hours in room 534, 1717 H Street NW., Washington, D.C.

Dated: September 6, 1978.

[4310-55]

THREATENED SPECIES PERMIT

Receipt of Application

Applicant: School of Pharmacy, University of Mississippi, University, Miss. 38677.

Applications for threatened species permits are not normally published in the FEDERAL REGISTER and the public is given a 30-day period during which they may submit comments. However, due to the concern of numerous organizations and agencies over the welfare of nonhuman primates and the international traffic in these species, it has been determined that this application should be published in the FEDERAL REGISTER.

The applicant requests a permit to import four stumptailed macaques (*Macaca arctoides*) for the purpose of research to ascertain the effects of the adminstration of d-amphetamine on the social interactions of a colony of captive nonhuman primates. These animals are to be obtained from a captive population held by the Primate Center TNO, the Netherlands.

Documents and other information submitted with this application are available to the public during normal business hours in Room 534, 1717 H Street NW., Washington, D.C., or by writing to the Director, U.S. Fish and Wildlife Service (WPO), Washington, D.C. 20240.

This application has been assigned file No. PRT 2-3156. Interested persons may comment on this application by submitting written data, views, or arguments to the Director at the above address within 30 days of the date of this publication. Please refer to the file number when submitting comments.

Dated: September 7, 1978.

DONALD G. DONAHOO,
Chief, Permit Branch, Federal Wildlife Permit Office, U.S. Fish and Wildlife Service.

[4310-10]

Office of the Secretary

[Civil No. 1983-73]

NATURAL RESOURCES DEFENSE COUNCIL, INC., ET AL.

Proposed Deviation From Scheduled Preparation of Environmental Impact Statements on Livestock Grazing

In the matter of the *Natural Resources Defense Council, Inc., et al.*, plaintiffs, v. *Cecil Andrus, Secretary of the Interior, et al.*, defendants.

The amended final judgment of April 14, 1978, in the above-entitled case, requires the preparation of a series of environmental impact statements (EIS's) by the Bureau of Land Management (BLM), Department of the Interior, on the grazing of livestock in the Western States, pursuant to the National Environmental Policy Act (NEPA) 42 U.S.C. 4321 et seq. Paragraph 9 of the judgment contemplates the possibility of material deviations from the judgment and provided for notice as follows:

9. If the Federal Defendants believe, in good faith, that circumstances dictate that any material deviations must be made, then in that event, the Federal Defendants shall give Notice to this Court wherein a detailed explanation shall be made of the deviation which is anticipated to occur together with the reason(s) therefor. This Notice shall be filed prior to the anticipated implementation of such deviation, and contemporaneously a copy of such Notice shall be sent by registered mail to all parties to this action (No. 1983-73) and such Notice shall be published in the FEDERAL REGISTER. Thereafter, if objections are filed with the court within 30 days from the date of publication in the FEDERAL REGISTER, the Federal Defendants and the objecting parties may make such motions and present evidence to the court as to them seems proper, and the court shall determine if such deviations shall be allowed to occur or make any other appropriate order; provided, however, that if no objections are filed with the court within such 30-day period, BLM shall be authorized to implement such deviation.

Paragraph 4 of the amended final judgment provides that a supplement to the final EIS for the Challis Planning Unit shall be completed by the end of fiscal year 1978. A draft supplemental EIS has been prepared, and was filed with the Environmental Protection Agency (EPA) on August 11, 1978, and circulated among governmental agencies and citizens and citizen groups for comment. The Federal Defendants now give notice that they propose to extend the completion time for the final EIS to November 30, 1978. The need for this additional time can be briefly stated as follows:

1. In its *Notice of Proposed Deviation From Scheduled Preparation of Environmental Impact Statements on Livestock Grazing* published in the FEDERAL REGISTER on September 1, 1977, the Department of the Interior requested a due date of December 1, 1979, for the filing of a Supplement to the Challis EIS. This date was requested because of serious data gaps and planning deficiencies identified during preparation of the Challis EIS, which had to be remedied prior to preparation of the Supplement.

2. In paragraph 4 of its April 14, 1978, amended final judgment, this Court set the end of fiscal year 1978, September 30, 1978, as the deadline for the completion of the Challis Supplement.

3. Since the filing of the final EIS on the Challis Planning Unit on January 10, 1977, BLM has worked with the Soil Conservation Service (SCS) and the U.S. Geological Survey (USGS) to update and supplement existing inventory data for Challis as quickly as possible. This work had not been completed when this Court issued its April 14, 1978, Order.

4. In response to the April 14th Order, BLM has expended truly extraordinary efforts to complete the Challis Supplement in the time allowed by the Court. Field employees worked double shifts and weekends to try to meet the deadline. Correlation of soils data provided by SCS with vegetation data obtained by BLM was completed in mid-May. Slope maps also became available from USGS during May. After compilation of data was completed, the management framework plan (MFP) for Challis was reviewed and updated. A first draft of the Supplement to the Challis EIS was completed on July 17, and the Draft Supplement, a copy of which is attached, was filed with EPA on August 11.

5. The public comment period for the Draft Supplement closes on October 22, 1978. We received approximately 1,000 separate comments on the Draft of the original Challis EIS, and expect a similar level of public interest in the Draft Supplement. All comments must be analyzed, appropriate text changes made, and responses prepared prior to completion of the Final Supplemental EIS. The additional time Federal Defendants have requested in our Notice of Proposed Deviation is essential to permit effective public participation in the EIS process as mandated by NEPA.

Dated: September 7, 1978.

GUY MARTIN,
Assistant Secretary,
Land and Water Resources.

This document is presented to the Court in compliance with paragraph 9 of the judgment as a material deviation from the schedule.

Respectfully submitted,

WILLIAM M. COHEN,
Land and Natural Resources Division, U.S. Department of Justice.

Office of the Secretary

TRUCKEE AND CARSON RIVER BASINS OF CALIFORNIA AND NEVADA—NEWLANDS, TRUCKEE STORAGE, AND WASHOE PROJECTS

Operating Criteria and Procedures for Coordinated Operation and Control of the Truckee and Carson Rivers for Service to Newlands Project

The water supply diversions of the Truckee-Carson Irrigation District from both the Truckee and Carson Rivers shall be limited to the amount needed for agricultural purposes, not exceeding 288,129 acre-feet, if available, for the 12 months ending October 31, 1978. The water supply diversions shall be measured at the gaging station below Lahontan Dam and at diversion points along the Truckee Canal. All use of water for power generation shall be incidental to either agricultural use or precautionary drawdown or spill. In satisfying the diversion for agricultural purposes, maximum use will be made of Carson River water and diversions through the Truckee Canal will be minimized.

Stampede Reservoir shall be operated by the United States to provide flood control, fish and wildlife and recreation benefits, and to store water for possible agricultural use by the Truckee-Carson Irrigation District. The operation of Stampede Reservoir will be coordinated with the operation of Lake Tahoe, Prosser Creek Reservoir, and Boca Reservoir to avoid infringing upon the floristan rates or water rights established by existing degrees and agreements.

In all of the operations, Truckee Canal will be operated to the maximum extent practical with the objective of maintaining minimum terminal flow to Lahontan Reservoir or Carson River during all periods except when criteria herein specifically permits such deliveries. In order to minimize the rates of fluctuation in the Truckee River below Derby Dam, the change of flow in Truckee Canal within any 24-hour period shall not exceed 50 cubic feet per second or 20 percent of the flow in the Truckee River below Derby Dam, whichever is greater.

During periods of spill or precautionary drawdown of Lahontan Reservoir, the district will be charged only with the predetermined schedule of irrigation releases to be passed at the gaging station below Lahontan Reservoir plus measured diversions from the Truckee Canal and Rock Dam Ditch.

The operation of Stampede Reservoir, Derby Diversion Dam, Truckee Canal, and Lahontan Reservoir will be conducted in accordance with the following criteria in order to minimize diversions from the Truckee River through the Truckee Canal.

SECTION A—TRUCKEE DIVERSION CRITERIA

Subject to conditions specified in section B (Storage Credit at Stampede), the diversions of water from the Truckee River into and through the Truckee Canal will be governed by the following criteria:

(1) If available, sufficient water will be diverted into Truckee Canal to meet direct agricultural requirements along the Truckee Canal.

(2) Diversions through the Truckee Canal into Lahontan Reservoir will be made in accordance with the following tabulation:

FEDERAL REGISTER, VOL. 43, NO. 177—TUESDAY, SEPTEMBER 12, 1978

Operating Month	If accumulated precipitation from October 1 to date at Tahoe City, California, is:	Inches	Continue Truckee Canal Diversion to Lahontan Reservoir if storage is less than upper limit. Lower Limit[1] Elev.	Ac. Ft.	Upper Limit Elev.	Ac. Ft.
February-March						
February 1	less than	16.80	4145.8	160,000	4146.3	163,000
	between	16.80 & 22.10	4138.5	120,000	4139.1	123,000
	greater than	22.10	4129.3	80,000	4130.1	83,000
March 1	less than	22.10	4151.8	200,000	4152.2	203,000
	between	22.10 & 26.10	4144.1	150,000	4144.6	153,000
	greater than	26.10	4134.2	100,000	4134.9	103,000
	If forecasted runoff plus existing storage on April 1 is:					
April-October		Ac. Ft.	Elev.	Ac. Ft.	Elev.	Ac. Ft.
April 1	greater than	350,000	No diversion to Lahontan through October.			
	between	250,000 & 350,000	4154.3	220,000	4154.7	223,000

	less than	250,000	4145.8	160,000	4146.3	163,000
August 1	between	250,000 & 350,000	4129.3	80,000	4130.1	83,000
	less than	250,000	4131.8	90,000	4132.6	93,000
September 1	less than	350,000	4119.5	50,000	4120.8	53,000
October 1	less than	350,000	4115.4	40,000	4116.8	43,000

[1]Truckee Canal Diversion to Lahontan Reservoir should be started only when storage recedes below lower limit.

SECTION B—STORAGE CREDIT AT STAMPEDE

As a means of minimizing the diversions of Truckee River water for use on the Carson Division of the Truckee-Carson Irrigation District or for storage in Lahontan Reservoir and at the same time insuring that the district will receive exactly the same total amount of water for its beneficial use as otherwise, the following modifications shall be applied to the criteria in section A (Truckee Diversion Criteria):

(1) The storage levels in Lahontan Reservoir specified as limits for starting and stopping diversions of water for storage in Lahontan or use on the Carson Division shall be converted to acre-feet and applied to the sum of water in storage at Lahontan Reservoir and water in Stampede Reservoir credited to the Truckee-Carson Irrigation District using the most up-to-date area-capacity curve for each reservoir.

(2) The combined storage facilities on the upper Truckee River will be operated in a manner consistent with the applicable decrees and so as to maintain the floristan rates with the objective of maximizing the accumulation of storage in Stampede Reservoir.

(3) Whenever there is uncommitted water in Stampede Reservoir, the Truckee-Carson Irrigation District shall forego the diversion of water into the Truckee Canal for storage in Lahontan Reservoir or for use on the Carson Division and shall accept credit in Stampede Reservoir for the amount of water it otherwise would have diverted.

(4) The sum of the amount of water stored in Lahontan Reservoir plus the amount of water stored in Stampede Reservoir and credited to the Truckee-Carson Irrigation District shall not be allowed to exceed the storage capacity of Lahontan (317,300 acre-feet), and this limit shall be preserved, if necessary, by the reduction of credit in Stampede Reservoir. When the amount of water credited to the Truckee-Carson Irrigation District is so reduced, the amount of that reduction shall be credited for the purpose of maintaining the minimum rates of flow below Derby Dam provided in section B(6) of these operating criteria and procedures.

(5) Whenever the water surface elevation of Lahontan Reservoir is at or below elevation 4,129.28 feet (80,000 acre-feet) above mean sea level during the irrigation season, water will be released from Stampede Reservoir to be diverted into and through the Truckee Canal for agricultural use by the Truckee-Carson Divisions. The total amount of the release shall be limited to the lesser of the amount credited to the Truckee-Carson Irrigation District or the amount needed to supplement the 80,000 acre-feet of water in Lahontan Reservoir to meet the remaining seasonal agricultural requirements of the Truckee-Carson Irrigation District.

(6) Insofar as possible consistent with existing decrees and with maintaining the floristan rates and with operating criteria and procedures sections B(1) through B(5), Stampede Reservoir (as well as the other storage facilities on the upper Truckee River) shall be operated with the objective of maintaining optimum rates of flow for fish, wildlife, and recreational purposes in the Truckee River below Derby Dam as determined by the Bureau of Reclamation in consultation with the Fish and Wildlife Service and the Pyramid Lake Paiute Tribe of Indians.

(7) At the conclusion of the water year, October 31, 1978, the Secretary of the Interior, in consultation with the Pyramid Lake Paiute Tribe of Indians and the Fish and Wildlife Service with respect to the requirements of the Pyramid Lake fishery, will determine: (1) The portion of the remaining storage in Stampede Lake allocated for releases to Pyramid Lake, and (2) the portion of the remaining storage in Stampede Reservoir to be allocated to the district as additional carryover storage credit for the 1979 water year.

(8) Nothing in sections B(1) through B(7) of these operating criteria and procedures shall in any way infringe on or interfere with the flood control function of Stampede Reservoir.

SECTION C

As a means of ensuring that the amount of water diverted is limited to that prescribed for beneficial agricultural use, the Truckee-Carson Irrigation District shall:

(1) Deliver water only to lands for which the district has in advance established to the satisfaction of the Secretary, or his designee, that a current valid water right exists.

(2) Establish a single water operations center which will coordinate all orders for delivery of water to individual turnouts, and which then will dispatch flows in the distribution systems to meet the water orders with minimum spill from the distribution system.

(3) Permit only authorized district employees to open and close individual turnouts and operate the distribution system facilities.

(4) Establish and operate sufficient stations for the measurement of all surface waters flowing out of the Truckee, North Carson, and South Carson Divisions.

(5) Initiate immediately a program for improving the measurement of the amount of water delivered to individual turnouts. The program shall include the installation of measuring devices on at least 10 percent of the total turnouts in 1973; the program shall concentrate first on the combinations of large users and currently poor measurements; and the installed devices must be approved by the Geological Survey and the Bureau of Reclamation.

(6) Submit to the Project Office of the Bureau of Reclamation a monthly report by the 15th of the following month for each of the three divisions, showing the total water delivery in acre-feet and the maximum, minimum, and mean daily outflow in cubic feet per second. Reports showing the amount of water in acre-feed delivered to each farm each month during the water year shall be made at least twice during the calendar year. These reports shall be circulated to the tribe and the members of the Truckee-Carson Operating Criteria and Procedures Committee.

(7) Establish a system for charging water users for the quantity of water delivered to their turnouts. The system shall be designed: (a) To provide a reasonable financial incentive for economical and efficient use of water; and (b) To produce revenue against the district's operation and maintenance expenses and to assist the discharge of its debt to the United States.

SECTION D

(1) Article 32 of the December 18, 1926, contract between the United States and the district will be invoked by the Secretary for substantial violations of these Operating Criteria and Procedures, and the Secretary reserves all other rights and options to enforce these criteria.

(2) If the Secretary determines that waste has occurred through negligence or inattention, after written notice the amount of such waste shall be deducted from the district's allowable maximum total diversion.

(3) The district shall not deliver water to users who do not comply with all of the terms and provisions of these Operating Criteria and Procedures. Such deliveries shall not resume without the prior approval of the Secretary or his designee.

(4) The Secretary shall not approve any applications for transfers of water rights within the Newlands Project pursuant to 43 U.S.C. 389 unless he finds that the district is in compliance with all of the terms and provisions of these Operating Criteria and Procedures, and that the applicants for such transfers are in compliance with these Operating Criteria and Procedures and with the applicable decrees. Transfers of water rights shall be restricted to the extent that there shall be no enlarged comsumptive use of

V 4 3 / 1 7 7

water within the lands of the Newlands Project.

(5) All of the water delivery operations of the Truckee-Carson irrigation District shall be monitored closely by the Bureau of Reclamation. Any and all violations of the terms and provisions of these Operating Criteria and Procedures shall be reported immediately by the district to the Project Office of the Bureau of Reclamation.

Dated: September 7, 1978.

JAMES A. JOSEPH,
Acting Secretary of the Interior.

Heritage Conservation and Recreation Service

NATIONAL REGISTER OF HISTORIC PLACES

Notification of Pending Nominations

Nominations for the following properties being considered for listing in the National Register were received by the Heritage Conservation and Recreation Service before September 1, 1978. Pursuant to section 60.13(a) of 36 CFR Part 60, published in final form on January 9, 1976, written comments concerning the significance of these properties under the National Register criteria for evaluation may be forwarded to the Keeper of the National Register, Office of Archeology and Historic Preservation, U.S. Department of the Interior, Washington, D.C. 20240. Written comments or a request for additional time to prepare comments should be submitted by September 22, 1978.

[7020-02]

HIGH-CARBON FERROCHROMIUM

[Inv. TA-201-35]

Report to the President

SEPTEMBER 5, 1978.

To the President:

In accordance with section 201(d)(1) of the Trade Act of 1974 (19 U.S.C. 2251(d)(1)), the United States International Trade Commission herein reports the results of an investigation relating to high-carbon ferrochromium.

The investigation (No. TA-201-35) was undertaken to determine whether ferrochromium, containing over 3 percent by weight of carbon, provided for in item 607.31 of the Tariff Schedules of the United States (TSUS), is being imported into the United States in such increased quantities as to be a substantial cause of serious injury, or the threat thereof, to the domestic industry producing an article like or directly competitive with the imported article.

The Commission received a letter from the Committee of Producers of High-Carbon Ferrochromium on June 9, 1978, requesting the investigation, and on June 13, 1978, it received a resolution of the Committee on Ways and Means of the House of Representatives that—

(a) Pursuant to section 201(b)(1) of the Trade Act of 1974, the United States International Trade Commission shall promptly make an investigation to determine whether ferrochromium, containing over 3 percent by weight of carbon, is being imported into the United States in such increased quantities as to be a substantial cause of serious injury, or threat thereof, to the domestic industry producing an article like or directly competitive with the imported article. For purposes of this resolution, the term "ferrochromium, containing over 3 percent by weight of carbon" means articles classified under item 607.31 of the Tariff Schedules of the United States (19 U.S.C. 1202).

(b) The Commission shall conclude its new investigation and report its determinations to the President by no later than 90 calendar days from the date of this resolution.

The Commission instituted the investigation on June 21, 1978, after determining that good cause exists, within the meaning of section 201(e) of the Trade Act of 1974 (19 U.S.C. 2251(e)), for a reinvestigation on high-carbon ferrochromium less than 1 year from the date the Commission reported to the President the results of its previous investigation (No. TA-201-28) on the same subject. Notice of this determination was published in the FEDERAL REGISTER of June 27, 1978 (43 FR 27907).

Notice of the institution of the investigation and of the public hearing to be held in connection therewith was issued on June 22, 1978, and published in the FEDERAL REGISTER of June 27, 1978 (43 FR 27907). The public hearing was held on August 8, 1978, in Washington, D.C. A transcript of the hearing and copies of briefs submitted by interested parties are attached.[1]

The information for this report was obtained from fieldwork and interviews by members of the Commission's staff, from other Federal agencies, from responses to the Commission's questionnaires, from information presented at the public hearing, from briefs submitted by interested parties, and from the Commission's files.

There were no imports of ferrochromium, containing over 3 percent by weight of carbon, from countries whose imports are presently subject to the rates of duty set forth in column 2 of the TSUS. The import relief recommended herein, therefore, is not addressed to imports from such countries. Certain recommended relief measures would involve the imposition of rates of duty on imports from countries whose imports are currently subject to rates of duty in column 1 which are higher than the rates set forth in column 2. Should such recommended, or any other, rates of duty higher than the column 2 rates be proclaimed by the President, it would be necessary for him to conform column 2 by proclaiming rates therefor that are not less than those proclaimed for column 1.[2]

[1] Attached to the original report sent to the President. These materials are available for inspection at the U.S. International Trade Commission, except for material submitted in confidence.

[2] See art. I, General Agreement on Tariffs and Trade (*Basic Instruments and Selected Documents*, vol. IV, March 1969), and General Headnote 4, Tariff Schedules of the United States (19 U.S.C. 1202).

V 4 3 / 1 7 7
SEP 12 78

DETERMINATION, FINDINGS, AND RECOMMENDATIONS OF THE COMMISSION

DETERMINATION

On the basis of its investigation, the Commission determines[3] that ferrochromium, containing over 3 percent by weight of carbon, provided for in item 607.31 of the Tariff Schedules of the United States, is being imported into the United States in such increased quantities as to be a substantial cause of serious injury to the domestic industry producing an article like or directly competitive with the imported article.

FINDINGS AND RECOMMENDATIONS

Commissioners Moore, Bedell, and Minchew[4] find and recommend that the imposition of rates of duty as follows, in addition to the existing column one rate of duty, is necessary to remedy the serious injury:

Ferrochromium, containing over 3 percent by weight of carbon, classifiable under item 607.31 of the TSUS:
1st year: 30% ad val. 2d year: 30% ad val. 3d year: 25% ad val. 4th year: 20% ad val. 5th year: 20% ad val.

Commissioner Ablondi finds and recommends that the imposition of rates of duty as follows, in addition to the existing column one rate of duty, is necessary to remedy the serious injury:

Ferrochromium, containing over 3 percent by weight of carbon, classifiable under item 607.31 of the TSUS:
1st year: 8% ad val. 2d year: 8% ad val. 3d year: 8% ad val.

Vice Chairman Alberger finds and recommends that the imposition of quotas[5] as follows is necessary to remedy the serious injury (in short tons, chromium content):

	1978[1]	1979	1980	1981	1982
South Africa	35,150	35,150	36,908	38,754	40,692
All other countries	59,850	59,850	62,842	65,984	69,283
Total	95,000	95,000	99,750	104,738	109,975
Rhodesia[2]	27,550	27,550	28,928	30,375	31,894
All other countries[2]	32,300	32,300	33,914	35,609	37,389

[1] Quotas are to be retroactive to Jan. 1, 1978.
[2] The quota for Rhodesia is stand-by in nature, and is to be implemented in the event that the embargo currently in effect with regard to imports from that country is lifted. As long as the embargo remains in effect, Rhodesia's share of the quota is to be added to the "all other countries" category.

Quotas are to be applied quarterly, both to prevent the flooding of the market and to allow Rhodesia's share to be reached in the "all other countries" category if the embargo is lifted. Quota levels are raised by 5 percent each year after 1979 in order to account for projected growth in U.S. high-carbon ferrochromium consumption, and yearend variances from quota levels are not to be carried forward into succeeding years (i.e., imports from South Africa in 1978 in excess of 35,150 tons would not be subtracted from that country's allocation for 1979).

By order of the Commission.

Issued: September 7, 1978.

KENNETH R. MASON,
Secretary.

[FR Doc. 78-25655 Filed 9-11-78; 8:45 am]

[3] Vice Chairman Alberger and Commissioners Moore, Bedell, and Ablonde determine in the affirmative. Chairman Parker did not participate in this investigation and Commissioner Minchew did not participate in the vote on injury.

[4] Commissioner Minchew, noting that the Commission has made an affirmative determination, has made a recommendation of remedy.

[5] Quota levels were calculated on the basis of average annual imports during 1972-77. As South Africa and Rhodesia were the primary sources of imports during this period (accounting for well over 50 percent of total imports each year), only those countries are given specific allocations of the total quota. These allocations are based on average share of total imports accounted for by these countries during 1972-77.

DEPARTMENT OF LABOR

Employment and Training Administration

INDIAN AND NATIVE AMERICAN PROGRAMS

Prime Sponsors Under Sections 302 and 304 of the Comprehensive Employment and Training Act

AGENCY: Employment and Training Administration, Labor.

ACTION: Notice.

SUMMARY: The purpose of this notice is to inform the public of the designation of fiscal year 1979 Indian and native American prime sponsors of employment and training programs funded under the Comprehensive Employment and Training Act (CETA) of 1973, as amended.

FOR FURTHER INFORMATION CONTACT:

Herman E. Narcho, Chief, Policy, Program Design, and Administration, Division of Indian and Native American Programs, Office of National Programs, 601 D Street NW., Room 6414, Washington, D.C. 20213, telephone 202-376-7279.

SUPPLEMENTARY INFORMATION: Indian and native American programs under the Comprehensive Employment and Training Act of 1973, as amended, are administered nationally by the Division of Indian and Native American Programs (DINAP), Office of National Programs, Employment and Training Administration, Department of Labor, 601 D Street NW., Room 6402, Washington, D.C. 20213, telephone 202-376-6102. Mr. Alexander S. MacNabb is the Director, DINAP.

Attached is a listing of prime sponsors. Their allocations will be announced later, when Congress makes funds available.

Signed at Washington, D.C., 18th day of August 1978.

ALEXANDER S. MACNABB,
Director, Division of Indian and Native American Programs, Office of National Programs.

DEPARTMENT OF LABOR

Office of the Secretary

[TA-W-3582]

ALVIN COAT INC., PATERSON, N.J.

Certification Regarding Eligibility to Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-3582: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the act.

The investigation was initiated on May 8, 1978, in response to a worker petition received on April 28, 1978, which was filed by the International Ladies' Garment Workers' Union on behalf of workers and former workers producing ladies' coats at Alvin Coat, Inc., Paterson, N.J.

The Notice of Investigation was published in the FEDERAL REGISTER on May 26, 1978 (43 FR 22793). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Alvin Coat, Inc., its customers (manufacturers), the U.S. Department of Commerce, the U.S. International Trade Commission, the National Cotton Council of America, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of section 222 of the act must be met. The Department's investigation revealed that all of the requirements have been met.

U.S. imports of women's, misses', and children's coats and jackets increased from 2252 thousand dozen in 1976 to 2723 thousand dozen in 1977. Imports declined from 590 thousand dozen in the first quarter of 1977 to 572 thousand dozen in the first quarter of 1978. The ratio of imports to domestic production increased from 48.3 percent in 1976 to 54.9 percent in 1977.

A survey of Alvin Coat, Inc.'s sole manufacturer indicated that the manufacturer imported ladies' coats in 1977 and 1978 with an absolute increase in imports in the first quarter 1978 compared with the first quarter 1977. The manufacturer's contracts with Alvin Coat, Inc. decreased in 1977 compared to 1976 as well as in the first quarter 1978 compared to the same period in 1977.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increased imports of articles like or directly competitive with the ladies' coats produced at Alvin Coat, Inc., Paterson, N.J. contributed importantly to the decline in sales and to the separation of workers at that plant. In accordance with the provisions of the act, I make the following certification:

All workers of Alvin Coat, Inc., Paterson, N.J. who became totally or partially separated from employment on or after October 1, 1977 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 31st day of August 1978.

HARRY J. GILMAN,
Acting Director, Office of Foreign Economic Research.

DEPARTMENT OF LABOR

[TA-W-2896]

BLISS & LAUGHLIN STEEL CO.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2896: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on January 11, 1978, in response to a worker petition received on December 19, 1977, which was filed by the United Steelworkers of America on behalf of all workers producing cold-rolled finished steel bars at the Detroit, Mich., plant of Bliss & Laughlin Steel Co. The investigation was expanded to include the Harvey, Ill., plant (see TA-W-2896A).

The notice of investigation was published in the FEDERAL REGISTER on January 27, 1978 (43 FR 3776). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Bliss & Laughlin Steel Co., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met. Without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threats thereof, and to the absolute decline in sales or production.

Production of cold finished steel bars at the Detroit plant increased in quantity in 1977 from 1976 and in the first 2 months of 1978 compared to the like period of 1977. Employment increased in 1977 from 1976 and in the first 2 months of 1978 compared to the like period in 1977.

A survey of some customers of the Detroit plant revealed that none of the respondents purchased imported steel bars in 1977 or in the first quarter of 1978.

CONCLUSION

After careful review I determine that all workers of the Detroit, Mich., plant of Bliss & Laughlin Steel Co. are denied eligibility to apply for adjustment assistance under title II, chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 6th day of September 1978.

HARRY J. GILMAN,
Acting Director, Office of Foreign Economic Research.

DEPARTMENT OF LABOR

[TA-W-2896A]

BLISS & LAUGHLIN STEEL CO.

Certification Regarding Eligibility to Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2896A: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on January 11, 1978, in response to a worker petition received on December 19, 1977 which was filed by the United Steelworkers of America on behalf of all workers producing cold-rolled finished steel bars at the Detroit, Mich. and Harvey, Ill. plants of Bliss & Laughlin Steel Co. A separate investigation of the Detroit, Mich., plant was conducted under TA-W-2896.

The Notice of Investigation was published in the FEDERAL REGISTER on January 27, 1978 (43 FR 3776). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Bliss & Laughlin Steel Co., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met. The investigation revealed that all of the criteria have been met.

Imports of cold-finished carbon steel bars increased from 70.3 thousand tons in 1976 to 117.3 thousand tons in 1977. The ratio of imports to domestic shipments increased from 5.3 percent in 1976 to 8.1 percent in 1977.

Imports of alloy steel bars increased from 81.2 thousand tons in 1976 to 140.9 thousand tons in 1977. The ratio of imports to domestic shipments increased from 3.3 percent in 1976 to 5.6 percent in 1977.

A survey of some of the customers of the Harvey plant revealed that several customers reduced purchases from the Harvey plant in 1977 and in the first quarter of 1978 and increased purchases of imports.

Employment at the Harvey plant increased in 1977 compared to 1976. Significant unemployment at the plant began in February 1978.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with the cold-finished carbon and alloy steel bars produced at the Harvey, Ill. plant of Bliss & Laughlin Steel Co. contributed importantly to the sales or production declines and to the total or partial separation of workers at that plant. In accordance with the provisions of the Act, I make the following certification:

All workers of the Harvey, Ill. plant of Bliss & Laughlin Steel Co. who became totally or partially separated from employment on or after February 1, 1978, are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 6th day of September 1978.

HARRY J. GILMAN,
Acting Director, Office of Foreign Economic Research.

BOYN-TAN LEATHERS, INC., MILTON MILLS, N.H.

Certification Regarding Eligibility to Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-3520: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on April 18, 1978, in response to a worker petition received on April 10, 1978, which was filed on behalf of workers formerly producing tanned and finished sheepskins and lambskins at Boyn-Tan Leathers, Inc., of Milton Mills, N.H.

The notice of investigation was published in the FEDERAL REGISTER on May 2, 1978 (43 FR 18789). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from Boyn-Tan Leathers, Inc., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met. It is concluded that all of the requirements have been met.

U.S. imports of tanned and finished sheepskins increased from 12,690,000 square feet in 1975 to 18,744,000 square feet in 1976 and decreased from 15,322,000 square feet in the January-September period of 1976 to 12,946,000 square feet in the same period of 1977. The imports to domestic production ratio for tanned and finished sheepskins increased from 15.5 percent in 1975 to 23.4 percent in 1976 and decreased from 24.6 percent in the January-September period of 1976 to 23.1 percent in the same period of 1977.

A sample survey of customers who purchased tanned and finished sheepskins from Boyn-Tan Leathers, Inc., indicated that some customers decreased purchases from the subject firm while increasing purchases of imports in 1977 compared to 1976.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with tanned and finished sheepskins produced at Boyn-Tan Leathers, Inc., contributed importantly to the decrease in sales or production and to the total or partial separation of workers of that firm. In accordance with the provisions of the Act, I make the following certification:

All workers at Boyn-Tan Leathers, Inc., of Milton Mills, N.H., who became totally or partially separated from employment on or after September 18, 1977, are eligible to apply for adjustment assistance under title II, chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 31st day of August 1978.

BRIAN TURNER,
Executive Assistant to the Deputy Under Secretary for International Affairs.

DEPARTMENT OF LABOR

[TA-W-3321]

CITY SHIRT CO., DIVISION OF WIDE AWAKE SHIRT CO. MAHANOY CITY, PA.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-3321: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on March 9, 1978, in response to a worker petition received on February 28, 1978, which was filed by the Amalgamated Clothing and Textile Workers' Union on behalf of workers and former workers producing uniform shirts at the Mahanoy City, Pa., plant of the City Shirt Co., a Division of Wide Awake Shirt Co.

The Notice of Investigation was published in the FEDERAL REGISTER on March 24, 1978 (43 FR 12401). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Wide Awake Shirt Co., its customers, the Amalgamated Clothing and Textile Workers' Union, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Act must be met. Without regard to whether any of the other criteria have been met, the following criterion has not been met.

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

The Department's investigation revealed that there are no separately identifiable U.S. imports of uniform shirts. The product is not listed as a separate item of any U.S. Tariff Schedule grouping. However, industry sources have indicated that there are

V 43 / 177 SE 12 78

negligible imports of civilian uniform shirts. There are no imports of U.S. Military uniforms due to Armed Service Procurement regulations.

A Department survey was conducted with customers of Wide Awake Shirt Co., the parent firm of City Shirt Co. None of the surveyed customers purchased imported uniform shirts during the period of 1975 through 1977. Customers confirmed that the import influence in the uniform shirt industry is negligible and that uniform shirts are not competitive with other shirt styles.

CONCLUSION

After careful review I determine that all workers at the Mahanoy City, Pa., plant of the City Shirt Co., a Division of Wide Awake Shirt Co., are denied eligibility to apply for trade adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 31st day of August 1978.

GLORIA G. PRATT,
Director, Office of Foreign Economic Policy.

[TA-W-3304]

GULANT AND MASLIN, INC., BROOKLYN, N.Y.

Termination of Investigation

Pursuant to section 221 of the Trade Act of 1974, an investigation was initiated on March 7, 1978, in response to a petition dated February 6, 1978, which was filed by the Amalgamated Clothing and Textile Workers on behalf of workers and former workers producing men's and boys' tailored clothing at Gulant and Maslin, Inc., Brooklyn, N.Y.

The notice of investigation was published in the FEDERAL REGISTER on March 17, 1978 (43 FR 11277). No public hearing was requested and none was held.

During the course of the investigation, it was established that all workers of Gulant and Maslin, Inc., Brooklyn, N.Y., were previously certified eligible to apply for adjustment assistance on February 19, 1976 (TA-W-361). That certification expired on February 19, 1978. All workers of Gulant and Maslin, Inc., were laid off and the company closed in October, 1977.

Since all workers covered by the present petition were included in the previous certification, a new investigation would serve no purpose. Therefore, the investigation is terminated.

Signed at Washington, D.C., this 29th day of August 1978.

HAROLD A. BRATT,
Acting Director, Office of Trade Adjustment Assistance.

[TA-W-2934]

INTERLAKE, INC., NEWPORT WORKS, NEWPORT AND WILDER, KY.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2934: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on January 17, 1978, in response to a worker petition received on December 19, 1977, which was filed by the United Steelworkers of America on behalf of workers and former workers producing flat rolled products and all steel products at the Newport-Wilder, Ky., plant of Interlake, Inc. During the course of the investigation it was revealed that the plant produces hot and cold rolled steel sheet and strip, steel plate, and steel tubular products.

On September 27, 1977, the Department certified workers engaged in employment related to the production of tubular products at the Newport, Ky., Works of Interlake, Inc., eligible to apply for adjustment assistance, and denied workers engaged in employment related to the production of flat rolled products which include hot and cold rolled steel sheet and strip and steel plate TA-W-1476.

The notice of investigation was published in the FEDERAL REGISTER on February 3, 1978 (43 FR 4696). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Interlake, Inc., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met. Without regard to whether any of the other criteria have been met, the following criterion has not been met:

That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated.

The Department's investigation revealed that the average number of production workers employed at Interlake's Newport, Ky., Works increased in each quarter compared to the same quarter of the previous year during the period from October 1976 through March 1978.

CONCLUSION

After careful review I determine that all workers engaged in the production of flat rolled products which include hot and cold rolled steel sheet and strip and steel plate at the Newport, Ky., Works of Interlake, Inc., Newport and Wilder, Ky., are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 31st day of August 1978.

GLORIA G. PRATT,
Director, Office of Foreign Economic Policy.

[TA-W-3969]

INTERPACE CORP., LOCK JOINT PIPE DIVISION, SOMERVILLE, N.J.

Termination of Investigation

Pursuant to section 221 of the Trade Act of 1974, an investigation was initiated on July 13, 1978, in response to a worker petition received on July 7, 1978, which was filed by the International Brotherhood of Teamsters on July 5, 1978, on behalf of workers and former workers producing steel high pressure sewer pipe, at the Interpace Corp., Lock Joint Division, Somerville, N.J.

Notice of the investigation was published in the FEDERAL REGISTER on July 28, 1978 (43 FR 32885). No public hearing was requested and none was held.

The petitioner, International Brotherhood of Teamsters requested withdrawal of this petition. A union representative cited no adverse impact of imports on workers at the Somerville plant of the Interpace Corp., Lock Joint Pipe Division as the reason for withdrawal. Consequently, the investigation has been terminated.

Signed at Washington, D.C., this 28th day of August 1978.

HAROLD A. BRATT,
Acting Director, Office of Trade Adjustment Assistance.

[TA-W-3367]

LAWRENCE CLOTHES, INC., PHILADELPHIA, PENNSYLVANIA

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-3367: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on March 20, 1978 in response to a worker petition received on February 21, 1978 which was filed by the Amalgamated Clothing and Textile Workers Union on behalf of all workers producing tailored clothing at the Philadelphia, Pa., plant of Lawrence Clothes, Inc.

The notice of investigation was published in the FEDERAL REGISTER on April 7, 1978 (43 FR 14776). No public hearing was requested and none was held.

Following a previous petition and subsequent investigation on behalf of all workers at Lawrence Clothes, Inc., the Department certified all workers as eligible to apply for trade adjustment assistance on February 10, 1976 (TA-W-346). That certification expired on February 10, 1978.

The information upon which the determination was made was obtained principally from officials of Lawrence Clothes, Inc., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met. It is concluded that all of the requirements have been met.

U.S. imports of men's and boys' tailored suits increased to 4,091,000 units in 1977 from 3,562,000 units in 1976. The ratio of imports of men's and boys' tailored suits increased to 20.0 percent in 1977 from 19.0 pecent in 1976.

The Department conducted a survey of Lawrence Clothes' major customers. One of these purchased imports and increased its imports in 1977 compared to 1976. Another customer, one that had accounted for a significant portion of sales for Lawrence Clothes, went out of business. The Department has subsequently determined that imports contributed importantly to the loss of sales and separation of workers at that firm.

CONCLUSION

After careful review of the facts obtained in the investigation, I concluded that increases of imports of articles like or directly competitive with the tailored clothing produced by Lawrence Clothes, Inc., Philadelphia, Pa., contributed importantly to the decline in sales or production and to the total or partial separation of workers at the plant as required for certification. In accordance with the provisions of the Act, I make the following certification:

All workers of Lawrence Clothes, Incorporated, Philadelphia, Pennsylvania who became totally or partially separated from employment on or after February 10, 1978, are certified eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 31st day of August 1978.

BRIAN TURNER,
Executive Assistant to the Deputy Under Secretary for International Affairs.

[4510-28]

[TA-W-3440]

MAURICE II KNITTING MILLS, INC., RED SPRINGS, N.C.

Negative Determination Regarding Eligibility to Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-3440: Investigation regarding eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on March 28, 1978, in response to a worker petition received on March 13, 1978, which was filed on behalf of workers and former workers producing finished knit fabrics at Maurice II Knitting Mills, Incorporated of Red Springs, North Carolina.

The notice of investigation was published in the FEDERAL REGISTER on April 11, 1978 (43 FR 15205). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from Maurice II Knitting Mills, Inc., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met. Without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

U.S. imports of finished fabric increased from 408 million square yards in 1975 to 464 million square yards in 1976 and decreased to 453 million square yards in 1977. Imports increased from 90 million square yards during the January-March period of 1977 to 129 million square yards during the same period of 1978. The ratio of imports to domestic production of finished fabric has remained under 2.0 percent for 1974 through 1976. Ratios for 1977 and 1978 are not currently available.

A sample survey of the major customers of Maurice II Knitting Mills, Inc. who purchased finished fabric indicated that these customers did not import finished fabrics in 1976, 1977 or the first quarter of 1978.

CONCLUSION

After careful review I determine that all workers at Maurice II Knitting Mills, Inc. of Red Springs, N.C. are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 31st day of August 1978.

BRIAN TURNER,
Executive Assistant to the Deputy Under Secretary for International Affairs.

[TA-W-3394]

MIGHTY MAC, INC., GLOUCESTER, MASS.

Certification Regarding Eligibility to Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-3394: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on March 29, 1978 in response to a worker petition received on March 13, 1978, which was filed on behalf of all workers producing men's and boys' outerwear at the Gloucester, Mass., plant of Mighty Mac, Inc.

The Notice of Investigation was published in the FEDERAL REGISTER on April 11, 1978 (43 FR 15207). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Mighty Mac, Inc., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met. It is concluded that all of the requirements have been met.

U.S. imports of men's and boys' outer coats and jackets increased both absoultely and relative to domestic production from 1976 to 1977. Imports increased in quantity from 22,060 thousands of units in 1976 to 27,432 thousands of units in 1977. The import to production ratio increased from 29.6 percent in 1976 to 35.3 percent in 1977.

Many of the customers of Mighty Mac, Inc. that were surveyed by the Department indicated that they have decreased purchases from the firm and increased purchases of imported men's and boys' outer coats and jackets in 1976 and 1977.

Conclusion

After careful review, I conclude that increases of imports of articles like or directly competitive with outerwear produced at the Gloucester, Mass., plant of Mighty Mac, Inc. contributed importantly to the decline in sales or production and to the total or partial separation of workers of that plant. In accordance with the provisions of the Act, I make the following certification:

All workers of the Gloucester, Massachusetts plant of Mighty Mac, Inc. who became totally or partially separated from employment on or after October 22, 1977 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 31st day of August 1978.

GLORIA G. PRATT,
Director, Office of Foreign Economic Policy.

[TA-W-3395]

MIGHTY MAC, INC., MANCHESTER, N.H.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-3395: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on March 29, 1978, in response to a worker petition received on March 13, 1978, which was filed on behalf of all workers producing men's and boys' outerwear at the Manchester, N.H., plant of Mighty Mac, Inc.

The Notice of Investigation was published in the FEDERAL REGISTER on April 11, 1978 (43 FR 15207). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Mighty Mac, Inc., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met. It is concluded that all of the requirements have been met.

U.S. imports of men's and boys' outer coats and jackets increased both absolutely and relative to domestic production from 1976 to 1977. Imports increased in quantity from 22,060 thousand of units in 1976 to 27,432 thousands of units in 1977. The import to production ratio increased from 29.6 percent in 1976 to 35.3 percent in 1977.

Many of the customers of Mighty Mac, Inc., that were surveyed by the Department indicated that they have decreased purchases from the firm and increased purchases of imported men's and boys' outer coats and jackets in 1976 and 1977.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with the men's and boys' outerwear produced at the Manchester, N.H., plant of Mighty Mac, Inc., contributed importantly to the sales and production declines and to the total or partial separation of the workers of that plant. In accordance with provisions of the Act, I make the following certification:

All workers of the Manchester, N.H., plant of Mighty Mac, Inc., who become totally or partially separated from employment on or after March 1, 1977, are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 31st day of August 1978.

GLORIA G. PRATT,
Director, Office of Foreign Economic Policy.

[TA-W-3121]

NORTH TERMINAL, INC., HINGHAM, MASS.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-3121: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the act.

The investigation was initiated on February 13, 1978, in response to a worker petition received on January 26, 1978, which was filed on behalf of workers and former workers producing steel parts for guns at North Terminal, Inc., Hingham, Mass.

During the course of the Department's investigation it was revealed that North Terminal produces parts for guns from aluminum as well as steel.

The notice of investigation was published in the FEDERAL REGISTER on February 28, 1978 (43 FR 8207). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of North Terminal, Inc. and the Winchester Group of Olin Corp., the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the act must be met. Without regard to whether any of the other criteria have been met, the following criterion has not been met.

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threats thereof, and to the absolute decline in sales or production.

Total production of receivers at North Terminal declined 10 percent in 1977 compared to 1976, production of receivers for Winchester, North Terminal's parent company, increased 32 percent during this period while production under contract for military rifles declined 57 percent. All employment declines at North Terminal occurred on the line producing receivers for military rifles while employment increased on the Winchester production line.

Neither the military contracting firm nor the U.S. Army can or do import any rifles or component parts.

CONCLUSION

After careful review, I determine that all workers of North Terminal, Inc., Hingham, Mass., are denied eligibility to apply for adjustment assistance under title II, chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 31st day of August 1978.

BRIAN TURNER,
Executive Assistant to the Deputy Under Secretary for International Affairs.

[TA-W-3109]

PHELPS DODGE CORP. WESTERN EXPLORATION DEPARTMENT, DOUGLAS, ARIZ.

Certificotion Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-3109: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on February 9, 1978, in response to a worker petition received on January 23, 1978, which was filed on behalf of workers and former workers engaged in exploration for new copper ore bodies at the Douglas, Ariz., facility of the Western Exploration Department of Phelps Dodge Corp.

The notice of investigation was published in the FEDERAL REGISTER on February 24, 1978 (43 FR 7743). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Phelps Dodge Corp., Metals Week, Metal Bulletin, American Metal Market, the U.S. Department of the Interior, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met. It is concluded that all of the requirements have been met.

The Department's investigation revealed that the Western Exploration Department provides the function of surveying for new ore bodies for Phelps Dodge Corp. Exploration work is integrated into the company's production of copper. Exploration for copper has been the primary function of this department, comprising a major proportion of total exploration work in 1975, 1976, and 1977.

The Western Exploration Department performs its activities for the entire corporation and is not specific to the Western operations of Phelps Dodge. Workers at three facilities of Phelps Dodge Corp. producing refined copper have been certified eligible to apply for adjustment assistance: The Morenci, Ariz., Branch (TA-W-2423), the New Cornelia Branch, Ajo, Ariz. (TA-W-2421), and the Douglas Reduction Works, Douglas, Ariz. (TA-W-2420). Production of copper at these certified facilities comprised a substantial percentage of total company copper production in 1976 and 1977.

U.S. imports of refined copper increased from 147,000 short tons in 1975 to 384,000 short tons in 1976 and to 391,000 short tons in 1977. Imports increased from 66,000 short tons in the first quarter of 1977 to 150,000 short tons in the first quarter of 1978.

The ratio of imported refined copper to domestic production increased from 8.6 percent in 1975 to 21.0 percent and 22.2 percent, respectively, in 1976 and 1977. The ratio increased from 13.1 percent in the first quarter of 1977 to 34.1 percent in the first quarter of 1978.

While imports of refined copper had increased by 161 percent in 1976 compated to 1975 and 2 percent in 1977 compared to 1976, domestic demand increased at only a fraction of those rates. Inventory levels of domestic and imported copper on consignment at domestic refineries in December 1976 were 31.4 percent above December 1975 levels and 143.2 percent above December 1974 levels. In each month in the period January-November 1977, inventories were higher than the same month in 1976. In December 1977 inventories were only slightly lower than inventories in December 1976. Phelps Dodge and other domestic producers of refined copper lost substantial sales in 1977 because of the excessive inventories of domestic and imported refined copper.

Imports of copper are affected by the differential between the domestic producers' price for copper and the world price established by the LME (London Metal Exchange). When the LME price drops more than the estimated transportation costs of 5 to 8 cents per pound below the domestic producers' price, the demand for imported copper increases. The yearly average LME price for copper in 1977 was 10 cents below the yearly average domestic producers' price. During May and June 1977 the LME price was almost 11 cents per pound below the domestic producers' price and in July and August 1977 the LME price was almost 12 cents per pound below the domestic producers' price. At the same time, the abundant supply of copper stocks in the foreseeable future provides no reason for domestic consumers of copper to maintain ties with domestic producers for purposes of a guarantee against copper shortages. Consequently, in 1977, when many domestic copper producers curtailed production because of the depressed market price for copper, imports of refined copper increased.

Price pressure from imported copper has reduced the ability of domestic producers to profitably mine domestic ore and convert it to copper concentrate and refined copper. Industry sources state that the weighted average production costs of the lowest cost domestic copper mines are 63 cents per pound. The weighted average costs for the highest cost domestic copper mines are $1.05 per pound. Thus, with a domestic market price of 60 cents per pound, domestic producers lose on the average 3 to 45 cents on each pound of copper they choose to sell.

The depressed market price for copper caused by increased imports of copper negatively affected Phelps Dodge Corp.'s level of profits. Net income recorded by Phelps Dodge Corp. has declined in each year during the period 1974 to 1977. Net income fell 57 percent from 1976 to 1977. As a result of the market conditions for copper, Phelps Dodge instituted certain budget cuts in late 1977. These budget cuts included reducing activities in the Western Exploration Department resulting in layoffs of workers in that department of the firm. Exploration activities at eight Phelps Dodge sites were either halted or severely curtailed in the first quater of 1978.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with refined copper produced by Phelps Dodge Corp. contributed importantly to the decline in production and to the total or partial separation of workers of the Western Exploration Department of the firm. In accordance with the provisions of the Act, I make the following certification:

All workers of the Douglas, Ariz., facility of the Western Exploration Department of Phelps Dodge Corp., who became totally or partially separated from employment on or after December 3, 1977, are eligible to apply for adjustment assistance under title II, chapter 2 of the Trade Act of 1974.

V 43 / 177

Signed at Washington, D.C., this 31st day of August 1978.

GLORIA G. PRATT,

[TA-W-3543]

PHELPS DODGE CORP. WESTERN EXPLORATION DEPARTMENT, RENO, NEV.

Certification Regarding Eligibility to Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-3543: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on April 25, 1978, in response to a worker petition received on April 14, 1978, which was filed on behalf of workers and former workers engaged in exploration for copper ore at the Reno, Nev., facility of the Western Exploration Department of Phelps Dodge Corp.

The notice of investigation was published in the FEDERAL REGISTER on May 5, 1978 (43 FR 19478-79). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Phelps Dodge Corp., Metals Week, Metal Bulletin, American Metal Market, the U.S. Department of the Interior, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met. It is concluded that all of the requirements have been met.

The Department's investigation revealed that the Western Exploration Department provides the function of surveying for new ore bodies for Phelps Dodge Corp. Exploration work is integrated into the company's production of copper. Exploration for copper has been the primary function of this department, comprising a major proportion of total exploration work in 1975, 1976, and 1977.

The Western Exploration Department performs its activities for the entire corporation and is not specific to the Western operations of the Phelps Dodge. Workers at three facilities of Phelps Dodge Corp. producing refined copper have been certified eligible to apply for adjustment assistance: The Morenci, Ariz., Branch (TA-W-2423), the New Cornelia Branch, Ajo, Ariz. (TA-W-2421), and the Douglas Reduction Works, Douglas, Ariz, (TA-W-2420). Production of copper at these certified facilities comprised a substantial percentage of total company copper production in 1976 and 1977.

U.S. imports of refined copper increased from 147,000 short tons in 1975 to 384,000 short tons in 1976 and to 391,000 short tons in 1977. Imports increased from 66,000 short tons in the first quarter of 1977 to 150,000 short tons in the first quarter of 1978.

The ratio of imported refined copper to domestic production increased from 8.6 percent in 1975 to 21.0 percent and 22.2 percent, respectively, in 1976 and 1977. The ratio increased from 13.1 percent in the first quarter of 1977 to 34.1 percent in the first quarter of 1978.

While imports of refined copper had increased by 161 percent in 1976 compared to 1975 and by 2 percent in 1977 compared to 1976, domestic demand increased at only a fraction of those rates. Inventory levels of domestic and imported copper on consignment at domestic refineries in December 1976 were 31.4 percent above December 1975 levels and 143.2 percent above December 1974 levels. In each month in the period January-November 1977, inventories were higher than the same month in 1976. In December 1977 inventories were only slightly lower than inventories in December 1976. Phelps Dodge and other domestic producers of refined copper lost substantial sales in 1977 because of the excessive inventories of domestic and imported refined copper.

Imports of copper are affected by the differential between the domestic producers' price for copper and the world price established by the LME (London Metal Exchange). When the LME price drops more than the estimated transportation costs of 5 to 8 cents per pound below the domestic producers' price, the demand for imported copper increases. The yearly average LME price for copper in 1977 was 10 cents below the yearly average domestic produceres' price. During May and June 1977 the LME price was almost 11 cents per pound below the domestic produceres' price and in July and August 1977 the LME price was almost 12 cents per pound below the domestic producers' price. At the same time, the abundant supply of copper stocks in the foreseeable future provides no reason for domestic consumers of copper to maintain ties with domestic producers for purposes of a guarantee against copper shortages. Consequently, in 1977, when many domestic copper producers curtailed production because of the depressed market price for copper, imports of refined copper increased.

Price pressure from imported copper has reduced the ability of domestic producers to profitably mine domestic ore and convert it to copper concentrate and refined copper. Industry sources state that the weighted average production costs of the lowest cost domestic copper mines are 63 cents per pound. The weighted average costs for the highest cost domestic copper mines are $1.05 per pound. Thus, with a domestic market price of 60 cents per pound, domestic producers lose on the average 3 to 45 cents on each pound of copper they choose to sell.

The depressed market price for copper caused by increased imports of copper negatively affected Phelps Dodge Corp's. level of profits. Net income recorded by Phelps Dodge Corp. has declined in each year during the period 1974 to 1977. Net income fell 57 percent from 1976 to 1977. As a result of the market conditions for copper, Phelps Dodge instituted certain budget cuts in late 1977. These budget cuts included reducing activities in the Western Exploration Department resulting in layoffs of workers in that department of the firm: Exploration activities at eight Phelps Dodge sites were either halted or severely curtailed in the first quarter of 1978.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with refined copper produced by Phelps Dodge Corp. contribution importantly to the decline in production and to the total or partial separation of workers of the Western Exploration Department of the firm. In accordance with the provisions of the Act, I make the following certification:

All workers of the Reno, Nev., facility of the Western Exploration Department of Phelps Dodge Corp., who become totally or partially separated from employment on or after December 3, 1977, are eligible to apply for adjustment assistance under title II, chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 31st day of August 1978.

GLORIA G. PRATT,
Director, Office of Foreign Economic Policy.

[TA-W-3542]

PHELPS DODGE CORP., WESTERN EXPORTATION DEPARTMENT, SALT LAKE CITY, UTAH

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-3542: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on April 25, 1978, in response to a worker petition received on April 14, 1978, which was filed on behalf of workers and former workers engaged in exploration for copper ore at the Salt Lake City, Utah facility of the Western Exploration Department of Phelps Dodge Corp.

The notice of investigation was published in the FEDERAL REGISTER on May 5, 1978 (43 FR 19478-79). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Phelps Dodge Corp., Metals Week, Metal Bulletin, American Metal Market, the U.S. Department of Interior, the U.S Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met. It is concluded that all of the requirements have been met.

The Department's investigation revealed that the Western Exploration Department provides the function of surveying for new ore bodies for Phelps Dodge Corp. Exploration work is integrated into the company's production of copper. Exploration for copper has been the primary function of this department, comprising a major proportion of total exploration work in 1975, 1976, and 1977.

The Western Exploration Department performs its activities for the entire corporation and is not specific to the Western operations of Phelps Dodge. Workers at three facilities of Phelps Dodge Corp. producing refined copper have been certified eligible to apply for adjustment assistance: the Morenci, Ariz., Branch (TA-W-2423), the New Cornelia Branch, Ajo, Ariz., (TA-W-2421) and the Douglas Reduction Works, Douglas, Ariz., (TA-W-2420). Production of copper at these certified facilities comprised a substantial percentage of total company copper production in 1976 and 1977.

U.S. imports of refined copper increased 147 thousand short tons in 1975 to 384 thousand short tons in 1976 and to 391 thousand short tons in 1977. Imports increased from 66 thousand short tons in the first quarter of 1978.

The ratio of imported refined copper to domestic production increased from 8.6 percent in 1975 to 21.0 percent and 22.2 percent, respectively, in 1976 and 1977. The ratio increased from 13.1 percent in the first quarter of 1977 to 34.1 percent in the first quarter of 1978.

While imports of refined copper had increased by 161 percent in 1976 compared to 1975 and by 2 percent in 1977 compared to 1976, domestic demand increased at only a fraction of those rates. Inventory levels of domestic and imported copper on consignment at domestic refineries in December 1976 were 31.4 percent above December 1975 levels and 143.2 percent above December 1974 levels. In each month in the period January-November 1977, inventories were higher than the same month in 1976. In December 1977 inventories were only slightly lower than inventories in December 1976. Phelps Dodge and other domestic producers of refined copper lost substantial sales in 1977 because of the excessive inventories of domestic and imported refined copper.

Imports of copper are affected by the differential between the domestic producers' price for copper and the world price established by the LME (London Metal Exchange). When the LME price drops more than the estimated transportation costs of 5-8 cents per pound below the domestic producers' price, the demand for imported copper increases. The yearly average LME price for copper in 1977 was 10 cents below the yearly average domestic producers' price. During May and June 1977 the LME price was almost 11 cents per pound below the domestic producers' price and in July and August 1977 the LME price was almost 12 cents per pound below the domestic producers' price. At the same time, the abundant supply of copper stocks in the foreseeable future provides no reason for domestic consumers of copper to maintain ties with domestic producers for purposes of a guarantee against copper shortages. Consequently, in 1977, when many domestic copper producers curtailed production because of the depressed market price for copper, imports of refined copper increased.

Price pressure from imported copper has reduced the ability of domestic producers to profitably mine domestic ore and convert it to copper concentrate and refined copper. Industry sources state that the weighted average production costs of the lowest cost domestic copper mines are 63 cents per pound. The weighted average costs for the highest cost domestic copper mines are $1.05 per pound. Thus, with a domestic market price of 60 cents per pound, domestic producers lose on the average 3 to 45 cents on each pound of copper they choose to sell.

The depressed market price for copper caused by increased imports of copper negatively affected Phelps Dodge Corporation's level of profits. Net income recorded by Phelps Dodge Corporation has declined in each year during the period 1974 to 1977. Net income fell 57 percent from 1976 to 1977. As a result of the market conditions for copper, Phelps Dodge instituted certain budget cuts in late 1977. These budget cuts included reducing activities in the Western Exploration Department resulting in layoffs of workers in that department of the firm. Exploration activities at 8 Phelps Dodge sites were either halted or severely curtailed in the first quarter of 1978.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with refined copper produced by Phelps Dodge Corporation contributed importantly to the decline in production and to the total or partial separation of workers of the Western Exploration Department of that firm. In accordance with the provisions of the Act, I make the following certification:

All workers of the Salt Lake City, Utah facility of the Western Exploration Department of Phelps Dodge Corp., who became totally or partially separated from employment on or after December 3, 1977, are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 31st day of August 1978.

[TA-W-2738]

ROBERT LAWRENCE, INC., BOSTON, MASS.

Determinations Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2738: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on December 7, 1977, in response to a

V 43 / 177 SEP 12 78

worker petition received on November 28, 1977, which was filed on behalf of workers and former workers producing men's coats at Robert Lawrence, Inc., Boston, Mass.

The notice of investigation was published in the FEDERAL REGISTER on December 30, 1977 (42 FR 65308). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Robert Lawrence, Inc., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group of eligibility requirements of section 222 of the Trade Act of 1974 must be met. With respect to workers producing men's sportcoats, without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

U.S. imports of men's and boys' tailored dress coats and sportcoats increased from 5,465 thousand units in 1975 to 6,965 thousand units in 1976. The ration of imports to domestic production decreased from 28.2 percent in 1975 to 25.3 percent in 1976. Imports decreased from 6,965 thousand units in 1976 to 6,269 thousand units in 1977.

Robert Lawrence produced sportcoats on a contract basis for apparel manufacturers. A Departmental survey revealed that each of Robert Lawrence's manufacturers had experienced increased sales in 1977 compared to 1976. Robert Lawrence's largest manufacturer indicated that it had decreased the amount of work given to Lawrence because it had increased its own manufacturing capacity.

With respect to workers producing men's outer coats, all of the group eligibility requirements of section 222 of the Act have been met.

U.S. import of men's and boys' outer coats and jackets increased from 20,034 thousand units in 1975 to 22,060 thousand units in 1976. The ratio of imports to domestic production increased from 28.1 percent in 1975 to 31.3 percent in 1976. Imports increased from 22,060 thousand units in 1976 to 27,432 thousand units in 1977.

A Departmental survey revealed that Robert Lawrence's largest outer coat customer decreased purchases from Lawrence while increasing its purchases of imported outer coats in 1977 compared to 1976.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with men's outer coats produced at Robert Lawrence, Inc., Boston, Mass., contributed importantly to the decrease in sales and production and to the separations of workers of that firm. In accordance with the provisions of the Act, I make the following certification:

All workers of Robert Lawrence, Inc., Boston, Mass., engaged in employment related to the production of men's outer coats who became totally or partially separated from employment on or after November 23, 1976 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

I further conclude that workers engaged in employment related to the production of men's sportcoats are denied eligibility to apply for adjustment assistance.

Signed at Washington, D.C. this 31st day of August 1978.

GLORIA G. PRATT,
Director, Office of Foreign Economic Policy.

[TA-W-3627]

ROSALBA FASHION CO., INC., HOBOKEN, N.J.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-3627: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on May 8, 1978, in response to a worker petition received on April 28, 1978, which was filed by the International Ladies' Garment Workers Union on behalf of workers and former workers producing ladies' coats at Rosalba Fashion Co., Inc., Hoboken, N.J.

The notice of investigation was published in the FEDERAL REGISTER on May 26, 1978 (43 FR 22793). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Rosalba Fashion Co., its customers (manufacturers), the U.S. Department of Commerce, the U.S. International Trade Commission, the National Cotton Council of America, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of section 222 of the Act must be met. The Department's investigation revealed that all of the criteria have been met.

U.S. imports of women's, misses', and children's coats and jackets increased from 2,252 thousand dozen in 1976 to 2,723 thousand dozen in 1977. Imports declined from 590,000 dozen in the first quarter of 1977 to 572,000 dozen in the first quarter of 1978. The ratio of imports to domestic production increased from 48.3 percent in 1976 to 54.9 percent in 1977.

The Department conducted a survey of the principal manufacturer for whom Rosalba Fashion Co., Inc. worked in 1976 and 1977. The manufacturer, who accounted for 100 percent of sales in 1976, reduced purchases from Rosalba Fashion Co., Inc., and increased purchases of imported ladies' coats in 1977 compared to 1976 and in the first quarter of 1978 compared to the first quarter of 1977.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with the ladies' coats produced at Rosalba Fashion Co., Inc., Hoboken, N.J., contributed importantly to the decline in sales or production and to the separations of workers at that plant. In accordance with the provisions of the Act, I make the following certification:

All workers of Rosalba Fashion Co., Inc., Hoboken, N.J., who became totally or partially separated from employment on or after October 1, 1977, are eligible to apply for adjustment assistance under title II, chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 31st day of August 1978.

BRIAN TURNER,
Executive Assistant to the Deputy Under Secretary for International Affairs.

[4510-28]

[TA-W-3442]

SIGNALITE DIVISION, GENERAL INSTRUMENT CORP., NEPTUNE, N.J.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-3442: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on March 28, 1978, in response to a worker petition received on March 13, 1978, which was filed on behalf of workers and former workers producing neon indicator lamps and lighted devices at Signalite Division, General Instrument Corp., Neptune, N.J. The investigation revealed that the Signalite Division produces only neon indicator lamps.

The notice of investigation was published in the FEDERAL REGISTER on April 11, 1978 (43 FR 15205). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Signalite, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met. The investigation revealed that all of the requirements have been met.

Imports of neon indicator lamps increased absolutely in 1977 compared to 1976 from 7,620 thousand units to 17,900 thousand units. Imports as a percentage of U.S. production increased from 4.3 percent in 1976 to 9.7 percent in 1977.

Signalite began importing neon indicator lamps manufactured in a General Instrument offshore facility in February 1977. Signalite's sales of imported neon lamps as a percentage of total division sales amounted to 12.9 percent in 1977, increasing to 29.2 percent in the first 3 months of 1978.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with neon indicator lamps produced at Signalite Division, General Instrument Corp., Neptune, N.J., contributed importantly to the total or partial separation of workers at that firm. In accordance with the provisions of the Act, I make the following certification:

All workers of Signalite Division, General Instrument Corp., Neptune, N.J., engaged in employment related to the production of neon indicator lamps who became totally or partially separated from employment on or after March 10, 1977, are eligible to apply for adjustment assistance under title II, chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 31st day of August 1978.

GLORIA G. PRATT,
Director, Office of Foreign Economic Policy.

[TA-W-3610]

STYLE SPORTSWEAR, PATERSON, N.J.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-3610: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the act.

The investigation was initiated on May 8, 1978, in response to a worker petition received on April 28, 1978, which was filed by the International Ladies' Garment Workers' Union on behalf of workers and former workers producing ladies' coats and raincoats at Style Sportswear, Paterson, N.J.

The notice of investigation was published in the FEDERAL REGISTER on May 26, 1978 (43 FR 22793). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Style Sportswear, its customers (manufacturers), the U.S. Department of Commerce, the U.S. International Trade Commission, the National Cotton Council of America, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of section 222 of the act must be met. The Department's investigation revealed that all of the requirements have been met.

U.S. imports of women's, misses', and children's coats and jackets increased from 2,252 thousand dozen in 1976 to 2,723 thousand dozen in 1977. Imports declined from 590,000 dozen in the first quarter of 1977 to 572,000 dozen in the first quarter of 1978. The ratio of imports to domestic production increased from 48.3 percent in 1976 to 54.9 percent in 1977.

U.S. imports of women's, misses', and children's raincoats decreased from 261,000 dozen in 1976 to 242,000 dozen in 1977. Imports increased from 84,000 dozen in the first quarter of 1977 to 129,000 dozen in the first quarter of 1978. The ratio of imports to domestic production decreased from 45.0 percent in 1976 to 40.3 percent in 1977.

The Department conducted a survey of the principal manufacturers for which Style Sportswear worked in 1976 and 1977. Manufacturers that accounted for 100 percent of sales in 1976 reported that they reduced purchases from Style Sportswear and increased purchases of imported ladies' coats and raincoats in 1977 compared to 1976. Manufacturers that accounted for 100 percent of sales in 1977 reported that the reduced purchases from Style Sportswear and increased purchases of imports in the first quarter of 1978 compared to the first quarter of 1977.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increased imports of articles like or directly competitive with the ladies' coats and raincoats produced at Style Sportswear, Paterson, N.J., contributed importantly to the decline in sales and to the separation of workers at that plant. In accordance with the provisions of the act, I make the following certification:

All workers of Style Sportswear, Paterson, N.J., who became totally or partially separated from employment on or after March 28, 1977, are eligible to apply for adjustment assistance under title II, chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 31st day of August 1978.

BRIAN TURNER,
Executive Assistant to the Deputy Under Secretary for International Affairs.

[TA-W-3204]

SUSSEX CLOTHES, LTD., NEW YORK, N.Y.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974, the Department of Labor herein presents the results of TA-W-3204: Investigation regarding certification of eligibility to apply for adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on February 22, 1978, in response to a worker petition received on February 6, 1978, which was filed by the Amalgamated Clothing and Textile Workers' Union on behalf of workers and former workers producing men's suitcoats, sportcoats, and pants at Sussex Clothes, Ltd., New York, N.Y.

The notice of investigation was published in the FEDERAL REGISTER on March 3, 1978 (43 FR 8863). No public hearing was requested and none was held.

The information upon which the determination was made was obtained

V 4 3 / 1 7 7

S E 1 2 7 8

principally from officials of Sussex Clothes, Ltd., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met. It is concluded that all of the requirements have been met.

U.S. imports of men's and boys' tailored dress coats and sportcoats increased from 5,465 thousand units in 1975 to 6,965 thousand units in 1976 and then decreased to 6,269 thousand units in 1977. Imports in absolute terms in 1977 were above those in the years 1973-75. The imports to domestic production ratio decreased from 28.2 percent in 1975 to 25.3 percent in 1976.

U.S. imports of men's and boys' tailored suits increased from 3,105 thousand units in 1975 to 3,562 thousand units in 1976. Imports then increased to 4,091 thousand units in 1977. The imports to domestic production ratio increased from 18.3 percent in 1975 to 20.0 percent in 1976.

U.S. imports of men's and boys' dress and sport trousers and shorts increased from 55,508 thousand units in 1975 to 73,209 thousand units in 1976. Imports then increased to 76,419 thousand units in 1977. The imports to domestic production ratio increased from 34.1 percent in 1975 to 41.9 percent in 1976.

A survey of customers of Sussex Clothes, Ltd. revealed that some had increased purchases of imported men's suits, sportcoats, and pants while reducing purchases from Sussex Clothes in 1977 compared to 1976 and in the first quarter of 1977.

A certification applicable to the petitioning group of workers was issued on March 15, 1976 (TA-W-548) and expired on March 15, 1978.

Conclusion

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with the men's suitcoats, sportcoats, and pants produced by Sussex Clothes, Ltd., New York, N.Y., contributed importantly to the decline in sales and production and to the total or partial separation of workers at that firm. In accordance with the provisions of the Act, I make the following certification:

All workers at Sussex Clothes, Ltd., New York, N.Y., who became totally or partially separated from employment on or after March 15, 1978, are eligible to apply for adjustment assistance under title II, chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 31st day of August 1978.

GLORIA G. PRATT,
Director, Office of Foreign Economic Policy.

[TA-W-3782]

TAG-A-LONG HANDBAGS & ACCESSORIES, INC., EAST HAVEN, CONN.; NEW YORK, N.Y.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-3782: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on May 25, 1978, in response to a worker petition received on May 22, 1978, which was filed on behalf of workers and former workers producing handbags at Tag-A-Long Handbags & Accessories, Inc., East Haven, Conn. The investigation was expanded to include the New York, N.Y., sales office.

The notice of investigation was published in the FEDERAL REGISTER on June 9, 1978 (43 FR 25197). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Tag-A-Long, its customers, the U.S. International Trade Commission, the U.S. Department of Commerce, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met. The investigation revealed that all of the criteria have been met.

Imports of handbags increased from 90.2 million units in 1976 to 92.8 million units in 1977. Imports continued to increase from 22.1 million units during the first quarter of 1977 to 34.0 million units during the first quarter of 1978. The ratio of imports of handbags to domestic production increased from 111.1 percent in 1976 to 116.6 percent in 1977.

Many of the customers who were surveyed either imported handbags directly or purchased, from domestic sources, handbags that were manufactured offshore. The customers reduced purchases from Tag-A-Long while increasing, either directly or indirectly, purchases of imported handbags.

Conclusion

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with handbags produced by Tag-A-Long Handbags & Accessories, Inc., East Haven, Conn., contributed importantly to the total or partial separations of the workers of that plant and at the firm's New York sales office. In accordance with the provisions of the Act, I make the following certification:

All workers of Tag-A-Long Handbags & Accessories, Inc., East Haven, Conn., and New York, N.Y., who became totally or partially separated from employment on or after October 29, 1977, are eligible to apply for adjustment assistance under title II, chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 31st day of August 1978.

BRIAN TURNER,
Executive Assistant to the Deputy Under Secretary for International Affairs.

[TA-W-3108]

WESTERN GENERAL OFFICES, PHELPS DODGE CORP., DOUGLAS, ARIZ.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-3108: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on February 9, 1978, in response to a worker petition received on January 23, 1978, which was filed on behalf of workers and former workers of the Western Engineering Department of Phelps Dodge Corp. engaged in providing engineering and support functions to its Western operations. The investigation was expanded to include workers in the rest of the Western General Offices who provide accounting, purchasing and administrative support to the Western operations.

The notice of investigation was published in the FEDERAL REGISTER on February 24, 1978 (43 FR 7743). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Phelps Dodge Corp. Metals Week, Metal Bulletin, American Metal Market, the U.S. Department of Interior, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met. it is concluded that all of the requirements have been met.

The Department's investigation revealed that the Western General Offices perform support functions such as engineering, accounting, purchasing and administration for the Western operations of Phelps Dodge Corp. These support functions are integral to the production of refined copper by the Western operations of Phelps Dodge Corp.

The Western operations consist of mining facilities at Morenci, Ariz., Ajo, Ariz. (New Cornelia mine), Tyrone, N. Mex., Bisbee, Ariz., and a smelter at Douglas, Ariz. Workers at the Morenci, Ariz., Ajo, Ariz., and Douglas, Ariz. production facilities of the Western operations have been certified eligible to apply for adjustment assistance by the Department in January 1978 (TA-W-2423, 2421, and 2420, respectively). Copper production at the facilities certified by the Department constituted a major proportion of total copper production by the Western operations in 1976 and 1977.

U.S. imports of refined copper increased from 147 thousand short tons in 1975 to 384 thousand short tons in 1976 and to 391 thousand short tons in 1977. Imports increased from 66 thousand short tons in the first quarter of 1977 to 150 thousand short tons in the first quarter of 1978.

The ratio of imported refined copper to domestic production increased from 8.6 percent in 1975 to 21.0 percent and 22.2 percent, respectively, in 1976 and 1977. The ratio increased from 13.1 percent in the first quarter of 1977 to 34.1 percent in the first quarter of 1978.

While imports of refined copper had increased by 161 percent in 1976 compared to 1975 and by 2 percent in 1977 compared to 1976, domestic demand increased at only a fraction of those rates. Inventory levels of domestic and imported copper on consignment at domestic refineries in December 1976 were 31.4 percent above December 1975 levels and 143.2 percent above December 1974 levels. In each month in the period January-November 1977, inventories were higher than the same month in 1976. In December 1977 inventories were only slightly lower than inventories in December 1976. Phelps Dodge and other domestic producers of refined copper lost substantial sales in 1977 because of the excessive inventories of domestic and imported refined copper.

Imports of copper are affected by the differential between the domestic producers' price for copper and the world price established by the LME (London Metal Exchange). When the LME price drops more than the estimated transportation costs of 5-8 cents per pound below the domestic producers' price, the demand for imported copper increases. The yearly average LME price for copper in 1977 was 10 cents below the yearly average domestic producers' price. During May and June 1977 the LME price was almost 11 cents per pound below the domestic producers' price and in July and August 1977 the LME price was almost 12 cents per pound below the domestic producers' price. At the same time; the abundant supply of copper stocks in the foreseeable future provides no reason for domestic consumers of copper to maintain ties with domestic producers for purposes of a guarantee against copper shortages. Consequently, in 1977, when many domestic copper producers curtailed production because of the depressed market price for copper, imports of refined copper increased.

Price pressure from imported copper has reduced the ability of domestic producers to profitably mine domestic ore and convert it to copper concentrate and refined copper. Industry sources state that the weighted average production costs of the lowest cost domestic copper mines are 63 cents per pound. The weighted average costs for the highest cost domestic copper mines are $1.05 per pound. Thus, with a domestic market price of 60 cents per pound, domestic producers lose on the average of 3 to 45 cents on each pound of copper they choose to sell.

The depressed market price for copper caused by increased imports of copper negatively affected Phelps Dodge Corp. level of profits. Net income recorded by Phelps Dodge Corp. has declined in each year during the period 1974 to 1977. Net income fell 57 percent from 1976 to 1977. As a result of the market conditions for copper, Phelps Dodge instituted certain budget cuts in late 1977. These budget cuts included reducing activities in the Western General Offices, resulting in layoffs of workers in that department of the firm.

Conclusion

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with refined copper produced by Phelps Dodge Corp. contributed importantly to the decline in production and to the total or partial separation of workers of the Western General Offices of that firm. In accordance with the provisions of the Act, I make the following certifications:

All workers of the Western General Offices of Phelps Dodge Corp., Douglas, Ariz., who became totally or partially separated from employment on or after December 3, 1977 are eligible to apply for adjudtment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 31st day of August 1978.

GLORIA G. PRATT,
Director, Office of Foreign Economic Research.

[FR Doc. 78-25531 Filed 9-11-78; 8:45 am]

[4510-28]

[TA-W-3266]

WESTINGHOUSE ELECTRIC CORP., LAMP DIVISION, BELLEVILLE, N.J.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-3266: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on February 27, 1978, in response to a worker petition received on February 13, 1978, which was filed by the International Union of Electrical, Radio and Machine Workers on behalf of former workers producing lamp bases at the Belleville, N.J., plant of the Lamp Division, Westinghouse Electric Corp.

The notice of investigation was published in the FEDERAL REGISTER on March 14, 1978 (43 FR 10648). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from information and publications provided by officials of the Westinghouse Electric Corp., its customers, the U.S. Department of Commerce, U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met. The investigation revealed that without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

V 4 3 / 1 7 7

On January 7, 1977, the Lamp Division announced its decision to close the Belleville plant. The Belleville plant produced lamp bases for fluorescent and miniature incandescent lamps. Westinghouse found that there was available capacity at the lamp making plants to manufacture lamp bases and that consolidating production into the lamp making plants would increase production efficiency. The Belleville plant closed April 1, 1977.

The Department's investigation revealed that production of both fluorescent and miniature incandescent lamps increased in 1977 compared to 1976. The ratio of imports to domestic production of fluorescent lamps was less than 2 percent in 1976 and 1977. None of the customers of Westinghouse that were surveyed decreased purchases of fluorescent lamps from Westinghouse and increased purchases of imports. Most of the surveyed customers of Westinghouse who purchased miniature incandescent lamps did not purchase imports.

CONCLUSION

After careful review, I determine that workers of the Belleville, N.J., plant of the Lamp Division, Westinghouse Electric Corp. are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 31st day of August 1978.

GLORIA G. PRATT,
Director, Office of Foreign Economic Policy.

Office of the Secretary

INVESTIGATIONS REGARDING CERTIFICATIONS OF ELIGIBILITY TO APPLY FOR WORKER ADJUSTMENT ASSISTANCE

Petitions have been filed with the Secretary of Labor under section 221(a) of the Trade Act of 1974 ("the Act") and are identified in the appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, has instituted investigations pursuant to section 221(a) of the act and 29 CFR 90.12.

The purpose of each of the investigations is to determine whether absolute or relative increases of imports of articles like or directly competitive with articles produced by the workers' firm or an appropriate subdivision thereof have contributed importantly to an absolute decline in sales or production, or both, of such firm or subdivision and to the actual or threatened total or partial separation of a significant number or proportion of the workers of such firm or subdivision.

Petitioners meeting these eligibility requirements will be certified as eligible to apply for adjustment assistance under title II, chapter 2, of the act in accordance with the provisions of subpart B of 29 CFR Part 90. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

Pursuant to 29 CFR 90.13, the petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than September 22, 1978.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than September 22, 1978.

The petitions filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, D.C. 20210.

Signed at Washington, D.C., this 31st day of August 1978.

HAROLD A. BRATT,
Acting Director, Office of Trade Adjustment Assistance.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[78-39]

SPACE SCIENCE STEERING COMMITTEE, OUT-OF-ECLIPTIC (OOE) MISSION AD HOC ADVISORY SUBCOMMITTEE

Renewal

Pursuant to section 14a of the Federal Advisory Committee Act (Pub. L. 92-463) and after consultation with the General Services Administration, NASA has determined that renewal of the above-named advisory subcommittee is in the public interest in connection with the performance of duties imposed upon NASA by law. The Space Science Steering Committee, under which the subcommittee operates, is a NASA internal committee, composed wholly of Government employees.

The function of this subcommittee is to obtain the advice of the scientific community on proposals in the specialized areas identified by the name of the Subcommittee.

ARNOLD W. FRUTKIN,
Acting Associate Administrator, External Relations.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

HUMANITIES PANEL

Meeting

SEPTEMBER 7, 1978.

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92-463, as amended) notice is hereby given that meetings of the Humanities Panel will be held at the National Endowment for the Humanities, Washington, D.C., from 9 a.m. to 5:30 p.m. on the following dates:

September 27th and 28th (room 807).

October 5th and 6th (first floor conference room).

October 13th (first floor conference room).

The purpose of these meetings is to review NEH museums and historical organizations program applications submitted to the National Endowment for the Humanities for projects beginning after January 1, 1979.

Because the proposed meetings will consider financial information and disclosure information of a personal nature the disclosure of which would constitute a clearly unwarranted invasion of personal privacy, pursuant to authority granted me by the chairman's delegation of authority to close advisory committee meetings, dated January 15, 1978, I have determined that the meetings would fall within exemptions (4) and (6) of 5 U.S.C. 552b(c) and that it is essential to close the meetings to protect the free exchange of internal views and to avoid interference with operation of the committee.

It is suggested that those desiring more specific information contact the Advisory Committee Management Officer, Mr. Stephen McCleary, 806 15th Street NW., Washington, D.C. 20506 or call area code 202-724-0367.

STEPHEN J. MCCLEARY,
Advisory Committee Management Officer, Museums and Historical Organizations Program, Division of Public Programs.

[FR Doc. 78-25617 Filed 9-11-78; 8:45 am]

[7536-01]

HUMANITIES PANEL

Meeting

SEPTEMBER 6. 1978.

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92-463, as amended), notice is hereby given that a meeting of the Humanities Panel will be held at 806 15th Street NW., Washington, D.C. 20506, in the first floor conference room, from 8 a.m. to 6 p.m. on October 3 and 4, 1978.

The purpose of the meeting is to review public media applications in all of the fields of the humanities submitted to the National Endowment for the Humanities for projects beginning after January 1, 1979.

Because the proposed meeting will consider financial information and disclose information of a personal nature the disclosure of which would constitute a clearly unwarranted invasion of personal privacy, pursuant to authority granted me by the chairman's delegation of authority to close advisory committee meetings, dated January 15, 1978, I have determined that the meetings would fall within exemptions (4) and (6) of 5 U.S.C. 552b(c) and that it is essential to close the meeting to protect the free exchange of internal views and to avoid interference with operation of the committee.

It is suggested that those desiring more specific information contact the Advisory Committee Management Officer, Mr. Stephen J. McCleary, 806 15th Street NW., Washington, D.C. 20506, or call area code 202-724-0367.

NATIONAL SCIENCE FOUNDATION

ADVISORY COMMITTEE FOR SCIENCE EDUCATION

Meeting

In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, as amended, the National Science Foundation announces the following meeting:

Name: Advisory Committee for Science Education.
Date and time: September 28 and 29, 1978, 9 a.m. each day.
Place: Room 651, 5225 Wisconsin Avenue NW., Washington, D.C.
Type of meeting: Open.
Contact person: Mrs. Frances Watts, Staff Assistant, Science Education Directorate, National Science Foundation, Room W-600, Washington, D.C. 20550, telephone 202-282-7930.
Summary minutes: May be obtained from the Committee Management Coordinator, Division of Financial and Administrative

Management, National Science Foundation, Room 248, Washington, D.C. 20550.
Purpose of committee: To provide advice and recommendations concerning the impact of all Foundation activities (including research, scientific information, and international programs, as well as, specifically, "education" programs) relating to education in the sciences in U.S. schools, colleges, and universities.
Agenda:

THURSDAY, SEPTEMBER 28

Update on fiscal year 1979 budget; introduction of general topic of meeting—Early Adolescence; Overview of Early Adolescence, Discussion and Recommendations for Action; oversight activities by the Undergraduate Subcommittee.

FRIDAY, SEPTEMBER 29

Remarks by Deputy Director, NSF; SE Advisory Committee structure and relationships to other advisory committees in directorate; issues initiated by the Advisory Committee.

M. REBECCA WINKLER,
Committee Management Coordinator.

SEPTEMBER 6, 1978.

[FR Doc. 78-25587 Filed 9-11-78; 8:45 am]

[7555-01]

DOE/NSF NUCLEAR SCIENCE ADVISORY COMMITTEE (NUSAC)

Meeting

In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, the National Science Foundation announces the following meeting:

Name: DOE/NSF Nuclear Science Advisory Committee (NUSAC).
Date and time: November 3, 1978, 2:30 p.m.-6 p.m. November 4, 1978, 9 a.m.-6 p.m.
Place: Meyer Memorial Library, Room 124, Stanford University, Stanford, Calif. 94305.
Type of meeting: November 3, 1978—Open. November 4, 1978—Open.
Contact person: Dr. Howel G. Pugh, Head, Nuclear Science Section, Room 341, National Science Foundation, Washington, D.C. 20550, telephone 202-632-4318.
Summary minutes: May be obtained from the Committee Management Coordinator, Division of Financial and Administrative Management, Room 248, National Science Foundation, Washington, D.C. 20550.
Purpose of committee: To provide advice on a continuing basis to both DOE and NSF on support for basic nuclear science in the United States.
Agenda:

NOVEMBER 3, 1978

2:30 p.m.—Discussion of agenda and procedures.
3 p.m.—Remarks of DOE representative.
3:30 p.m.—Remarks of NSF representative.
4 p.m.—Remarks and discussion on activities of the 1979 NUSAC Facilities Subcommittee.
6 p.m.—Adjournment.

NOVEMBER 4, 1978

9 a.m.—Remarks and discussion on activities of the 1978-79 Manpower Subcommittee.
9:45 a.m.—Remarks and discussion on activities of the 1978-79 Instrumentation Subcommittee.
11 a.m.—Remarks and discussion on activities of the working group on user-type research.
11:45 a.m.—Remarks and discussion on activities of the working group on ongoing programs and laboratory operations.
2 p.m.—Discussion of possible comments to the Advisory Committee for Physics of the NSF.
2:30 p.m.—Remarks and discussion on activities of the working group on long-range planning and scientific priorities.
6 p.m.—Adjournment.

M. REBECCA WINKLER,
Committee Management Coordinator.

SUBCOMMITTEE ON DEVELOPMENTAL BIOLOGY

Meeting

In accordance with the Federal Advisory Committee Act, as amended, Pub. L. 92-463, the National Science Foundation announces the following meeting:

Name: Subcommittee on Developmental Biology of the Advisory Committee for Physiology, Cellular, and Molecular Biology.
Date and time: November 2, 3, and 4, 1978, 9 a.m.
Place: Room 338, National Science Foundation, 1800 G Street NW., Washington, D.C. 20550.
Type of meeting: Closed.
Contact person: Dr. Mary E. Clutter, Program Director, Developmental Biology Program, Room 326, National Science Foundation, Washington, D.C. 20550, telephone 202-632-4314.
Purpose of subcommittee: To provide advice and recommendations concerning support for research in developmental biology.
Agenda: To review and evaluate research proposals as part of the selection process for awards.
Reason for closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries, and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of 5 U.S.C. 552b(c), Government in the Sunshine Act.
Authority to close meeting: This determination was made by the Committee Management Officer pursuant to provisions of section 10(d) of Pub. L. 92-463. The Committee Management Officer was delegated the authority to make such determinations by the Acting Director, NSF, on February 18, 1977.

M. REBECCA WINKLER,
Committee Management Coordinator.

SUBCOMMITTEE ON PUBLIC UNDERSTANDING OF SCIENCE OF THE ADVISORY COMMITTEE ON SCIENCE AND SOCIETY

Meeting

In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, as amended, the National Science Foundation announces the following meeting:

Name: Subcommittee on Public Understanding of Science of the Advisory Committee on Science and Society.
Date and time: October 5 and 6, 1978, 9 a.m. to 5 p.m. each day.
Place: Room 651, National Science Foundation, 5225 Wisconsin Avenue NW., Washington, D.C.
Type of meeting: Part open—October 5—Open 9 a.m. to 12 noon; closed 1 p.m. to 5 p.m. October 6—Closed 9 a.m. to 5 p.m.
Contact person: Mr. George W. Tressel, Program Director, Public Understanding of Science, Office of Science and Society, National Science Foundation, Washington, D.C. 20550, telephone 202-282-7770.
Purpose of subcommittee: To provide advice and recommendations concerning direction and priorities and support for projects in the public understanding of science program.
Summary minutes: May be obtained from the Committee Management Coordinator, Division of Financial and Administrative Management, Room 248, National Science Foundation, Washington, D.C. 20550.
Agenda:

OCTOBER 5—9 A.M. TO 12 NOON—OPEN SESSION

Open discussion. Review of the grants and funding pattern of the last fiscal year and discuss trends and questions related to PUOS' long-range funding policies.

OCTOBER 5—1 P.M. TO 5 P.M. AND OCTOBER 6—9 A.M. TO 5 P.M.—CLOSED SESSIONS

To review and evaluate research proposals as part of the selection process for awards.

Reason for closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of 5 U.S.C. 552b(c), Government in the Sunshine Act.
Authority to close meeting: This determination was made by the Committee Management Officer pursuant to provisions of section 10(d) of Pub. L. 92-463. The Committee Management Officer was delegated the authority to make such determinations by the Acting Director, NSF, on February 18, 1977.

M. REBECCA WINKLER,
Committee Management Coordinator.

SEPTEMBER 6, 1978.

NUCLEAR REGULATORY COMMISSION

ADVISORY COMMITTEE ON REACTOR SAFEGUARDS SUBCOMMITTEE ON ADVANCED REACTORS

Meeting

The ACRS Subcommittee on Advanced Reactors will hold an open meeting on September 27, 1978, in room 1046, 1717 H Street NW., Washington, D.C. 20555, to continue its review of matters related to the NRC-sponsored research on the safety of advanced reactor designs. This meeting was rescheduled from September 25, 1978, as announced at 43 FR 36152, August 15, 1978.

In accordance with the procedures outlined in the FEDERAL REGISTER on October 31, 1977 (42 FR 56972), oral or written statements may be presented by members of the public, recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Subcommittee, its consultants, and staff. Persons desiring to make oral statements should notify the designated Federal employee as far in advance as practicable so that appropriate arrangements can be made to allow the necessary time during the meeting for such statements.

The agenda for subject meeting shall be as follows:

WEDNESDAY, SEPTEMBER 27, 1978

8:30 A.M. UNTIL THE CONCLUSION OF BUSINESS

The Subcommittee may meet in executive session, with any of its consultants who may be present, to explore and exchange their preliminary opinions regarding matters which should be considered during the meeting and to formulate a report and recommendations to the full Committee.

At the conclusion of the executive session, the Subcommittee will hear presentations by and hold discussions with representatives of the NRC staff, and their consultants, pertinent to the above topics. The Subcommittee may then caucus to determine whether the matters identified in the initial session have been adequately covered and whether the project is ready for review by the full Committee.

Further information regarding topics to be discussed, whether the meeting has been canceled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefore can be obtained by a prepaid telephone call to the designated Federal employee for this meeting, Dr. Richard P. Savio, telephone 202-634-3267, between 8:15 a.m. and 5 p.m., e.d.t.

Dated: Sept. 6, 1978.

JOHN C. HOYLE,
Advisory Committee Management Officer.

[FR Doc. 78-25580 Filed 9-11-78; 8:45 am]

[7590-01]

ADVISORY COMMITTEE ON REACTOR SAFEGUARDS SUBCOMMITTEE ON RADIOLOGICAL EFFECTS AND SITE EVALUATION

Meeting

The ACRS Subcommittee on Radiological Effects and Site Evaluation will hold an open meeting on September 27-28, 1978, at 1717 H Street NW., Washington, D.C. 20555, to review: (1) A draft of regulatory guide 8.JB, "Radiation Safety Training at Nuclear Power Plants," (2) certain aspects of emergency planning, and (3) the NRC research program on radiological effects for the annual ACRS report to Congress.

In accordance with the procedures outlined in the FEDERAL REGISTER on October 31, 1977 (42 FR 56972), oral or written statements may be presented by members of the public, recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Subcommittee, its consultants, and staff. Persons desiring to make oral statements should notify the designated Federal employee as far in advance as practicable so that appropriate arrangements can be made to allow the necessary time during the meeting for such statements.

The agenda for subject meeting shall be as follows: Room 1167 at 1 p.m., Wednesday, September 27, 1978, until conclusion of business. Room 1046 at 8:30 a.m., Thursday, September 28, 1978, until conclusion of business.

The Subcommittee may meet in executive session, with any of its consultants who may be present, to explore and exchange their preliminary opinions regarding matters which should be considered during the meeting and to formulate a report and recommendations to the full Committee.

At the conclusion of the executive session, the Subcommittee will hear presentations by and hold discussions with representatives of the NRC staff, and their consultants, pertinent to this review. The Subcommittee may then caucus to determine whether the matters identified in the initial session have been adequately covered and whether the project is ready for review by the full Committee.

Further information regarding topics to be discussed, whether the meeting has been canceled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefore can be obtained by a prepaid telephone call to the designated Federal employee for this meeting, Mr. Ragnwald Muller, telephone 202-634-1413 between 8:15 a.m. and 5 p.m., e.d.t.

Dated: September 6, 1978.

JOHN C. HOYLE,
Advisory Committee Management Officer.

[Docket No. 50-368]

ARKANSAS POWER & LIGHT CO.

Availability of Safety Evaluation Report

Notice is hereby given that the Office of Nuclear Reactor Regulation has published its safety evaulation report regarding the review of the fire protection program for the Arkansas Nuclear One—Unit 2 plant located in Pope County, Ark. The review of the fire protection program is in connection with the review of the application for an operating license for the Arkansas Nuclear One—Unit 2 plant. Notice of receipt of the Arkansas Power & Light Co.'s application for a facility operating license was published in the FEDERAL REGISTER on April 23, 1974 (39 FR 14371).

The report is being made available at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C., and at the Arkansas Polytechnic College, Russellville, Ark. 72801 for inspection and copying. The report (Document No. NUREG-0223 dated August 1978) can also be purchased, at current rates, from the National Technical Information Service, Department of Commerce, 5285 Port Royal Road, Springfield, Va. 22161.

Dated at Bethesda, Md., this 30th day of August 1978.

For the Nuclear Regulatory Commission.

JOHN F. STOLZ,
Chief, Light Water Reactors Branch No. 1, Division of Project Management.

[7590-01]

[Docket Nos. 50-452; 50-453]

DETROIT EDISON CO. (GREENWOOD ENERGY CENTER, UNITS 2 AND 3)

Order Canceling Prehearing Conference Scheduled for September 19-21, 1978

The Board was aware that the applicant planned to update and revise the application, but we were not aware of the extent of the revision until we received the NRC staff's filing of August 31, 1978. The staff estimates that it will be more than 2 years before its review of the revised application is completed. The staff also stated that after the revised application was received, "this application must be renoticed in the FEDERAL REGISTER to give interested persons, other than those who have already intervened, an opportunity to file intervention petitions."

The Board determined that the scheduled prehearing conference would be canceled since it was not possible that it could be productive. All parties (except DACE who cannot be contacted by phone) were notified on September 1, 1978, of the Board's decision. Applicant and staff were also informed that their responses to the contentions in the petition of CEE due this week are no longer required. The prehearing conference is indefinitely postponed.

The staff's statement relative to the renotice of the proceeding is not explicit. Does the staff anticipate that it will recommend to the Commission that a renotice is appropriate or is it putting the Board on notice that it will request the Licensing Board to take this action? The Board expects a clarification on this point.

It is so ordered.

Dated at Bethesda, Md., this 6th day of September 1978.

For the Atomic Safety and Licensing Board.

ELIZABETH S. BOWERS,
Chairman.

[7590-01]

[Docket No. 50-333]

POWER AUTHORITY OF THE STATE OF NEW YORK

Proposed Issuance of Amendment to Facility Operating License

The Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. DPR-59 issued to Power Authority of the State of New York (the licensee), for operation of the James A. FitzPatrick Nuclear Power Plant (the facility), located in Oswego County, N.Y.

The amendment would authorize an increase in spent fuel storage capacity from 760 to 2244 fuel assemblies. The amendment would also revise design features and associated operating limits, as necessary, to accommodate the increased storage capacity in accordance with the licensee's application dated July 26, 1978.

Prior to issuance of the proposed license amendment, the Commission will have made the findings required by the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations.

By October 12, 1978, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding, and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) or the subject matter of the proceeding as to which petitioner wishes to intervene or who has been admitted as a party may amend his petition, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, the petitioner shall file a supplement to his petition to intervene which must include a list of the contentions which he seeks to have litigated in the matter, and the bases for each contention set forth with reasonable specificity. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

A request for a hearing or a petition for leave to intervene shall be filed with the Secretary of the Commission, United States Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Section, or may be delivered to the Commission's Public Document Room, 1717 H Street NW., Washington, D.C., by the above date. A copy of the petition should also be sent to the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, and to Lewis R. Bennett, Assistant General Manager/General Counsel, Power Authority of the State of New York, 10 Columbus Circle, New York, N.Y. 10019, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the Atomic Safety and Licensing Board designated to rule on the petition and/or request, that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(i)–(v) and § 2.714(d).

For further details with respect to this action, see the application for amendment, dated July 26, 1978, which is available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C., and at the Oswego County Office Building, 46 East Bridge Street, Oswego, N.Y.

Dated at Bethesda, Md., this 1st day of September, 1978.

For the Nuclear Regulatory Commission.

THOMAS A. IPPOLITO,
Chief, Operating Reactors Branch No. 3, Division of Operating Reactors.

[7590-01]

[Docket Nos. 50-443-A and 50-444-A]

PUBLIC SERVICE CO. OF NEW HAMPSHIRE, ET AL, SEABROOK STATION, UNITS 1 AND 2

Receipt of Additional Antitrust Information: Time for Submission of Views on Antitrust Matters

Public Service Co. of New Hampshire, pursuant to section 103 of the Atomic Energy Act of 1954, as amended, filed on May 15, 1978, information requested by the Attorney General for Antitrust Review as required by 10 CFR Part 50, Appendix L. This information adds Massachusetts Municipal Wholesale Electric Co., Vermont Electric Cooperative, Inc., Maine Public Service Co., Taunton Municipal Lighting Plant Commission, and Bangor Hydro-Electric Co., as possible co-owners of the Seabrook Station, Units 1 and 2.

The information was filed by Public Service Co. of New Hampshire, The United Illuminating Co., Central Maine Power Co., Central Vermont Public Service Corp., The Connecticut Light & Power Co., Fitchburg Gas & Electric Light Co., Montaup Electric Co., New Bedford Gas & Edison Light Co., New England Power Co., Vermont Electric Power Co., Inc., Massachusetts Municipal Wholesale Electric Co., Vermont Electric Cooperative, Inc., Maine Public Service Co., Taunton Municipal Lighting Plant Commission, Bangor Hydro-Electric Co., and Town of Hudson, Mass., Light & Power Department in connection with their application for construction permits and operating licenses for the Seabrook Station, Units 1 and 2. The site for this plant is located in Rockingham County, N.H.

The original antitrust portion of the application was submitted on July 9, 1973, and Notice of Receipt of Application for Construction Permits and Facility Licenses and Availability of Applicant's Environmental Report; Time for Submission of Views on Antitrust Matters, was published in the FEDERAL REGISTER on August 9, 1973 (38 FR 21522). The Notice of Hearing was published in the FEDERAL REGISTER on August 9, 1973 (38 FR 21519).

Copies of the above stated documents are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. 20555, and at the Exeter Public Library, Front Street, Exeter, N.H.

Information in connection with the antitrust review of this application can be obtained by writing to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, attention: Antitrust and Indemnity Group, Office of Nuclear Reactor Regulation.

Any person who wishes to have his views on the antitrust matters with respect to the Massachusetts Municipal Wholesale Electric Co., Vermont Electric Cooperative, Inc., Maine Public Service Co., Taunton Municipal Lighting Plant Commission, and Bangor Hydro-Electric Co. presented to the Attorney General for consideration should submit such views to the U.S. Nuclear Regulatory Commission on or before November 6, 1978.

Dated at Bethesda, Md., this 21st day of August 1978.

For the Nuclear Regulatory Commission.

STEVEN A. VARGA,
Chief, Light Water Reactors Branch No. 4, Division of Project Management.

OFFICE OF MANAGEMENT AND BUDGET

CLEARANCE OF REPORTS

List of Requests

The following is a list of requests for clearance of reports intended for use in collecting information from the public received by the Office of Management and Budget on September 6, 1978 (44 U.S.C. 3509). The purpose of publishing this list in the FEDERAL REGISTER is to inform the public.

The list includes the title of each request received; the name of the agency sponsoring the proposed collection of information; the agency form number(s), if applicable; the frequency with which the information is proposed to be collected; an indication of who will be the respondents to the proposed collection; the estimated number of responses; the estimated burden in reporting hours; and the name of the reviewer or reviewing division or office.

Requests for extension which appear to raise no significant issues are to be approved after brief notice through this release.

Further information about the items on this daily list may be obtained from the Clearance Office, Office of Man-

agement and Budget, Washington, D.C. 20503, 202-395-4529, or from the reviewer listed.

NEW FORMS

DEPARTMENT OF ENERGY

Boiler Manufacturers Report, EIA-97, on occasion, boiler manufacturers, 238 responses, 119 hours, C. Louis Kincannon, 395-3211.

DEPARTMENT OF DEFENSE

Departmental and Other, Report of Profit, on occasion, business firms contracting with DOD, 495,000 responses, 3,960,000 hours, Office of Federal Statistical Policy and Standards, Caywood, D. P., 395-3443.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Health Care Financing Administration (Medicare), Instructions for Completion of Federal Assistance Reports—Medicaid Fraud, HCFA-71, quarterly, State medicaid fraud control units, 200 responses, 5,440 hours, Budget Review Division, Human Resources Division, 395-4775.

Social Security Administration, Social Security Bulletin Readership Survey, SSA-3949, single time, individuals and institutions who regularly receive the SS bulletin, 1,800 responses, 300 hours, Human Resources Division, 395-3532.

Alcohol, Drug Abuse and Mental Health Administration, The Prevalence of Hearing Impairment in the State and County Mental Hospital Resident Population, single time, State and county mental hospitals, 1,695 responses, 1,695 hours, Office of Federal Statistical Policy and Standard, 673-7956.

REVISIONS

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Alcohol, Drug Abuse and Mental Health Administration, Treatment Outcome Prospective Study (TOPS), other (see SF-83), clients in drug abuse treatment programs, Human Resources Division, Richard Eisinger, 395-3214.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Federal Disaster Assistance Administration, Monthly Billing and Reconciliation for Section 236, Tax and Utility Subsidy, HUD-9816, on occassion, managers of section 236 housing projects, 5,000 responses, 2,400 hours, Caywood, D. P., 395-3443.

EXTENSIONS

DEPARTMENT OF THE INTERIOR

Bureau of Mines, Industrial Explosives and Blasting Agents Sold by Manufacturers for Consumption in the United States, 6-1439-A, annually, producers of industrial explosives and blasting agent, 19 responses, 19 hours, Office of Federal Statistical Policy and Standard, 673-7956.

DAVID R. LEUTHOLD,
Budget and Management Officer.

[3190-01]

OFFICE OF THE SPECIAL REPRESENTATIVE FOR TRADE NEGOTIATIONS

TRADE POLICY STAFF COMMITTEE

Solicitation of Public Views

Pursuant to section 201 of the Trade Act of 1974, on September 5, 1978, the President received a report from the U.S. International Trade Commission (USITC) on the case of High-Carbon Ferrochromium (Investigation No. TA-201-35). The Commission submitted a report containing an affirmative determination that ferrochromium, containing over 3 percent by weight of carbon, provided for in item 607.31 of the Tariff Schedules of the United States (TSUS), is being imported into the United States in such increased quantities as to be a substantial cause of serious injury to the domestic industry producing an article like or directly competitive with the imported article.

The Commission finds and recommends that the imposition of rates of duty as follows, in addition to the existing column 1 rate of duty, is necessary to remedy the serious injury:

Ferrochromium, containing over 3 percent by weight of carbon, classifiable under item 607.31 of the TSUS:
1st year—30% ad valorem
2d year—30% ad valorem
3d year—25% ad valorem
4th year—20% ad valorem
5th year—20% ad valorem

Within 60 days of receiving a report from the Commission containing an affirmative determination, the President must determine what method and amount of import relief he will provide or determine that the provision of relief is not in the national economic interest, and whether he will direct expeditious consideration of adjustment assistance petitions.

In determining whether to provide import relief and what method and amount of import relief he will provide, the President must take into account, in addition to other considerations he may deem relevant, the following factors:

(1) The probable effectiveness of the import relief as a means to promote adjustment, the efforts being made or to be implemented by the industry concerned to adjust to import competition, and other considerations relevant to the position of the industry in the Nation's economy;

(2) The effect of import relief on consumers and on competition in the domestic markets for such articles;

(3) The effect of import relief on the international economic interest of the United States;

(4) The impact on U.S. industries and firms as a consequence of any possible modification of duties or other import restrictions which may result from international obligations with respect to compensation;

(5) The geographic concentration of imported products marketed in the United States;

(6) The extent to which the United States market is a focal point for exports of such article by reason of restraints on exports of such article to, or on imports of such article into, third country markets; and

(7) The economic and social costs which would be incurred by taxpayers, communities, and workers if import relief were or were not provided.

The Office of the Special Representative for Trade Negotiations chairs the interagency Trade Policy Committee structure that makes recommendations to the President as to what action, if any, he should take on reports submitted by the USITC under section 201(d). In order to assist the Trade Policy Staff Committee in developing recommendations to the President as to what action to take under sections 202 and 203 of the Trade Act of 1974, the Committee welcomes briefs from interested parties on the above listed subjects. (Additional information on this case is available in USITC report 201-35).

Briefs should be submitted in twenty (20) copies to: Chairman, Trade Policy Staff Committee, Room 729, Office of the Special Representative for Trade Negotiations, 1800 G Street NW., Washington, D.C. 20506.

To be considered by the Trade Policy Staff Committee, submissions should be received in the Office of the Special Representative for Trade Negotiations no later than the close of business Friday, September 29, 1978.

WILLIAM B. KELLY,
Chairman, Trade Policy Staff Committee.

[Designation of Disaster Loan Area No. 6003]

FLORIDA

Designation of Disaster Loan Area

Nassau County in the State of Florida constitutes a disaster area because of a decrease in shrimp harvested this year. The reduction in the harvest is the direct result of the coldness of the water which prevented the normal movement of shrimp and the egg laying which usually takes place in May and June of 1978. Eligible persons, firms, and organizations may file applications for loans for economic injury until the close of business on June 6, 1979, at:

Small Business Administration, District Office, 400 West Bay Street, Jacksonville, Fla. 32202.

or other locally announced locations.

(Catalog of Federal Domestic Assistance Program Nos. 59002 and 59008.)

Dated: September 6, 1978.

PATRICIA M. CLOHERTY,
Acting Administrator.

[Application No. 04/04-5151]

VENTURE OPPORTUNITIES CORPORATION

Application for a license to Operate as a Small Business Investment Company

An application for a license to operate as a small business investment company under the provisions of the

Small Business Investment Act of 1958, as amended (15 U.S.C. 661 et seq.), has been filed by Venture Opportunities Corp. (applicant) with the Small Business Administration pursuant to 13 CFR 107.102 (1978).

The officers and directors are as follows:
A. Fred March, President and Director, 759 NE. 166th Street, Apartment No. 3, North Miami Beach, Fla. 33162.
Flora March, Vice President and Director, 759 NE. 166th Street, Apartment No. 3, North Miami Beach, Fla. 33162.
Robert E. Dady, Secretary and director, 1438 Brickell Avenue, Miami, Fla. 33131.

The applicant will maintain its principal place of business at 1438 Brickell Avenue, Miami, Fla. 33131. It will begin operations with $500,000 of private capital derived from the sale of 1,000 shares of common stock to A. Fred March.

The applicant will conduct its operations in the Miami Dade County areas which are going through stress.

As a small business investment company under section 301(d) of the Act, the applicant has been organized and chartered solely for the purpose of performing the functions and conducting the activities contemplated under the Small Business Investment Act of 1958, as amended from time to time, and will provide assistance solely to small business concerns which will contribute to a well-balanced national economy by facilitating ownership in such concerns by persons whose participation in the free enterprise system is hampered because of social or economic disadvantaged.

Matters involved in SBA's consideration of the applicant include the general business reputation and character of the proposed owners and management and the probability of successful operation of the applicant under their management, including adequate profitability and financial soundness, in accordance with the Small Business Investment Act and the SBA rules and regulations.

Notice is hereby given that any person may, not later than 15 days from the date of publication of this notice, submit to SBA written comments on the proposed applicant. Any such communication should be addressed to the Duputy Associate Administrator for Investment, Small Business Administration, 1441 L Street NW., Washington, D.C. 20416.

A copy of this notice shall be published in a newspaper of general circulation in Miami, Fla.

(Catalog of Federal Domestic Assistance Program No. 59.011, Small Business Investment Companies.)

Dated: September 7, 1978.

PETER F. MCNEISH,
Deputy Associate Administrator for Investment.

VETERANS ADMINISTRATION

VETERANS ADMINISTRATION WAGE COMMITTEE

Meetings

Pursuant to the provisions of section 10 of Pub. L. 92-463, notice is hereby given that meetings of the Veterans Administration Wage Committee will be held on:

Thursday, October 5, 1978.
Thursday, October 19, 1978.
Thursday, November 2, 1978.
Thursday, November 16, 1978.
Thursday, November 30, 1978.
Thursday, December 14, 1978.
Thursday, December 28, 1978.

The meetings will convene at 2:30 p.m. and will be held in Room 1175A, Veterans Administration Central Office, 810 Vermont avenue NW., Washington, D.C.

The Committee's primary responsibility is to consider and make recommendations to the Chief Medical Director, department of Medicine and Surgery on all matters involved in the development and authorization of wage rate schedules for Federal Wage System (blue-collar) employees.

At these scheduled meetings, the Committee will consider wage survey specifications, wage survey data, local committee reports and recommendations, statistical analyses, and proposed wage schedules derived therefrom.

Under the provisions of section 10(d) of Pub. L. 92-463, the Federal Advisory Committee Act, as amended by Pub. L. 94-409, meetings may be closed to the public when they are concerned with matters listed under section 552b, Title 5, United States Code. Two of the matters so listed are those related solely to the internal personnel rules and practices of an agency (5 U.S.C. 552b(c)(2)), and those involving trade secrets and commercial or financial information obtained from a person and privileged or confidential (5 U.S.C. 552b(c)(4)).

Accordingly, I hereby determine that all portions of the meetings cited above will be closed to the public because the matters considered are related to the internal rules and practices of the Veterans Administration (5 U.S.C. 552b(c)(2)), and the detailed wage data considered by the Committee during its meetings have been obtained from officials of private establishments with a guarantee that the data will be held in confidence (5 U.S.C. 552b(c)(4)).

However, members of the public who wish to do so are invited to submit material in writing to the Chairman regarding matters believed to be deserving of the Committee's attention.

Additional information concerning these meetings may be obtained by contacting the Chairman, Veterans Administration Wage Committee, Room 1175, 810 Vermont Avenue NW., Washington, D.C. 20420.

Dated: September 5, 1978.

MAX CLELAND,
Administrator.

[7035-01]

INTERSTATE COMMERCE COMMISSION

[Decisions Volume No. 24]

DECISION-NOTICE

AUGUST 21, 1978.

The following applications are governed by special rule 247 of the Commission's rules of practice (49 CFR § 1100.247). These rules provide, among other things, that a protest to the granting of an application must be filed with the Commission on or before October 12, 1978. Failure to file a protest, within 30 days, will be considered as a waiver of opposition to the application. A protest under these rules should comply with rule 247(e)(3) of the rules of practice which requires that it set forth specifically the grounds upon which it is made, contain a detailed statement of protestant's interest in the proceeding (as specifically noted below), and shall

specify with particularity the facts, matters, and things relied upon, but shall not include issues or allegations phrased generally. A protestant should include a copy of the specific portions of its authority which protestant believes to be in conflict with that sought in the application, and describe in detail the method—whether by joinder, interline, or other means—by which protestant would use such authority to provide all or part of the service proposed. Protests not in reasonable compliance with the requirements of the rules may be rejected. The original and one copy of the protest shall be filed with the Commission, and a copy shall be served concurrently upon applicant's representative, or upon applicant if no representative is named. If the protest includes a request for oral hearing, such request shall meet the requirements of section 247(e)(4) of the special rules and shall include the certification required in that section.

Section 247(f) provides, in part, that an applicant which does not intend timely to prosecute its application shall promptly request that it be dismissed, and that failure to prosecute an application under the procedures of the Commission will result in its dismissal.

Further processing steps will be by Commission notice, decision, or letter which will be served on each party of record. Broadening amendments will not be accepted after the date of this publication.

Any authority granted may reflect administratively acceptable restrictive amendments to the service proposed below. Some of the applications may have been modified to conform to the Commission's policy of simplifying grants of operating authority.

We find: With the exceptions of those applications involving duly noted problems (e.g., unresolved common control, unresolved fitness questions, and jurisdictional problems) we find, preliminarily, that each common carrier applicant has demonstrated that its proposed service is required by the public convenience and necessity, and that each contract carrier applicant qualifies as a contract carrier and its proposed contract carrier service will be consistent with the public interest and the national transportation policy. Each applicant is fit, willing, and able properly to perform the service proposed and to conform to the requirements of the Interstate Commerce Act and the Commission's regulations. This decision is not a major Federal action significantly affecting the quality of the human environment.

It is ordered: In the absence of legally sufficient protests, filed within 30 days of publication of this decision-notice (or, if the application later becomes unopposed), appropriate authority will be issued to each applicant (except those with duly noted problems) upon compliance with certain requirements which will be set forth in a notification of effectiveness of this decision-notice. To the extent that the authority sought below may duplicate an applicant's existing authority, such duplication shall not be construed as conferring more than a single operating right.

By the Commission, Review Board No. 3, members Parker, Fortier, and Hill (Review Board member Fortier not participating).

H. G. HOMME, JR.,
Acting Secretary.

MC 200 (Sub-308F), filed June 28, 1978. Applicant: RISS INTERNATIONAL CORP. (a Delaware corporation), 903 Grand Avenue, Kansas City, MO 64106. Representative: Rodger J. Walsh, 903 Grand Avenue, Kansas City, MO 64106. To operate as a *common carrier*, by motor vehicle, transporting: *Electronic devices, radios, and televisions*, serving Bloomington, IN, as an off-route point in connection with carrier's presently authorized regular-route operations. (Hearing site: Kansas City, MO, or Indianapolis, IN.)

MC 263 (Sub-226F), filed July 3, 1978. Applicant: GARRETT FREIGHTLINES, INC., 2055 Garrett Way, Pocatello, ID 83201. Representative: Wayne S. Green (same address as applicant). To operate as a *common carrier*, by motor vehicle, over (A) regular routes, transporting: *General commodities* (except those of unusual value, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), between Albuquerque, NM, and New Orleans, LA, (1) from Albuquerque over Interstate Hwy 40 to junction U.S. Hwy 287, then over U.S. Hwy 287 to junction Interstate Hwy 20 at Fort Worth, then over Interstate Hwy 20 to junction U.S. Hwy 71, then over U.S. Hwy 71 to junction U.S. Hwy 190, then over U.S. Hwy 190 to junction Interstate Hwy 10, then over Interstate Hwy 10 to New Orleans, and return over the same route, (2) from Albuquerque to Fort Worth as described in (1) above, then over Interstate Hwy 20 to junction Interstate Hwy 45, then over Interstate Hwy 45 to junction Interstate Hwy 10, then over Interstate Hwy 10 to New Orleans, and return over the same route, and (3) from Albuquerque over Interstate Hwy 40 to junction U.S Hwy 84, then over U.S. Hwy 84 to junction Interstate Hwy 20, then over Interstate Hwy 20 to Fort Worth, then over the routes described in (1) and (2) above to New Orleans, and return over the same route, serving the intermediate and off-route points of Dallas, Fort Worth, Tyler, Longview, Houston, and Beaumont, TX, and Shreveport and Baton Rouge, LA, (B) irregular routes, transporting: *Frozen foods and potato products*, from those points in ID south of the southern boundary of Idaho County, ID, to points in TX and LA. (Hearing site: Pocatello, ID, or Spokane, WA.)

NOTE.—Certificate shall be limited, in point of time, to a period expiring 5 years from the date of issuance of the certificate.

MC 1263 (Sub-30F), filed July 17, 1978. Applicant: McCARTY TRUCK LINES, INC., 17th and Harris, Trenton, MO 64683. Representative: Frank W. Taylor, Jr., Suite 600, 1221 Baltimore Avenue, Kansas City, MO 64105. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *metal cans and can ends*, from Mount Vernon and Carthage, MO, to Kansas City, KS. (Hearing site: Kansas City, MO.)

MC 3062 (Sub-42F), filed June 19, 1978. Applicant: INMAN FREIGHT SYSTEM, INC., 321 North Spring Avenue, Cape Girardeau, MO 63701. Representative: Joel H. Steiner, 39 South LaSalle Street, Chicago, IL 60603. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Lead, lead alloys, and zinc*, and (2) *materials, equipment, and supplies* used in the manufacture, production, sale, or distribution of the commodities named in (1) above (except commodities in bulk, commodities in dump vehicles, and commodities which because of their size or weight require the use of special equipment), between Herculaneum, MO, on the one hand, and, on the other, points in AL, IL, and IN. (Hearing site: Chicago, IL, or St. Louis, MO.)

MC 5227 (Sub-40F), Filed July 5, 1978. Applicant: ECKLEY TRUCKING, INC.,P.O. Box 201, Mead, NE 68041. Representative: Gailyn L. Larsen, 521 South 14th Street, P.O. Box 81849, Lincoln, NE 68501. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Cement in containers, and lumber and lumber products*, from points in WA, OR, CA, ID, and MT, to points in AZ, AR, CO, ID, IL, IN, IA, KS, MN, MS, MT, NE, ND, NM, SD, UT, WI, and WY, restricted to the transportation of traffic originating at the indicated origins and destined to the indicated destinations. (Hearing site: Portland, OR, or Lincoln, NE.)

MC 11220 (Sub-155F), filed June 28, 1978. Applicant: GORDONS TRANSPORTS, INC., 185 West McLemore Avenue Memphis, TN 38101. Representative: James J. Emigh, P.O. Box 59, Memphis, TN 38101. To operate as a *common carrier*, by motor vehicle,

transporting: *General commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), serving the facilities of National Starch & Chemical Corp., at or near Meredosia, IL, as an off-route point in connection with carrier's presently authorized regular-route operations. (Hearing site: Washington, DC.)

MC 14702 (Sub-75F), filed June 19, 1978. Applicant: OHIO FAST FREIGHT, INC., 3893 Market Street NW., Warren OH 44484. Representative: Michael Spurlock, 275 East State Street, Columbus, OH 43215. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Iron and steel articles*, from the facilities of Georgetown Steel Co., at or near Georgetown, SC, to points in PA, NY, NJ, OH, IN, IL, MD, MI, VA, WV, and WI. The person or persons who may be engaged in common control with Bellevue Trucking Co. must either file an application under section 5(a) of the Interstate Commerce Act or submit an affidavit explaining why such approval is unnecessary. (Hearing site; Columbus, OH.)

MC 23618 (Sub-33F), filed July 28, 1978. Applicant: McALISTER TRUCKING CO., a corporation, d.b.a. MATCO, P.O. Box 2377, 2041 South Treadaway Boulevard, Abilene, TX 79604. Representative: E. Larry Wells, Suite 1125, Exchange Park, P.O. Box 45538, Dallas, TX 75245. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1)(a) *Trash and refuse collection bins, collection boxes for reusable commodities, stoves, fireplaces, chimney assemblies, spark arresters, and hearths*, and (b) *equipment and supplies* used in the installation of the commodities named in (a) above, in containers or on pallets, from Santa Cruz, CA, to points in the United States (except AK and HI); and (2) *materials, equipment, and supplies* used in the manufacture, distribution, and application of the commodities named in (1) above (except liquids in bulk), between points in the United States (except AK and HI), on the one hand, and, on the other, Santa Cruz, CA. Hearing site: San Francisco or Los Angeles, CA.)

MC 29934 (Sub-18F), filed June 25, 1978. Applicant: LO BIONDO BROS. MOTOR EXPRESS, INC., P.O. Box 160, Bridgeton, NJ 08302. Representative: Michael R. Werner, P.O. Box 1409, 167 Fairfield Road, Fairfield, NJ 07006. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Glass containers, not exceeding 1-gallon capacity*, from Knox, Marienville, Parker, Elk City, and Paint, PA, to Dayton, NJ. Hearing site: New York, NY.

MC 38320 (Sub-19F), filed June 23, 1978. Applicant: CENTRAL MOTOR EXPRESS, INC., P.O. Drawer C, Campbellsville, KY 42718. Representative: Louis J. Amato, P.O. Box E, Bowling Green, KY 42101. To operate as *common carrier*, by motor vehicle, over irregular routes, transporting: *Malt beverages*, in containers, and *malt beverage containers*, from the facilities of Pabst Brewery, at or near Perry, GA, to points in KY, OH, IN, and IL. (Hearing site: Atlanta, GA.)

NOTE.—Dual operations are involved in this proceeding.

MC 111594 (Sub-78F), filed June 21, 1978. Applicant: CW TRANSPORT, INC., 610 High Street, Wisconsin Rapids, WI 54494. Representative: Leonard R. Kofkin, 39 South LaSalle Street, Chicago, IL 60603. To operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, classes A and B exposives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), (1) between St. Louis, MO, and junction U.S. Hwys 25W and 25E, serving junction U.S. Hwys 25W and 25E for joinder only, from St. Louis, MO, over U.S. Hwy 40 to junction IL Hwy 15, then over IL Hwy 15 to junction Interstate Hwy 64, then over Interstate Hwy 64 to junction IN Hwy 65, then over IN Hwy 65 to junction IN Hwy 66, then over IN Hwy 66 to junction U.S. Hwy 231, then over U.S. Hwy 231 to junction of Interstate Hwy 65, then over Interstate Hwy 65 to junction U.S. Hwy 68, then over U.S. Hwy 68 to Glasgow, KY, then over KY Hwy 90 to junction U.S. Hwy 127, then over U.S. Hwy 127 to junction TN Hwy 52, then over TN Hwy 52 to junction U.S. Hwy 27, then over U.S. Hwy 27 to junction TN Hwy 62, then over TN Hwy 62 to Knoxville, TN, then over U.S. Hwy 25W to junction U.S. Hwy 25E, and return over the same route; (2) between Vincennes, and Evansville, IN, over U.S. Hwy 41, and return over the same route; (3) between Terre Haute, IN, and Louisville, KY, from Terre Haute, IN, over IN Hwy 46 to junction IN Hwy 159, then over IN Hwy 159 to junction IN Hwy 246, then over IN Hwy 246 to junction IN Hwy 157, then over IN Hwy 157 to junction IN Hwy 54, then over IN Hwy 54 to Bedford, IN, then over IN Hwy 37 to junction IN Hwy 60, then over IN Hwy 60 to junction IN Hwy 111, then over IN Hwy 111 to Louisville, KY, and return

V 4 3 / 1 7 7

over the same route; (4) between Chicago, IL, and junction of Interstate Hwy 75 and U.S. Hwy 421, serving junction Interstate Hwy 75 and U.S. Hwy 421 for joinder only, from Chicago, IL, over U.S. Hwy 41 to junction U.S. Hwy 30, then over U.S. Hwy 30 to junction Interstate Hwy 65, then over Interstate Hwy 65 to Columbus, IN, then over IN Hwy 7 to Madison, IN, then over U.S. Hwy 421 to the junction Interstate Hwy 75, and return over the same route; (5) between South Bend, IN, and Louisville, KY, from South Bend, IN, over U.S. Hwy 31 to Indianapolis, IN, then over Interstate Hwy 65 to Louisville, KY, and return over the same route; (6) between Indianapolis, IN, and Cincinnati, OH, serving Cincinnati, OH, for joinder only, over Interstate Hwy 74; (7) between Elkhart and Richmond, IN, from Elkhart, IN, over U.S. Hwy 33 to Goshen, IN, then over IN Hwy 15 to Gas City, In, then over U.S. Hwy 35 to Richmond, IN, and return over the same route; (8) between Fort Wayne, IN, and junction U.S. Hwy 52 and Interstate Highway 74, from Fort Wayne, IN, over U.S. Hwy 27 to junction of IN Hwy 101, then over IN Hwy 101 to junction of Interstate Hwy 74, and return over the same route; (9) between Louisville, KY, and junction U.S. Hwy 150 and Interstate Hwy 75 serving junction of U.S. Hwy 150 and Interstate Hwy 75, for joinder only, from Louisville, KY, over Interstate Hwy 65 to junction KY Hwy 245, then over KY Hwy 245 to junction U.S. Hwy 150, then over U.S. Hwy 150 to junction Interstate Hwy 75, and return over the same route; (10) between Cincinnati, OH, and Asheville, NC, serving Cincinnati, OH, for joinder only, from Cincinnati, OH, over Interstate Hwy 75 to junction KY Hwy 80, then over KY Hwy 80 to London, KY, then over KY Hwy 229 to junction U.S. Hwy 25E, then over U.S. Hwy 25E to junction TN Hwy 32, then over TN Hwy 32 to junction U.S. Hwy 25E, then over U.S. Hwy 25E to junction U.S. Hwy 25, then over U.S. Hwy 25 to Asheville, NC, and return over the same route.

(11) Between Cincinnati, OH, and junction Interstate Hwy 64 and Interstate Hwy 77 at or near Charleston, WV, serving both Cincinnati, OH, and junction Interstate Hwy 64 and Interstate Hwy 77, for joinder only, from Cincinnati, OH, over OH Hwy 125 to junction U.S. Hwy 68, then over U.S. Hwy 68 to junction U.S. Hwy 52, then over U.S. Hwy 52 to junction OH Hwy 527, then over U.S. Hwy 527 to junction WV Hwy 94, then over WV Hwy 94 to junction Interstate Hwy 64, then over Interstate Hwy 64 to junction Interstate Hwy 77 at or near Charleston, WV, and return over the same route; (12) between junction Interstate Hwy 64 and Interstate Hwy 77 at or near Charleston, WV, and junction U.S. Hwy 21 and Interstate Hwy 26 at or near Columbia, SC, serving junction Interstate Hwy 64 and Interstate Hwy 77, for joinder only, from junction Interstate Hwy 64 and Interstate Hwy 77 over Interstate Hwy 77 to junction of U.S. Hwy 52, then over U.S. Hwy 52 to junction Interstate Hwy 77, then over Interstate Hwy 77 to junction U.S. Hwy 21, then over U.S. Hwy 21 to junction Interstate Hwy 26, at or near Columbia, SC, and return over the same route; (13) between Asheville, NC, and junction Interstate Hwy 77 and U.S. Hwy 460 serving junction Interstate Hwy 77 and U.S. Hwy 460, for joinder only, from junction Interstate Hwy 77 and U.S. Hwy 460 over U.S. Hwy 460 to junction U.S. Hwy 19, then over U.S. Hwy 19 to junction U.S. Hwy 11E, then over U.S. Hwy 11E to Johnson City, TN, then over U.S. Hwy 23 to junction U.S. Hwy 25, then over U.S. Hwy 25 to Asheville, NC, and return over the same route; (14) between Asheville, NC, and Charleston, SC, from Asheville, NC, over U.S. Hwy 25 to Greenville, SC, then over U.S. Hwy 276 to junction Interstate Hwy 26, then over Interstate Hwy 26 to Charleston, SC, and return over the same route; (15) between Asheville, and Wilmington, NC, over U.S. Hwy 74; (16) between Greenville, SC, and Durham, NC, from Greenville, SC, over Interstate Hwy 385 to junction Interstate Hwy 85, then over Interstate Hwy 85 to Charlotte, NC, then over NC Hwy 49 to Asheboro, NC, then over U.S. Hwy 64 to Pittsboro, NC, then over U.S. Hwy 15 to Durham, NC, and return over the same route; (17) between Asheville, and Elizabeth City, NC, from Asheville, NC, over U.S. Hwy 70 to junction Interstate Hwy 40, then over Interstate Hwy 40 to Greensboro, NC, then over Interstate Hwy 85 to Durham, NC, then over NC Hwy 98 to junction U.S. Hwy 64, then over U.S. Hwy 64 to junction U.S. Hwy 17, then over U.S. Hwy 17 to Elizabeth City, NC, and return over the same route; (18) between Durham, NC, and North Augusta, SC, from Durham, NC, over NC Hwy 55 to junction U.S. Hwy 401, then over U.S. Hwy 401 to Fayetteville, NC, then over Interstate Hwy 95 to junction Interstate Hwy 20, then over Interstate Hwy 20 to junction U.S. Hwy 25, then over U.S. Hwy 25 to North Augusta, SC, and return over the same route; (19) between Charlotte, NC, and junction U.S. Hwy 52, and Interstate Hwy 77 near Wytheville, VA, serving junction U.S. Hwy 52 and Interstate Hwy 77, for joinder only, from Charlotte, NC, over Interstate Hwy 85 to junction U.S. Hwy 52, then over U.S. Hwy 52 to junction Interstate Hwy 77, near Wytheville, VA, and return over the same route; (20) between Charleston, SC, and Charlotte, NC, from Charleston, SC over U.S. Hwy 52 to junction U.S. Hwy 176, then over U.S. Hwy 176 to junction Interstate Hwy 95, then over Interstate Hwy 95 to junction U.S. Hwy 15, then over U.S. Hwy 15 to junction SC Hwy 261, then over SC Hwy 261 to junction U.S. Hwy 521, then over U.S. Hwy 521 to Charlotte, NC, and return over the same route; (21) between Charleston, SC, and Salisbury, NC, over U.S. Hwy 52; (22) between Durham, and New Bern, NC, over U.S. Hwy 70; and (23) between Lumberton, and Lexington, NC, from Lumberton, NC, over NC Hwy 211 to Candor, NC, then over U.S. Hwy 220 to Asheboro, NC, then over U.S. Hwy 64 to junction U.S. Hwy 29, then over U.S. Hwy 29 to Lexington, NC, and return over the same route. Serving in connection with the above routes, all points in IN, NC, and SC as intermediate and off-route points. Restriction: The above routes are restricted as follows: (a) Service at Chicago, IL is restricted against the transportation of traffic destined to points in NC west of a line beginning at the junction of U.S. Hwy 25 and the NC-SC State line, then north over U.S. Hwy 25 to Asheville, then north over U.S. Hwy 23 to the NC-TN State line, and those in SC west of line beginning at the junction of U.S. Hwy 29 and the SC-GA State line, then north and east over U.S. Hwy 29 to the NC-SC State line. (b) Service at St. Louis, MO, Louisville, KY, and all points in IN is restricted against the transportation of traffic destined to points in NC west of a line beginning at the junction of U.S. Hwy 321 and the NC—SC State line, then north over U.S. Hwy 321 to the junction of NC Hwy 16 at or near Conover, then north over NC Hwy 16 to the junction of NC Hwy 18 at or near Wilkesboro, then north over NC Hwy 18 to the NC-VA State line; and those in SC west of a line beginning at the junction of U.S. Hwy 29 and the SC-GA State line, then north and east over U.S. Hwy 29 to the NC-SC State line. (c) Service at Louisville, KY is restricted against the transportation of traffic originating at points in NC west of a line beginning at the junction of U.S. Hwy 321 and the NC-SC State line, then north over U.S. Hwy 321 to the junction of NC Hwy 16 at or near Conover, NC, then north over NC Hwy 16 to the junction of NC Hwy 18 at or near Wilkesboro, then north over NC Hwy 18 to the NC-VA State line, or originating at points in SC west of a line beginning at the junction of U.S. Hwy 29 and the SC-GA State line, then north and east over U.S. Hwy 29 to the NC-SC State line. (d) Routes 14 through 23 may not be tacked or joined with carrier's present authority to provide service between points in

S E 1 2 7 8

OH, on the one hand, and, on the other, points in NC and SC. (e) Service is not authorized for the transportation of traffic moving locally between points in IN, between points in OH, between points in IN and points in OH, between points in NC, between points in SC nor between points in NC and points in SC.

NOTE.—The purpose of this application is to convert a portion of applicant's existing irregular route authority to regular route authority.

MC 111812 (Sub-580F), filed June 30, 1978. Applicant: MIDWEST COAST TRANSPORT, INC., P.O. Box 1233, Sioux Falls, SD 57101. Representative: Ralph H. Jinks (same address as applicant). To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Confectionery, chocolate, cocoa, and finish or glaze coating* (except commodities in bulk, in tank vehicles), from the facilities of Ambrosia Chocolate Co., at or near Milwaukee, WI, to points in AZ, CA, ID, MT, NV, OR, UT, and WA, restricted to the transportation of traffic originating at the named origin. (Hearing site: Milwaukee, WI.)

MC 113362 (Sub-333F), filed June 26, 1978. Applicant: ELLSWORTH FREIGHT LINES, INC., 310 East Broadway, Eagle Grove, IA 50533. Representative: Milton D. Adams, 1105½ Eighth Avenue NE. P.O. Box 429, Austin, MN 55912. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Paper and paper products* (except commodities in bulk), from the facilities of International Paper Co., at or near (a) Mobile, AL, and (b) Moss Point, MS, to points in MN, IA, MO, KY, VA, WI, IL, IN, MI, OH, WV, PA, MD, DE, NJ, NY, CT, RI, MA, NH, VT, ME, and DC. (2) *Equipment, materials, and supplies* used in the manufacture, sale, and distribution of the commodities named in (1) above (except commodities in bulk) in the reverse direction, restricted in (1) and (2) to the transportation of traffic originating at the named origins and destined to the indicated destination. (Hearing site: Mobile, AL; Washington, DC or Chicago, IL.)

MC 113855 (Sub-442F), filed July 13, 1978. Applicant: INTERNATIONAL TRANSPORT, INC., a ND corp., 2450 Marion Road SE., Rochester, MN 55901. Representative: Michael E. Miller, 502 First National Bank Bldg., Fargo, ND 58102. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting (1)(a) *Agricultural implements and adapter kits*, (b) *canopies and cabs*, (c) *agricultural implements and contractors' equipment safety guards*, (d) *logging, forestry and construction equipment*, (e) *airconditioners*, (f) *attachments* for the commodities in (a) through (e) above, and (g) *parts* for the commodities in (a) through (f) above, from Portland, OR, to points in the United States (including AK but excluding HI), and (2) *materials and equipment* used in the manufacture and distribution of the commodities in (1) above, in the reverse direction. Condition: Prior receipt from applicant of an affidavit setting forth its appropriate complementary Canadian authority or explaining why no such Canadian authority is necessary. (Hearing site: Portland, OR.)

NOTE:—Traffic to the ports of entry on the international boundary line between the United States and Canada is destined to or originates at all points in Canada. The restriction and conditions contained in the grant of authority in this proceeding are phrased in accordance with the policy statement entitled notice to interested parties of new requirements concerning applications for operating authority to handle traffic to and from points in Canada published in the FEDERAL REGISTER on December 5, 1974, and supplemented on November 18, 1975. The Commission is presently considering whether the policy statement should be modified, and is in communication with appropriate officials in Canada regarding this issue. If the policy statement is changed, appropriate notice will appear in the FEDERAL REGISTER and the Commission will consider all restrictions or conditions which were imposed pursuant to the prior policy statement, regardless of when the condition or restriction was imposed, as being null and void and having no force or effect.

MC 114323 (Sub-23F), filed July 17, 1978. Applicant: PAUL MARCKESANO AND SONS CO., INC., 36 Ferris Street, Brooklyn, NY 11231. Representative: Morton E. Kiel, Suite 6193, 5 World Trade Center, New York, NY 10048. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Cement*, from Evansville, PA, to points in NJ and NY. (Hearing site; New York, NY.)

MC 114457 (Sub-408F), filed July 5, 1978. Applicant: DART TRANSIT CO., a corporation, 2102 University Avenue, St. Paul, MN 55114. Representative: James H. Wills (same address as applicant). To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Such commodities as are dealt in by manufacturers of sporting goods and recreational equipment*, from the facilities of Frabill Manufacturing Co., at or near Milwaukee, WI, to points in the United States (except AK and HI); and (2) *materials, equipment, and supplies used in the manufacture of sporting goods and recreational equipment*, (except commodities in bulk), from Seattle, WA, Chicago, IL, and Detroit, MI, to the facilities of Frabill Manufacturing Co., at or near Milwaukee, WI. (Hearing site: Seattle or Spokane, WA.)

SE 12 78

V 4 3 / 1 7 7

NOTE.—The restriction and conditions contained in the grant of authority in this proceeding are phrased in accordance with the policy statement entitled notice to interested parties of new requirements concerning applications for operating authority to handle traffic to and from points in Canada published in the FEDERAL REGISTER on December 5, 1974, and supplemented on November 18, 1975. The Commission is presently considering whether the policy statement should be modified, and is in communication with appropriate officials of the Provinces of AB, SK, and MB regarding this issue. If the policy statement is changed, appropriate notice will appear in the FEDERAL REGISTER and the Commission will consider all restrictions or conditions which were imposed pursuant to the prior policy statement, regardless of when the condition or restriction was imposed, as being null and void and having no force or effect.

MC 141532 (Sub-25F), filed June 26, 1978. Applicant: PACIFIC STATES TRANSPORT, INC., 35433 16th Avenue South, Federal Way, WA 98002. Representative: Henry C. To operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: (1) *Motor vehicle parts, motor vehicle components, motor vehicle equipment*, and (2) *materials, equipment, and supplies* used in the manufacture of the commodities named in (1) above, (except commodities in bulk), between the facilities used by Chrysler Corp., Service & Parts Division, in AZ, AR, CA, CO, ID, IN, KS, LA, MN, MS, MO, MT, NV, OK, OR, TN, TX, UT, WA, and WY, under a continuing contract with Chrysler Corp., of Center Line, MI. (Hearing site: Washington, DC.)

MC 143540 (Sub-5F), filed June 28, 1978. Applicant: MARINE TRANSPORT CO., a corporation, 2321 Burnette Boulevard, Wilmington, NC 28401. Representative: Robert L. McGeorge, 1054 31st Street NW., Washington, DC 20007. To operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Paper, paper articles, and wood pulp*, (1) between the facilities of Federal Paper Board Co., Inc., at or near Riegelwood, NC, and the facilities of Weyerhaeuser Co., at or near New Bern and Greenville, NC, on the one hand, and, on the other, (a) Charleston, SC, (b) Savannah, GA, (c) Norfolk and Newport News, VA, and (d) Wilmington and Morehead City, NC, and (2) between the facilities of Weyerhaeuser Co., at or near Greenville, NC, and the facilities of Weyerhaeuser Co., at or near New Bern, NC, under continuing contracts with (1) Federal Paper Board Co., of Montvale, NJ, and (2) Weyerhaeuser Co., of Tacoma, WA. (Hearing site: Washington, DC or Raleigh, NC.)

MC 143775 (Sub-8F), filed July 13, 1978. Applicant: PAUL YATES, INC., 6601 West Orangewood, Glendale, AZ 85301. Representative: Michael R. Burke (same address as applicant). To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Garage door operators* and (2) *machinery, electrical switches, and products* used in the manufacture and installation of garage door operators (except commodities in bulk), from Covington, OH, and Detroit, MI, to points in CA, CO, CT, and WA. (Hearing site: Dayton, OH or Washington, DC.)

NOTE.—Dual operations are involved in this proceeding.

MC 143775 (Sub-9F), filed July 17, 1978. Applicant: PAUL YATES, INC., 6601 West Orangewood, Glendale, AZ 85301. Representative: Charles E. Creager, 1329 Pennsylvania Avenue, P.O. Box 1417, Hagerstown, MD 21740. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Drugs, toilet preparations, health care products, alumina calcined* and *magnesium hydroxide* (except commodities in bulk), in vehicles equipped with mechanical refrigeration, (1) from Philadelphia, PA, Lakewood, NJ, and Lewes, DE, to points in the United States, (except ME, NH, VT, NY, PA, VA, NJ, MD, MA, RI, CT, DE, WV, AK, HI, and DC), (2) from Friendship, NC, to points in the United States, (except AK, HI, VA, NC, and SC), (3) from Reno, NV, to points in PA, and (4) from San Leandro, CA, to points in IN, GA, and PA, restricted in (4) above to the transportation of traffic originating at the named origin and destined to the indicated destinations. (Hearing site: Phoenix, AZ.)

NOTE.—Dual operations are involved in this proceeding.

MC 143775 (Sub-12F), filed July 17, 1978. Applicant: PAUL YATES, INC., 6601 West Orangewood, Glendale, AZ 85301. Representative: Edward N. Button, 1329 Pennsylvania Avenue, P.O. Box 1417, Hagerstown, MD 21740. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meats, meat products and meat byproducts, and articles distributed by meat-packing houses*, as described in section A and C of appendix I to the report in Description in Motor Carrier Certificates 61 MCC 209 and 766 (except hides and commodities in bulk), from the facilities of or used by (1) Armour and Company, at or near Sioux City, IA, and (2) Madison Foods Co. and Armour and Company, at or near Madison, NE, to points in VA, WV, MD, DE, PA, NJ, CT, MA, NY, VT, NH, ME, RI, and DC, restricted to the transportation of traffic originating at the named origins and destined to the indicated destinations. (Hearing site: Phoenix, AZ.)

NOTE.—Dual operations are involved in this proceeding.

MC 143952 (Sub-1F), filed June 19, 1978. Applicant: LEO CRADER, d.b.a., BLUE LIGHT MESSENGER SERVICE, 405 Second Avenue, Stratford, CT 06497. Representative: Thomas W. Murrett, 342 North Main Street, West Hartford, CT 06117. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), between Bridgeport, Shelton, Ansonia, Derby, Milford, and Stratford, CT, on the one hand, and, on the other, Newark International Airport, Newark, NJ, and points in New York, NY, restricted against the transportation of packages or articles weighing in the aggregate more than (500) pounds from one consignor to one consignee on any one day. (Hearing site: New Haven or Hartford, CT.)

MC 144683 (Sub-1F), filed June 5, 1978. Applicant: DAVE JONES WRECKER SERVICE, INC., 501 Highway 17-92, Fern Park, FL 32730. Representative: John A. Sutton, P.O. Box 367, Orlando, FL 32802. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Wrecked, disabled, and repossessed motor vehicles, trailers, motor homes, and replacement vehicles*, and (2) *parts* for the commodities named in (1) above, between points in FL, GA, NC, SC, TN, KY, AL, LA, IN, OH, MI, IL, and MS. (Hearing site: Orlando or Jacksonville, FL.)

MC 144704 (Sub-1F), filed June 23, 1978. Applicant: CHERNICKY TRUCKING, INC., P.O. Box 215, Route 66, Shippenville, PA 16254. Representative: John A. Pillar, 205 Ross Street, Pittsburgh, PA 15219. To operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Coal*, in dump vehicles, from points in Clarion County, PA, to points in NY, under continuing contract with Chernicky Coal Co., Inc., and Kann Coal Co., Inc., of Shippenville, PA. (Hearing site: Pittsburgh, PA or Washington, DC.)

MC 144863 (Sub-1F), filed July 5, 1978. Applicant: LONNIE WHITE d.b.a. LUBBOCK WRECKER SERVICE, 2327 Erskine Road, Lubbock, TX 79407. Representative: Richard Hubbert, P.O. Box 10236, Lubbock, TX 79408. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Wrecked or disabled cars, wrecked or disabled trucks, wrecked or disabled tractors*, and *wrecked or disabled trailers* (except mobile homes), and *replacement vehicles*, in wrecker service, between points in Lubbock County, TX, and NM. (Hearing site: Lubbock or Dallas, TX.)

MC 144969F, filed July 7, 1978. Applicant: WHEATON CARTAGE CO., a corporation, Millville, NJ 08332. Representative: E. Stephen Heisley, 805 McLachlen Bank Building, 666 Eleventh Street NW, Washington, DC 20001. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Synthetic plastics, synthetic latex, battery insulating partitions, and cleaning compounds* (except commodities in bulk, in tank vehicles), from Acton, MA, to points in CT, DE, MD, NJ, NY, PA, and RI; (2) *cleaning compounds* (except in bulk, in tank vehicles), from Cambridge, MA, to points in CT, DE, MD, NJ, NY, PA, and RI; (3)(a) *synthetic plastics, adhesives, sealants, cements, chemicals, chemical compounds, gas absorbing compounds, rubber, rubber compounds, soldering flux, coatings, lubricants, and* (b) *materials, equipment, and supplies used in the manufacture and distribution* of the commodities in (3)(a) above, (except commodities in bulk, in tank vehicles), from those points in the United States in and east of WI, IL, KY, TN, and MS, to Woodbury, NJ; and (4) *cleaning compounds, chemicals, chemical compounds, and fertilizer compounds*, from Nashua, NH, to points in CT, DE, MD, NJ, NY, PA, and RI, restricted in (1), (2), (3), and (4) above against the transportation of commodities requiring the use of special equipment, and restricted to the transportation of traffic originating at or destined to the facilities of W. R. Grace & Co. (Hearing site: Washington, DC.)

NOTE.—Dual operations are involved in this proceeding.

MC 144982F, filed June 30, 1978. Applicant: OHIO PACIFIC EXPRESS, INC., 2385 South High Street, Columbus, OH 43207. Representative: Thomas F. Kilroy, Suite 406, 6901 Old Keene Mill Road, Springfield, VA 22150. Authority granted to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Paperboard boxes*, knocked down, from the facilities of J. G. Clark Co., in Morrow County, OH, to points in AZ, CA, CO, NM, NV, OK, TX, and UT. (Hearing site: Columbus, OH.)

NOTE.—Dual operations are involved in this proceeding.

MC 145085F, filed July 17, 1978. Applicant: SID'S, INC., P.O. Box D, Jonesport, ME 04649. Representative: James E. Mahoney, 84 State Street, Boston, MA 02109. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foodstuffs and materials, supplies, and equipment* used in the manufacture and distribution of foodstuffs, (except commodities in bulk, in tank vehicles), (1) between points in ME, on the one hand, and, on the other, points in the United States (except AK and HI). Condition: Prior receipt from applicant of an affidavit setting forth its appropriate complementary Canadian authority or explaining why no such Canadian authority is necessary. (Hearing site: Bangor or Portland, ME.)

NOTE.—Applicant states that some traffic is destined to Nova Scotia, Canada. The restriction and conditions contained in the grant of authority in this proceeding are phrased in accordance with the policy statement entitled notice to interested parties of new requirements concerning applications for operating authority to handle traffic to and from points in Canada published in the FEDERAL REGISTER on December 5, 1974, and

SE 12 78

supplemented on November 18, 1975. The Commission is presently considering whether the policy statement should be modified, and is in communication with appropriate officials of the Provinces of Alberta, Saskatchewan, and Manitoba regarding this issue. It the policy statement is changed, appropriate notice will appear in the FEDERAL REGISTER and the Commission will consider all restrictions or conditions which were imposed pursuant to the prior policy statement, regardless of when the condition or restriction was imposed, as being null and void and having no force or effect.

MC 145118F, filed July 25, 1978. Applicant: DENNIS W. BOKNECHT, R. R. 5, Seymour, IN 47274. Representative: Edwin J. Simcox, Suite 800, 5 East Market Street, Indianapolis, IN 46204. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Bean meal*, from the facilities of Ralston Purina, at or near Louisville, KY, and the facilities of Lauhoff Grain, at or near Danville, IL, to the facilities of Rose Acre Farms Inc., in Jackson and Jennings Counties, IN. (Hearing site: Cincinnati, OH, or Indianapolis, IN.)

MC 145128F, filed August 4, 1978. Applicant: MARKET SUPPORT SERVICES, INC., 4653 Hollins Ferry Road, Baltimore, MD 21227. Representative: Ronald N. Cobert, Suite 501, 1730 M Street, NW., Washington, DC 20036. To operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), between the facilities of John-Jeffrey (Baltimore) Corp., at or near Baltimore, MD, and the facilities of John-Jeffrey Corp., at or near Gloucester City and Bellmawr, NJ, on the one hand, and, on the other, points in DE, MD, NJ, MY, PA, VA, and DC, under continuing contracts with John-Jeffrey (Baltimore) Corp. and John-Jeffrey Corp., of Gloucester City, NJ. (Hearing site: Washington, DC.)

PASSENGER AUTHORITY

MC 139673 (Sub-4F), filed July 17, 1978. Applicant: JAMES H. STEGER d.b.a. STEGER BUS LINES, 4150 Aldebaran Way, Mobile, AL 36609. Representative: Robert E. Tate, P.O. Box 517, Evergreen, AL 36401. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Passengers and their baggage*, in special and charter operations, beginning and ending at Mobile, AL., and extending to points in the United States in and east of ND, SD, NE, KS, OK, and TX. (Hearing site: Mobile or Birmingham, AL.)

[Exception No. 1 Under Section (a), Paragraph (1), Part (v), Revised Service Order No. 1332]

DENVER & RIO GRANDE WESTERN RAILROAD CO.

AUGUST 31, 1978.

By the Board: There is a shipment of rail for Southern Pacific Transportation Co. to be loaded at Pueblo, Colo. Delay in production of the rail means the rail will not begin loading until the week of September 4, 1978. The specifications for the cars required to transport this traffic make it essential that the Denver & Rio Grande Western Railroad Co. commence immediate assembly of these cars.

Order. Pursuant to the authority vested in the Railroad Service Board by section (a)(1)(v) of the Revised Service Order No. 1332, the Denver & Rio Grande Western Railroad Co. is authorized to assemble and hold Southern Pacific Transportation Co. and St. Louis Southwestern Railway Co. drop end gondolas and flatcars for loading rail at Pueblo, Colo., destined to Southern Pacific Transportaion Co., regardless of the provisions of section (a)(2)(ii).

These cars shall become fully subject to all provisions of Revised Service Order No. 1332 when loading is completed and instructions for forwarding are received from the shipper.

Effective August 31, 1978.

Expires September 30, 1978.

JOEL E. BURNS,
Chairman,
Railroad Service Board.[1]

[Ex Parte No. 349F]

INCREASED FREIGHT RATES AND CHARGES, 1978, NATIONWIDE

SEPTEMBER 5, 1978.

As part of the decision served June 7, 1978, in the above-entitled proceeding, the Commission ordered the investigation into the lawfulness of the rates, charges, and regulations, as set forth in the Tariff of Increased Rates and Charges X-349, as supplemented, of the following commodities:

	SPC No.
1. Newsprint paper	57
2. Sodium alkalies	69
3. Industrial gases	71
4. Sulphuric acid	73
5. Rubber, natural or synthetic	78
6. Manufactured iron or steel	100
7. Recyclables	NA
8. Soda ash	70
9. Plastic materials	77
10. Iron and steel pipe—western territory only	101

By further decision served July 27, 1978 (published in the FEDERAL REGISTER at 43 FR 33871, August 1, 1978), as amended by decision served August 7, 1978, the substance of the investigation, and the procedural time schedule was established. Opening statements of facts and arguments may be submitted by railroad respondents no later than September 8, 1978. Statements by shippers and other parties may be submitted no later than October 9, 1978, with railroad replies due no later than October 30, 1978.

Respondents, and other parties interested in presenting their views and evidence, or in otherwise participating in this proceeding, shall be required by this notice to notify the Commission by filing with the Office of Proceedings, Room 5342, Interstate Commerce Commission, Washington, D.C. 20423, on or before September 15, 1978, the original and one copy of a declaration of intent to participate. The Commission shall then prepare and make available to all such persons a list containing the names and addresses of all parties to this proceeding, upon whom copies of all statements must be filed. Notice will be given to the general public by delivering a copy of this notice to the Director, Office of the Federal Register, for publication.

H. G. HOMME, Jr.,
Acting Secretary.

LEASE AND INTERCHANGE OF VEHICLES BY MOTOR CARRIERS

Decided: August 23, 1978.

Charles Zumstein d.b.a. C. E. Zumstein Co. (MC-134183 and two subs), has filed an application for approval of contract carrier rental contract No. 2-3050 with Lewisburg Container Co. of Lewisburg, Ohio, lessee, under paragraph (b) of section 1057.6 of the Lease and Interchange of Vehicles Regulations (49 C.F.R. 1057).

Findings: 1. The contract does not contain any guaranteed minimum annual rental agreement.

It is ordered: 1. Applicant's request for approval of the contract carrier rental contract No. 2-3050 is denied.

By the Commission, Motor Carrier Leasing Board, Board Members Joel E. Burns, Robert S. Turkington, and W. F. Sibbald, Jr. Board Member Turkington not participating.

REROUTING TRAFFIC

[I.C.C. Order No. 71 Under Revised Service Order No. 1252]

To Chesapeake Western Railway: In the opinion of Joel E. Burns, Agent, Chesapeake Western Railway is unable to transport traffic over its line between Elkton, Va., and Harrisonburg, Va., because of bridge damage.

It is ordered:

(a) *Rerouting traffic.* Chesapeake Western Railway, being unable to transport traffic over its line between Elkton, Va., and Harrisonburg, Va., because of bridge damage, is authorized to divert or reroute such traffic over any available route to expedite the movement.

(b) *Concurrence of receiving road to be obtained.* Chesapeake Western Railway, in rerouting cars in accordance with this order, shall receive the concurrence of other railroads to which such traffic is to be diverted or rerouted, before the rerouting or diversion is ordered.

(c) *Notification to shippers.* Chesapeake Western Railway, when rerouting cars in accordance with this order, shall notify each shipper at the time each shipment is rerouted or diverted and shall furnish to such shipper the new routing provided under this order.

(d) Inasmuch as the diversion or rerouting of traffic is deemed to be due to carrier disability, the rates applicable to traffic diverted or rerouted by said Agent shall be the rates which were applicable at the time of shipment on the shipments as originally routed.

(e) In executing the directions of the Commission and of such Agent provided for in this order, the common carriers involved shall proceed even though no contracts, agreements, or arrangements now exist between them with reference to the divisions of the rates of transportation applicable to said traffic; divisions shall be, during the time this order remains in force, those voluntarily agreed upon by and between said carriers; or upon failure of the carriers to so agree, said divisions shall be those hereafter fixed by the Commission in accordance with pertinent authority conferred upon it by the Interstate Commerce Act.

(f) *Effective date.* This order shall become effective at 4 p.m., August 29, 1978.

(g) *Expiration date.* This order shall expire at 11:59 p.m., September 6, 1978, unless otherwise modified, changed, or suspended.

This order shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association. A copy of this order shall be filed with the Director, Office of the Federal Register.

Issued at Washington, D.C., August 29, 1978.

[7035-01]

[I.C.C. Order No. 72 Under Revised Service Order No. 1252]

REROUTING TRAFFIC

To all railroads: In the opinion of Joel E. Burns, Agent, the Carolina, Clinchfield & Ohio Railway Co. is unable to transport promptly all traffic offered for movement over its lines between Elkhorn City, Ky., and Kingsport, Tenn., because of a derailment and bridge damage.

It is ordered:

(a) *Rerouting traffic.* The Carolina, Clinchfield & Ohio Railway Co. being unable to transport promptly all traffic offered for movement over its lines between Elkhorn City, Ky., and Kingsport, Tenn., because of a derailment and bridge damage, that line is authorized to divert or reroute such traffic via any available route to expedite the movement. Traffic necessarily diverted by authority of this order shall be rerouted so as to preserve as nearly as possible the participation and revenues of other carriers provided in the original routing.

(b) *Concurrence of receiving roads to be obtained.* The railroad rerouting cars in accordance with this order shall receive the concurrence of other railroads to which such traffic is to be diverted or rerouted, before the rerouting or diversion is ordered.

(c) *Notification to shippers.* Each carrier rerouting cars in accordance with this order, shall notify each shipper at the time each shipment is rerouted or diverted and shall furnish to such shipper the new routing provided under this order.

(d) Inasmuch as the diversion or rerouting of traffic is deemed to be due to carrier disability, the rates applicable to traffic diverted or rerouted by said Agent shall be the rates which were applicable at the time of shipment on the shipments as originally routed.

(e) In executing the directions of the Commission and of such Agent provided for in this order, the common carriers involved shall proceed even though no contracts, agreements, or arrangements now exist between them with reference to the divisions of the rates of transportation applicable to said traffic. Divisions shall be during the time this order remains in force,

V 43 / 177

those voluntarily agreed upon by and between said carriers; or upon failure of the carriers to so agree, said divisions shall be those hereafter fixed by the Commission in accordance with pertinent authority conferred upon it by the Interstate Commerce Act.

(f) *Effective date.* This order shall become effective at 2 p.m., August 31, 1978.

(g) *Expiration date.* This order shall expire at 11:59 p.m., September 6, 1978, unless otherwise modified, changed or suspended.

This order shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads of subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association. A copy of this order shall be filed with the Director, Office of the Federal Register.

Issued at Washington, D.C., August 31, 1978.

1

CIVIL AERONAUTICS BOARD.

TIME AND DATE: September 7, 1978 (This item will be discussed in closed session immediately following conclusion of the open session which begins at 10 a.m.)

PLACE: Room 1011, 1825 Connecticut Avenue NW., Washington, D.C.

SUBJECT: Recommended position for negotiations with Korea.

STATUS: Closed.

PERSON TO CONTACT: Phyllis T. Kaylor, the Secretary, 202-673-5068.

SUPPLEMENTARY INFORMATION: Negotiations with Korea are scheduled to begin in Washington, September 18, 1978. There is an interagency meeting to prepare for the U.S. position for these negotiations on Friday, September 8, 1978. Accordingly, the following Board members have voted that agency business requires that the Board meet on this item on less than 7 days' notice and that no earlier announcement of the meeting was possible;

Chairman, Alfred E. Kahn
Member, Richard J. O'Melia
Member, Elizabeth E. Bailey

This memo contains possible strategy and positions to be taken by the United States in its negotiations with Korea. Public disclosures, particularly to foreign governments, of opinions, evaluations, and strategies relating to the issues could seriously compromise the ability of the U.S. Delegation to achieve an agreement which would be in the best interests of the United States. Accordingly, the following Members have voted that the meeting on this subject would involve matters the premature disclosure of which would be likely to significantly frustrate implementation of proposed agency action within the meaning of the exemption provided under 5 U.S.C. 552b(c)(9)(B) and 14 CFR 410b.5(9)(B) and that the meeting on this item should be closed:

Chairman, Alfred E. Kahn
Member, Richard J. O'Melia
Member, Elizabeth E. Bailey

PERSONS EXPECTED TO ATTEND

Board Members.—Chairman, Alfred E. Kahn; Member, Richard J. O'Melia; and Member, Elizabeth E. Bailey.

Assistants to Board Members.—Mr. Mike Roach, Mr. Elias Rodriguez, and Mr. David M. Kirstein.

Office of the Managing Director.—Mr. Dennis Rapp and Mr. John Hancock.

Bureau of Pricing and Domestic Aviation.—Mr. Michael E. Levine, Ms. Barbara Clark, Mr. James L. Deegan, Mr. Herbert Aswall, Mr. Doug Leister, and Mr. John Kiser.

Bureau of International Aviation.—Mr. Donald A. Farmer, Jr., Mr. James Horneman, Mr. Ed Wilbur, Mr. Willard Demory, and Mr. Parlen McKenna.

Office of Economic Analysis.—Mr. Robert Frank and Mr. Richard Klem.

Bureau of Consumer Protection.—Ms. Pat Kennedy.

Office of the General Counsel.—Mr. Philip J. Bakes, Jr. and Mr. Gary J. Edles.

Office of the Secretary.—Mrs. Phyllis T. Kaylor and Ms. Deborah A. Lee.

Reporter.—North American Reporting.

GENERAL COUNSEL CERTIFICATION

I certify that this meeting may be closed to the public under 5 U.S.C. 552b(c)(9)(B) and 14 CFR 310b.5(9)(B).

PHILIP BAKES,
General Counsel.

CIVIL AERONAUTICS BOARD.

Notice of deletion of item from the September 7, 1978, agenda.

TIME AND DATE: 10 a.m., September 7, 1978.

PLACE: Room 1027, 1825 Connecticut Avenue NW., Washington, D.C. 20428.

SUBJECT: 9. Docket 31496, Piedmont's motion for hearing on Miami Entry Authority (Memo 8160, BPDA).

STATUS: Open.

PERSON TO CONTACT:

Phyllis T. Kaylor, the Secretary, 202-673-5068.

SUPPLEMENTARY INFORMATION: The Bureau of Pricing and Domestic Aviation requests that Item 9 be deleted from the meeting calendar of September 7, 1978. The deletion is made necessary by the staff's desire to take account of additional, related pleadings. Accordingly, the following Members have voted that agency business requires the deletion of Item 9 and that no earlier announcement of this deletion was possible:

Chairman, Alfred E. Kahn
Member, Richard J. O'Melia
Member, Elizabeth E. Bailey

All amendments to previously announced agendas are publicly posted at the Board's offices, sent to the Federal Register for publication, and mailed to parties to docketed cases affected by the change. We regret any inconvenience that may be caused by these changes or the delayed receipt of our notices.

[S-1825-78 Filed 9-8-78; 8:45 am].

3

CIVIL AERONAUTICS BOARD.

TIME AND DATE: 10 a.m., September 11, 1978.

PLACE: Room 1027, 1825 Connecticut Avenue NW., Washington, D.C. 20428.

SUBJECT: Touche Ross and Co. to make a presentation regarding the Joint Travel Agent/Airline Economic and Value Study.

STATUS: Open.

PERSON TO CONTACT:

Phyllis T. Kaylor, the Secretary, 202-673-5068.

SUPPLEMENTARY INFORMATION: Due to a clerical error, this notice was not available 7 days in advance. So that the Board can meet to hear this presentation at the scheduled time, the following Members have voted that agency business requires that the Board meet on less than 7 days' notice

and that no earlier announcement of this meeting was possible.

Chairman, Alfred E. Kahn
Member, Richard J. O'Melia
Member, Elizabeth E. Bailey

All amendments to previously announced agendas are publicly posted at the Board's offices, sent to the Federal Register for publication, and mailed to parties to docketed cases affected by the change. We regret any inconvenience that may be caused by these changes or the delayed receipt of our notices.

5

CIVIL AERONAUTICS BOARD.

TIME AND DATE: 10 a.m., September 13, 1978.

PLACE: Room 1027, 1825 Connecticut Avenue NW., Washington, D.C. 20428.

SUBJECT:

1. Ratification of items adopted by notation.
2. Docket 33279, Application of Reeve Aleutian Airways, Inc., for an exemption to carry military passengers on scheduled flights pursuant to a contract with the Military Airlift Command (Memo 5333-E, BPDA).
3. Docket 32867, Petition of Reeve Aleutian Airways, Inc., to establish increased final service mail rates (Memo 8169, BPDA).
4. Docket 30332, IATA agreements proposing varying increases in North Atlantic cargo rates through September 30, 1979, to compensate for cost increases. Pan American and TWA support the agreements in their entirety while Seaboard supports the increases with some exceptions. Both the Air Freight Forwarders Association and the Ad Hoc Committee for the Development of Air Freight oppose some of the structural aspects of the agreements (BPDA, BIA).
5. Docket 26291, Petition for immediate restoration of adequate air service for American Samoa, (Memo 7651-C, BPDA, OCCR, BIA, OGC).
6. Dockets 29449, and 30132, Applications of Northwest for realignment and restriction removal (Memo 8171, BPDA).
7. Docket 31447, Piedmont's application to amend its certificate for Route 87 to extend its system from the terminal points Greensboro/High Point and Raleigh/Durham to the new terminal point Dallas/Ft. Worth. Piedmont moved for an expedited hearing and also suggested that we follow show cause procedures in this case (Memo 8159, 8159-A, BPDA, OGC).
8. Dockets 32770, 32719, 32721, 32753, 32813, 32836, 32837, and 33003; Eastern's application for temporary suspension of service at Memphis, Tenn.; Southern's application for removal of certificate restriction prohibiting nonstop service between Atlanta and Memphis and petition for order to show cause; Southern's application for exemption to permit nonstop service between Atlanta and Memphis with two round trips; Braniff's application for amendment of its certificate to permit service between Atlanta and Memphis on a permissive basis; Frontier's application for amendment of its certificate to permit service between Atlanta and Memphis on a permissive basis; Piedmont's application for removal of certificate restriction prohibiting nonstop service between Atlanta and Memphis and petition for order to show cause; Piedmont's application for exemption to permit nonstop service between Atlanta and Memphis with two round trips; Texas International's application for amendment of its certificate to permit service between Atlanta and Memphis (BPDA, ALJ, OGC).
9. Docket 32260, TWA's motion for expedited hearing on St. Louis/Kansas City-Los Angeles-Honolulu authority; Docket 32384, Northwest's application for removal of Los Angeles/San Francisco/Honolulu long-haul restriction; Docket 32291, American's application for Los Angeles/San Francisco-Honolulu athority with St. Louis long-haul requirement (Memo 8161, BPDA, ALJ, OGC).
10. Amendment of the Off-Route Charter Rules (OGC, BPDA, BIA).
11. Docket 27631, *Foremost International Tours* v. *Qantas Airways*, Enforcement Proceeding. Petitions for review of an initial decision holding that Qantas' inclusive tour operation was not unlawful (Memo 8131, OGC).

STATUS: Open.

UNITED STATES INTERNATIONAL TRADE COMMISSION.

TIME AND DATE: 10 a.m., Thursday, September 19, 1978.

PLACE: Room 117, 701 E Street NW., Washington, D.C. 20436.

STATUS: Parts of this meeting will be open to the public. The rest of the meeting will be closed to the public.

MATTERS TO BE CONSIDERED:

Portions open to the public.

1. Agenda.
2. Minutes.
3. Ratifications.
4. Petitions and complaints (if necessary).
5. Fish from Canada (Inv. 303-TA-3)—Briefing and vote.
6. Portland hydraulic cement from Canada (Inv. AA1921-184)—Briefing and vote.
7. Quarterly report on East-West Trade (if not already approved by action jacket).
8. Any items left over from previous agenda.

Portions closed to the public:

9. Status report on the MTN study.

CONTACT PERSON FOR MORE INFORMATION:

13

NATIONAL TRANSPORTATION SAFETY BOARD.

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: 43 FR 39924, September 7, 1978.

PREVIOUSLY ANNOUNCED TIME AND DATE OF MEETING: Thursday, September 14, 1978, 9 a.m. [NM-78-33].

CHANGE IN MEETING: A majority of the Board has determined by recorded vote that the business of the Board requires revising the agenda of this meeting and that no earlier announcement was possible. The agenda as now revised is set forth below.

STATUS: The first eight items on the agenda will be open to the public; the last item will be closed under Exemption 10 of the Government in the Sunshine Act.

MATTERS TO BE CONSIDERED:

1. *Aircraft Accident Report*—Southern Co. Services, Inc., beech-Hawker 125-600A, N40PL, McLean, Va., April 28, 1977.
2. *Highway Accident Report*—Cates Trucking, Inc., tractor-semi-trailer/multiple vehicle collision and override, I-285, Atlanta, Ga., June 20, 1977.
3. *Marine Accident Report*—MV *Chester A. Poling* sinking near Cape Ann, Mass., January 10, 1977.
4. *Letter* to Lake Carriers' Association re reconsideration of probable cause, SS *Edmund Fitzgerald*, November 10, 1975.
5. *Letter* to Federal Railroad Administration re their response to safety recommendation R-73-5.
6. *Closeout* of safety recommendations A-78-4, R-74-33, R-77-18, R-75-32, and R-75-37.
7. *Closeout* of safety recommendations H-77-9, H-77-43, and R-76-8.
8. *Discussion*—Determination of probable cause.
9. *Opinion and Order*—Petition of Jolls, Dkt. SM-1953; disposition of petitioner's appeal.

GUIDELINES FOR REVIEW OF PLANNED PERFORMANCE IN COMPREHENSIVE MANPOWER PROGRAMS

V 43 / 177 SEP 12 78

[FR 4510-30]

DEPARTMENT OF LABOR

Employment and Training Administration

[Field Memorandum 390-78]

GUIDELINES FOR REVIEW OF PLANNED PERFORMANCE IN COMPREHENSIVE MANPOWER PROGRAMS

AGENCY: Employment and Training Administration, Labor.

ACTION: Notice.

SUMMARY: In order to provide a common framework of national and regional experience against which to compare performance goals and to identify potential problems with program design and delivery, the Department of Labor has developed guidelines to review prime sponsors planned performance for fiscal year 1979 under Title I of the Comprehensive Employment and Training Act (CETA) of 1973, as amended.

The entire text of Field Memorandum No. 390-78, which was issued on July 26, 1978, is published here to inform all interested parties of the Department's review procedures.

For further information contact:

Robert Colombo, Employment and Training Administration, U.S. Department of Labor, Patrick Henry Building, Room 5006, 601 D Street NW., Washington, D.C. 20213, telephone, 202-376-6560.

FIELD MEMORANDUM NO. 390-78—ALL REGIONAL ADMINISTRATORS

Lawrence W. Rogers, Administrator, Field Operations.

CETA Title I Reviw Guidelines for Fiscal Year 1979

1. *Purpose.* To transmit guidelines for the review of CETA title I annual plans for fiscal year 1979.

2. *References.* FM 209-77; FM 347-77.

3. *Background.* Grant review guidelines were implemented for the first time to review fiscal year 1977 CETA title I grant applications. There was some criticism of this initial effort, mainly concerning the technical adequacy of the indicators themselves and the fact that participation in the development of the indicators was limited. In response to this, a work group, consisting of one prime sponsor representative from each region and one representative from each regional office, was created to identify the best indicators to measure performance and to define methods of computation, given the constraints of the existing data system. The group produced a final document (FM 209-77) setting forth 13 performance indicators, grouped into four clusters and related interpretive factors. The cluster approach was used since CETA represents a multiplicity of goals and objectives for which no single performance indicator can adequately measure the effectiveness of a local program.

A subgroup consisting of three prime sponsor representatives, three regional office representatives, and two national office representatives analyzed fiscal year 1976 data and develoed a mechanism to assist in the review of fiscal year 1978 annual plans. The resulting grant review guidelines include three of the original four clusters. The earnings cluster was incorporated into the interpretive factors section of the grant review guidelines because there is no formal mechanism in the planning process that considers planned earnings outcomes. (See FM 347-77.)

4. *Changes Proposed for fiscal year 1979.* In preparation for reviewing fiscal year 1979 grants, the work group again convened to propose grant review guidelines more appropriate for fiscal year 1979. The work group was generally satisfied with the fiscal year 1978 process, but proposed the following refinements.

a. Raise the "point of critical inspection," below which prime sponsors must explain low planned performance, from the quartile to the third.

b. Emphasize that prime sponsors must explain planned performance below their actual performance of the prior year. (Throughout this field memorandum, "prior year" or "previous year" shall mean fiscal year 1977. The "current year" is fiscal year 1978, and fiscal year 1979 grants are those being reviewed.)

c. Provide additional supporting data to aid prime sponsors with their planning and to assist Federal representatives to understand explanations in terms of local conditions.

d. Clarify and expand the concept of incremental improvement from that provided for the fiscal year 1978 review.

e. Publish the grant review guidelines early enough so that they may be more useful in the planning process.

5. *Responsibilities.* It will be the responsibility of the Federal representative to fill out the worksheets and determine when an explanation will be required from a prime sponsor. The prime sponsor will have the responsibility to provide explanations when required.

It was the specific intent of the work group that explanations should be based on clusters rather than individual indicators. That is, if only one or two indicators within a cluster fall into the area requiring explanation by a small amount, no explanation may be required, especially if the other indicators are well inside the two-thirds requiring no explanation. Only good judgment by the Federal representative in determining which clusters need explanation can maintain flexibility and prevent needless redtape and delays.

Throughout this memorandum the Federal representative is designated as the reviewer of the prime sponsor's annual plan. However, some regions may prefer to use committees or other processes in the review. This is the prerogative of the RA, and although the term Federal Representative will be designated, it is not intended to limit the RAs in their choice of review staff.

6. *Objectives and mechanism of review guidelines.* The primary objective of such a tool is to provide a common framework against which prime sponsors and regional offices can compare fiscal year 1979 annual plans and performance goals to actual national and regional experience.

Data for each indicator are displayed by reference points of lowest and highest performance and low and high thirds on both a national and regional level. Planned performance in relationship to the regional low or high third will be emphasized in the plan review. Each indicator cluster will include a list of factors the presence or absence of which may affect performance. Such a list is not intended to be all inclusive nor is it intended to substitute for the knowledge of a Federal representative and prime sponsor staff about the appropriateness of a plan. The data are intended to provide a good starting point from which to identify potential problems with program design and delivery before they are reflected in poor performance. The review guidelines are not to be considered as performance standards, since there is no requirement that prime sponsors perform at any standardized level. The reference points of regional and national experience serve only as convenient benchmarks against which prime sponsors plans can be reviewed and analyzed, and to identify where further explanation would help the RA to understand local goals and where additional technical assistance may be needed.

Some users may wish to understand the distribution of performance more precisely than thirds are able to show. For these users, optional scattergrams plotting each prime sponsor, by region, have been provided in attachment II. To aid in comparison, the scattergrams have been divided into the same thirds as shown on the guideline worksheets.

7. *Indicators.* The indicators to be used as the basis for the review of fiscal year 1979 title I annual plans are those developed by the performance indicators work group and issued in FM 209-77, as revised by the work group for fiscal year 1979. However, several indicators have been excluded from this exercise; these are in the earnings cluster, for which no information is generally available in the planning documents, and the expenditure rate in the fund utilization cluster, because it is the complement of the carryout rate included in these review guidelines. The following indicators have been included.

a. *Termination cluster.*

(1) Positive termination rate:
Total positive terminations/total terminations times 100.

(2) Entered employment rate, as percent of total terminations:
Entered employment/total terminations times 100.

(3) entered employment rate, as percent of positive terminations:
Entered employment/total positive terminations times 100.

(4) Nondirect placement rate, as a percent of total terminations:
Nondirect placements/total terminations times 100.

(5) Nondirect placement rate, as a percent of entered employment:
Nondirect placements/entered employment times 100.

b. *Cost cluster,* where total accured expenditures refer to prime sponsor CETA funds.

(1) Cost per positive termination:
Total accrued expenditures/positive terminations.

(2) Cost per entered employment:
Total accured expenditures/entered employment.

(3) Cost per nondirect placement:
Total accrued expenditures/Nondirect placements

c. *Fund Utilization Cluster*

(1) Carryout rate:
Funds available—Accrued expenditures/Funds available × 100

(2) Administrative cost rate:
Administrative expenditures/Total accrued expenditures × 100

8. *Description of data:*

a. *Data base.* Data covering fiscal year 1977 for 438 prime sponsors were used to compute the 10 indicators and to determine national and regional thirds against which the prime sponsor's planned performance will be compared. The data were obtained from the CETA program status summary (PSS), financial status report (FSR) and obligations contained in the grant signature sheet and modifications. Data from these documents are received in the national office through the regional automated system (RAS). The RAS data were, in turn, processed by statistical package for the social sciences (SPSS) which provided most of the computations. The data were taken from RAS as of mid-February 1978. The data are not perfect; about 2 percent of it is missing or incorrect. Cost data in these worksheets have been corrected from the draft version. To help identify any additional data errors, attachment III.b. provided the raw data, reported by prime sponsors, from which the indicators are calculated. Please notify the national office immediately, Attention: TDCR, if any major data or computation errors are noted.

b. *Computation of thirds.* The performance of each prime sponsor was computed for each of the 10 indicators. The results, expressed as a percentage or dollar cost, were then arrayed in ascending order from the lowest computed value to the highest. This array was divided into three equal parts, each part containing the performance of 33⅓ percent of all prime sponsors.

c. *Interpretive factors.* Data for interpretive factors preprinted on the interpretive factor worksheet (see attachment I) include selected client characteristics, pre-CETA and post-CETA median wages, percent of cumulative enrollment by activity, percent of accrued expenditures by activity and the local unemployment rate. Data, except for the local unemployment rate, were obtained from the PSS for enrollment, the FSR for accrued expenditures and the quarterly summary of participant characteristics (QSPC) for characteristics and wage data. The unemployment rates were developed by BLS as the basis for fiscal year 1978 allocations. They represent fiscal year 1977 annual averages and thus correspond to prime sponsor performance for the same period. Prime sponsor fiscal year 1979 plan data will be compared against the national and regional totals from the RAS printout for fiscal year 1977 dated December 23, 1977. For comparison, the Federal representative should fill in the appropriate data in the interpretive factor worksheet for the prime sponsor under review to explain program performance. Two columns are provided for prime sponsors. In the first column the Federal representative will include planned fiscal year 1979 data, where available. If planning data for chacacteristics and wages can be extracted from the narrative or the significant segments portion of the PPS, it should be included. In the second prime sponsor column, the Federal representative should copy fiscal year 1977 performance data. Instructions for completing "sponsor" columns are in attachment I.

9. *Application of review guidelines.* There are separate worksheets for each of the indicator clusters and a worksheet for the interpretive factors to be utilized in annual plan reviews. See attachment I for an explanation of the four reference points (the high, the low, and the first and second thirds) and instructions for the use of the worksheets.

In reviewing prime sponsor planning goals, the following procedures should apply:

a. *Computation of planning goals.* The Federal representative should first compute the fiscal year 1979 performance goals for each of the indicators in the three performance clusters by substituting cumulative planning data *through the fourth quarter* from the PPS and BIS of the fiscal year 1979 annual plan for the data elements of the formulas in the worksheets. The computed values should be placed in the "planned for fiscal year 1979" column of the worksheets.

b. *Comparison to regional thirds.* Planned performance in relation to the *regional* thirds will be emphasized in the review process for each indicator in the performance clusters to determine if local planning goals require an explanation. The national reference points provide additional reference points. Use of regional comparative data as the reference points against which prime sponsor plans are to be compared takes into account programmatic, labor market, and other factors unique to a particular region, thereby insuring equitable treatment for as many prime sponsors as possible.

c. *Planned performance requiring explanation.* In general, planned performance that is (1) not less than the prior year's performance, and (2) in the acceptable two-thirds need not be explained. Planned performance falling *above* the region's lowest third for the "termination cluster" and *below* the region's highest third for the "cost cluster" and the carryout rate in the "fund utilization cluster" will not normally need explanation. Higher positive outcome rates and lower costs for positive outcomes and carryout rates generally indicate desirable performance and should not require explanation unless there are programmatic or other reasons for doing so. Because the carryout rate of the "fund utilization cluster" is high for many regions, the RA may require an explanation for planned carryout rates above some fixed level (to be determined by the RA) even though planned carryout may be below the highest third. Whatever point is selected must be realistic and achievable by the majority of prime sponsors (the national median for carryout rate was 20 percent).

Any planned administrative rates that exceed the limits specified in the regulations (95.17(b)(8)) must be explained to the complete satisfaction of the RA.

RA's may, in addition, request an explanation of planned performance in the two-thirds which normally requires no explanation when the re-

V 43 / 177 SEP 12 78 IMI

viewer believes the planning goals are unrealistic or serious programmatic problems are evident. This may include planned performance which differs substantially from previous performance without a significant change occurring in program operations, or planned performance which may not be achievable because of serious administrative, managerial or fiscal problems. The RA may determine appropriate situations and the amount of detail required for any explanation.

Explanations must be as *complete* as possible. They should take into account the absence or presence of labor market, programmatic and other locally relevant situations which may influence performance.

These factors will be discussed in item 10 of this FM. To the extent that an explanation relates to a local *problem* (such as a management problem) under the control of the prime sponsor, it should include a brief discussion of the steps being taken to correct the problem. (Note that an indicator in the low or high third may result from program mix or labor market conditions and may not reflect a "problem.")

d. *Incremental improvement.* In evaluating plans for fiscal year 1979, an additional key element to be considered is each sponsor's previous performance. The concept of incremental improvement is critical to reviewing a sponsor's plan. To determine the extent of improvement over previous performance, Federal representatives should compute (or copy from the lists provided) the sponsor's actual achievement for each of the indicators, using the fiscal year 1977 data. The results should be placed in the column headed "Actual fiscal year 1977" of the performance indicator worksheets. If planned performance continues to be in the third requiring explanation, but reasonable improvement over previous performance is planned, such improvement may serve as adequate explanation. The knowledge and *judgment* of the reviewer must play a large role in these situations, particularly where the prime sponsor has a history of achieving below plan. A prime sponsor, even though planning to perform in the two-thirds of all clusters requiring no explanation, should not plan lower performance than it achieved the prior year without explaining why unless there has been a drastic change in local conditions. Although all sponsors may be expected to improve their performance, reviewers must use judgment; improvement—like growth—has limits.

e. *Use of current data.* The structure of the grant review guidelines has made no formal provision for using current, mid-year data, because mid-year data are not always comparable to end-of-year data. However, if questions arise concerning the need to explain, or the adequacy of the explanation provided, the most recent data available should be taken into account. Current data should be especially helpful in helping to decide questions concerning incremental improvement.

10. *Interpretive descriptions and interpretive factors.* Each performance cluster worksheet (see attachment I to this FM) contains a preprinted list of programmatic and environmental factors which may be of assistance in explaining, or raising questions about prime sponsor planned performance. The list, located in the lower left side of each worksheet, is *not* intended to be all inclusive. The Federal representative may be aware of other factors unique to the region or prime sponsor area that could explain planned performance. Among the influential factors (whether or not listed) are those dealing with the prime sponsor's program mix, enrollee characteristics, enrollee pre-CETA and post-CETA wages, and the local unemployment rate.

These factors are all quantifiable and are designated as *interpretive factors.* They are contained on a separate worksheet in Attachment I for convenience of comparing these factors and using them in combination to explain planned performance. Since these factors, except for enrollee wages and the local unemployment rate, can be broken down by their proportion of the prime sponsor's total program, each factor can be compared with other elements of the sponsor's program and regional experience data.

The interpretive factors worksheet will contain regional and national experience data for fiscal year 1977 which has been preprinted on the worksheets. Prime sponsor data to be compared within the program and with regional totals will be filled in by the Federal Representative in the blank columns (see Attachment I, section II, for additional instructions).

Page 5 of Attachment I contains a short description of the use of each of the interpretive factor groups. The description is limited but should help the Federal Representative to understand how the various interpretive factors may be used. The following examples provide the Federal Representative with a fuller range of implications that these factors may have on planned performance:

a *Enrollee Characteristics.* The Federal Representative should pay particular attention to the types of participants to be enrolled in the program and the possible correlations to the percent of expenditures, cumulative enrollments by program activity, planned performance goals, and program objectives. Prime sponsors may develop and operate programs designed to increase the employability of particular groups of enrollees, with placement in unsubsidized employment not being a program objective. A prime sponsor proposing to serve a significant number of youth and full-time students may be expected to allocate a sizable portion of funds for work experience activities and have a sizable percentage of enrollments in work experience activities, accompanied by a relatively low planned "entered employment rate," a relatively high planned "cost per entered employment," and a relatively high planned "positive termination rate." The Federal Representative should then compare planned performance goals for the affected indicators against regional comparative data for the interpretive factors. This comparison should help to assess planned performance.

Prime sponsors operating programs or activities stressing service to other "hard-to-place" groups, e.g., minorities, persons with limited English-speaking ability, older workers and handicapped, may reasonably be expected to propose relatively low positive termination rates through frequent tunover, low entered employment rates, high costs per positive termination and high costs per entered employment.

b. *Program Mix.* Prime sponsors may plan to allocate a sizable portion of funds to classroom training and OJT. These are placement-related activities and planned performance should reflect this, unless the classroom training includes much remedial education. Planned goals for other indicators may be similarly affected by such a distribution of funds. The Federal Representative should review regional data for the affected indicators and the interpretive factors for possible explanation of the sponsor's planned performance.

The interpretive factors and other environmental and programmatic influences must be used with care. Although there may be an established correlation (see page 5 of Attachment I) among some of these with the planning goals, there are many nonmeasurable factors which can completely outweigh the correlations, many of which are weak. Initial multiple regression equations show that the 10 best factors were "able to explain" an average of about 40 percent of the variation between prime sponsors for the performance indicators. This means that the majority (about 60 percent) of the variation in prime sponsor performance is not predictable by the data available. It will be incumbent on the Federal Representative, who is knowledgeable concerning the environmental and programmatic aspects of the prime sponsor, to make *judgments* as to the factors and the strength of the factors considered to be operating to determine if they are adequate to explain planned performance.

11. *Additional Information.* The national office is currently preparing a statistical analysis of a variety of factors affecting performance. The Performance Indicators Work Group recommended that this study, with updates, be published quarterly.

12. *Training.*

a. *Federal Staff.* In order to insure a uniform understanding of how to apply the guidelines in your region, it is recommended that regional staff be trained *as early as possible.* Regional offices may request training from the national office. Arrangements will be made for national staff or members of the Performance Indicators Work Group to assist in training in the regions.

Although the fiscal year 1979 grant narratives will be abbreviated because of uncertainty relating to CETA reauthorization, these review guidelines were designed to aid in the review of the PPS and BIS. Since these forms are not expected to change during fiscal year 1979, it seems most reasonable to review proposed performance on a full year basis. RA's, of course, must determine what level of detail is appropriate for their fiscal year 1979 grant reviews.

13. *Action Required.* RA's should distribute this FM as soon as possible to regional staff, prime sponsors and any other person requiring this information. They should also inform prime sponsors and others that these guidelines will be published in the FEDERAL REGISTER.

14. *Inquiries.* Questions should be directed to John Weigant or Henry Rosenbloom on 376-6580 or Nan Beckley on 376-6575.

15. *Attachments.*

I. Worksheets and Instructions (RA's only).

II. Performance Indicator Scattergrams.

III. Prime sponsor lists by region, of performance indicators based on fiscal year 1977 performance (RA's are authorized to substitute RAS data where it is more current or convenient.) (RA's only).

NOTE. For presentation in the FEDERAL REGISTER, only Attachments I and II of this field memorandum will be reproduced. However, performance data contained in Attachment III, which will not be reproduced, are also contained in the Performance Indicator Scattergrams of Attachment II, although prime sponsors are not identified.

WORKSHEETS

I. *Performance Cluster Worksheets.* Separate worksheets have been developed for each of the indicator clusters which include a list of interpretive environmental and programmatic factors to be used in plan reviews. The following will describe the format of the cluster worksheets and general procedure for review.

A. The *upper part of each worksheet* lists the component parts of the cluster, the computation formula, and a space for entering planned outcomes for the prime sponsor being reviewed. Next to the planned result insert the prime sponsor's actual performance during the prior year. Comparative data, to be used as reference points in either percents or dollars, are preprinted. The comparative data will be displayed for both *national* and for *individual regions.* Four reference points are included:

1. Lowest performance in the region/Nation (low).

2. First third in the region/Nation (33 percent).

3. Second third in the region/Nation (67 percent).

4. Highest performance in the region/Nation (high).

The low third refers to the point where 33⅓ percent of the prime sponsors fall *below* in performance.

The high third refers to the point in performance which 33⅓ percent of the sponsors fall above.

The middle third includers scores between the 33⅓-percent value and the 66⅔-percent value.

B. The bottom left hand side of the worksheets contains a list of interpretive descriptions. These environmental and progammatic factors may influence performance and may be used as a basis for explaining deviations of planning goals. The list is not all-inclusive; Federal Representatives should be aware of other factors unique to the region of sponsor. In any event, is will be incumbent upon the Federal Representative (working with the prime sponsors) to document the absence or presence of influential factors. Important factors that can be helpful in explaining planned performance are those dealing with program mix, enrollee characteristics, pre-CETA and post-CETA wages and the local unemployment rate. These interpretive factors are listed on a separate worksheet of the review guideline package. This worksheet will be discussed in section II of this attachment.

C. The bottom right hand side of the worksheets provides space for explanation of planned performance. Explanation is required as described in 9.c. of this FM.

II. *Interpretive Factors.* An additional worksheet, assisting Federal Representatives in displaying performance in terms of various interpretive factors, is contained in the worksheet package. These factors should be used in conjunction with the influential factors listed on the indicator cluster worksheets as a basis to explain prime sponsor performance. The interpretive factors include categories of program mix, selected enrollee characteristics, pre-CETA and post-CETA wages and local unemployment rates. Page 5 of this Attachment contains a short description on the use of each section of the interpretive factors.

The worksheet contains four columns of data. In the first column, the Federal Representative should insert the planned data for the grant year being reviewed, as available. In the second column, the Federal Representative should insert the prime sponsor's performance for the previous year. In the final two columns corresponding regional and national data have been preprinted. The prime sponsor data should be filled in as follows.

A. PRIME SPONSOR PLANNING DATA

1. *Program Mix—Percent of Expenditures by Program Activity.* Obtain data from section F. of the BIS of the fiscal year 1979 annual plan. Cumulative fourth quarter expenditure data for each activity from F.2.A. through F.2.f. should be divided by cumulative fourth quarter total projected expenditures by program. F.2. The result should be multiplied by 100 and placed in the "sponsor" column beside the appropriate activity.

2. *Program Mix—Pecent of Camulative Enrollment by Program Activity.* First determine combined cumulative fourth quarter enrollment by adding the cumulative (total) fourth quarter enrollment in each program activity listed in section II of the PPS except Classroom Training-Voc. Ed. (Voc. Ed. enrollment is excluded because the data are too variable to be a useful indicator, and are often reported under classroom training—prime sponsor.) Then divide the fourth quarter cumulative enrollment for each of the program activities by the combined cumulative enrollment. Multiply by 100 to give the percent and record in the appropriate space. Example: Percent enrollment in classroom training equals:

$$\frac{\text{PPS: II.A (4th Q)(a) X 100}}{\text{PPS (4th Q)(a): II.A + II.C + II.D + II.E}}$$

3. *Enrollee Characteristics.* Planned enrollment by age, sex, and race should be available in a table located in the grant narrative under the section "Population To Be Served" (Section III.B.A.1. of the "Forms Prepara-

tion Handbook"). Corresponding percentages should be recorded on the interpretive factors worksheet. Enrollment for the other characteristics is not routinely planned, so it is not necessary to insert planning data where none exists. However, if the prime sponsor happens to plan for Significant Segments of the Population that exactly correspond to any of the listed categories, the planning data may be inserted. Leave blank all categories for which there is no data; it will be assumed that last year's performance will be repeated. Considerable judgment must be exercised by Federal Representatives in interpreting the impact of these factors and their changes over time.

4. *Median Wages, Unemployment Rates.* As with planned enrollee characteristics, this data should be included only if there is documentation in the grant narrative that exactly corresponds. In the great majority of cases, these spaces should be left blank.

B. *Prime Sponsor Previous Performance.* Performance data as of fourth quarter fiscal year 1977 should be inserted as appropriate. Federal Representatives may use two sources for the data: the prime sponsor's Quarterly Reports, or the RAS reports which were generated from the original Quarterly Reports.

1. *Program Mix—Percentage of Expenditures by Program Activity.* Use column B of the FSR for fourth quarter fiscal year 1977 to determine percentages. For example, percent of expenditures for PSE equals:

$$\frac{\text{FSR 7.B.3 (Wages + Fringes + Other) X 100}}{\text{FSR 7.B.7}}$$

2. *Program Mix—Percentage of Cumulative Enrollment by Program Activity.* Use section II of PSS using procedures similar to those described in paragraph A.2. above. Do not include classroom training—vocational education in any calculations.

3. *Enrollee Characteristics.* Compute percentages from the fiscal year 1977 fourth quarter QSPC or RAS printouts. Use data for total participants (column B of the QSPC).

4. *Median Wages.* Median wages have been estimated using standard methods for grouped data. (See a "Forms Preparation Handbook," May 1974.) Originally, all wage categories were included, but it was discovered that for some prime sponsors a majority of their placements had no previous wage. This caused the pre-CETA median wage to be a zero and the resultant increase in median wage was unrealistically high. The problem was resolved by excluding those without previous wages from the computation. However, eliminating those without previous wages skews actual performance in the other direction. Recognizing the merits of both positions, and that more complete data should be helpful in explaining performance, both computations have been made. Wherever the pre-CETA median wage would be zero, the percentage of participants with no previous wage is printed.

The "official" pre-CETA median wage excludes those with no previous earnings and is the preferred interpretive factor to explain performance related to wage increases. However, the other pre-CETA median wage may be included in explanations where it adds meaning. The "official" figure is contained on the prime sponsor lists under the column headed "Pre-CETA, w/o O's." It is followed by the figure including zero pre-CETA wages. Post-CETA median wages are not affected by either choice.

5. *Unemployment Rates.* Unemployment rate data are drawn from BLS annual averages for 1977 that were used to allocate funds for FY '78. They are printed on the data sheets of prime sponsor data, The regional and national unemployment rates shown on the Interpretive Factors Worksheets were aggregated from the prime sponsor data. The displayed rates should be compared with unemployment rates of recent periods noting trends that may assist in explaining differences.

Use of Interpretive Factors—General Observations

1. *Program Mix.* The size of a youth work experience program explains more of the variation in placement rates and "costs per" than any other sinlge set of factors. Youth work experience programs generally lower placement rates, raise positive termination rates, raise costs per placement, and lower costs per positive termination. A large youth work experience program is characterized by large percentages of fulltime students, youth age 18 and under, "other labor force," and a high proportion of cumulative enrollment in the work experience program activity. A relatively low cost per enrollment in work experience (cumulative) also suggests an in-school type program. (Note.—"Other labor force" participants may no longer correlate with a youth work experience program due to changes in instructions for intertitle transfers between title I and title III summer programs.)

High proportions of classroom training and OJT expenditures and enrollments often lead to higher nondirect placement rates and costs. High PSE and work experience expenditures and enrollments usually lead to low placement rates and high "costs per," especially if cost per enrollee is high, as in prevailing-wage work experience. Significant direct placement activity may be indicated by relatively high expenditures for services to participants. Direct placements will also generally lower "costs per" and raise the positive termination and entered employment rates.

2. *Enrollee Characteristics.* All enrollee characteristics listed among the interpretive factor have, on the average, lower entered employment rates than their counterparts. Prime sponsors who serve relatively large proportions of these difficult-to-place groups can be expected to have lower rates and higher cost per.

3. *Median Wages.* Higher post-CETA wages and increased wages from pre-to post-CETA may provide evidence for an emphasis on higher quality., longer tern (more expensive) training in higher skilled jobs. Large increases which result from low pre-CETA wages may also indicate a high proportion of participants without prior work experience, or with limited or old work experience.

4. *Unemployment Rates.* Local unemployment rates are negatively corrlated with all of the placement rates and are positively correlated with the costs per placement. That is, prime sponsors with higher than average unemployment rates can expect proportionately more costly programs with lower placement rates.

Displaying Worksheets in the "Federal Register"

For purposes of publication in the Federal Register, the complete set of worksheets for Region I, only, will be displayed. For the other regions (II through X), only the regional numerical data will be provided. These data can be substituted for regional data in Region I worksheets for the appropriate performance indicator clusters and interpretive factors to obtain the worksheets for any other region. National data are the same for all regions and are contained in the worksheets for Region I.

EXPLANATION/ JUSTIFICATION: Explanation Third

EXPLAIN OR JUSTIFY IF PLANNED PERFORMANCE FOR THE CLUSTER IS BELOW PREVIOUS PERFORMANCE OR THE LOWEST REGIONAL THIRD.

Lower total positive termination rates (or high non-positive rates) may be due to:

- High enrollment of hard-to-place groups;
- High local unemployment rates;
- Inadequacies in program operation (e.g., assessment, counseling, job development, subcontractor management, or internal management) or in program design (e.g., long "holding" periods before placement, poor coordination between components, classifying applicants as participants prior to actual enrollment in program activities, etc.)

Lower entered employment rates: Any of the above plus local emphasis on program activities whose goal is not placement--work experience for youth, remedial education, intertitle transfers, etc.

Lower nondirect placement rates: Any of the above plus inclusion of significant direct placement activities.

Continue explanations on additional sheets if needed. When explaining low termination rates, refer to Interpretive Factors Worksheets to compare local factors with Regional (and national) averages.

Cost per Non-Direct Placement	BIS F.2 / PPS I.B.1.b + I.B.1.c			1584	3533	6984	12939	790*	3640	5760	33580

EXPLANATION/ JUSTIFICATION: Explanation Third

EXPLAIN OR JUSTIFY IF PLANNED PERFORMANCE FOR THE CLUSTER IS ABOVE PREVIOUS PERFORMANCE OR THE HIGHEST REGIONAL THIRD.

Higher Costs per Positive Termination may be due to any of the factors leading to lowered positive termination rates (see termination cluster worksheet) plus:

- High local cost structures for standard items (e.g., wage rates, rental costs, etc.);
- Use of more costly resources (e.g., proprietary schools, computers, special equipment, etc.);
- Emphasis on supportive services (transportation, day care, etc.), classroom training, employability development, etc.;
- Higher than minimum rates for participant stipends or wages;
- Stress on longer term training for higher skill jobs;
- Use of PSE

Higher Costs per Entered Employment may be due to any of the factors contributing to higher positive termination costs indicated above plus those leading to lowered Entered Employment Rates (see termination cluster worksheet).

Higher Costs per Non-Direct Placement may be due to any of the factors contributing to higher positive termination costs indicated above plus the inclusion of direct job placement activities.

*5 prime sponsors reported extremely low values. These are probably due to data problems so were excluded.

Continue Explanations of additional sheets if needed. When explaining high "costs per", refer to Interpretive Factors Worksheets to compare local factors with Regional (& national) averages.

FUND UTILIZATION CLUSTER	Formula	Planned for FY79	Actual FY77
Carryout:	BIS E.7.b		
% of Available Funds	BIS E.7.f x 100		
Administrative Cost Rate	BIS E.1.d x 100		
	BIS E.7.d		

EXPLAIN OR JUSTIFY IF PLANNED PERFORMANCE FOR THE CLUSTER IS ABOVE PREVIOUS PERFORMANCE OR THE HIGHEST REGIONAL THIRD.

EXPLANATION/JUSTIFICATION:

Higher Carryout Rates may be caused by:

- Slow startup of new activities;
- Supplemental appropriations received late in the fiscal year;
- Internal administrative, management, processing or contracting problems;
- Unplanned-for events, since original grant approval;
- Unusually high carryin rates.

Higher Administrative Cost Rates (over 20%) may be caused by:

- High local cost structure, especially salaries, rent;
- Stress on activities requiring proportionally more administration (e.g., classroom training vs work experience);
- Stress on non-stipended activities (e.g., services, direct placements);
- Heavy reliance on contractors, subgrants;
- Unplanned carryout of non-administrative costs;
- Heavy use of computers or other hardware;
- High indirect cost rates.

Prime sponsors showing improbable Carryout Rates (less than 0% or greater than 100%) are excluded:
*National: 14 **This Region: 1

Continue explanation on additional sheets if needed. When explaining high planned Carryout and Administrative Rates, refer to Interpretive Factors Worksheets to compare local factors with Regional (and national) averages.

ATTACHMENT II TO FM NO. 390-78

SCATTERGRAMS OF KEY PERFORMANCE INDICATORS

Scattergrams prepared by the SPSS computer program have been included so that users can graphically see the variation in the indicators. Regions are plotted on the vertical axis with one line for each region. The value for the performance indicator is shown on the horizontal axis. The national distribution is plotted on two lines at the bottom of the graph, repeating the regional picks above it. Each asterisk(*) indicates a single occurrence. Multiple occurrences are shown by a one-digit number from 2 to 8. Nine or more occurences are shown by a "9".

How to Read Scattergrams. Scattergrams can be used in several different ways. The easiest is simple inspection to see how the data are distributed, and what are the lows, the highs, and the median. To aid in visual understanding, the data hve been divided into low, middle, and high thirds. Such a division also makes it easier to see differences between regions.

Some users will what to know the exact value of a particular occurrence or plotted point. To determine the value of any particular occurrence for an indicator, place a ruler vertically so that it intersects the point (a digit or "*"), and read the value from the scale at the top or bottom of the page. The top and bottom scales are the same, although different reference values are printed. Use whichever reference value is most convenient. The region to which the point belongs can be read from either side scale. Once the value has been determined, it is then possible to search the lists of prime sponsors to see which one is represented by the particular plotted point.*

This process can be reversed. To find which point on the scattergram represents a given prime sponsor first find the value of the desired indicator for that prime sponsor from the prime sponsor lists (Attachment III).[1] Then locate that value on the top and bottom scales of the scattergram for the desired indicator. A ruler place through the value located on the top and bottom scales should intersect the prime sponsor's plotted point for his region.

[1]Attachment III of this field memorandum, containing a listing of performance by prime sponsor, is not being provided for the FEDERAL REGISTER. Therefore, it will not be possible to identify the performance of specific prime sponsors by using the scattergrams.

The data from which the scattergram were plotted were derived from the Regional Automated System (RAS) during mid-February 1978. Since then, it is possible that some missing data have been added and some incorrect data have been updated. In any case, please review the data to insure that our data and computations agree with your data and computations and advise the national office (Attn: TDCR) of any needed corrections.

Signed at Washington, D.C., this 31st day of August 1978.

ROBERT J. MCCONNON,
Deputy Assistant Secretary for Employment and Training Administration.

DEPARTMENT OF ENERGY

Economic Regulatory Administration

OIL PRICE CEILINGS TO REFLECT IMPACT OF INFLATION

Adjustments to Lower and Upper Tier Crude

[3128-01]

Title 10—Energy

CHAPTER II—FEDERAL ENERGY ADMINISTRATION [1]

PART 212—MANDATORY PETROLEUM PRICE REGULATIONS

Adjustments to Lower and Upper Tier Crude Oil Price Ceilings To Reflect Impact of Inflation

AGENCY: Economic Regulatory Administration, Energy.

ACTION: Final rule.

SUMMARY: The Economic Regulatory Administration (ERA), of the Department of Energy (DOE), by this action issues Crude Oil Price Schedule No. 12, effective September 1, 1978, for the months of September, October, and November 1978. The Schedule provides monthly crude oil price increases to take into account the impact of inflation, as permitted under the Emergency Petroleum Allocation Act of 1973, as amended (EPAA, Pub. L. 93-159).

Beginning in September 1978, inflation adjustments will be applied to the projected August 1978 lower tier and upper tier prices (approximately $5.50 per barrel and $12.29 per barrel respectively), resulting in lower tier and upper tier prices for the months of September, October, and November 1978 of approximately $5.55, $5.60, and $5.65 per barrel (lower tier) and $12.39, $12.50, and $12.61 (upper tier), respectively.

EFFECTIVE DATE: September 1, 1978.

SUPPLEMENTARY INFORMATION:

A. *Introduction.*
B. *Crude Oil Price Schedule No. 12.*

[1] Editorial Note: Chapter II will be renamed at a future date to reflect that it contains regulations administered by the Economic Regulatory Administration of the Department of Energy.

A. *Introduction.*

Under the EPAA, Congress provided flexibility to control first sale prices of domestic crude oil as long as the national weighted average first sale price ("actual composite price") did not exceed $7.66 per barrel ("statutory composite price") for all domestic crude oil produced and sold in February 1976. Beginning in March 1976, the EPAA authorized increases in the statutory composite price to reflect the effects of inflation and to provide production incentives. Under present authority, the statutory composite price is adjusted upward at a rate not to exceed 10 percent annually.

With the issuance of Crude Oil Price Schedule No. 9 (42 FR 62125, Dec. 9, 1977), the ERA undertook to continue the policy, announced by the President in the National Energy Plan (NEP) and implemented by the Federal Energy Administration (FEA) in Crude Oil Price Schedule No. 8 (42 FR 45284, Sept. 9, 1977), to adjust both lower tier and upper tier ceiling prices to reflect only the rate of inflation as measured by the GNP deflator. Reference should be made to the Notice which accompanied Crude Oil Price Schedule No. 8 for a description of prior actions taken by FEA to achieve compliance with the composite price constraints of the EPAA and for a discussion of the domestic crude oil pricing policy set forth in the NEP.

B. *Crude Oil Price Schedule No. 12.*

This price schedule continues the policy as described in the Notice which accompanied Crude Oil Price Schedule No. 8. Accordingly, under Crude Oil Price Schedule No. 12, effective September 1, 1978, the August 1978 lower tier ceiling price (the May 15, 1973 posted price plus $1.81 per barrel, resulting in an average first sale price of approximately $5.50 per barrel), and the August 1978 upper tier price (the September 30, 1975 posted price less $0.38, resulting in an average first sale price of approximately $12.29 per barrel), are adjusted for inflation for September, October, and November 1978, based on the first revision of the GNP deflator published on August 21, 1978, which reflects an annual rate of inflation of 10.7 percent. (Although ceiling prices are being increased for the months of September, October, and November at an effective annual rate of 10.7 percent, we have determined that these monthly increases are not in excess of those permitted under the EPAA, because these increases will not in any of these months result in an actual composite price in excess of the statutory composite price.)

1. *Lower tier ceiling prices.*

Adjustments to ceiling prices for lower tier crude oil and the approximate average first sale prices pursuant to those ceiling prices in September, October, and November 1978, are determined pursuant to the following methodology:

A. ERA has computed a monthly adjustment factor of 0.00851 which when applied over a 12-month period yields an effective annual rate of adjustment of 10.7 percent.

B. September adjustment equals ($5.50) (0.00851) per barrel equals $0.046 per barrel rounded to $0.05 per barrel.

C. October adjustment equals ($5.50 plus 0.05) (0.00851) per barrel equals $0.047 per barrel rounded to $0.05 per barrel.

D. November adjustment equals ($5.50 plus 0.05 plus 0.05) (0.00851) per barrel equals $0.048 per barrel rounded to $0.05 per barrel.

Based upon the monthly adjustments computed above, average lower tier ceiling prices for the months of September, October, and November 1978 are computed as follows:

September equals $5.50 plus $0.05 equals $5.55.

October equals $5.55 plus $0.05 equals $5.60.

November equals $5.60 plus $0.05 equals $5.65.

Using an average highest posted field price on May 15, 1973 of $3.69 per barrel and the monthly adjustments as computed above, lower tier prices for the next 3 months have been determined as follows:

Month	Ceiling price	Price [1]
September	May 15, 1973 highest posted field price plus $1.86.	$5.55
October	May 15, 1973 highest posted field price plus $1.91.	5.60
November	May 15, 1973 highest posted field price plus $1.96.	5.65

[1] Estimated average first sale price.

2. *Upper tier ceiling prices.*

Adjustments to ceiling prices for upper tier crude oil and the approximate average first sale prices pursuant to those ceiling prices in September, October, and November 1978 are determined pursuant to the following methodology:

A. Adjustment factor (explained above) equals 0.00851.

B. September adjustment equals ($12.29) (0.00851) per barrel equals $0.104 per barrel rounded to $0.10 per barrel.

C. October adjustment equals ($12.29 plus 0.10) (0.00851) per barrel equals $0.105 per barrel rounded to $0.11 per barrel.

D. November adjustment equals ($12.29 plus 0.10 plus 0.11) (0.00851) per barrel equals $0.106 per barrel rounded to $0.11 per barrel.

Based upon the monthly adjustments computed above, average upper tier ceiling prices for the months of September, October, and November 1978 are computed as follows:

September equals $12.29 plus $0.10 equals $12.39.

October equals $12.39 plus $0.11 equals $12.50.

November equals $12.50 plus $0.11 equals $12.61.

Using an average highest posted field price on September 30, 1975, of $12.67 per barrel and the monthly adjustments as computed above, upper tier prices for the next 3 months have been determined as follows:

Month	Ceiling price	Price [1]
September	September 30, 1975 highest posted field price less $0.28.	$12.39
October	September 30, 1975 highest posted field price less $0.17.	12.50
November	September 30, 1975 highest posted field price less $0.06.	12.61

[1] Estimated average first sale price.

On or before December 1, 1978, the ERA will issue Crude Oil Price Schedule No. 13, setting forth lower tier and upper tier ceiling prices for the months of December 1978 and January and February 1979.

The following table summarizes first sale price data for the months February 1976 through November 1978.

Month	Estimated Average Lower Tier Ceiling Price	Actual Lower Tier Price	Estimated Average Upper Tier Ceiling Price	Actual Upper Tier Price 4/	Statutory Composite Price	Actual Composite Price 1/	Cumulative Excess Receipts (Millions
1976 Feb	$5.04	$5.05	$11.35	$11.48	$7.66	$7.87	$49

1/Beginning with the month of September 1976, includes prices for stripper well crude oil production at values imputed in accordance with sec. 121 of the ECPA. Effects of ANS crude oil production, which commenced June 20, 1977, are included.

2/Preliminary

3/ Projected on the basis of Crude Oil Price Schedule Nos. 11 and 12.

4/Does not include effects of Alaska North Slope crude oil Production.

(Emergency Petroleum Allocation Act of 1973, Pub. L. 93-159, as amended, Pub. L. 93-511, Pub. L. 94-99, Pub. L. 94-133, Pub. L. 94-163, and Pub. L. 94-385; Federal Energy Administration Act of 1974, Pub. L. 93-275, as amended, Pub. L. 94-385; Energy Policy and Conservation Act, Pub. L. 94-163, as amended, Pub. L. 94-385; E.O. 11790, 39 FR 23185; Department of Energy Organization Act, Pub. L. 95-91; E.O. 12009, 42 FR 46267.)

In consideration of the foregoing, Part 212 of Chapter II of Title 10 of the Code of Federal Regulations is amended as set forth below, effective September 1, 1978.

Issued in Washington, D.C., September 1, 1978.

DAVID J. BARDIN,
Administrator, Economic Regulatory Administration.

Section 212.77 is amended in the Appendix to add Schedule No. 12 of Monthly Price Adjustments, as follows:

§ 212.77 Adjustments to ceiling prices.

* * * * *

APPENDIX.—*Schedule No. 12 of Monthly Price Adjustments, Effective Sept. 1, 1978*

Month	Lower tier, May 15, 1973, posted price [1] (plus)	Upper tier, Sept. 30, 1975, posted price [2] (less)
1976:		
February	1.35	1.32
March	1.38	1.25
April	1.41	1.18
May	1.45	1.11
June	1.48	1.05
July	1.48	1.05

September	1.48	1.05
October	1.48	1.05
November	1.48	1.05
December	1.48	1.05
1977:		
January	1.48	1.25
February	1.48	1.25
March	1.48	1.70
April	1.48	1.70
May	1.48	1.70
June	1.48	1.70
July	1.48	1.70
August	1.48	1.70
September	1.48	1.70
October	1.48	1.70
November	1.48	1.70
December	1.48	1.70
1978:		
January	1.48	1.70
February	1.48	1.70
March	1.48	1.70
April	1.48	1.70
May	1.48	1.70
June	1.48	1.70
July	1.48	1.70
August	1.48	1.70
September	1.51	1.44
October	1.54	1.18
November	1.57	.92
December	1.59	.87
1978:		
January	1.61	.82
February	1.63	.77
March	1.66	.71
April	1.69	.65
May	1.72	.59
June	1.75	.52
July	1.78	.45
August	1.81	.38
September	1.86	.28
October	1.91	.17
November	1.96	.06

tember 1, 1978 pursuant to 10 CFR 212.77. It restates without change the lower and upper tier price ceilings applicable to crude oil produced and sold in the months of February 1976 through August 1978, as determined under 10 CFR 212.73, 212.74, and 212.77. Both lower tier and upper tier ceiling prices, which were increased under Schedule No. 11 effective June 1, 1978, are further increased as indicated in this schedule, effective September 1, 1978.

This schedule is effective only through November 30, 1978. Price ceilings for subsequent months will be provided by Schedule No. 13, to be issued on or about December 1, 1978. This schedule may, however, be superseded prior to December 1, 1978, by early issuance of Schedule No. 13 to reflect further ceiling price adjustments based on presently unanticipated trends in actual composite price levels.

Title 17—Commodity and Securities Exchanges

CHAPTER II—SECURITIES AND EXCHANGE COMMISSION

[Release Nos. 33-5966; 34-15108; 35-20688; IC-10382; AS-253]

PART 210—FORM AND CONTENT OF FINANCIAL STATEMENTS, SECURITIES ACT OF 1933, SECURITIES EXCHANGE ACT OF 1934, PUBLIC UTILITY HOLDING COMPANY ACT OF 1935, INVESTMENT COMPANY ACT OF 1940, AND ENERGY POLICY AND CONSERVATION ACT OF 1975

Adoption of Requirements for Financial Accounting and Reporting Practices for Oil and Gas Producing Activities

AGENCY: Securities and Exchange Commission.

ACTION: Final rules.

SUMMARY: The Commission has reached the following conclusions regarding oil and gas accounting: (1) Traditional accounting methods fail to provide sufficient information on financial position and operating results of oil and gas producers; (2) information supplemental to primary financial statements is required to permit assessment of the financial position and operating results of a company and to permit comparison of companies engaged in oil and gas producing activities; (3) development of an accounting method based on a valuation of proved oil and gas reserves would provide significant useful information, and steps should be taken to develop such a method; and (4) in these circumstances, requiring either successful efforts or full cost as a uniform method of accounting is unwarranted. Accordingly, the Commission is adopting rules that require disclosure in financial statements of supplemental financial and operating data (including information on future net revenues from production of proved oil and gas reserves) that apply regardless of the accounting method followed. The rules also specify the form of successful efforts method of accounting that oil and gas producers may follow. Alternatively, oil and gas producers may follow the full cost method, pursuant to rules that the Commission is proposing separately for public comment. Two other releases contain related proposals that would (1) conform the Commission's existing oil and gas disclosure requirements to the new financial statement rules and (2) require a supplemental earnings summary based on a valuation of proved oil and gas reserves. The rules published in this release apply in filings with the Commission pursuant to the Federal securities laws and in the preparation of accounts by persons engaged, in whole or in part, in the production of crude oil or natural gas in the United States for purposes of filing with the Department of Energy reports of energy information that are subject to the requirements of the Energy Policy and Conservation Act of 1975.

EFFECTIVE DATE: The rules published in this release shall be effective initially for full fiscal years ending after December 25, 1979.

FOR FURTHER INFORMATION CONTACT:

Richard C. Adkerson or James L. Russell 202-755-0222, Office of the Chief Accountant, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549.

SUPPLEMENTARY INFORMATION:

I. Summary of Conclusions

The Commission has concluded that significant improvements in the communication of financial position and operating results of oil and gas producers can be achieved through (1) adopting requirements for disclosure of specified historical information relating to oil and and gas producing activities; (2) adopting requirements for disclosure of information relating to future net revenues from estimated production of proved oil and gas reserves; and (3) developing a method of accounting that provides for recognition in financial statements of proved oil and gas reserves as assets and changes in proved oil and gas reserves in earnings.

DEVELOPMENT OF A NEW METHOD OF ACCOUNTING

The Commission has determined that development of new financial accounting measurement standards will be necessary to achieve meaningful reporting of earnings and financial position for oil and gas producing companies. Financial statements should seek to provide decisionmakers with information that is both relevant and reliable. The Commission assessed the various alternative methods of accounting considered during its proceeding on accounting for oil and gas producing activities on this basis.

The Commission has concluded that significant improvement in the measurement of assets and earnings in the primary financial statements of oil and gas producing companies can be achieved only through the development and implementation of an accounting method that reflects:

(1) Proved oil and gas reserves as assets in the balance sheet;

(2) Additions to proved reserves and changes in valuations of proved reserves in the income statement; and

(3) All costs associated with finding and developing additions to proved oil and gas reserves, together with all costs determined to be nonproductive during the current period, in the income statement.

The Commission is calling the accounting method to be developed on this basis "reserve recognition accounting" or "RRA."

The feasibility of developing RRA, however, is not assured at the present time because of the inherent imprecision of estimates of proved oil and gas reserves and the need to establish standards for valuations of these reserves in order to achieve an acceptable degree of reliability. Nevertheless, the Commission has concluded that efforts should be directed toward the development and implementation of RRA so that the goal of obtaining relevant and reliable financial statements of oil and gas producers can be realized, a goal that appears attainable on the basis of information now available to the Commission, notwithstanding the admittedly difficult problems to be resolved.

Accordingly, the Commission is initiating a series of steps seeking the development of RRA. Actions will be taken to gain experience with the public reporting of valuations of proved oil and gas reserves so that implementation problems can be identified and addressed on a timely basis. The approach will also allow flexibility for the Commission to revise its direction should circumstances indicate that revisions are necessary. The initial step in attempting to develop RRA is the adoption of a requirement for the disclosure in financial statements of the present value of future net revenue from the estimated production of proved oil and gas reserves, beginning in filings with the Commission that include fiscal years ending after December 25, 1979, as previously proposed in Release Nos. 33-5878 dated October 26, 1977 (42 FR 57651) and 33-5916 dated March 17, 1978 (43 FR 12334). (However, in Release No. 33-5967, published concurrently, the Commission proposes that these data be disclosed outside financial statements for years ending after December 25, 1978.) The required data are to be compiled using a prescribed methodology, *i.e.*, developing future net revenue information on the basis of present economic conditions and using a specified discount rate. Registrants will be permitted to disclose additional data on other bases to supplement the required data.

Concurrently, the Commission is publishing for comment proposed rules that require the presentation of a supplemental earnings summary relating to oil and gas producing activities prepared on the basis of RRA, beginning with filings with the Commission covering fiscal years ending after December 25, 1979 (*see* Release No. 33-5969, Aug. 31, 1978). The information generated and the experience gained in developing and disclosing valuation information on proved oil and gas reserves, resulting from the disclosure requirements described in this release and from the presentation of the supplemental RRA earnings summary, will provide the basis for the Commission to decide whether and, if so when RRA should be proposed as the required accounting method for the preparation of primary financial statements of oil and gas producing companies.

The Commission presently anticipates that this process of assessing the feasibility of RRA will continue for at least 3 years and could extend further. During the period that RRA is being developed and its feasibility assessed, the Commission has concluded that the disclosures of financial and operating data required by the rules published in this release will enable investors and government policymakers (a) to gain an understanding of the financial position and operating results of a company and (b) to compare the financial position and operating results of different companies. In view of its efforts to develop RRA, the Commission has concluded, as discussed in section V, "Traditional Oil and Gas Accounting Methods," that the benefits of requiring that all companies adopt one of the methods of accounting presently used in the petroleum industry do not justify the costs and confusion that would be attendant to such a requirement.

The traditional methods of accounting are inherently limited because of their failure to provide timely recognition of oil and gas reserves in assets and earnings reported in the financial statements. This limitation so severely affects the ability of primary historical cost financial statements to communicate relevant information on the assets and earning activities of oil and gas producers that requiring uniformity of accounting methods in this instance would not enhance significantly the ability of investors or government policymakers to gain an understanding of the operations of individual companies or to compare the operations of different companies. Meaningful analyses would focus almost exclusively on the supplemental data to be disclosed pursuant to the rules published in this release, even if uniform accounting methods were required.

The Commission, therefore, has determined that during this interim period companies may follow either the successful efforts method of accounting, as defined by Statement of Financial Accounting Standards No. 19, "Financial Accounting and Reporting by Oil and Gas Producing Companies" ("FAS 19"), published in December 1977 by the Financial Accounting Standards Board ("FASB"), or a prescribed form of the full cost method. The Commission is publishing in this release rules relating to the application of successful efforts accounting, which conform to the provisions of FAS 19, and is publishing in Release No. 33-5968 (Aug. 31, 1978) proposed rules that would govern the application of the full cost method for companies electing to follow that method. The rules specifying the application of the successful efforts and the full cost methods will become effective for full fiscal years ending after December 25, 1979.[1]

DISCLOSURE RULES

The Commission has concluded that data supplemental to financial statements are necessary for an adequate understanding of operating results and financial position, regardless of the method of accounting used to prepare and present financial statements of oil and gas producers. Thus, the Commission has adopted rules that require disclosure of the information summarized below:

(a) Quantities and annual changes in quantities of proved oil and gas reserves;

(b) Costs incurred in exploration, development, and production activities;

(c) Capitalized costs relating to oil and gas producing activities;

(d) Historical information on cash flow and value of transfers from producing oil and gas;[2]

(e) Cash flow and value of transfers ("net revenue") from estimated future production of proved oil and gas reserves, calculated on the basis of current economic conditions; and

(f) Present value of net revenue from estimated future production of proved oil and gas reserves using a ten percent discount rate.[3]

[1] The Commission had proposed that its financial statement rules become effective for fiscal years beginning after June 15, 1978. The rules adopted by the Commission in this release, however, become effective for fiscal years ending after Dec. 25, 1979. Thus, a company with a calendar fiscal year is required to adhere to these rules initially in its year-end 1979 financial statements.

[2] The term "value of transfers from producing oil and gas" refers to production sold or transferred to other operations (such as refining, transportation, chemical plants, or gas processing operations) of the producers. Such transfers are to be valued at estimated market prices. *See* newly adopted § 210.3-18(k)(4).

[3] In addition, Item 2 of Regulation S-K (§ 229.20) requires the disclosure of statistical data on oil and gas properties, including information on acreage owned, drilling activities, and production activities. *See* Release 33-5967, published concurrently, that proposes to revise the existing disclosures relating to oil and gas properties.

Although some of this information is prescribed by FAS 19, and certain of the information has been required under previous disclosure rules of the Commission, the disclosure requirements adopted by the Commission in this proceeding extend beyond prior requirements.

II. Background

The Commission's determinations published in this release, and the lengthy and extensive proceeding upon which they are based, are unique in many respects. They reflect the requirements of the Energy Policy and Conservation Act of 1975, 89 Stat 871 ("EPCA"), which directs the Commission to assure the development and observance of accounting practices to be followed in the preparation of accounts by oil and gas producers, as well as characteristics peculiar to the oil and gas industry.

Diversity in financial accounting practices of oil and gas producers has been a matter of controversy for many years.[4] Two primary accounting methods (along with variations of each) have been followed by oil and gas producers for public financial reporting: The successful efforts method, which is characterized by capitalizing only the costs directly related to productive properties; and the full cost method, under which all costs incurred in finding and developing oil and gas reserves within broad cost centers are capitalized.

Reflecting the interest of Congress in obtaining meaningful and reliable energy information, EPCA directs the Commision to assure the development and observance of accounting practices to be followed by oil and gas producers in the preparation of accounts as the basis for reports to be required by the Department of Energy ("DOE") in developing a reliable energy data base. EPCA further provides that, under certain circumstances, the Commission may rely on the accounting determinations of the FASB, the private sector organization to which the Commission looks for the initiative in establishing financial accounting standards, in lieu of promulgating rules on oil and gas accounting practices. In 1975, the FASB undertook to establish financial accounting and reporting standards for oil and gas producing activities.

EPCA required that such practices be developed by December 22, 1977,

[4] The history of past efforts by the Commission, the accounting profession, and the industry to address this issue is discussed in Release No. 33-5877 (42 FR 57661), Oct. 26, 1977.

V 43 / 177 SE 12 78

but the Commission was authorized to extend this deadline to afford the opportunity for interested persons to submit written comment on whether the Commission should recognize or rely on accounting practices established by the FASB. In recognition of this deadline, the Commission published for public comment proposed rules relating to financial accounting measurement standards in Release No. 33-5861 dated August 31, 1977 (42 FR 44972), and related disclosure standards in Release No. 33-5877 dated October 26, 1977 (42 FR 57661). The proposed rules, so as not to confuse or conflict with the then ongoing FASB project, reflected in substance the Exposure Draft of a Proposed Statement of Financial Accounting Standards, "Financial Accounting and Reporting by Oil and Gas Producing Companies," published by the FASB in July 1977. This Exposure Draft proposed a form of the successful efforts methods of accounting as the uniform method for all enterprises engaged in oil and gas producing activities.

On December 5, 1977, the FASB issued FAS 19, effective initially for fiscal years beginning after December 15, 1978. The provisions of FAS 19 are essentially the same as those contained in the Exposure Draft. The Commission, in Release No. 33-5892 dated December 22, 1977 (43 FR 877), requested public comment on whether it should rely on the determinations of the FASB or adopt other rules to establish oil and gas accounting practices pursuant to the Federal securities laws and to EPCA. As authorized by EPCA, the Commission extended the deadline for the development of these accounting practices. Previously, in response to a large number of requests, the Commission had indicated its intention to conduct a public hearing in connection with its review to determine the appropriate accounting and disclosure standards for oil and gas producers.

The Commission's proceeding was marked by intense interest and extensive participation by advocates of particular points of view relating to oil and gas accounting standards. The Commission has received a large number of written submissions, including many comprehensive analyses of issues under consideration. It has also included in its public file (No. S7-715) for this proceeding the public record developed by the FASB during its proceeding leading to FAS 19, the public record submitted by DOE in connection with its inquiry into this matter, and the public files of previous proceedings on oil and gas accounting of the Commission,[5] the Accounting Principles Board ("APB") of the American Institute of Certified Public Accountants, and the Federal Power Commission. Members of the Commission and its staff heard testimony from 97 witnesses, compiling over 2,700 pages of transcript, during 12 days of the public hearing, which was conducted both in Washington, D.C. and Houston, Tex. Included among those participating in the proceeding were managers of oil and gas producing companies, academics, research consultants, representatives of the investment community, public accountants, and the FASB.

EPCA requires that the Commission consult with DOE, the Federal Energy Regulatory Commission, and the General Accounting Office ("GAO") with respect to accounting practices to be developed. Pursuant to this directive, an "EPCA Consultation Group" was formed which met periodically from 1976 through early 1978. Both DOE, after independently soliciting written comment and conducting a 2-day hearing, and GAO subsequently submitted formal comments in connection with the Commission's rulemaking proceeding.

The Commission's determinations in this matter, as described in this release, reflect its independent conclusions that resulted from this extensive deliberative process. They represent, in the Commission's view, the most effective and appropriate means of providing information for informed investment decisions relating to the oil and gas producing industry and for informed decisions by Government policymakers. Thus, these determinations are in keeping with the goals and requirements of both the Federal securities laws and the applicable Federal energy laws.

The Commission has long been concerned about the diversity of accounting practices in the petroleum industry and the availability of relevant financial information to investors in securities of companies engaged in oil and gas producing activities. The primary impetus for initially undertaking this proceeding, however, was the mandate of EPCA that the Commission, for purposes of establishing a reliable energy data base, assure the development of accounting practices to be followed by oil and gas producers. The statutory requirements of EPCA distinguish this proceeding from the usual role of the Commission in the process of establishing financial accounting standards.

The Federal securities laws authorize the Commission to prescribe accounting practices to be applied in the preparation and presentation of financial statements and other financial data to be included in filings with the Commission pursuant to such laws. In 1938, the Commission, in accounting series release ("ASR") No. 4 (11 FR 10913), stated its administrative policy with respect to financial statements included in these filings. ASR No. 4 provides that the Commission presumes that financial statements prepared in accordance with accounting principles for which there is no substantial authoritative support are misleading, notwithstanding disclosure of those principles. If there is a difference of view between a registrant and the Commission, the Commission will accept disclosure in lieu of a change in the financial statements only if there is substantial authoritative support for the proposed accounting principle and the Commission has not expressed a contrary view in an official release. Thus, rather than exercise its extensive authority to adopt specific accounting principles and methods, the Commission elected in large part to accept, in the first instance, principles already having substantial precedent—accounting principles that are generally accepted in the private sector.

The FASB was created in 1973 as the first independent, full-time body designated by the accounting profession to formulate and issue financial accounting and reporting standards. Previously, accounting principles were established by standard-setting bodies within the American Institute of Certified Public Accountants. On December 20, 1973, the Commission published ASR No. 150 (39 FR 1260), in which it reaffirmed its policy of relying, in the first instance, on the private sector for the establishment of accounting principles and recognized the then newly established FASB as the entity designated by the private sector to have that responsibility. That release states in part:

> For purposes of this policy, principles, standards and practices promulgated by the FASB in its statements and interpretations will be considered by the Commission as having substantial authoritative support, and those contrary to such FASB promulgations will be considered to have no such support (footnotes omitted).

The Commission's policy recognizes that the FASB operates to establish accounting standards, but it does not involve a delegation of the Commission's substantive rulemaking authority to the FASB. While the Commission recognizes that, in general, it is most desirable for the private sector rather than the Government to develop accounting standards, the Commission retains the final authority under the Federal securities laws to promulgate rules, including financial accounting standards, that govern the preparation and presentation of financial statements issued by publicly owned companies, regardless of the FASB's determinations.

[5] See Release Nos. 33-5343 (38 FR 1747), Dec. 18, 1972, and 33-5427 (38 FR 28948), Oct. 4, 1973.

The provisions of EPCA, as discussed in section VI of this release, "Reporting to the Department of Energy," altered the Commission's traditional relationship with the FASB. In contrast to the discretionary authority to prescribe financial accounting practices vested in the Commission by the Federal securities laws, EPCA requires that the Commission assure the development and observance of accounting practices for the oil and gas producing industry. The inseparable nature of the issues involving oil and gas accounting practices in terms of reporting to DOE and to investors resulted in the Commission's Determination that it should proceed to adopt rules under the Federal securities laws as well as under EPCA.

Although EPCA permits the Commission to rely, under certain circumstances, on accounting practices developed by the FASB, the Commission can do so (1) only if it is assured that the accounting practices would be observed by oil and gas producers to the same extent as would result if the Commission had prescribed rules and (2) after the Commission had provided an opportunity for public comment on the FASB's conclusions. Thus, under EPCA the Commission was required to conduct a review of FAS 19 that is unique with respect to the Commission's traditional role in the process of establishing financial accounting standards.

Several commentators in this proceeding took a position that the question of whether the Commission should support the conclusions of the FASB on oil and gas accounting ought to be governed by the Commission's assessment of the adequacy of the process followed by the FASB, i.e., the Commission should seek to satisfy itself that the FASB was exposed to all relevant background information and evidence and, in reaching its conclusions, all points of view were heard and considered. As in all cases in which it determines to promulgate rules, however, the Commission has been required in this matter to reach independent conclusions on the substantive issues before it.

The Commission's conclusions in this proceeding, therefore, should not be considered an expression of dissatisfaction with the FASB's standard-setting procedures or with its deliberations on this subject. Even though the Commission's judgment differs from that of the FASB in certain respects in this instance, the Commission views neither the proceeding it undertook involving oil and gas accounting nor the outcome as evidencing any change in the Commission's basic policy of looking to the FASB for the initiative in establishing and improving accounting standards.

The Commission has recently reaffirmed its belief that this initiative belongs in the private sector, subject to oversight by the Commission, and its support of the FASB as the body in the private sector primarily responsible for undertaking such initiative.[6] The Commission intends to maintain its support of the activities of the FASB and encourages it to continue the aggressive pursuit and resolution of complex financial accounting and reporting issues. As in the past, the Commission will continue to participate in the standard-setting process in its traditional active oversight capacity in accordance with its policy of looking to the FASB for the initiative in addressing financial accounting issues.

III. Basis of Conclusions

The discovery of oil and gas is the most significant event in exploration, development, and production activities. Traditional accounting methods do not provide for recognition of this event in recording the assets or earnings of companies engaged in this industry, and, as a result, do not provide for a meaningful presentation of operating results or financial position. The Commission is seeking to remedy this limitation, which applies equally to the successful efforts and the full cost methods, by striving to develop an accounting method (reserve recognition accounting) that would recognize proved oil and gas reserves as assets and that would recognize changes in proved oil and gas reserves in earnings as the changes occur.

A fundamental consideration of the Commission in this proceeding has been to assure that information is communicated about the assets of an oil and gas producing company. The FASB, in connection with its project on the "Conceptual Framework for Financial Accounting and Reporting," has proposed the following definition of "assets" for financial accounting purposes:

> Assets are financial representations of economic resources—cash and future economic benefits—the beneficial interest in which is legally or equitably secured to a particular enterprise as a result of a past transaction or event affecting the enterprise (footnote omitted). Economic resources benefit a business enterprise by increasing, directly or through use in earning activities, future net cash inflows to the enterprise. A resource other than cash must have three characteristics to be represented as an asset in the financial statements of an enterprise: (a) The resource must, singly or in combination with other resources, contribute directly or indirectly to future cash inflows (or to obviating future cash outflows), (b) the enterprise must be able to obtain the benefit from it, and (c) the transaction or event giving rise to the enterprise's right to or interest in the benefit must already have occurred.[7]

Proved oil and gas reserves constitute the most important asset for most companies in the oil and gas producing industry.[8] An investor or a government policymaker making decisions based on past activities and expectations of future prospects of companies engaged in oil and gas producing activities requires information on proved oil and gas reserves. This information, accordingly, must be emphasized prominently in financial reporting.

The primary focus of financial reporting is information relating to earning activities.[9] Although participants in the securities markets and government policymakers base decisions on various types of information, including but certainly not limited to publicly reported financial information, meaningful presentation of earnings is a primary goal of financial reporting.

Several adverse consequences occur if reported earnings are not regarded as meaningful. In the first place, the confidence of investors and government policymakers in the information conveyed by financial reporting is eroded to the extent that reported earnings are regarded as not relevant. This may affect confidence in the securities markets and the willingness of investors to hold or acquire equity securities. Government policymakers may seek to require needed information through more burdensome reporting requirements.

Further, reported assets and earnings have significance in other respects. Financial accounting data are often used as the basis for debt and other contractual arrangements. Managers of companies for various reasons place importance on reported financial

[6] "Securities and Exchange Commission Report to Congress on the Accounting Profession and the Commission's Oversight Role" (Washington, D.C.: U.S. Government Printing Office, 1978), pp. 29-31.

[7] Exposure Draft of Proposed Statement of Financial Accounting Concepts: "Objectives of Financial Reporting and Elements of Financial Statements of Business Enterprises" (Stamford, Conn.: FASB, December 1977), paragraphs 47-48.

[8] The FASB indicated that oil and gas reserves qualify as assets under its proposed definition of assets discussed above; however, the FASB noted that defining reserves as assets does not necessarily determine that reserves should be included in financial statements or how reserves should be measured if they are included in financial statements. As discussed below, the FASB commented that value accounting, in its view, was not a realistic alternative at this time for measuring earnings of an oil and gas producing company. (Comments of the FASB, May 31, 1978, pp. 50-54 in File S7-715.)

[9] FASB Exposure Draft: "Objectives of Financial Reporting and Elements of Financial Statements of Business Enterprises," paragraph 14.

results, which frequently are the basis for evaluation of their performance and for their compensation. If financial accounting fails to provide reported earnings that convey material information, managers may be under further temptation to take actions to maximize reported financial results even if these actions are not economically justified or in the interests of shareholders.[10]

Financial accounting has inherent limitations and, consequently, undue emphasis on a single net income amount by investors and by government policymakers should be avoided. The Commission, nevertheless, believes that it is essential to make reported earnings as meaningful as possible in communicating economic information to decisionmakers.

The relevance of reported assets and earnings of companies engaged in this industry would be vastly enhanced if oil and gas reserves were recognized as assets and changes in reserves were included in earnings. An acceptable level of reliability, however, is necessary before data should be required in public reports, and an even higher degree of reliability is necessary before it should be incorporated into the primary financial statements.

Oil and gas reserves cannot be measured directly—they can only be estimated—and such estimates cannot achieve high precision in many cases. Furthermore, placing a valuation on estimated quantities of oil and gas reserves involves additional estimates that are also imprecise. The Commission has concluded that supplemental disclosure of valuation information on oil and gas reserves in accordance with its newly adopted rules is appropriate even though the information cannot be precisely determined, as discussed in section VII, "Description of the Rules."

Although valuations of proved oil and gas reserves are commonly developed and used in financing arrangements, in transactions involving purchases and sales of proved properties, and for internal managerial purposes, few public disclosures of these data have been made previously. The Commission does not, consequently, have adequate information now available to support a conclusion that the data are sufficiently reliable to be used as the basis of primary financial statements at this time. Because of the potential to enhance significantly the usefulness of financial data of oil and gas producers through incorporating valuations of reserves in financial statements, the Commission believes that efforts should be directed toward (a) obtaining public disclosure of these data so that their reliability can be ascertained, and (b) striving aggressively to develop a workable method of accounting based on the data.

The actions taken by the Commission as described in this release are the first in a process that must be flexible in order to provide an opportunity to address problems as development of a valuation system of accounting for oil and gas producing activities proceeds. Progress must be timely because of the continuing need for relevant financial statements in this industry.

REVENUE RECOGNITION

Traditional accounting methods in the oil and gas producing industry are based on a revenue-recognition convention known as the "realization" principle, a principle that is embodied substantially throughout generally accepted accounting principles. APB Statement No. 4 contains the following discussion of the realization principle:

> Most types of revenue are the joint result of many profit-directed activities of an enterprise and revenue is often described as being "earned" gradually and continuously by the whole of enterprise activities * * *. All of the profit-directed activities of an enterprise that comprise the process in which revenue is earned may be called the *earning process.*
>
> Revenue is conventionally recognized at a specific point in the earning process of a business enterprise, usually when assets are sold or services are rendered. This conventional recognition is the basis of the pervasive measurement principle known as realization * * *. Revenue is generally recognized when both of the following conditions are met: (1) The earning process is complete or virtually complete, and (2) an exchange has taken place.[11]

The Commission has concluded that the earning process in exploring for and then producing oil and gas differs significantly from that of most other industries and that this justifies different treatment within the existing accounting framework.[12] In most industries the cost of producing or acquiring an asset or product is normally related directly to the revenue that may be expected to be derived from the product or asset. Consequently, the cost of an asset when it is acquired may be expected to provide a reasonable reflection of its value, at least under normal conditions. On the other hand, in oil and gas exploration, a great deal may be spent on a property that has no value at all or, conversely, relatively small expenditures may result in the discovery of very valuable oil and gas reserves. Thus, the cost of exploring for and developing oil and gas reserves has no necessary relationship to the value of these reserves, except perhaps on an industrywide basis in the long run. In other words, in most industries the value to the business at the time of making an investment is appropriately represented by costs incurred, even though values of assets in all industries obviously change over time.[13] This condition does not exist in the oil and gas producing industry.

Besides the fundamental difference in the nature of the earning process, another distinguishing characteristic of the petroleum industry is that the marketability of oil and gas at prices above a minimum level appears reasonably assured for the present and, absent a radical technological innovation, for the foreseeable future. As commodities, oil and gas are each relatively homogeneous and the supply of each, while unknown, is limited. These two factors are likely to continue to cause upward pressure on prices (again, as long as no developments reduce demand significantly).

Thus, because (1) the earning process in this industry has discrete movements, based on information gained at the point of discovery of reserves attributable to a particular property, or at the point of impairment of the value of the property as a result of gaining information through drilling or otherwise, and (2) the marketability of oil and gas appears relatively assured under existing economic conditions, the Commission believes that an exception to the principle of recognizing revenue only upon realization is justified and, moreover, is required to achieve meaningful reporting of assets and earnings.

[10] However, as discussed in section V, "Traditional Oil and Gas Accounting Methods," the Commission believes the focus of the objectives of financial reporting should be the information requirements of users of financial data.

[11] "Statement No. 4—Basic Concepts and Accounting Principles" (New York, N.Y.: American Institute of Certified Public Accountants, Inc., 1971), paragraphs 148-153 (emphasis in the original). The APB, the predecessor to the FASB as the private sector body involved in establishing financial accounting standards, issued "Statements" and "Opinions." APB Statements, unlike Opinions, do not establish authoritative standards but rather present the APB's conclusions on certain accounting issues.

[12] Revenue under existing generally accepted accounting principles is recognized in certain cases on a basis other than the realization convention. APB Statement No. 4 indicated: "For example, on long-term construction contracts revenue may be recognized as construction progresses. This exception to the realization principle is based on the availability of evidence of the ultimate proceeds and the consensus that a better measure of periodic income results. Sometimes revenue is recognized at the completion of production and before a sale is made. Examples include certain precious metals and farm products with assured sales prices. The assured price, the difficulty in some situations of determining costs of products on hand, and the characteristic of unit interchangeability are reasons given to support this exception." (Paragraph 153.)

[13] As discussed in section IV, "Scope of Conclusions," the Commission has required disclosure of replacement cost information in response to measuring the impact of changing prices on financial statements in general.

DEVELOPMENT OF RRA

The plans for attempting to develop RRA involve specific actions to take place sequentially. The first step will be an evaluation of the disclosures in response to the rules published in this release, including the present value information relating to estimated future production of proved oil and gas reserves (*see* section VII, "Description of the Rules").

Concurrently, the Commission is publishing in a separate release (Release No. 33-5969) proposed rules that would require registrants to prepare a supplemental earnings summary of oil and gas producing activities on the basis of RRA, thereby incorporating the present value information on oil and gas reserves into a summary income statement format. The RRA supplemental earnings summary would involve a presentation of the results of oil and gas producing activities separated into three elements:[14]

(a) *Results of current production activities* would reflect the proceeds of current sales and the value of transfers of oil and gas less current lifting costs and amortization on a unit-of-production basis of the aggregate valuation of proved oil and gas reserves.

(b) *Results of current exploration and development activities* would reflect the valuation of proved oil and gas reserves added during the current period as a result of exploration, development, and improved recovery programs less the exploration and development costs associated with the proved reserves added or determined to be nonproductive during the current period.

(c) *Revisions to valuations* would include changes in valuations of proved oil and gas reserves added in previous periods as a result of revisions in estimated quantities and production rates, revisions to reflect changes in the prices of oil and gas and in the costs of development and production, and increases in the valuations resulting from the passage of time as a result of applying the discounted cash flow method of valuation.

All other accounting principles would be applied in accordance with existing generally accepted accounting principles. The supplemental RRA earnings summary would, therefore, not be prepared on a full "current value" basis, because the valuation of assets other than proved oil and gas reserves (and those directly related to reserves, i.e., mineral resource assets[15]) and the valuation of liabilities would be unchanged from the primarily historical cost basis embodied in generally accepted accounting principles.

Furthermore, the valuation of proved oil and gas reserves, as noted above, would be required to conform to the methodology prescribed by the Commission. The valuation, consequently, would not result necessarily in a "best" estimate of the fair market value of a company's proved oil and gas reserves, which would require consideration of expected future economic conditions. But, in the Commission's view, a valuation on the prescribed basis will be representative of the market value of proved oil and gas reserves derived on a relatively objective and uniform basis.

A supplemental RRA earnings summary, if the proposed rules are adopted, would be required initially in filings with the Commission that include fiscal years ending after December 25, 1979. While the proposed rules provide a general format of the proposed presentation, the Commission views the proposals as establishing general rather than specific guidelines in this regard. An extended comment period, through April 30, 1979, is provided to permit registrants and users of financial information to consider their experiences with the initial public disclosure of valuations of proved oil and gas reserves.

If the Commission determines to require the supplemental RRA earnings summary, it will evaluate the usefulness of the presentation in terms of the relevance and reliability of information it conveys. The Commission will ultimately determine whether it should propose RRA as the basis of the primary financial statements of oil and gas producers. A prediction of the exact timing for these further considerations would be speculative at this point; however, it appears that implementation could not take place prior to 1981.

To assist the Commission and its staff in evaluating the experiences with disclosure of proved oil and gas reserve valuation data, the Commission will initiate steps toward the appointment of an advisory committee. This advisory committee would meet with the staff of the Commission to consider implementation problems, assess experiences in preparing and using the valuation information on oil and gas reserves, and assist in soliciting and evaluating public comments on the issues involved in this project. The advisory committee would be expected to include representatives of oil and gas producing companies, independent petroleum engineering firms, the investment community, academics, and public accounting firms. In addition, the FASB and Government agencies with an interest in this project would be invited to participate in or observe the work of the advisory committee.[16]

EXISTING ACCOUNTING PRACTICES

The Commission considered whether it should require that oil and gas producing companies adopt a uniform method of accounting while RRA is being developed. The form of the successful efforts method of accounting prescribed by FAS 19, the full cost method of accounting now followed by many companies, and variations of these methods were considered. The Commission evaluated the benefits of a uniform accounting method from the standpoint of providing useful information to investors and policymakers to assist them in gaining an understanding of the operations of a company and in comparing the operations of companies in the industry and of companies in the petroleum industry with companies in other industries. The Commission considers that, as a general rule, a uniform application of accounting methods is and should be required to enhance comparability. It has concluded otherwise in this situation because the traditional oil and gas accounting methods, none of which provide timely recognition of reserves in the primary financial statements, do not adequately communicate relevant information concerning assets and earnings.

Financial statements of oil and gas producing companies prepared under any of the traditional accounting methods fail to provide investors and Government policymakers sufficient relevant information to make informed decisions. Information presented to the Commission in this proceeding indicated that lenders base their decisions almost entirely on information other than that reported in the basic financial statements and that securities analysts also look primarily to such other information. Because historical costs do not furnish meaningful information concerning economic resources of oil and gas producing companies, the data presented in the balance sheet and income statement do not adequately assist investors in assessing prospective cash flows. Relevance, one of the critical qualitative characteristics of financial reporting, is clearly lacking in the presentation of assets and net income in financial statements of companies engaged in oil and gas exploration.

[14] Valuations of oil and gas reserves would be computed following the methodology reflected in the disclosure rules published in this release, i.e., using current prices of oil and gas, current costs of development and production, and a specified 10 percent discount rate (*see* new § 210.3-18(k)(6)).

[15] *See* Staff Accounting Bulletin ("SAB") No. 10 dated July 27, 1976 (41 FR 13596) for the Commission staff's definition of mineral resource assets for the oil and gas producing industry, as amended by SAB No. 23 dated August 31, 1978, and published concurrently with this release.

[16] The degree of the involvement of the Commission and of the FASB in those future efforts is discussed further in section IV, "Scope of Conclusions."

V 4 3 / 1 7 7

A consequence of these limitations of traditional accounting is that application of a uniform presently accepted accounting method in the petroleum industry would not provide any appreciable improvement in the ability of investors or policymakers to compare companies. Meaningful comparisons must be based almost exclusively on data other than those reported in traditional primary financial statements, regardless of whether the same or different methods of accounting are used.

Similarly, even though the historical cost and revenue realization concepts reflected in traditional oil and gas accounting methods are consistent with financial accounting concepts used in other industries, adherence to a traditional method does not achieve interindustry comparability. The application of these accounting conventions to the oil and gas producing industry so significantly detracts from the relevence of information communicated by the accounting process that the primary financial statements are of little use in understanding the financial position and operating results of oil and gas producers. A uniform traditional accounting method, accordingly, would not enhance interindustry comparability, notwithstanding that the accounting conventions may be essentially the same as those used in other industries.

The Commission believes that the disclosures prescribed by its newly adopted rules encompass the relevant information on oil and gas producing activities for assessing the past activities and the future prospects of a company and for comparing different companies. The Commission has, therefore, concluded that little benefit in terms of disclosure of useful information would be achieved by requiring a uniform traditional method of accounting or a variation of a traditional method.

Any accounting change, moreover, has certain economic effects, including the costs of changing records and financial statements, the impact on management planning, the costs of communicating the new information to investors and analysts, and the costs of revising debt and other contractual agreements that contain provisions based on financial accounting data. Many commentators in this proceeding took a position that a change to the successful efforts method of accounting would, in addition to the matters discussed above, have an impact on the access to and cost of capital for companies that now follow the full cost method, thereby placing a burden on competition in the petroleum industry and reducing domestic exploration for new supplies of oil and gas.

The Commission believes that the potential competitive impact of adopting a uniform method of accounting for the petroleum industry is not likely to be so substantial as to preclude its mandating a uniform method if uniformity would enhance the ability of investors and policymakers to understand the financial results of a company and to compare companies. On balance, however, the Commission has concluded that selecting one of the traditional methods of accounting as a uniform method for the oil and gas producing industry is not appropriate. In addition to the costs of changing to a uniform method, the Commission has concluded there would be little, if any, benefit from uniformity in this case, as discussed previously. The information that will be provided to investors and to government policymakers as result of the disclosure rules adopted by the Commission will be sufficient to enable an analysis of the financial statements of a company and comparisons of the financial statements of different companies. Moreover, the Commission's efforts to develop the RRA method further signify the desirability of avoiding the costs and confusion that adoption of a uniform standard would entail at this time.

IV. Scope of Conclusions

Certain aspects of the Commission's decision on financial reporting and accounting by oil and gas producing companies may be incorrectly perceived as having broader implications for other areas of financial accounting. In this regard, the Commission:

(1) Affirms its long-standing view that uniform accounting principles should be applied by all companies to similar events and transactions; and

(2) Emphasizes that its conclusion to endeavor to establish an accounting method that will measure assets and earnings in financial statements on the basis of valuations of proved oil and gas reserves does not reflect a determination that the primarily historical cost basis of the present accounting model should be abandoned in favor of some form of current value accounting.

Uniformity of Accounting Methods

Financial accounting seeks to communicate the substance of events and transactions. When similar events and transactions are involved in the operations of different companies, the companies should employ the same accounting methods so that any differences in their reported results of operations and financial position reflect actual differences and not differences caused by applying different accounting methods.

Investment decisions involve an allocation of available capital among alternative investment opportunities. Inherent in this process is a comparison of the securities of different companies. A fundamental goal of financial reporting is the communication of information to assist investors in this comparison. The Commission has long believed that comparability of financial information can and should be enhanced by requiring that companies follow uniform accounting methods for similar events and transactions.

In addition, the Commission does not believe that the occurrence of adverse economic effects with respect to certain companies, such as effects on the ability of companies to raise capital or to compete with other companies, necessarily precludes a requirement of a uniform accounting method. To the contrary, if the uniform accounting method provides relevant information to investors, such economic effects would likely reflect a more efficient allocation of capital.

In this proceeding, the Commission has determined that efforts should be undertaken to seek development of a uniform method of accounting based on using valuations of proved oil and gas reserves. Until this method can be developed, the Commission has concluded that the supplemental disclosures it is prescribing will adequately serve the needs of investors and government policymakers for financial information on oil and gas producing activities. If complete incorporation of RRA into the primary financial statements is ultimately found not to be feasible, the Commission believes that further consideration of financial accounting standards for this industry will be required to augment the supplemental data because it views neither the successful efforts method nor the full cost method as acceptable for the long term. Speculation on these further considerations would not be appropriate in view of the rapidly evolving nature of financial accounting and reporting concepts.[17]

Current Economic Information in Financial Reporting

The Commission has been concerned in recent years about the ability of the existing accounting model to communicate meaningful information in the face of current economic conditions, which have included, in particular, rapid increases in the prices of specific goods and services. In an early statement on this matter, the Commission stated in part:

> While a continuation or acceleration of the rate of price-level change might require

[17] These considerations would have the benefit of the results of the FASB's deliberations on the conceptual framework project, discussed below.

S E 1 2 7 8

a fundamental change in the basic accounting measurement model used in preparing financial statements, it would be premature for the Commission to suggest such a change at this time. Careful consideration of the many implications of such a major step would be necessary both by the Financial Accounting Standards Board and by the Commission.[18]

At approximately the same time, the FASB issued a discussion memorandum on the objectives of financial statements in connection with a major, continuing project of developing a "Conceptual Framework for Financial Accounting and Reporting." This project, which is expected to "set the course for financial accounting and reporting for many years," [19] has been divided into parts that include (1) objectives of financial reporting by business enterprises; (2) elements of financial statements of business enterprises, such as assets, liabilities, revenue, expense, etc.; (3) qualitative characteristics of financial information, such as relevance, reliability, and comparability; (4) basis of measurement of the elements of financial statements; and (5) display of information in an earnings statement. In addition, the FASB has in progress two related efforts: a project to develop criteria for materiality decisions in financial reporting and a proposed project to develop criteria for accounting recognition in financial statements, e.g., to identify the time at which revenues and expenses of earning activities should be recognized.

The FASB has indicated its intent to introduce any major changes in measurement concepts that may result from its conceptual framework project by initially requiring supplementary disclosures rather than by changing the basic financial statements. The FASB noted that the supplementary disclosure approach would apply to any measurement it may determine is needed to show the effects of inflation on a business enterprise. The FASB stated:

> One reason for the Board's preference for the supplementary disclosure route to introduce new measurement concepts is that it provides an opportunity for preparers, auditors, and users of financial statements to gain experience under less rigid guidance than would be required if the changes were to be made immediately in the basic financial statements themselves. That experience may provide a basis for a subsequent Board decision to change the measurements in the basic statements, or it could suggest that no such change should be made.[20]

In August 1975, the Commission expressed its continuing concern about the impact on individual companies of changing prices attendant to the high rate of inflation. In publishing proposed rules to require disclosure of certain replacement cost information as a means of supplementing historical cost financial statements, the Commission stated in part:

> Under current conditions, the Commission is not prepared to conclude that the basic accounting model needs to be changed to reflect replacement cost or other current value data in lieu of historical cost data in the financial statements. In addition, it notes that this is one of the matters being investigated by the Financial Accounting Standards Board in connection with the Board's inquiry into the conceptual framework for financial statements. The Commission believes that such a fundamental change in the basic accounting model should only be made, if at all, after such a study. At the same time, it believes that the absence of any current cost or value information is a significant shortcoming for users of financial data about business activities. * * *[21]

After receiving public comment on the proposed rules, the Commission adopted a rule[22] that requires certain registrants to disclose in financial statements filed with the Commission current cost information concerning their inventories and productive capacity. The Commission indicated that these new requirements should not be considered a prejudgment of the FASB's conceptual framework project and that data disclosed in response to the disclosure rules should assist the FASB in its study. Although the Commission is now assessing the disclosures made in response to the replacement cost disclosure rule, it continues to believe that the disclosure of relevant current economic information, including the current costs of assets as well as the current costs of using assets, is essential to meaningful financial reporting in the existing business environment.

The Commission has not, however, determined that these concerns should necessarily lead to the general implementation of a form of current value accounting. The Commission has reservations about the kinds of subjective decisions that would be injected into financial statements by adopting a current value system.

Notwithstanding its views on current value accounting in general, the Commission considers the operations and economic environment of oil and gas producing companies to be sufficiently different from that of other industries to manifest the need for a departure from traditional concepts embodied in generally accepted accounting principles.[23] The petroleum industry has been faced with significant increases in the costs of its operations because of inflation and other current economic circumstances, but the Commission's conclusions concerning appropriate accounting standards for these activities were influenced primarily by other factors (even though RRA would provide more effective disclosure of the increasing costs of finding and developing oil and gas than do traditional accounting methods). The Commission believes that RRA would effectively portray the economic resources and the earning process of oil and gas producers during periods of stable or declining prices as well as during periods of rising prices.

The Commission's conclusions are therefore limited in scope to accounting for the oil and gas producing industry. Notwithstanding the limited nature of its conclusions, the Commission has been keenly aware that its deliberations in this proceeding have involved broader issues of financial reporting, many of which, such as judging the merits of particular accounting methods on the basis of the relevance and reliability of the information they provide to investors, are presently under study by the FASB in connection with the conceptual framework project. Its conclusions, accordingly, reflect its views on fundamental matters of significance to the conceptual framework of financial reporting. The Commission does not, however, view its actions as being inconsistent with the tentative conclusions of the FASB in this regard. The Commission will carefully consider in its future deliberations on oil and gas accounting, as well as on other financial reporting matters, the FASB's conclusions reached during the course of its conceptual framework project.

Since its deliberations on oil and gas accounting, the FASB has begun consideration of issues of financial reporting beyond those pertaining to financial statements. The FASB, in its comments to the Commission during this proceeding, stated in part:

> At the time that Statement No. 19 was being debated, the Board's principal focus was on financial statements; since that time, the Board has begun to focus on the broader area of financial reporting in general, and in its December 1977 exposure draft ("Objectives of Financial Reporting and Elements of Financial Statements of Business Enterprises") sets forth proposed objectives of financial reporting, not just financial statements. Information disclosed in a financial report outside of the financial statements is likely to be subject to a lesser standard of objectivity and verifiability than information presented in the financial statements themselves. Therefore, disclosure of estimated cash flows relating to oil and gas reserves is consistent with those objectives and may well be an appropriate matter for consideration by the FASB after

[23] As discussed in section III, "Basis of Conclusions."

its project on financial reporting is completed.[24]

The Commission supports this broader orientation of the FASB. It believes that the goal of providing useful financial information to investors requires that standards for preparing financial statements and supplementary information be closely coordinated. The standard-setting process should not distinguish between financial statements and other financial disclosures as in the past.

The Commission considers its conclusions in this proceeding to be consistent with the concept of providing a total package of useful financial information to investors (and to Government policymakers as well). The Commission's determinations, while seeking to improve the usefulness of primary financial statements, are premised on the ability of companies to convey meaningful information in the form of supplemental disclosures.

The Commission would welcome further initiatives or participation by the FASB in the continuing efforts relating to financial reporting for oil and gas producing activities. Because of the FASB's unique expertise in financial reporting matters, its views will be given careful consideration. If the FASB decides to take the initiative on future considerations of financial reporting by oil and gas producing companies, the degree of involvement required by the Commission will be correspondingly diminished.

V. Traditional Oil and Gas Accounting Methods

During its proceeding, the Commission considered a number of alternative approaches, including the financial accounting standards promulgated in FAS 19. The Commission also considered whether the purposes of the Federal securities laws and EPCA required or made appropriate a rule mandating that all oil and gas producing companies adopt a uniform method of accounting other than RRA during the period prior to its development.

The following are the primary alternative financial accounting measurement approaches suggested by commentators and considered by the Commission:

1. The successful efforts method of accounting ("SE"), as prescribed by FAS 19 as the uniform method of accounting for all oil and gas producing companies.
2. The full cost method of accounting ("FC") as it is now commonly practiced.
3. An approach using projects or areas-of-interest as cost centers, with the cost center being the determining factor in the decision of whether to capitalize costs incurred in exploration activities.

Successful efforts accounting

SE is the traditional accounting method in the petroleum industry. Except for the costs of acquiring properties, it requires a direct relationship between costs incurred and specific oil and gas reserves discovered before costs are identified with assets. Although many variations of SE have existed in practice, FAS 19 established a uniform SE method.[25]

Under this method the nature of the cost (rather than the nature of the cost center) is the determining factor in the capitalization/expense decision. Exploration expenditures, except for those that directly result in the acquisition of assets such as interests in properties and wells and related equipment, are charged to expense regardless of whether the property with which they can be ultimately associated is productive or nonproductive. In summary, FAS 19 requires that SE be applied in the following manner:

1. Exploratory costs other than acquisition of unproved properties and drilling productive wells are charged to expense as incurred. Such costs include nonproductive exploratory wells (exploratory "dry holes"), geological and geophysical expenditures, and delay rentals and similar expenditures to carry or maintain interests in oil and gas leases.
2. Costs of acquiring properties are capitalized initially; however, losses are recognized if the values of unproved properties are determined to be impaired on the basis of a required periodic assessment.
3. Capitalized acquisition costs are amortized on the unit-of-production method using total proved oil and gas reserves. Capitalized exploration and development costs are amortized using proved developed oil and gas reserves.
4. Production (lifting) costs together with amortization of the capitalized acquisition, exploration, and development costs become the cost of oil and gas produced.
5. Revenue is recognized only upon sales to outside parties. Sales may occur as oil and gas are produced in the field, after subsequent refining or other manufacturing processes, or after transmission to distributors or end-users.

Comments in support of SE

SE was supported by the FASB and a large number of other commentators during the Commission's proceeding. They asserted that SE, as prescribed by FAS 19, provides for the petroleum industry a uniform accounting method that is consistent with the present accounting framework for companies in other industries and with accounting in the other extractive industries. These commentators stated that SE more clearly reflects the economics of oil and gas producing activities by accounting for nonproductive exploration costs as losses rather than assets and that, therefore, SE results in reported earnings that reflect, to the extent possible within the present historical cost framework, the risks and returns resulting from current operations. The FASB said that an objective of earnings communication consistently reflected in its decisions is risk portrayal, and FAS 19 is thus consistent with its earlier pronouncements on research and development costs, contingency losses, development stage companies, and foreign currency translation.

Further, those supporting FAS 19 maintained that differences in accounting are appropriate only if significant differences in facts and circumstances exist, and that similar risks of failure and potential rewards of success prevail among all companies engaged in oil and gas producing activities, even though companies in the industry differ in the magnitude and number of projects undertaken. These and other differences, in their opinion, should not affect the principles underlying the recognition of assets and measurement of earnings in financial statements.

SE advocates noted that, under generally accepted accounting principles, costs not directly related to future benefits are usually charged against current revenues even though the costs may be vital to operations. Because SE embodies this concept, they felt that it communicates the risks and the rising costs of exploration caused by inflation and the necessity to explore for oil and gas in deeper and more remote locations. They said that SE, together with appropriate supplemental disclosures, will provide users of financial statements sufficient information about the successes and failures of oil and gas producing activities.

These commentators considered SE preferable to FC because FC results in the capitalization of loss projects as assets which, in their view, obscures risks and failures through an artificial smoothing of reported earnings. Furthermore, proponents of SE generally considered SE preferable to any accounting method that would incorporate valuations of oil and gas reserves directly into the financial statements (such as the proposed RRA method). Many of them commented that the development of valuation information on a meaningful basis is so highly subjective that public disclosure of this information should not be required and that consideration of a valuation accounting method would be inappropriate until further progress is made on the FASB's conceptual framework project. Introduction of these accounting concepts in the oil and gas producing industry would, in the view of these commentators, make accounting in this industry inconsistent with other industries and inconsistent for petroleum companies engaged in other activities, such as integrated companies and natural gas transmission companies.

Many commentators observed that the FASB undertook an extensive project to address the difficult and long-debated problems of accounting and financial reporting for oil and gas producing companies. It solicited and had the benefit of substantial public participation during the course of its project on oil and gas accounting. These commentators, pointing to the concern expressed by Members of Congress and others about diversity of accounting practices both in general and specifically in the petroleum industry, maintained that the conclusions of the FASB, as the private sector body responsible for establishing accounting standards, should be accepted by the Commission, because FAS 19 resolves the uniformity issue by selecting an accounting method that the commentators considered to be either appropriate or, at least, not unreasonable. These commentators also noted that the FASB received significant support to carry out its assigned functions and that the members of the FASB and its staff are independent and highly qualified. A decision by the Commission that did not accept the FASB's conclusions on this matter would, it was argued, seriously undermine the FASB's resolve and its effectiveness in the future.[26]

Comments in opposition to SE

The overriding issue in the debate over the traditional accounting methods in the petroleum industry is the treatment of nonproductive exploration costs. SE accounts for these costs as losses to be recognized currently, while FC accounts for nonproductive costs as elements of the capital expenditures required to obtain oil and gas reserves, on the basis that they are unavoidable in the search for oil and gas.

Some commentators disagreed with the view that SE is consistent with the existing accounting framework. Others said that, even if SE were considered consistent with accounting in other industries, this consistency was irrelevant because SE fails to recognize the capital nature of exploration costs. Commentators asserted that SE seriously distorts the portrayal of operations in oil and gas activities and that consequently, the information provided by SE is meaningless. They stated that financial accounting should highlight neither risks and failures nor successes; rather, it should seek to portray operations in a meaningful manner.

Many commentators said that the definition of the assets of an oil and gas producing company is fundamental to an assessment of the two traditional methods. They considered SE to be deficient because it focuses on individual expenditures and thus fails to recognize the decisionmaking process inherent in exploration activities. These commentators asserted that success is determined by comparing total investments with total discoveries of oil and gas reserves rather than by the outcome of individual wells, some of which are inevitably nonproductive. Other areas in which accounting was claimed to be similar to FC were said to include accounting for spoilage in inventories, accounting for marketable securities on a portfolio basis, and accounting for costs incurred in construction projects.

Certain commentators claimed that SE results in an unrealistically conservative presentation of oil and gas producing activities, particularly for aggressive explorers and new entrants in the industry. They stated that historical cost accounting is limited in its ability to portray risks because it does not reflect current economic conditions. They contended that, for this reason, SE cannot report risks in a meaningful manner. In their view, SE results in an artificial variability in reported earnings, reflecting the overall level of exploratory expenditures more than the economic results of those activities.

Nearly all commentators who expressed opposition to SE took a view that uniformity of accounting methods in the petroleum industry was either inappropriate because of differences among companies within the industry, unnecessary because comparability could be achieved through disclosure of supplemental information, or unjustified because of the possibility of potential adverse economic effects of requiring SE as a uniform method for all oil and gas producers.

Many commentators opposed to SE expressed general support of the FASB in its standard-setting activities. However, they criticized the FASB's judgment on the accounting issues and the potential economic impact attendant to requiring SE, stating that oil and gas accounting involves unique issues that require considerations apart from the general objectives of financial reporting.

Many, but not all, opponents of SE commented that an accounting method based on valuations of oil and gas should be developed and implemented in the near future. They stated that requiring adoption of SE prior to consideration of a form of value accounting for oil and gas producing activities would therefore be illogical and costly.

Economic impact of requiring SE

During the Commission's proceeding, significant attention was focused on whether the adoption of SE, as prescribed by FAS 19, would have an adverse impact on competition in the petroleum industry and, if so, the extent of the impact. Many commentators stated that the adverse effect on the financial statements of FC companies would limit their access to capital, cause a significant reduction in their exploration activities, and thus unnecessarily restrain competition in the domestic oil and gas producing industry.

These commentators asserted that aggressive independent producing companies following FC constitute a significant factor in the petroleum industry and that these companies are dependent upon access to new capital to finance their exploration activities. They stressed the importance placed on reported earnings and shareholders' equity by suppliers of capital. Any impairment of the access of FC companies to capital, according to this view, would unreasonably restrain competition in the oil and gas producing industry by creating a barrier to new entrants in the industry and by precipitating a reduction in future exploratory efforts of other companies.

Managers, whose compensation is frequently based on reported earnings, place great significance on reported financial results and these commentators said that FC managers would likely take actions not economically justified to offset the financial statement effects of SE. These expected actions, such as reducing the extent of oil and gas operations and directing expenditures toward low-risk rather than high-risk drilling prospects, were said to be contrary to the national policy of seeking to increase domestic supplies of energy.

In response, the FASB and other commentators asserted that SE applied as a uniform method of accounting is consistent with accounting in other industries and that it would therefore foster fair and effective competition in the capital markets (1) by providing investors, lenders, and other suppliers of capital with comparable financial data prepared objec-

[24] Comments of FASB, May 31, 1978, pp. 51-52, in File S7-715 (emphasis in original). This quotation was made in the context of the FASB's comment that the successful efforts method as prescribed by FAS 19 is consistent with its proposed objectives of financial reporting and full costing is not (p. 48) and that the measurement problems associated with valuations of oil and gas reserves "strongly suggested to the Board that the cash flow disclosures should not be required in financial statements" (p. 51) (emphasis in original).

[25] The provisions of FAS 19 pertaining to application of SE are the basis of the Commission's newly adopted rules published in this release that define SE for those oil and gas producers electing to follow that method. See sec. VII of this release for a further description of these rules.

[26] The Commission's disagreement with this point of view is discussed in sec. II, "Background."

tively and evenhandedly, permitting consistent analysis of risks and rewards; (2) by relieving the capital markets of the anticompetitive burdens of noncomparable, inconsistent financial data; and (3) by eliminating inequities affecting allocation of capital resources to and among oil and gas companies.

According to this latter view, an economically successful company will be able to attract capital regardless of the method of accounting it adopts. These commentators noted that many small oil and gas producing companies have followed SE for many years and have generally been able to obtain capital to finance their operations. They noted that the prospects of finding commercially recoverable oil and gas reserves, the prices at which those reserves would be sold, the costs incurred, and the income taxes paid are totally unaffected by the method of accounting for the costs incurred. They asserted that a decision not to undertake commercially attractive exploration projects simply because SE is required would thus seem unlikely for the vast majority of companies. Moreover, they felt that accounting standards should be established with the objective of providing useful information to users of financial statements rather than to foster or avoid any particular actions by managers of companies that are affected by the standards.

A number of research studies undertaken or sponsored by persons interested in this proceeding were submitted to the Commission. The following studies supported the position that adoption of SE as a uniform method would not have a significant and unwarranted adverse economic impact:

1. Consultants to the FASB interviewed 24 bank loan officers, bank trust officers, underwriters, securities analysts, and a bond rating officer, all with experience in the industry. The FASB concluded that the method of accounting followed by oil and gas producing companies would not significantly affect the majority of the investment or credit granting decisions of these interviewees.

2. A consultant to the FASB directed a telephone interview survey of senior executive officers of 27 small- and medium-sized SE companies. None of those surveyed felt that SE had hindered his company's ability to raise capital.

3. A consultant to the FASB directed studies using various statistical procedures to analyze the effect of the publication of the FASB's exposure draft and of FAS 19 on the market prices of common stocks of oil and gas producing companies. These studies led to a conclusion that the research did not provide sufficient evidence for concluding that the publication of the FASB's decision to require SE had a selective effect on prices of the common stocks of FC companies in relation to SE companies. This conclusion was considered by some commentators to be consistent with the findings of recent empirical research into the relationship between securities' prices and information reported in financial statements.[27]

4. An examination by academics of (1) the significance of external capital and exploration expenditures of petroleum companies and (2) the relationships between common stock prices and earnings, oil and gas reserves, and accounting methods indicated that the securities markets may not always consider adequately the accounting method used by a company. These researchers expressed concern that the risks in exploration may not be properly assessed if they are not clearly disclosed. They concluded that SE should be adopted as a uniform method, because they considered it to portray risks more clearly than FC.

5. A joint submission by an academic and a public accountant, based on an investigation of statistical and other data in the petroleum industry, concluded that (1) SE is the predominant method used in the industry; (2) the segment of the industry comprised of companies that might be required to record material adjustments to their financial statements if SE were required is relatively small; and (3) independent SE companies obtain capital in the public securities markets and undertake aggressive exploration activities.

6. An academic conducted a survey in 1975 of securities analysts that specialize in the oil and gas industry. His research indicated that a substantial majority (over 70 percent) of the 310 respondents expressed a preference for SE over FC.

7. The FASB submitted a staff analysis that identified 257 United States and 35 Canadian registrants with the Commission engaged in oil and gas producing activities. The FASB's staff found that:

(1) Approximately one-half of these registrants follow SE;

(2) Over 60 percent of these registrants with revenues of less than $10 million follow SE;

(3) Approximately one-half of these registrants with revenues of less than $100 million follow SE;

(4) More than one-half of the U.S. registrants that are engaged principally in exploration and production use SE; and

(5) Over half of these registrants that are engaged primarily in other lines of business follow SE.

8. The FASB also submitted a staff analysis of recent filings with the Commission by 294 registrants, including 140 following FC, that included disclosure of the potential impact of adopting SE.[28] This analysis found that (1) adoption of SE would have a relatively insignificant financial statement effect for a significant minority of FC companies, (2) only seven of the FC companies disclosed that adoption of SE might affect their future dividend policies (none disclosed that it would), and (3) only six disclosed that they would have to renegotiate their debt or other agreements.

The following research studies were submitted in support of the view that a requirement that FC companies adopt SE would have a significant adverse economic impact:

1. A research consultant engaged by a group of several FC companies described previous research that he had undertaken on the relationship between exploration costs and revenue from sales of oil and gas produced from a large number of offshore leases. This consultant concluded that FC results in reported assets that closely approximate oil and reserve values, less a normal return on investment.

2. Another research consultant engaged by these companies analyzed statistical and other data for the petroleum industry and concluded that FC companies comprise an important part of the independent producing segment of the industry and that FC companies are relatively aggressive in searching for oil and gas. His conclusions were presented as support for the position that the financial statement effects of a change to SE would hinder the ability of FC companies to continue aggressive exploration programs.

3. A representative of an investment banking firm engaged by these companies analyzed the financing activity of certain petroleum companies and concluded that FC companies depend significantly on external capital sources to finance their activities and that they are relatively more aggressive than SE companies in seeking such capital. His conclusions were presented as support for the position that the financial statement effects of a change to SE would hinder the ability of FC companies to obtain capital to finance their exploration activities.

4. A research firm engaged by these FC companies interviewed more than 100 industry participants and financing groups. The firm concluded that adoption of SE would cause a substantial ($1.3 billion) reduction in domestic exploration and development spending, which would not be offset by increased spending by other companies and would thus result in a substantial ($2.4 billion) annual increase in the U.S. balance of trade deficit.

5. This group of companies also engaged two academic research consultants to perform empirical studies on the impact on common stock prices of FC companies of publication in July 1977 of the FASB's proposal to require that all companies adopt SE. This study, although similar in some respects to the research of this nature sponsored by the FASB, used different statistical techniques and different samples of companies. The consultants concluded on the basis of their research that the publication of the FASB's proposal caused a relative downward shift in the prices of the common stocks of FC companies which was sustained over a 6-month period, with no evidence of recovery.

The submission of these research studies supporting different views concerning the potential economic impact of the adoption of SE generated substantial further comment challenging various aspects of the methodology employed or the conclusions drawn from the studies.

[27] *See, e.g.*, Thomas R. Dyckman, David H. Downes, and Robert P. McGee, "Efficient Capital Markets and Accounting: A Critical Analysis" (Englewood Cliffs, N.J.: Prentice-Hall, Inc., 1975) and William H. Beaver, "What Should be the Objectives of the FASB?" "The Journal of Accountancy," Aug. 1973, pp. 49-56.

[28] On Sept. 1, 1977, the staff of the Commission published an interpretive release, Staff Accounting Bulletin ("SAB") No. 16 (42 FR 44983), that described the staff's view of appropriate disclosure by registrants relating to the issuance of the July 15, 1977, FASB Exposure Draft. In SAB No 16, the Commission's staff indicated that registrants whose financial statements would be substantially affected if the FASB's proposal were required to be applied should disclose certain information about the relationship between their existing accounting policies and the FASB's proposal. The disclosures described in SAB No. 16 included an indication of the general magnitude of the potential impact on earnings and shareholders equity and a discussion of any significant implications that adoption of the FASB's proposed standards might have concerning the registrant's dividend policy and its ability to comply with covenants in its debt or other agreements. SAB No. 16 has been rescinded in SAB No. 23 (Aug. 31, 1978), published concurrently with this release.

COMMISSION'S ASSESSMENT OF SE

The Commission does not disagree with the view that SE is conceptually consistent in many respects with accounting in other industries. The Commission's decision that SE should not be the uniform method of accounting for oil and gas producing industry is based on its conclusions regarding the information on assets and earnings that is conveyed by applying the SE method. As does any other historical cost method of accounting for oil and gas producing activities, SE fails to portray effectively economic performance because it gives no recognition in the primary financial statements to discoveries of oil and gas.

Further, SE results in distinguishing costs incurred in exploration and development on a basis that does not provide useful information about a company's assets and earnings, even though the conceptual basis of SE may be consistent with traditional accounting concepts. SE accounts for certain costs incurred in finding oil and gas as assets and accounts for other finding costs as expenses on the basis generally of whether the costs directly relate to productive properties. Some of the costs related to productive properties (*e.g.*, lease bonuses, successful exploratory wells, and all development wells) are capitalized and other costs related either to productive properties (*e.g.*, geological and geophysical costs and delay rentals) or to nonproductive properties (*e.g.*, lease bonuses and exploratory wells) are charged immediately to expense. This differentiation among costs incurred in finding and developing oil and gas yields an income statement that associates a mixture of current and past costs with the proceeds from production of previously discovered oil and gas reserves—an association that cannot result in a meaningful portrayal either of the risks associated with exploration or of the results of current operations. Furthermore, accumulated past costs of exploration and development and their amortization are irrelevant in terms of reaching current decisions, whether they are made by investors, government policymakers, or management.

SE can therefore lead to misunderstandings of the nature of current operations and financial position. The source of relevant information on economic resources and on the prospects of future cash flows for companies following SE, or any other historical cost accounting method (including FC), would be the supplemental disclosure of operating costs and physical activities. This information communicated supplementally may frequently appear to be directly contrary to the results reported in the balance sheet and income statement.

The Commission is required to consider, among other factors, the potential impact on competition in adopting rules pursuant to the Securities Exchange Act of 1934 and "not adopt any such rule or regulation which would impose a burden on competition not necessary or appropriate in furtherance of the purposes of (the Act)" (section 23(a)(2), (15 U.S.C. 78w)). In adopting a rule on accounting standards for oil and gas producers, pursuant to this Act, the Commission must therefore balance potential anticompetitive effects of the rule against the purposes of the Securities Exchange Act. In reaching that balance, the Commission need not, however, choose the least anticompetitive alternative if any burden on competition is "necessary or appropriate" to further the purposes of the Act.[29] The burden of balancing the anticompetitive effects of the rule rests with the Commission and it must reach its own conclusions independently after taking into account public comments and other pertinent information.

The Commission assessed the potential economic impact of requiring a uniform SE method, including the potential impact on competition in the petroleum industry and the potential impact on domestic supplies of oil and gas. The Commission, in this regard, considered the extent to which FC companies have relied on equity capital in the past, the impact of an accounting change to SE on the financial statements of FC companies, and the potential resulting effects on access of FC companies to external capital.

The Commission believes that investors should have sufficient information available to permit an efficient allocation of capital. Demonstrating that equity capital has been a minor part of the funds obtained to finance operations or that other companies have achieved success without using FC does not obviate the need to examine whether proscribing FC would have a competitive impact. Conversely, the fact that FC companies have relied heavily on equity capital and that access to equity capital has been important to them in financing growth would not, in and of itself, demonstrate that FC should not be proscribed. The Commission has concluded in this regard that access to equity capital is important to oil and gas producing companies and that it should seek to obtain disclosure of information that would foster the flow of equity capital to deserving companies.

While the issue of whether a mandated change to SE would have competitive and other adverse economic effects has been contested heatedly, the question of the financial statement effect of such a change has not been a subject of debate. The disclosures in 1977 financial statements of potentially affected companies demonstrate that the effect of a change to SE would be a significant reduction in the net income and shareholders equity of many companies that now follow FC. The fundamental point of contention regarding access to capital is ultimately whether this adverse effect on financial statements would have a corresponding adverse impact either on the ability of FC companies to raise equity capital or on their cost of equity capital.

In addition to the studies described previously on the possible impact on common stock prices of the publication of the FASB's proposal to require that all oil and gas producing companies adopt SE, similar empirical studies were conducted by the Commission's staff.[30] These empirical studies were generally inconclusive as to the possible effect of the publication of the FASB's proposal on the prices of the common stocks of FC companies. The Commission, however, did not consider the findings of the empirical tests on market behavior to be critical to its decision on oil and gas accounting. Notwithstanding the inconclusive findings of the various studies, the in-

[29] The Report of the Senate Committee on Banking, Housing and Urban Affairs on the 1975 Amendments states: "This explicit obligation to balance, against other regulatory criteria and considerations, the competitive implications of self-regulatory and Commission action *should not be viewed as requiring the Commission to justify that such actions be the least anticompetitive manner of achieving a regulatory objective.* Rather the Commission's obligation is to weigh competitive impact in reaching regulatory conclusions." (S. Rept. No. 94-75 to accompany S. 249, 94th Cong., 1st sess., 13 (1975) (emphasis added).)

[30] The report of the Commission's staff has been placed in the public file (File No. S7-715) for this proceeding. In addition, the Commission engaged a research consultant to advise its staff on these empirical tests, and his report is also included in the public file.

V 43 / 177

ability to identify the specific causes of stock price reactions limits the usefulness of studies of this nature in reaching policy decisions. The Commission has concluded that its assessment of competitive impact as well as its decision on appropriate accounting standards must be based on its judgment of these issues derived from other information developed during its proceeding.

Since the accounting change would not affect the underlying economic circumstances of a company, it would appear that any effects on access to or cost of equity capital would likely be short-lived, as preparers and users become more accustomed to dealing with explanations of the substance of companies operations in terms of cash flows and oil and gas reserves rather than historical cost financial statements. The Commission believes that the ability of companies to communicate these data effectively by the use of valuation information on proved oil and gas reserves (which has not been commonly disclosed previously) and other information prescribed by its new rules would tend to preclude any long-term or severe impediments to access to equity capital.

In contrast to the controversy surrounding the issue of access to equity capital, the impact of requiring SE on access to debt financing did not appear to be of major concern. Substantially all commentators agreed that private debt suppliers look to oil and gas reserves and cash flow data rather than reported financial results in reaching lending decisions. Some concern was expressed about a possible impact on public debt offerings because of the use of financial statement data as the basis for restrictive covenants in debt agreements and the use of financial statements by institutions and rating agencies to evaluate creditworthiness. The debt covenant problem is faced whenever major accounting changes are made, but experience has indicated that accommodations among lenders and borrowers can be reached without major difficulty. Few companies disclosed in their 1977 financial statements that they would be in violation of loan agreements if SE were required. The sophistication of institutions and rating agencies would likely negate any undue impact on their analyses of the debt capacities of the companies. The Commission concluded that a change to SE would likely have an inconsequential, if any, impact on access to debt capital.

As discussed previously, many commentators, including high-level representatives of FC companies, stated their belief that managers of FC companies would alter their business decisions by seeking to mitigate the effects of SE on reported earnings through a reduction in their exploration expenditures. One research study, referred to previously, attempted to quantify an estimate of the expected reduction in the industry's exploratory spending if SE were required. This study was considered by the Commission to be questionable in several respects and, in any case, to be of little relevance because it reflected in large part behavioral reactions to a proposal that was being heatedly contested. The Commission found that the expected reactions of managers were reflected more accurately in the comments and testimony presented directly by company officials.

The Commission found merit in the view that managers will base their decisions more on economic factors rather than on financial reporting factors. Even if individual companies were to reduce their exploratory efforts, other companies, including independent petroleum companies, would likely undertake available exploration activities that are economically profitable. It is likely that any effect on management behavior in allocating funds to exploration could be expected to be inconsequential in relation to other economic conditions, such as the government's pricing and other regulatory policies, the increasing costs of finding oil and gas, and inflation in general. Thus, it seems unlikely that exploration efforts would be substantially affected on an industry-wide basis.

The Commission recognizes that the decisionmaking process at the individual company level could to some degree be affected in a dysfunctional manner by the imposition of a SE requirement because of the financial statement impact of applying this method. The Commission's belief that financial accounting should seek to portray financial position and operating results in a meaningful manner is based on its view that financial reporting on this basis would provide useful information to investors and other users of financial information. The Commission agrees strongly with the FASB's tentative conclusion that the objectives of financial reporting should be couched in terms of the needs of those for whom the information is intended.[31] While the potential economic impact of financial accounting standards should be assessed in the process of establishing new standards, the objective of providing useful information to investors should be overriding.[32] Some managers may take uneconomic actions even if this objective is achieved, but the Commission considers the actions in these cases to reflect on the judgment of the managers involved rather than on the standard-setting process.

In summary, the economic impact arguments presented by commentators opposed to the adoption of SE were considered by the Commission to be vastly overstated and oversimplified. They were based generally on either a presumption of a naive capital market or a presumption of large numbers of naive and misdirected managers in the petroleum industry. The Commission found during its proceeding, especially during the public hearing in which it had the opportunity to discuss these issues directly with corporate managers and representatives of the investment community, that these presumptions were invalid. The Commission ultimately concluded that the economic impact of requiring SE would be short-lived and much less severe than predicted by those commentators.

Nevertheless, the Commission recognizes that, if it were to require that all companies adopt SE, certain costs would be imposed on oil and gas producers whose financial statements would be materially affected by the accounting change. These costs would include: the costs of gathering the data to make the accounting change and revising accounting systems to generate the information needed to report under the new method; the costs and the confusion of explaining the accounting change to users, who would also incur costs in adjusting to the new information; and the costs that would be incurred by a few companies in revising debt and other con-

[31] FASB, Proposed Statement of Financial Accounting Concepts, "Objectives of Financial Reporting and Elements of Financial Statements of Business Enterprises," p. 1.

[32] A number of commentators stated that the Commission was required to consider for public financial reporting purposes the nation's current energy policies and the effect, if any, its actions would have on these policies. As described previously, the competition and energy supply issues involved in this proceeding are fundamentally inseparable and thus were taken into consideration by the Commission. The Commission wishes to make clear, however, its view that attempts to foster particular national economic policies, such as an increase in domestic petroleum production, are not appropriate considerations in formulating financial reporting standards. Financial reporting should seek to provide investors with useful information that is relevant, reliable, comparable, and unbiased. Otherwise, the capital allocation process would be distorted and ultimately the credibility of the information provided by financial reporting would be lost. Energy is clearly a vital asset and increased production is an important national goal, but it should not be obtained by influencing the financial accounting measurement system for the express purpose of encouraging investors to commit funds. To the extent that the capital market is efficient such an approach would not work; but, beyond this and more importantly, the social cost of the intent in terms of diminished credibility of the country's public disclosure system and capital markets would be disproportionately high.

SE 12 78

tractual arrangements that are based on financial accounting data. Imposing these costs on companies, together with the possibility that to some extent FC companies might encounter a degree of unwarranted difficulty in raising capital, was considered unjustified by the Commission in view of its conclusions that the SE method does not provide significant useful information on financial position and operating results.

FULL COST ACCOUNTING

The FC method, like SE, is not followed uniformly in practice. Typically, all costs (including nonproductive costs) incurred in the search for and development of oil and gas reserves within large cost centers (usually countries or continents) are capitalized, subject to a value limitation. The capitalized costs are amortized, usually on a composite unit-of-production basis, as oil and gas are produced. Some companies do not include certain costs, such as those associated with major offshore lease acquisitions, in the costs being amortized until the properties are evaluated through the drilling of exploratory wells, at which time the costs together with the related oil and gas reserves are included in the composite amortization computation for the cost center. Practice in applying FC also varies with regard to the treatment of costs incurred in a cost center prior to establishing production, for example, in a newly acquired foreign concession. Frequently, these preproduction costs are deferred without applying any value limitation as long as exploration is underway. Gains or losses from the sale of oil and gas reserves are usually not recognized by companies following FC unless an unusually large portion of the reserves are sold. Like SE, revenue under the FC method is recognized only upon sales to outside parties.

COMMENTS IN SUPPORT OF FC [33]

Supporters of FC asserted that FC better reflects the economic facts of exploration and thus provides financial statements that are more meaningful in measuring the performance of companies. They stated that companies entering the industry initially or companies increasing their capital expenditures, particularly smaller companies, would be burdened by adverse effects on their financial statements if SE were required regardless of the degree of success in finding oil and gas, because earnings reported under SE are affected more by the level of exploratory spending than by the results of the exploratory effort. Likewise, they noted that companies following SE can increase their earnings by reducing the level of their exploration effort and producing previously discovered oil and gas. FC, in their view, would avoid these consequences of SE.

In addition, these commentators asserted that, under FC, a company that is relatively more successful in discovering oil and gas typically reports higher earnings than would otherwise be the case, and that a company that incurs finding costs relatively higher than the value of its discoveries reports lower earnings. They claimed that FC thus provides financial statements that are more useful than SE in providing signals of current exploration activity and in predicting the future prospects of companies.

FC supporters maintained that the fundamental issue in oil and gas accounting is the definition of the asset to be accounted for. They asserted that SE inappropriately places emphasis on individual expenditures by reporting as assets only those costs of productive properties, successful exploratory wells, and facilities that constitute the oil and gas producing system. They claimed that this factor makes SE inconsistent with the primary objective of exploration activities, which is to find, develop, and produce oil and gas reserves. Oil and gas reserves rather than the costs of properties and equipment were said to be the assets of an oil and gas producing company. Under the historical cost framework, the objective should be, in their view, to account properly for the total costs of acquiring these assets.

Most FC advocates acknowledge that FC does not purport to represent current values of oil and gas reserves. Nevertheless, they believe that FC provides book values of assets that are closer to economic values than does SE and that FC thereby enables users of financial statements to gain a better understanding of the current value of reserves.

COMMENTS IN OPPOSITION TO FC [34]

The primary defect of FC, according to its critics, is that it relies on a "cover" concept whereby costs that are either unsuccessful or unrelated to specific oil and gas reserves are capitalized and amortized against revenues from productive properties. They commented that FC capitalizes nonproductive costs as assets and noted that a dry hole has no value and, consequently, should not be reported as an asset. They stated that, because nonproductive costs dissipate shareholders' investment, SE properly reflects such costs as current period expenses.

The opponents of FC argued that SE better portrays the economic realities of exploration. They noted that two important realities in the petroleum industry are the risks associated with exploration and the volatility of commercial successes and failures. They asserted that financial statements should reflect these risks and fluctuations in earnings and not obscure them. The opponents of FC also objected to the view that FC recognizes oil and gas reserves as assets, asserting that both FC and SE accumulate costs to be assigned to oil and gas produced and that the methods differ only in the amount of costs to be assigned. These commentators stated that only value accounting, which they considered impracticable at the present time, could perhaps better serve the needs of investors for information than SE combined with supplemental disclosure of operating data. While they acknowledged that nonproductive costs are necessary costs of operations, these costs were said to add no value to the company and thus should be reported as current operating expenses.

The issue was also raised that the existence of FC as an alternative to SE or as a uniform method of accounting for the oil and gas producing industry places anticompetitive burdens on companies because of the impact that noncomparable financial statements have on the securities markets. Commentators claimed that adoption of SE as a uniform method would enhance competition in the capital markets by providing intercompany and interindustry comparability of objectively prepared financial data so that consistent analyses of risks and rewards would be facilitated.

COMMISSION'S ASSESSMENT OF FC

The Commission has concluded that the FC method, like SE, is inherently defective in providing useful information on financial position and operating results for a number of reasons. In addition to the failure of FC to provide timely recognition of discoveries of oil and gas reserves in the primary financial statements as discussed below, the Commission was troubled by the ability of companies following FC, absent adequate disclosure, to conceal the effects of unprofitable current exploration programs. For example, a company could engage in unprofitable exploration programs and not reflect that fact in net income because it owned valuable reserves discovered many years in the past.

The Commission was also disturbed by the comments of corporate managers that their companies needed FC to report stable earnings because fluctu-

[33] Much of the previous discussion in "Comments in Opposition to SE" presents arguments by commentators in support of FC.

[34] Much of the previous discussion in "Comments in Support of SE" presents arguments by commentators in opposition to FC.

V 4 3 / 1 7 7

ating earnings are adversely regarded by their shareholders. This point of view was taken by, among others, several representatives of rate-regulated companies that have undertaken exploration programs in recent years on a non-rate-regulated basis. The Commission disagrees strongly with this viewpoint. If companies undertake business endeavors, such as oil and gas producing activities, that are characterized by intermittent success and failure, financial reporting should reflect clearly the fluctuating nature of these operations.

The Commission is taking steps in this proceeding to insure that investors and government policymakers have sufficient information to overcome this inherent deficiency of FC. Supplemental disclosure of information on costs incurred in oil and gas producing activities and on quantities and valuations of proved oil and gas reserves are being required. Also, the proposed supplemental RRA earnings summary would provide useful information on the variability of earning activities of oil and gas producers.

Moreover, as discussed further at the conclusion of section VII, "Description of the Rules," the Commission reminds registrants who follow FC of their responsibility to provide an explanation of their financial data in "Management's Discussion and Analysis of the Summary of Earnings or Summary of Operations" to enable investors to appraise the quality of earnings. The Commission and its staff examined many of these narrative presentations by FC companies in connection with the public hearing conducted as part of this proceeding and found them to be generally inadequate. For instance, several cases were noted in which substantial increases in depreciation, depletion, and amortization expense were explained in general terms rather than presenting the impact of factors such as changes in estimated reserves and higher finding costs. The Commission believes the narratives should include explanations that relate the financial statements and the supplemental disclosures, including reserve quantity and valuation information, in a meaningful, comprehensive analysis. The Commission's staff will be taking appropriate steps to insure that the explanations provided by registrants in the oil and gas producing industry are adequate in this regard.

In addition, the Commission is proposing separately, in Release No. 33-5968, rules that would establish a specified limitation on capitalized costs under the FC method and rules that would proscribe certain troublesome practices in applying FC, such as excluding undeveloped lease costs from the costs being amortized and not providing any limitations on preproduction costs capitalized in new cost centers.

In addition to these concerns, FC, like SE, is based on recording the historical costs of completed transactions, with revenue recognized only as sales are made to outside parties. Therefore, the Commission's criticisms of SE and traditional oil and gas accounting methods in general apply equally to FC.

Some commentators contended that FC yields reported assets that approximate or closely represent values of oil and gas reserves. The Commission acknowledges a long-run, theoretical equivalency for the industry as a whole between the total costs (including a return on funds invested) incurred in exploration and development activities and the value of oil and gas discovered. Various market imperfections, such as uncertainties inherent in exploration activities and the impact of Government regulation, raise questions, however, about the ability of this equivalency to exist even on an industrywide basis except in the long run. On an individual-firm basis, which is the focus of financial accounting, these considerations become irrelevant. Accumulated costs represent values in such cases only by coincidence because of many factors, including the stochastic nature of discoveries, the inability to estimate accurately total recoverable quantities of oil and gas (as opposed to proved reserves), and the effects of changing oil and gas prices and changing costs of finding and developing oil and gas. The Commission, therefore, considers the view that FC results in reported assets of an oil and gas producing company that approximate the values of its oil and gas properties to be without merit.

For similar reasons, the Commission also disagrees with the FC supporters who contended that it provides a meaningful portrayal of the total costs of oil and gas reserves. The development of a procedure to relate the costs of finding and developing oil and gas with reserves discovered is extremely complex. The industry is characterized by long periods between initial expenditures and the ultimate receipt of proceeds from production of oil and gas discovered.

A relationship of costs incurred and reserves discovered has meaning only if costs and discoveries are considered over a relevant period of time; however, FC results in averaging the total costs incurred by a company with its total discoveries, placing no time constraint on this averaging procedure. Costs incurred many years in the past would be related with current discoveries, and past discoveries related with current expenditures. A procedure to develop a valid relationship between costs and reserves would likely have to consider factors such as accumulating exploration expenditures over some relevant period of time (perhaps 5 to 10 years, varying by property), allocating prediscovery and nonproductive costs in an appropriate manner, estimating ultimate recoverable oil and gas reserves (which are much more subjective than estimates of proved reserves), and adjusting historical costs over the time span to a current cost basis. Such considerations are far beyond the scope of FC, or any financial accounting method. Yet, the necessity to consider these factors in developing a useful relationship between costs and discoveries refutes the argument that FC results in a meaningful measure of the total costs of oil and gas reserves or that it meaningfully relates costs and reserves in an income statement.

In summary, the Commission rejected FC as a uniform method because it does not reflect valuations of oil and gas reserves in reported assets and earnings, thus failing to provide useful information to investors and policymakers on the significant aspects of oil and gas producing activities, and because it fails to provide a meaningful portrayal of the costs of finding and developing oil and gas reserves.

AREA-OF-INTEREST APPROACH

A number of commentators suggested that an accounting method be developed that would define cost centers or projects on the basis of some criteria (an "area-of-interest") and that all costs related to the area-of-interest be capitalized to the extent that oil and gas reserves are discovered attributable to the area-of-interest. Some stated that an area-of-interest approach would be more consistent with the decisionmaking process of managers in the oil and gas producing industry.

Various criteria were suggested as the basis for defining an area-of-interest, such as the individual field, larger related geological structures, geographical areas, or total expenditures for a drilling program. Obviously, as the boundaries of the area-of-interest are narrowed, the financial statement impact of such an approach tends toward that of SE; and as the cost centers or projects are broadened, such an approach tends toward FC.

The area-of-interest method was appealing in concept to the Commission in certain respects. This approach would avoid certain of the more undesirable aspects of SE and FC. For instance, unlike SE, it would not require that exploration costs related to properties with proved reserves be recognized as current expenses. It would also place boundaries on cost centers to avoid to some extent the deferral of current exploration losses that can occur under FC when current exploration programs are unprofitable.

The practical problems of developing a method of accounting based on an area-of-interest are great. The development process itself would require a lengthy and costly major project. The financial statement impact of applying such a method would not be known until standards were developed. Defining the cost center and addressing the temporal issue discussed previously in connection with the FC method are difficult issues that would have to be resolved prior to implementing an approach of this nature. The feasibility of developing an area-of-interest approach within a reasonable period of time is, therefore, questionable, in the Commission's view.

Furthermore, the Commission questions the assertion of some commentators that the area-of-interest approach reflects the managerial decision process in the oil and gas producing industry. Information provided to the Commission during its proceeding indicated that the basis for management decisions varies from company to company and within companies. The most frequently stated basis for decisionmaking by company managers was that of an exploration program, i.e., allocating capital among available drilling prospects wherever located on the basis of risk-adjusted expected returns. Such an approach frequently results in related capital expenditures, in terms of the management decisionmaking process, being made in unrelated geological or geographical areas. The Commission doubts that a workable accounting approach could be developed on a "program" basis. Moreover, the relationship between management decisionmaking and appropriate financial accounting measures is unclear, at best.

In the final analysis, the Commission has concluded that the major problems related to the development of an area-of-interest approach make further considerations of it impractical at the present time. Like SE and FC, the method would not reflect discoveries of oil and gas in reported assets and earnings on a timely basis. This factor alone negates the ability of any of these accounting methods to measure economic activity in the oil and gas producing industry in a meaningful manner. The Commission believes that efforts should be directed toward developing a method of accounting, such as RRA, that would accomplish this objective rather than seeking to develop an area-of-interest approach.

VI. REPORTING TO THE DEPARTMENT OF ENERGY

Section 503 of EPCA (42 U.S.C. 6383) requires that the Commission, "[f]or purposes of developing a reliable energy data base related to the production of crude oil and natural gas * * * shall take such steps as may be necessary to assure the development and observance of accounting practices to be followed in the preparation of accounts by persons engaged, in whole or in part, in the production of crude oil or natural gas in the United States." As discussed below, this section requires that these accounting practices permit, to the greatest extent practicable, the compilation of an energy data base.

REPORTING TO DOE PURSUANT TO EPCA

Section 11(c) of the Energy Supply and Environmental Coordination Act of 1974 (15 U.S.C. 796), as amended by section 505 of EPCA and by the DOE Organization Act of 1977 (Pub. L. 95-91), states the following:

(3) In order to carry out (its) responsibilities under subsection (a) of (sec. 11) (DOE) shall require, pursuant to subsection (b)(1)(A) of (sec. 11), that persons engaged, in whole or in part, in the production of crude oil or natural gas—

(A) keep energy information in accordance with the accounting practices developed pursuant to section 503 of the Energy Policy and Conservation Act, and

(B) submit reports with respect to energy information kept in accordance with such practices.

(DOE) shall file quarterly reports with the President and the Congress compiled from accounts kept in accordance with such section 503 and submitted to (DOE) in accordance with this paragraph. Such reports shall present energy information in the categories specified in subsection (c) of such section 503 to the extent that such information may be compiled from such accounts. Such energy information shall be collected and such quarterly reports made for each calendar quarter which begins 6 months after the date on which the accounting practices developed pursuant to such section 503 are made effective.

Thus, DOE is required to: (1) Mandate that oil and gas producers keep energy information in accordance with these accounting practices developed by the Commission pursuant to EPCA; (2) collect reports of energy information from oil and gas producers compiled from accounts maintained in accordance with the accounting practices; and (3) submit reports to the President and the Congress based on the reports received from the producers.

DOE has indicated to the Commission that it plans to develop two reporting systems, an annual and a quarterly system, in implementing the requirements of EPCA. The annual reporting system will be incorporated into a broader reporting system, called the "Financial Reporting System" or "FRS," being developed by DOE. Section 205(h)(2) of the DOE Organization Act requires that DOE develop the format for an "energy-producing company financial report" to allow comparison among energy-producing companies on a uniform and standardized basis and to permit:

(A) An evaluation of company revenues, profits, cash flow, and investments in total, for the energy-related lines of commerce in which such company is engaged and for all significant energy-related functions within such company;

(B) An analysis of the competitive structure of sectors and functional groupings within the energy industry;

(C) The segregation of energy information, including financial information, describing company operations by energy source and geographic area;

(D) The determination of costs associated with exploration, development, production, processing, transportation, and marketing and other significant energy-related functions within such company; and

(E) Such other analyses or evaluations as (DOE) finds is necessary to achieve the purposes of this Act.

DOE is required by section 205(h) of this Act to consult with the Commission and to assure that the "energy-producing company financial report" is consistent (to the extent practicable and consistent with the purposes and provisions of the Act) with the accounting practices for oil and gas producers developed pursuant to EPCA.

DOE has informed the Commission that FRS is to be used to collect information annually in response to the requirements of EPCA. FRS was published on June 22, 1978, for public comment and hearing (Form EIA-28 (43 FR 27055)) in connection with the required review and clearance of the proposed form by the Office of Management and Budget. DOE stated that it plans to collect data using FRS initially from 29 large petroleum producers during 1978 and in 1979 from approximately 100 large companies and a sample of 150 smaller companies. DOE has not indicated its plans concerning EPCA's requirement that data be collected quarterly from all oil and gas producers.

FRS consists of a number of reporting schedules of financial information, which are tied to a company's publicly reported financial statements, together with schedules of statistical data. DOE has stated that its objectives in developing FRS include, where possible, conformance of its definitions and requirements to those used in related government and public reporting systems.

COMMISSION'S RESPONSIBILITIES UNDER EPCA

The Commission considers its responsibilities under EPCA to be divid-

ed between two related areas: (1) Accounting practices necessary to prepare financial statements to be filed with DOE; and (2) accounting practices necessary to compile the financial and operating information supplemental to financial statements, as required by EPCA in section 503(c)(3).

Provisions of EPCA describe an energy data base and require inclusion of specific data; however, its requirements are not restrictive. The language in EPCA describing the energy data base can be traced to the disclosure recommendations of "Accounting Research Study No. 11", "Financial Reporting in the Extractive Industries" ("ARS No. 11"), a research study published in 1969.[35] The disclosure recommendations of "ARS No. 11" stressed the importance of supplementing financial statements with information on reserves and operating activities "to compensate for the limited ability of conventional financial statements to portray the financial position and results of operations of companies in the extractive industries." [36] The goals of presenting data supplemental to financial statements were "• • • to facilitate evaluation of effort and result • • •," "• • • to facilitate correlation (of financial data) with mineral reserve and operating data • • •" and to provide "• • • a means of identifying the magnitude of effort with result, as expressed in both financial and statistical terms • • •." [37]

The Commission has concluded that information on oil and gas reserves and other statistical operating data together with reported earnings and financial position should be made available to investors to enable evaluations of the securities of individual companies engaged in oil and gas producing activities. Government officials, in formulating national energy policies, should also have access to these financial and operating data for individual oil and gas producers as well as aggregated data on an industrywide basis. The determination by the Commission to combine consideration of the issues involving reporting to DOE and to investors stems from the relationship between the requirements of EPCA and the needs of investors for useful information in assessing the securities of companies engaged in oil and gas producing activities.

The focus of EPCA is the reporting of energy data, including financial information, to DOE. The major controversy involved in the Commission's proceeding on oil and gas accounting, however, has not involved the reports to be filed with DOE, which are not expected to be distributed to the investing public, but rather the Commission's deliberations on public financial reporting issues.

While the primary impetus for the Commission's undertaking this proceeding was the mandate of EPCA, as noted previously, the Commission has long been concerned about public financial reporting by oil and gas producing companies. The Commission decided that its responsibilities under the Federal securities laws dictated that it consider public financial reporting issues in conjunction with its consideration of accounting issues from the standpoint of reporting to DOE.[38]

The joint undertaking to develop public financial reporting standards and to develop accounting practices for reporting to DOE resulted in expressions of concern by commentators that the Commission was not giving proper consideration to the issues in view of the different purposes of the Federal securities laws and of EPCA. The Commission has carefully assessed the rules it adopted in this proceeding separately in terms of public financial reporting and reporting to DOE. The Commission has concluded that the information needs of investors and government policymakers are fundamentally similar in this instance, even though the level of detail required by these groups of users may differ. The requirements adopted pursuant to the Federal securities laws and those under EPCA reflect, therefore, this similarity of needs for relevant and reliable information on oil and gas producing activities.

FINANCIAL STATEMENTS FILED WITH DOE

In its comments submitted in connection with the Commission's proceeding, DOE has advised the Commission that the "primary needs of the Financial Reporting System are full disclosure and uniform definitions of financial and operating data • • • (and that FRS) can be adapted to any accounting system adopted by the SEC which meets these requirements.[39]"

Further, DOE commented that:

> [T]he DOE concludes that historical cost accounting methods do not portray adequately the operating results of oil and gas producers, particularly with regard to oil and gas reserves. It is clear that neither the full cost nor the successful efforts method permits reliable evaluation of the profitability of oil and gas exploration investments • • •.
>
> The DOE does not advocate the adoption of any particular accounting method as most suitable for public reporting purposes. For purposes of the Financial Reporting System, the successful efforts and the full cost methods appear less suitable than a form of value accounting for reserves.[40]

DOE's comments are consistent with the Commission's decision to initiate efforts seeking the development of an accounting method that will incorporate valuations of proved oil and gas reserves in the financial statements. During the period that this method of accounting is being developed and its feasibility assessed, the Commission, for reasons discussed earlier in this release, is not requiring that oil and gas producers adhere to a uniform method in preparing financial statements to be reported either to investors or to DOE. The Commission reached this conclusion with respect to DOE reporting on the basis that the objectives of EPCA would not be fostered if such a requirement were adopted and that the maximum amount of useful information for an understanding and comparison of companies' operations would be made available through the reporting of supplemental financial and operating data pursuant to the rules published in the release.

ENERGY DATA BASE

Section 503(c) of EPCA requires the Commission to:

> • • • assure that accounting practices developed pursuant to [EPCA], to the greatest extent practicable, permit the compilation, treating domestic and foreign operations as separate categories, of an energy data base consisting of:
>
> (1) The separate calculation of capital, revenue, and operating cost information pertaining to—
>
> (A) prospecting,
> (B) acquisition,
> (C) exploration,
> (D) development, and
> (E) production,
>
> including geological and geophysical costs, carrying costs, unsuccessful exploratory drilling costs, intangible drilling and development costs on productive wells, the cost of unsuccessful development wells, and the cost of acquiring oil and gas reserves by means other than development. Any such calculation shall take into account disposition of capitalized costs, contractual arrangements involving special conveyance of rights and joint operations, differences between book and tax income, and prices used in the transfer of products or other assets from one person to any other person, including a person controlled by, controlling or under common control with such person.
>
> (2) The full presentation of the financial information of persons engaged in the production of crude oil or natural gas, including—
>
> (A) disclosure of reserves and operating activities, both domestic and foreign, to facilitate evaluation of financial effort and result; and
>
> (B) classification of financial information by function to facilitate correlation with reserve and operating statistics, both domestic and foreign.
>
> (3) Such other information, projections and relationships of collected data as shall be necessary to facilitate the compilation of such data base.

Based on this section, the Commission has determined that the following information relating to the operations of individual oil and gas producers must be included in the energy data base:

1. A tabulation of costs by function, including those charged to expense as incurred as well as those capitalized.
2. Disclosure of revenues from oil and gas production.
3. Disclosure of oil and gas reserves.
4. Disclosure of operating statistical information.
5. A classification of financial statement data by function—which involves reporting financial statement data according to exploration, development and production activities to facilitate interpreting the physical results shown by oil and gas reserves and other operating statistics.

The "prospecting" category specified by section 503(c)(1)(A) is not typically applied to oil and gas producing activities—it was taken from "ARS No. 11" which used the five functional classifications incorporated into EPCA to describe operations common to all extractive industries. If prospecting costs are considered to be costs incurred prior to the acquisition of a property, they would consist principally of preacquisition geological and geophysical expenditures, which the Commission's rules include in exploration costs. FRS requires that geological and geophysical costs be reported separately (the Commission has concluded that this level of detail is unnecessary for investor reporting purposes). In the Commission's view, this reporting requirement accomplishes the objectives of EPCA in specifying that "prospecting" costs be considered a separate functional category.[41]

EPCA provides for the separate reporting of capital and operating cost information on a functional basis. It also requires that costs incurred in operations be reported in substantial detail separately for costs capitalized and costs charged to expense. The objective of this requirement of EPCA, though, is to obtain the total current costs incurred in searching for, developing, and producing oil and gas.

Analyses to correlate current finding and developing costs with oil and gas reserve activity require these total costs, without regard to their treatment in financial statements. The reporting of total costs incurred in these activities facilitates such analyses, which require information over a number of years and consideration of complex relationships, as well as providing information on the magnitude of operations and the uses of cash.[42]

The Commission has considered various approaches of relating costs and reserves in some manner as a possible requirement for supplemental disclosure purposes and has concluded that such a requirment is not feasible at the present time.

EPCA also requires the separate reporting of revenue on a functional basis. Under the traditional financial accounting methods, revenue is recognized only upon production. Section 210.3-18(k)(4) of the rules published in this release specifies the accounting practices for reporting historical net revenue information, including the value of transfers for integrated companies.

Section 503(c)(2) requires the presentation of oil and gas reserve information and operating statistical data to facilitate evaluation of financial effort and result, and the presentation of functional financial statement data to correlate with reserve and operating statistics. Section 210.3-18(k)(5) of the rules published in this release provides for the disclosure of oil and gas reserve information and paragraph (k)(2) provides for the disclosure of costs capitalized in balance sheets. Further, as described below, the rules also require the reporting of valuation information relating to proved oil and gas reserves.

FRS requires the reporting of certain statistical information on oil and gas properties, drilling operations, and production activity.[43] The Commission concluded that it was not necessary to adopt rules pursuant to EPCA for the reporting of statistical information because the nature of this information (*i.e.*, acreage owned, wells drilled, quantities produced) does not require the development of accounting practices.

Section 503(c)(3) of EPCA indicated that the data base shall include "[s]uch other information, projections, and relationships of collected data as shall be necessary to facilitate the compilation of such data base." As noted above, the Commission's rules provide for the reporting of information, including present values, pertaining to estimated future production from proved oil and gas reserves. The Commission believes that this information is essential to an understanding of companies operations.

DOE'S DATA REQUIREMENTS

DOE has informed the Commission that the proposed FRS contains all information it has identified thus far as fulfilling its needs relating to oil and gas producing activities. The Commission believes that it has addressed the significant problems relating to accounting practices needed to compile and report these data. It can be expected, though, that DOE will identify data in the future relating to oil and gas producing activities that will be useful for its analyses, and further considerations of required accounting practices may be necessary.

The Commission believes that the proposed RRA method that it is seeking to develop would generate substantially more useful information to DOE than that provided by the primary financial statements prepared on the basis of traditional accounting methods. RRA is conceptually consistent with the requirements of EPCA. It would permit, for example, the separation of operating results between exploration and development activities and production activities.

DOE may have need for more forward-looking information than that reflected in the Commission's rules published in this release, including budgeted capital expenditures and other projections. The Commission is seeking means to encourage the public reporting of forward-looking information; however, many complexities are involved in developing approaches to foster such disclosures.

FRS requires separate reporting for individual phases of integrated operations (production, transportation, and regulated pipelines). This separation of activities is not required under generally accepted accounting principles specified by FASB Statement No. 14, "Financial Reporting for Segments of a Business Enterprise," or the Commission's industry segment disclosure rule (Item 1(b) of Regulation S-K, 17 CFR 229.20). FRS also requires allocations of certain items of income and expense, including income taxes, which are not required to be allocated among segments for public reporting purposes. The Commission did not address these matters in this proceeding in view of its on-going considerations involving segment disclosures for all industries. The Commission will monitor the efforts of DCE to obtain reporting of these data.

REPORTING BY NONPUBLIC PRODUCERS PURSUANT TO EPCA

A number of comments received by the Commission recommended that it, in some manner, exempt small or pri-

[41] For a further discussion of this matter, *see* release No. 33-5877.
[42] This relationship between costs and reserves was discussed in connection with the Commission's assessment of FC in section V, "Traditional Oil and Gas Accounting Methods." Information on costs incurred in oil and gas producing activities classified by functional categories is required by the newly adopted §210.3-18(k)(3). The Commission has determined not to require that costs incurred in these activities be separated into amounts capitalized and amounts charged to expense for purposes of investor reporting.
[43] The Commission in item 2 of Regulation S-K requires disclosure of information of this type in somewhat less detail for investors. These requirements are being revised as proposed in release No. 33-5967, published concurrently with this release.

vately owned oil and gas producers from the reporting requirements of EPCA. In this regard, section 523(a)(4) of EPCA (42 U.S.C. 6393) requires that rules adopted pursuant to EPCA establish procedures for requests to prevent special hardship, inequity or an unfair distribution of burdens relating to the application of any such rules.

As described previously, DOE, and not the Commission, is to collect the reports required by EPCA. Moreover, DOE will have to reach judgments concerning its needs for data in relation to the burden placed on particular oil and gas producers. Accordingly, the Commission has adopted an exemptive provision in its rules (only as they pertain to maintaining accounts pursuant to EPCA) that automatically exempts persons from compliance with particular requirements of the rules when DOE grants an exemption from its related recordkeeping and reporting requirements.

VII. Description of the Rules

The rules promulgated by the Commission reflect its determinations in this proceeding as described in the previous sections of this release. These financial accounting and reporting rules, contained in § 210.3-18 of Regulation S-X, apply: (1) To the preparation of financial statements included in filings with the Commission pursuant to the Federal securities laws; and (2) to the preparation of accounts by persons engaged, in whole or in part, in the production of crude oil or natural gas in the United States as prescribed by sections 503 and 505 of EPCA.

Section 210.3-18, as discussed at the conclusion of the preceding section VI, contains an exemptive provision to make it explicit that persons exempted from the recordkeeping and reporting requirements of DOE are similarly exempted from the requirements of this section in the preparation of accounts pursuant to EPCA. This exemptive provision, however, does not affect the applicability of the requirements of § 210.3-18 to filings pursuant to the Federal securities laws.

In addition, the rules published in this release adopt an amendment to § 210.3-17, the replacement cost disclosure rule of Regulation S-X (applicable only to registrants with the Commission). The amendment provides an exemption from this rule for mineral resource assets employed in oil and gas producing activities.

OPTION TO FOLLOW SE OR FC

In Release No. 33-5861 dated August 31, 1977 (42 FR 44972), the Commission proposed rules to adopt the financial measurement standards embodied in the FASB Exposure Draft, published in July 1977, that proposed to require that all oil and gas producing companies adopt a form of SE. Release No. 33-5861 stated in part that it was "* * * the intention of the Commission to propose rules which are the same as the provisions of the FASB Exposure Draft," [44]

The most significant change reflected in the rules adopted by the Commission from those proposed in Release No. 33-5861 is that oil and gas producers may elect to follow either of two methods of accounting, SE or FC. The application of the SE method is prescribed by the rules published in this release; the Commission is publishing concurrently proposed rules for the application of the FC method.[45] A reporting entity will be required to apply either the prescribed SE rules or the FC method ultimately adopted, on a uniform basis to all of its operations and to the operations of its subsidiaries and its investees accounted for by the equity method. The SE method promulgated by the Commission is intended to be identical to the financial accounting measurement standards prescribed in FAS 19.[46] The Commission's goal in proposing rules governing the application of FC is to establish a standard form of FC that is generally consistent with current practice while eliminating certain existing practices that the Commission has determined to be inconsistent with the conceptual basis of FC or to be otherwise inappropriate.

The Commission's conclusions on applying SE and FC are intended to achieve a degree of standardization of existing accounting practices, without requiring the costs that would be associated with adopting either SE or FC as a uniform method for all companies. Although it believes that both SE and FC are deficient in significant respects in reporting financial position and operating results, the Commission has concluded that proper application of the prescribed form of SE or FC in preparing financial statements that include supplemental disclosures of the information required by the rules published in this release will yield financial statements that, taken as a whole, result in a fair presentation of financial position, results of operations, and changes in financial position of oil and gas producing companies.

The Commission is not prepared to accept at the present time financial statements prepared on the basis of RRA as primary financial statements because of the absence of standards and experience in developing valuations of oil and gas reserves for financial accounting purposes. As discussed previously in this release, the Commission is proposing rules that would require the presentation of a supplemental earnings summary of oil and gas activities prepared on the basis of RRA, beginning in filings with the Commission that include fiscal years ending after December 25, 1979. (See Release No. 33-5969, published concurrently.) Registrants may, however, prepare and present supplemental financial statements or other supplemental data on the basis of RRA prior to this date voluntarily, provided that the basis of presentation is adequately disclosed.

SECTION 210.3-18

The newly adopted § 210.3-18 includes the following paragraphs:

Paragraph reference	Description
(a)	Definitions.
(b)-(h)	Application of the successful efforts method of accounting.
(i)	Application of the full cost method of accounting.[47]
(j)	Accounting for income taxes.
(k)	Disclosure requirements.

[47] Proposed rules for the application of full cost accounting are being published for comment in Release 33-5968, issued concurrently with this release.

Paragraph (a): Definitions. The definitions in paragraph (a) are applicable throughout § 210.3-18. Included are: (1) The definition of oil and gas producing activities to which these rules apply; (2) the definition of proved oil and gas reserves and criteria for classifying such reserves as developed or undeveloped; (3) the definitions of proved and unproved properties, and the proved area of properties; (4) the definition of field and reservoir; and (5) the classification of wells as exploratory, development, service, and stratigraphic test wells.

The definitions conform to those contained in FAS 19 except for the definition of proved oil and gas reserves. FAS 19 adopted the definition of proved oil and gas reserves reflected in the Commission's regulations at the time of its publication.[48] The Commission subsequently adopted a somewhat revised definition of proved oil and gas reserves in connection with the adoption of rules relating to industry segment reporting and the establishment of Regulation S-K.[49] That release (ASR No. 236) indicated that the revisions to the definition of proved oil and gas reserves were consistent with past interpretations by the Commission's staff, or were otherwise minor in nature. The Commission also stated in ASR No. 236 its belief that the change

[44] The primary reason for proposing these rules was the timing requirement imposed by EPCA, as discussed in section II, "Background," of this release.

[45] See Release No. 33-5968.

[46] Comments are solicited below on whether the rules accomplish this objective.

[48] See Release No. 33-5706 (41 FR 21764), May 28, 1976.

[49] See Release No. 33-5893 (42 FR 65554), December 23, 1977.

in definition should not result in any changes in the quantities that would have been reported using the previous definition.

The Commission agrees with the many commentators in this proceeding who expressed the need for consistent use of definitions of proved oil and gas reserves for reporting to the various Federal agencies that require such information and for public financial reporting. Use of different definitions raises questions about the credibility of the information that is reported and imposes an undue burden on oil and gas producers.

In furtherance of the objective of achieving consistent reporting of proved oil and gas reserves, the Commission is conforming its definition of proved oil and gas reserves to the definition that has been developed by DOE in connection with its project to establish an Oil and Gas Information System.[50] It is believed, however, that the definition adopted in the rules published in this release is consistent with the definition previously adopted in Regulation S-K.[51]

A critical element of the definition of proved oil and gas reserves is that the oil and gas must be recoverable commercially under existing economic and operating conditions. The Commission's rules require that the prices of oil and gas used in determining commercial recoverability must be currently existing prices with no escalations based upon anticipated future conditions. Currently existing prices include consideration of changes in existing prices provided by contractual arrangements (and escalation to present prices when gas contracts expire). Prospective price increases provided by law or Government regulation in the United States should not be considered, because of a number of past experiences in which similar increases have been modified or suspended.

Paragraphs (b)-(h): Application of SE. The rules in § 210.3-18 (b)-(h) specify the application of SE. They are intended to be identical to the financial accounting measurement standards of FAS 19. The application of SE, as defined by FAS 19, is described above in Section V, "Traditional Oil and Gas Accounting Methods."

The rules adopted by the Commission for the application of SE are generally the same as those proposed in Release No. 33-5861, which reflected the FASB's Exposure Draft. A description of the application of these standards and the changes from the provisions of the Exposure Draft, and thus reflected in paragraphs (b)-(h), are contained in paragraphs 189-232 of FAS 19. The changes reflect principally the treatment of stratigraphic test wells and the assessment of in-progress exploratory wells.

Most commentators in the Commission's proceeding who advocated SE stated that the Commission should adopt the form of SE set forth in FAS 19. A small number of the commentators favoring SE, however, expressed disagreement with several of the FASB's conclusions, including the charging of all geological and geophysical costs to expense, the required assessment of unproved properties, the capitalization of dry development wells, and various aspects of amortizing capitalized costs. Similar views had been presented by other commentators in the proceedings of the Commission and the FASB prior to the publication of FAS 19. These matters were considered by the FASB, as described in FAS 19. The Commission has concluded that, on balance, the form of SE defined by FAS 19 is the appropriate SE method to be adopted in its rules because it provides a uniform and consistent method of accounting for companies that choose to follow SE.

Paragraph (j): Accounting for Income Taxes. The Commission has concluded, that comprehensive interperiod income tax allocation by the deferred method, without considering any interaction for income tax statutory depletion, shall be applied retroactively for all oil and gas producing activities, regardless of whether the SE or FC method is adopted. The Commission believes that this method, which is the same as that prescribed by FAS 19, is required to achieve consistency in accounting for income taxes generally.

Paragraph (k): Disclosure Requirements. Subparagraphs (1) through (5) of this paragraph reflect the rules proposed in Release No. 33-5877, dated October 26, 1977 (42 FR 57661). The proposed rules included the disclosure provisions of the FASB's Exposure Draft, together with disclosure of certain other data.

Persons engaged, in whole or in part, in the production of crude oil or natural gas in the United States are required to maintain accounts so that these data may be compiled for reporting to DOE, as prescribed by EPCA.

The rules adopted by the Commission require the following:

(1) Disclosure on the face of the balance sheet of the accounting method followed (successful efforts or full cost) (§ 210.3-18 (k)(1)).

(2) Disclosure of capitalized costs (§ 210.3-18(k)(2)). This paragraph requires the separate disclosure by geographic area of capitalized costs and related depreciation, depletion, and amortization attributable (a) to proved properties and (b) to unproved properties as of the end of each period for which a balance sheet is required.

(3) Disclosure of costs incurred in oil and gas activities (§ 210.3-18(k)(3)). This paragraph requires, for each full fiscal year that an income statement is required, disclosure by geographic area of (a) aggregate costs incurred in the following activities: acquisition of properties (with separate disclosure of acquisitions of significant proved properties), exploration, development, and production; (b) the provisions for depreciation, depletion, and amortization, and valuation charges to expense; and (c) the entity's share of costs incurred by its investees accounted for by the equity method if the investees' reserves are required to be disclosed.

(4) Historical revenues from producing oil and gas (§ 210.3-18(k)(4)). Disclosure is required for each year that an income statement is required of the historical cash flow and value of transfers (at estimated market prices) from production of (a) proved reserves, (b) reserves applicable to long-term supply or similar agreements in which the entity acts as producer and (c) reserves of the entity's investees accounted for by the equity method.

(5) Disclosure of estimated quantities of proved oil and gas reserves (§ 210.3-18(k)(5)). This paragraph requires the following by major geographic area and for each year for which an income statement is required: (a) Net quantities of proved oil and gas reserves and proved developed reserves as of the beginning and end of each such year; (b) changes in the net quantities of proved reserves, with changes described by certain categories, for each such year; (c) quantities of oil and gas subject to long-term supply, purchase, or similar agreements with foreign governments if the reporting entity participates as a producer, as of the end of each such year, and the net quantities of oil and gas received during each such year attributable to these agreements; and (d) the entity's proportionate share of the net proved oil and gas reserves of its investees that are accounted for by the equity method. Explanations shall also be provided for any important economic factors or significant uncertainties that affect particular components of the disclosure of proved reserves.

The disclosures of capitalized costs required by the newly adopted § 210.3-18(k)(2) reflect a reduction of the detail proposed in Release No. 33-5877. The proposals would have required disclosure of capitalized costs by certain categories, which many commentators considered unnecessary and burdensome. The Commission has limited the segregation of capitalized costs to those related to proved properties and to unproved properties, a segregation it considers necessary to relate balance sheets to the disclosure of information on quantities and valuations of proved oil and gas.[52] In addi-

[50] This definition is contained in Form EIA-23, "Annual Survey of Domestic Oil and Gas Reserves" (43 FR 6993), which has been submitted by DOE to the Office of Management and Budget for review and clearance.

[51] Opportunity for public comment on the newly adopted definition of proved reserves is being provided as discussed below.

[52] Other disclosures of capitalized costs may also be appropriate. Paragraph 5 of APB Opinion No. 12, "Omnibus Opinion—1967," requires disclosure of "* * * balances of major classes of depreciable assets, by nature or function."

V 43 / 177

tion, the rules adopted by the Commission permit the capitalized costs of support equipment and facilities to be included with capitalized costs of either proved properties or unproved properties if they can be related to either category or, if significant, to be disclosed separately.

The proposed rules, consistent with the FASB's Exposure Draft, specified that certain information on capitalized costs be disclosed by entities subject to rate regulation. In explaining the deletion of these requirements from FAS 19, the FASB noted that it had initiated a project involving financial accounting and reporting by rate-regulated companies and that consideration of special disclosures such as those proposed in the Exposure Draft would be included as part of that project. The Commission has concluded that any decision on such disclosure requirements should await the outcome of the broader consideration of this matter by the FASB.

The disclosures of costs incurred in oil and gas producing activities (§ 210.3-18(k)(3)) have also been revised from the disclosures of this nature proposed in Release No. 33-5877. Specifically, the rules do not require (a) separation of costs incurred into amounts capitalized and amounts charged to expense or (b) estimates of costs required to complete development of proved reserves.

As discussed in section VI, "Reporting to the Department of Energy," the principal objective of disclosing costs incurred in oil and gas producing activities on a functional basis is to facilitate analyses that seek to relate costs with oil and gas reserves and to present information on the magnitude of current activities. Whether costs incurred are capitalized or charged to expense is irrelevant for purposes of these analyses and, accordingly, the proposed requirement has been deleted.

Many commentators expressed opposition to the proposal in Release No. 33-5877 that estimated future costs to develop proved reserves be disclosed. They expressed concern about the subjectivity of such estimates and questioned the meaningfulness of the disclosure. The Commission has concluded that this disclosure is not necessary because of the disclosure of information on future net revenue from estimated production of proved oil and gas reserves, as required by § 210.3-18(k)(6).

The remainder of the rules for disclosure of costs incurred are the same as the related provisions of FAS 19 except that separate disclosure is required of depreciation, depletion, and amortization expense; charges to expense resulting from assessments of properties, *i.e.*, valuation write-downs; and capitalized costs and costs incurred by investees accounted for by the equity method if information on the proved reserves of such investees is disclosed.

Costs incurred in oil and gas producing activities are required to be reported in four categories: Acquisition of properties; exploration; development; and production. The Commission intends that this reporting conform to the disclosures specified by FAS 19 and, in less detail, to those required by FRS (as discussed in section VI, "Reporting to the Department of Energy"). Accordingly, the following guidelines are provided for classifying costs into the four categories: [53]

1. Costs incurred in the acquisition of properties.[54] Costs incurred to purchase, lease or otherwise acquire a property, including costs of lease bonuses and options to purchase or lease properties, the portion of costs applicable to minerals when land including mineral rights is purchased in fee, brokers' fees, recording fees, legal costs, and other costs incurred in acquiring properties.

2. Exploration involves (a) identifying areas that may warrant examination and (b) examining specific areas that are considered to have prospects of containing oil and gas reserves, including drilling exploratory wells and exploratory-type stratigraphic test wells. Exploration costs may be incurred both before acquiring the related property (sometimes referred to in part as prospecting costs) and after acquiring the property. Principal types of exploration costs, which include depreciation and applicable operating costs of support equipment and facilities [55] and other costs of exploration activities, are:

(a) Costs of topographical, geographical, and geophysical studies, rights of access to properties to conduct those studies, and salaries and other expenses of geologists, geophysical crews, and others conducting those studies. Collectively, those are sometimes referred to as geological and geophysical or "G&G" costs.[56]

(b) Costs of carrying and retaining undeveloped properties, such as delay rentals, ad valorem taxes on properties, legal costs for title defense, and the maintenance of land and lease records.

(c) Dry hole contributions and bottom hole contributions.

(d) Costs of drilling and equipping exploratory wells.

(e) Costs of drilling exploratory-type stratigraphic test wells.

3. Development costs are incurred to obtain access to proved reserves and to provide facilities for extracting, treating, gathering and storing the oil and gas. More specifically, development costs, including depreciation and applicable operating costs of support equipment and facilities and other costs of development activities, are costs incurred to:

(a) Gain access to and prepare well locations for drilling, including surveying well locations for the purpose of determining specific development drilling sites, clearing ground, draining, road building, and relocating public roads, gas lines, and power lines, to the extent necessary in developing the proved reserves.

(b) Drill and equip development wells, development-type stratigraphic test wells, and service wells, including the costs of platforms and of well equipment such as casing, tubing, pumping equipment, and the wellhead assembly.

(c) Acquire, construct, and install production facilities such as lease flow lines, separators, treaters, heaters, manifolds, measuring devices, and production storage tanks, natural gas cycling and processing plants, and central utility and waste disposal systems.

(d) Provide improved recovery systems.

4. Production involves lifting the oil and gas to the surface and gathering, treating, field processing (as in the case of processing gas to extract liquid hydrocarbons), and field storage. The production function shall normally be regarded as terminating at the outlet valve on the lease or field production storage tank; if unusual physical or operational circumstances exist, it may be more appropriate to regard the production function as terminating at the first point at which oil, gas, or gas liquids are delivered to a main pipeline, a common carrier, a refinery, or a marine terminal.

Production costs are those costs incurred to operate and maintain wells and related equipment and facilities, including depreciation and applicable operating costs of support equipment and facilities and other costs of operating and maintaining those wells and related equipment and facilities. They become part of the cost of oil and gas produced. Examples of production costs (sometimes called lifting costs) are:

(a) Costs of labor to operate the wells and related equipment and facilities.

(b) Repairs and maintenance.

(c) Materials, supplies, and fuel consumed and supplies utilized in operating the wells and related equipment and facilities.

(d) Property taxes and insurance applicable to proved properties and wells and related equipment and facilities.

(e) Severance taxes.

Depreciation, depletion, and amortization of capitalized acquisition, exploration, and development costs are not production costs but also become part of the cost of oil and gas produced along with production (lifting) costs identified above.

5. Overhead, including general and administrative costs such as salaries and office expenses and depreciation charges for office buildings, applicable to oil and gas producing activities but not directly identified with a specific function should be allocated among the functions on a reasonable basis. Such overhead would be included in operating expenses as that term is defined in FASB Statement of Financial Accounting Standards No. 14, "Financial Reporting for Segments of a Business Enterprise." Statement No. 14 requires that operating expenses that are not directly traceable to an industry segment be allocated on a reasonable basis among those industry segments for whose benefits the expenses were incurred. Methods used to allocate operating expenses should be consistently applied from period to period (but, if changed, disclosure shall be made of the nature and the effect of the change in the period of change.)

The rules relating to the disclosure of quantities of proved oil and gas reserves in § 210.3-18(k)(5) have been revised slightly from the related rules proposed in Release No. 33-5877. They now conform to the provisions of FAS 19, as explained in paragraphs 238-244 of appendix B of FAS 19.

Many commentators disagreed with the conclusions of the Commission and the FASB that information on quantities of oil and gas reserves should be included in financial statements, primarily because the estimation of oil and gas reserves is inherently imprecise and is beyond the expertise of independent public accountants. The Commission has concluded that information on oil and gas reserves is needed to supplement financial statements, regardless of the method of accounting used, because of the importance of this information in gaining an understanding of the operations of oil and gas producers. The Auditing Standards Executive Committee of the American Institute of Certified Public Accountants is now engaged in a project to establish auditing procedures, including criteria for the auditor's use of specialists with expertise in estimating oil and gas reserves, that would apply to examinations involving financial statements that include information on oil and gas reserve quantities and valuations. The Commission recognizes that auditors would not be expected to have the expertise to develop or reach opinions on the accuracy of estimates of oil and gas reserves; however, auditors, by using specialists with expertise in estimating oil and gas reserves, should be able to perform sufficient audit procedures to enable them to reach opinions on financial statements that include information on oil and gas reserves.

The accompanying rules also require the disclosure of certain information regarding future net revenues from estimated production of proved oil and gas reserves (§ 210.3-18(k)(6)). These requirements were proposed in Release No. 33-5878 [57] dated November 3, 1977 (42 FR 5765) and revised in Release No. 33-5916 dated March 17, 1978 (43 FR 12334). In addition to letters of comment received in response to these releases, information pertinent to the Commission's consideration of these proposed rules was received in connection with its proceeding (in particular, the public hearing) involving financial accounting and reporting practices of oil and gas producers.

The rules adopted are substantially the same as those proposed except that the data are required to be disclosed in somewhat less detail and a safe-harbor provision has been added. The rules require:

(1) The presentation for each of the first 3 years and the remainder in a single amount of Estimated Future Net Revenues for the following categories: (a) Proved reserves; (b) proved developed reserves; (c) proved reserves applicable to long-term or similar agreements in which the entity acts as producer; and (d) the entity's share of the proved reserves of its investees accounted for by the equity method. The Estimated Future Net Revenues shall be computed by applying to estimated future production of proved reserves, assuming continuation of existing economic conditions, the current prices of oil and gas and current costs of development and production.

(2) The Present Value of the Estimated Future Net Revenues for the four categories presented above using a 10 percent discount rate.

(3) The Present Value of the Estimated Future Net Revenues, separately reported for (a) proved reserves added in prior years and (b) proved reserves added during the current year with separate presentation, if significant (specified to be generally more than 10 percent of current additions), of proved reserves resulting from application of improved recovery techniques or purchases of reserves in-place.

Most of the commentators expressing opposition to these disclosures indicated that developing the data involves estimates that are too dependent on subjective judgments to warrant public reporting. In addition to the significant uncertainties in estimating quantities of proved reserves, judgment would be needed in estimating rates of production, the timing of development expenditures, etc. in developing the future net revenue information. Such information could be misleading, it was argued, because the limitations on the data might not be understood by investors. Because of the subjective nature of the data, some commentators recommended that the disclosures not be required as part of the financial statements, or, at a minimum, be labeled as "unaudited." [58]

In addition to the need for estimates and judgments in developing the data, many commentators felt that the valuation methodology proposed by the Commission would not result in information that would be useful or meaningful. The use of current prices and costs may not be indicative of future economic relationships. Use of an arbitrary discount rate and the exclusion of income tax effects were also cited as factors that would limit the ability of the resulting computations to provide any meaningful indication of the current value of proved reserves.

The requirement for present value disclosures places significant burdens of time and expense on registrants, involving the efforts of geologists, petroleum engineers, and other specialists. Such costs and effort were considered by some commentators to be excessive in relation to the perceived value of the data. Accordingly, some suggested that any mandatory disclosures of this nature be deferred until the previously discussed disclosures of quantities of oil and gas reserves and supplemental historical financial information could be assessed in practice. As an interim measure, some suggested that voluntary disclosures in accordance with guidelines established by the Commission should be permitted.

Many of the letters expressed a belief that the proposed disclosures would be, in essence, a forecast of future economic conditions, and that such forward-looking information represents a significant departure from current financial reporting practice. Individual firms in the oil and gas industry, as well as other industries, should be left discretion as to whether forecasts should be published, according to these commentators. Others argued that present value disclosures would represent a move away from historical cost accounting, and they felt that experimentation with new accounting methods of this nature should not be initiated while the FASB's conceptual framework project is in its initial phases.

In contrast to the above criticisms, a substantial number of letters indicated

[53] All costs reported should be costs relating to net working interests in all properties owned by reporting persons, whether operated by the person or by other persons.

[54] FRS provides that acquisition of unproved properties be separately reported as a component of exploration costs and that acquisition of proved properties be separately reported as a component of development costs.

[55] Support equipment and facilities used in oil and gas producing activities include seismic equipment, drilling equipment, construction and grading equipment, vehicles, repair shops, warehouses, supply points, camps, and division, district or field offices. Some support equipment or facilities may serve two or more of those activities and may also serve transportation, refining, and marketing activities. To the extent that the support equipment and facilities are used in oil and gas producing activities, their depreciation and applicable operating costs become exploration, development or production costs, as appropriate.

[56] G&G studies may be conducted on a property owned by another person, in exchange for an interest in the property if proved reserves are found or to be reimbursed if proved reserves are not found. In such cases, the G&G costs shall be accounted for as a receivable when incurred and, if proved reserves are found, they shall become the costs of the proved property acquired.

[57] Release No. 33-5878 also proposed to rescind the existing requirements for certain registrants to disclose replacement cost information about mineral resource assets employed in oil and gas producing activities. The Commission's actions published in this release include adoption of the proposed revision to the "Exemption" paragraph of § 210.3-17.

[58] As noted previously, the AICPA's Auditing Standards Executive Committee has under consideration a proposed audit guide on oil and gas reserve information that would describe auditing procedures applicable to information on oil and gas reserves, including valuation data, that is disclosed in financial statements.

SEC 1278

V 4 3 / 1 7 7

general support for the proposed disclosures. It was widely felt that the information was of major importance to investors in evaluating the status and performance of oil and gas producing companies. This view is consistent with the Commission's determinations in this proceeding, as discussed in earlier sections of this release.

The Commission has concluded that the benefits of such disclosures outweigh any limitations associated with the subjective nature of the data and the necessary use of arbitrary assumptions to obtain a uniform methodology. The Commission believes that the usefulness of this supplemental information justifies the costs of compliance; furthermore, as discussed earlier in this release, the Commission has concluded that there is potential for achieving substantial improvements in financial reporting in the oil and gas producing industry if valuations of oil and gas reserves can be ultimately incorporated into the primary financial statements.

The Commission recognizes that the present value data may not be equivalent to the current value of registrants' oil and gas properties. Current values must necessarily take into account, among other factors, the values resulting from the likelihood that the properties contain oil and gas in excess of proved reserves and expectations of future changes in economic conditions, such as the probability of future changes in prices and costs. However, the use of uniform assumptions in estimating the data is necessary to insure an acceptable degree of objectivity and comparability of the information required to be disclosed. Registrants will be permitted to disclose additional data based on other assumptions, if such assumptions are reasonable and are adequately explained.

A general provision contained in § 210.3-18(k)(6) requires disclosure of any additional information that management believes is necessary to prevent the data from being misleading. For example, such information could include: (1) A statement that the data may not reflect cash to be received in the future from the sale of oil and gas currently owned, (2) a statement that the data do not necessarily reflect the costs that would be incurred to obtain equivalent oil and gas reserves, and (3) other statements relevant to an understanding of the effects of changing prices and costs on the future operations of the company. Disclosures of this nature might include a discussion of the relationship between the data disclosed and the current value of the registrant's oil and gas properties.

Release 33-5878 requested comments on several specific issues relating to the proposed disclosures. The responses are summarized below:

1. Discount rate. The release proposed that the net revenues be discounted using an estimated production loan rate (i.e., the rate on financing secured solely by oil and gas reserves). Alternatively, comments were requested on whether it would be appropriate for the Commission to specify a uniform discount rate. Criticisms of the production loan rate focused on the fact that it would incorporate an inflation element, while the net revenue data would be based on current prices and costs; that foreign reserves would require different rates; and that the production loan rate was unrealistic because some companies do not obtain such financing. Alternative recommendations included the use of an overall borrowing rate or a weighted-average cost of capital. However, a majority of commentators were in favor of the Commission specifying a uniform rate to improve comparability of the data disclosed. The Commission agrees that the gain to users in terms of comparability outweighs any distortions caused by the use of a single rate by all registrants. Accordingly, the final rules specify use of a 10-percent-discount factor.

2. Other approaches. Because of the Commission's concern with the quantity of data proposed for disclosure, comments were requested on different approaches to achieving the desired objectives. The requirements for disclosure by category of reserve changes and by specific time periods were generally felt to be too detailed, given the inherent lack of precision in the data and the necessary use of somewhat arbitrary assumptions as to prices, costs and discount rate. As discussed below, the rules have been modified to reduce the quantity of data required to be disclosed.

3. Safe harbor provision. The proposed amendments did not include a safe harbor provision. The comment letters addressing this issue were unanimous in urging that such a provision be included, because of the many uncertainties necessarily involved in the development of the data. The Commission has concluded that such a safe harbor provision is appropriate. The rules provide that the information relating to the disclosure of future net revenues from estimated production of proved reserves shall not be deemed to be misleading unless the information is prepared without a reasonable basis or disclosed other than in good faith.

4. Natural gas liquids ("NGL") plants. Staff Accounting Bulletin No. 10 dated July 27, 1976 (41 FR 35163) states in part that "mineral resource assets" include all assets that are directly associated with and which derive value from mineral reserves. Release No. 33-5878 presented a recommendation that NGL plants should be excluded from mineral resource assets (and therefore subject to the replacement cost disclosures specified in § 210.3-17) if two conditions are met: (1) The NGL plant can be replaced and (2) the value of the NGL plant is not primarily dependent on a particular field. Most comments stated that these guidelines are sufficiently specific.[59]

5. Tax effects. The computations of estimated future net revenues do not require consideration of income tax effects. Many commentators felt that failure to include income taxes would be highly misleading, as taxes are a significant component of any stream of net revenues, especially for foreign reserves. However, there was acknowledgement of the difficulty in making any precise association between income taxes and estimated future revenues. The Commission has concluded that the objectives of the present disclosures are better achieved by excluding income taxes from the net revenue and present value computations. However, it is suggested that registrants indicate the magnitude of the income taxes associated with the difference between the computed present values and the financial statement basis of the related proved reserves with appropriate consideration of related deferred income taxes.

6. Competitive impact. A few commentators expressed concern that the proposed reporting requirements could put registrants at a competitive disadvantage relative to foreign companies not registered with the Commission. Future net revenue data presented on a geographical basis could result in disclosures with respect to individual countries, which some commentators stated might restrict their ability to obtain overseas concessions and create political pressures from host governments. The Commission considers separate geographical information significant to a complete presentation of the data. Unusual problems encountered by a registrant in complying with this requirement should be discussed with the staff of the Commission for appropriate resolution.

The comment letters and testimony at the Commission's public hearing also dealt with other implementation issues. Several persons suggested that specific computational guidelines be provided, e.g., that current prices be defined as the weighted average price of oil and gas produced during the most recent year (or month), or that production and development costs be estimated on the basis of overall current per-unit averages. The Commission does not object to these approaches, appropriately applied and disclosed, in developing current prices and costs as long as they result in reasonable estimates, and does not believe it should adopt specific requirements of this nature at this time. In response to concerns about the quantity of data to be required, the rules have been revised to limit to 3 years the time periods for which estimated future net revenues are presented, with the remainder presented as a single amount. Disclosure of the year-end present value attributable to additions to proved reserves from the application of improved recovery methods is required only if significant. Similarly, insignificant additions attributable to purchases of reserves may be included with discoveries and extensions of reserves. Finally, the requirement for disclosure of the weighted-average prices of oil and gas used in the computations has been eliminated.

The Commission stated in Release No. 33-5878 that it was proposing certain analytical data (i.e., future net revenues presented by year, the sensitivity of the data to a change in the

[59] The Commission's staff is providing additional guidance on this matter in SAB No. 23 (Aug. 31, 1978), published concurrently with this release.

discount rate, and the weighted-average unit prices) to provide information that would permit users to vary assumptions used in developing the required data. Much of the analytical data included in the proposed rules has not been included in the rules adopted by the Commission in response to comments on the burden of the requirements. The Commission believes, nevertheless, that such disclosures could be meaningful in certain circumstances and encourages registrants to develop appropriate presentations of this nature.

The following tables illustrate the disclosure that the rules require for each geographic area for which disclosures of net quantities of reserves of oil and gas are presented, i.e., the reporting entity's home country (if significant reserves are located there) and each foreign geographic area (individual countries or groups of countries as appropriate for meaningful disclosure in the circumstances) in which significant reserves are located.

Estimated future net revenues from proved reserves of oil and gas as of December 31, 1979

SOLICITATION OF COMMENTS

As noted previously, the Commission is concerned that the rules published in this release achieve certain objectives. Specifically, comments are requested on the following:

1. It is intended that the rules relating to the application of the SE method of accounting conform to related provisions of FAS 19. Those provisions have been rearranged to facilitate their adoption as rules by the Commission. Comments are requested on whether these rearrangements result in significant deviations or omissions.

2. A further objective of the Commission is that its rules be consistent to the extent practicable and appropriate with the Financial Reporting System being developed by DOE. Instances in which application of these rules would result in differing reporting to the various Federal agencies of the costs incurred in oil and gas producing activities should be communicated to the Commission.

3. Finally, comments are requested on the appropriateness of the revised definition of proved oil and gas reserves. Of particular interest are comments on instances in which this definition would be inconsistent with that developed by DOE, or with the Commission's previous definition as contained in Regulation S-K.

All interested persons are invited to submit their written comments by October 31, 1978. It should, however, be noted that, notwithstanding the opportunity to comment on the above matters, § 210.3-18 has been adopted by the Commission and is effective as adopted unless or until amended by the Commission.

Comments should refer to File S7-715 and should be submitted in triplicate to George A. Fitzsimmons, Secretary, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549. All comments will be available for public inspection.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF THE SUMMARY OF EARNINGS

Guide 22, "Summary of Earnings," which applies to registration statements filed pursuant to the Securities Act of 1933, and the related guide 1, "Summary of Operations," which applies to forms 10 and 10-K, require that a narrative analysis of the financial data presented in the summary be included in applicable filings with the Commission.[60] ASR No. 159 states that the purpose of the narrative analysis is "• • • to enable the investors to appraise the quality of earnings." ASR No. 159 also states:

[T]his analysis should include a discussion of material facts, whether favorable or unfavorable, required to be disclosed or disclosed in the prospectus, registration statement, or report which in the opinion of management may make historical operations or earnings as reported in the summary of earnings not indicative of current or future operations or earnings.

In Release No. 33-5837 dated June 20, 1977 (42 FR 33137), the Commission solicited comments on whether it should require a narrative analysis by management of oil and gas producing activities that would include a discussion of oil and gas reserves, operating statistics, and supplemental financial data. Such an analysis could be useful to investors in assessing financial effort and results in view of the complexities involved in understanding and analyzing the data disclosed supplementally to the primary financial statements. The Commission noted in Release No. 33-5837 several matters that might affect an assessment of oil and gas producing activities:

1. Uncertainties related to estimates of quantities of oil and gas reserves;
2. The likelihood of additional recoverable oil and gas in addition to proved reserves;
3. Significant investments in and plans to undertake improved recovery programs;
4. Major changes in management philosophy regarding exploration and development activities; and
5. Effects of factors such as changing prices of specific goods and services, impact of government regulation, and changes in relationships with host governments.

These and other matters can be important to an understanding of the financial statements and of the information disclosed supplementally. Many commentators felt that such a narrative analysis by management of oil and gas producing activities would be useful. Other commentators expressed the opinion that no new requirement was needed because of the existing provisions of Guides 22 and 1, as discussed above.

The Commission has concluded that the existing requirements in this regard are sufficient. It emphasizes, however, that registrants involved in oil and gas producing operations should focus their narrative analyses pertaining to these operations primarily on exploration, development, and production activities, using the supplemental information required by the rules published in this release to discuss the major factors affecting these activities and their relationship to the information conveyed in the financial statements.

EFFECTIVE DATE

The rules adopted in this release are effective initially for full fiscal years ending after December 25, 1978, that are contained in filings that include fiscal years ending after December 25, 1979. Thus, a company with a calendar fiscal year is required to adhere to these rules initially in filings that include its 1979 fiscal year, although earlier application is encouraged. Accounting changes adopted to conform to the provisions of these rules shall be made retroactively by restating the financial statements of prior periods. Financial statements for the fiscal year in which these rules are first applied shall disclose the nature of the accounting changes and their effect on income before extraordinary items,

[60] The amendments to guides 22 and 1 requiring the presentation of management's discussion and analysis of the summary of earnings (operations) were published in ASR No. 159 dated Aug. 16, 1974 [39 FR 31894].

SE 12 78

net income, and related per share amounts for each period restated.

The Commission had proposed that its rules become effective for fiscal years beginning after June 15, 1978, consistent with the FASB's Exposure Draft. The FASB subsequently determined that the standards of FAS 19 would be effective for fiscal years beginning after December 15, 1978. A later effective date has been established for the Commission's rules in order to provide additional time for registrants to comply. It should be noted, however, that the Commission is proposing in Release No. 33-5967 amendments to Regulation S-K that would apply the disclosure provisions of these rules (outside the financial statements) to filings with the Commission that include fiscal years ending after December 25, 1978.

COMMISSION ACTION

The Commission hereby amends 17 CFR Part 210 by revising the title and table of contents of Part 210; adding paragraph (c) to § 210.1-01; revising the "Exemption" paragraph of § 210.3-17; and adding new § 210.3-18; as indicated below:

1. The title of Part 210 is revised as set forth below:

2. The table of contents of Part 210 is amended by adding an entry for § 210.3-18 to read as set forth below:

RULES OF GENERAL APPLICATION

Sec.

* * * * *

210.3-18 Financial accounting and reporting for oil and gas producing activities pursuant to the federal securities laws and the Energy Policy and Conservation Act of 1975.

3. A new paragraph (c) is added to § 210.1-01 as set forth below:

§ 210.1-01 Application of Regulation S-X (17 CFR Part 210).

* * * * *

(c) In addition to filings pursuant to the Federal securities laws, § 210.3-18 applies to the preparation of accounts by persons engaged, in whole or in part, in the production of crude oil or natural gas in the United States pursuant to section 503 of the Energy Policy and Conservation Act of 1975 (42 U.S.C. 6383) ("EPCA") and section 11(c) of the Energy Supply and Environmental Coordination Act of 1974 (15 U.S.C. 796), as amended by section 505 of EPCA.

4. The Exemption to § 210.3-17 is revised as set forth below:

§ 210.3-17 Current replacement cost information.

* * * * *

Exemption. This section shall not apply to any person where the total of inventories and gross property, plant and equipment (i.e., before deducting accumulated depreciation, depletion and amortization) as shown in the consolidated balance sheet at the beginning of the most recently completed fiscal year is less than $100 million or where the total of inventories and gross property, plant and equipment is less than 10 percent of the total assets of the person as shown in the consolidated balance sheet at the beginning of the most recently completed fiscal year. The replacement cost information specified below in paragraphs (c) and (d) is not required to be shown for mineral resource assets employed in the production of crude oil or natural gas.

* * * * *

5. A new § 210.3-18 is added as set forth below:

§ 210.3-18 Financial accounting and reporting for oil and gas producing activities pursuant to the Federal securities laws and the Energy Policy and Conservation Act of 1975.

This section prescribes financial accounting and reporting standards for registrants of the Commission engaged in oil and gas producing activities in filings under the Federal securities laws and for the preparation of accounts by persons engaged, in whole or in part, in the production of crude oil or natural gas in the United States, pursuant to section 503 of the Energy Policy and Conservation Act of 1975 (42 U.S.C. 6383) ("EPCA") and section 11(c) of the Energy Supply and Environmental Coordination Act of 1974 (15 U.S.C. 796) ("ESECA"), as amended by section 505 of EPCA.

Exemption. Any person exempted by the Department of Energy from any recordkeeping or reporting requirements pursuant to section 11(c) of ESECA, as amended, is similarly exempted from the related provisions of this section in the preparation of accounts pursuant to EPCA. This exemption does not affect the applicability of this section to filings pursuant to the Federal securities laws.

(a) *Definitions.* The following definitions apply to the terms listed below as they are used in this section:

(1) *Oil and gas producing activities.*

(i) Such activities include:

(A) The search for crude oil, including condensate and natural gas liquids, or natural gas ("oil and gas") in their natural states and original locations.

(B) The acquisition of property rights or properties for the purpose of further exploration and/or for the purpose of removing the oil or gas from existing reservoirs on those properties.

(C) The construction, drilling, and production activities necessary to retrieve oil and gas from its natural reservoirs, and the acquisition, construction, installation, and maintenance of field gathering and storage systems—including lifting the oil and gas to the surface and gathering, treating, field processing (as in the case of processing gas to extract liquid hydrocarbons) and field storage. For purposes of this section, the oil and gas production function shall normally be regarded as terminating at the outlet valve on the lease or field storage tank; if unusual physical or operational circumstances exist, it may be appropriate to regard the production functions as terminating at the first point at which oil, gas, or gas liquids are delivered to a main pipeline, a common carrier, a refinery, or a marine terminal.

(ii) Oil and gas producing activities do not include:

(A) The transporting, refining and marketing of oil and gas.

(B) Activities relating to the production of natural resources other than oil and gas.

(C) The production of geothermal steam or the extraction of hydrocarbons as a byproduct of the production of geothermal steam or associated geothermal resources as defined in the Geothermal Steam Act of 1970.

(D) The extraction of hydrocarbons from shale, tar sands, or coal.

(2) *Proved oil and gas reserves.* Proved oil and gas reserves are the estimated quantities of crude oil, natural gas, and natural gas liquids which geological and engineering data demonstrate with reasonable certainty to be recoverable in future years from known reservoirs under existing economic and operating conditions, i.e., prices and costs as of the date the estimate is made. Prices include consideration of changes in existing prices provided only by contractual arrangements, but not on escalations based upon future conditions.

(i) Reservoirs are considered (A) proved and tested if economic producibility is supported by either actual production or conclusive formation test (drill stem or wire line), or (B) proved and untested if economic producibility is supported only by core analyses and/or electric or other log interpretations. The area of a reservoir considered proved includes that portion delineated by drilling and defined by gas-oil and/or oil-water contacts, if any; and the immediately adjoining portions not yet drilled, but which can be reasonably judged as economically productive on the basis of available geological and engineering data. In the absence of information on fluid contacts, the lowest known structural occurrence of hydrocarbons controls the lower proved limit of the reservoir.

(ii) It is not necessary that production, gathering or transportation facilities be installed or operative for a reservoir to be considered proved. However, it should be reasonably certain that such facilities will be installed in the future.

(iii) Reserves which can be produced economically through application of improved recovery techniques (such as fluid injection) are included in the "proved" classification when successful testing by a pilot project, or the operation of an installed program in the reservoir, provides support for the engineering analysis on which the project or program was based.

(iv) Estimates of proved crude oil, natural gas, or natural gas liquids reserves do not include (A) those reserves, the recovery of which is subject to reasonable doubt because of uncertainty as to geology, reservoir characteristics, or economic factors; (B) reserves that may occur in undrilled prospects; (C) reserves that may be recovered from oil shales, coal, gilsonite, and other such sources; and (D) volumes placed in underground storage.

(3) *Proved developed oil and gas reserves.* Proved developed oil and gas reserves and reserves that can be expected to be recovered through existing wells with existing equipment and operating methods. Additional oil and gas expected to be obtained through the application of fluid injection or other improved recovery techniques for supplementing the natural forces and mechanisms of primary recovery should be included as "proved developed reserves" only after testing by a pilot project or after the operation of an installed program has confirmed through production response that increased recovery will be achieved.

(4) *Proved undeveloped reserves.* Proved undeveloped oil and gas reserves are proved reserves that are expected to be recovered from new wells on undrilled acreage, or from existing wells where a relatively major expenditure is required for recompletion. Reserves on undrilled acreage shall be limited to those drilling units that offset productive units and that are reasonably certain of production when drilled.

(5) *Proved properties.* Properties with proved reserves.

(6) *Unproved properties.* Properties with no proved reserves.

(7) *Proved area.* The part of a property to which proved reserves have been specifically attributed.

(8) *Field.* An area consisting of a single reservoir or multiple reservoirs all grouped on or related to the same individual geological structural feature and/or stratigraphic condition. There may be two or more reservoirs in a field which are separated vertically by intervening impervious strata, or laterally by local geologic barriers, or by both. Reservoirs that are associated by being in overlapping or adjacent fields may be treated as a single or common operational field. The geological terms "structural feature" and "stratigraphic condition" are intended to identify localized geological features as opposed to the broader terms of basins, trends, provinces, plays, areas-of-interest, etc.

(9) *Reservoir.* A porous and permeable underground formation containing a natural accumulation of producible oil or gas that is confined by impermeable rock or water barriers and is individual and separate from other reservoirs.

(10) *Exploratory well.* A well drilled to find and produce oil or gas in an unproved area, to find a new reservoir in a field previously found to be productive of oil or gas in another reservoir, or to extend a known reservoir.

(11) *Development well.* A well drilled within the proved area of an oil or gas reservoir to the depth of a stratigraphic horizon known to be productive.

(12) *Service well.* A well drilled or completed for the purpose of supporting production in an existing field. Specific purposes of service wells include gas injection, water injection, steam injection, air injection, saltwater disposal, water supply for injection, observation, or injection for in-situ combustion.

(13) *Stratigraphic test well.* A drilling effort, geologically directed, to obtain information pertaining to a specific geologic condition. Such wells customarily are drilled without the intention of being completed for hydrocarbon production. This classification also includes tests identified as core tests and all types of expendable holes related to hydrocarbon exploration. Stratigraphic test wells are classified as (i) "exploratory-type," if not drilled in a proved area, or (ii) "development-type," if drilled in a proved area.

(b) *Costs to be capitalized if the successful efforts method of accounting is followed.* The costs of the following assets involved in oil and gas producing activities are to be capitalized when incurred:

(1) *Mineral interests in properties.* Including (i) fee ownership or a lease, concession, or other interest representing the right to extract oil or gas subject to such terms as may be imposed by the conveyance of that interest; (ii) royalty interests, production payments payable in oil or gas, and other nonoperating interests in properties operated by other; and (iii) those agreements with foreign governments or authorities under which a reporting entity participates in the operation of the related properties or otherwise serves as "producer" of the underlying reserves (as opposed to being an independent purchaser, broker, dealer, or importer). Properties do not include other supply agreements or contracts that represent the right to purchase, rather than extract, oil and gas.

(2) *Wells and related equipment and facilities.* Including: (i) Costs incurred to drill and equip those exploratory wells and exploratory-type stratigraphic test wells that have found proved reserves and (ii) development costs, i.e., costs incurred to obtain access to proved reserves and provide facilities for extracting, treating, gathering, and storing the oil and gas, including the drilling and equipping of development wells and development-type stratigraphic test wells (whether those wells are successful or unsuccessful) and service wells.

(3) *Support equipment and facilities used in oil and gas producing activities.* Items such as seismic equipment, drilling equipment, construction and grading equipment, vehicles, repair shops, warehouses, supply points, camps, and division, district, or field offices.

(4) *Uncompleted wells, equipment and facilities.* Including costs incurred to: (i) Drill and equip wells that are not yet completed and (ii) acquire or construct equipment and facilities that are not yet completed and installed.

(c) *Assessment of unproved properties if the successful efforts method of accounting is followed.* Unproved properties shall be assessed periodically to determine whether they have been impaired. A property would likely be impaired, for example, if a dry hole has been drilled on it and the enterprise has no firm plans to continue drilling. Also, the likelihood of partial or total impairment of a property increases as the expiration of the lease term approaches if drilling activity has not commenced on the property or on nearby properties. Information that becomes available after the end of the period covered by the financial statements but before those financial statements are issued shall be taken into account in evaluating conditions that existed at the balance sheet date.

(1) If the results of the assessment indicate impairment, a loss shall be recognized by providing a valuation allowance. Impairment of individual unproved properties whose acquisition costs are relatively significant shall be assessed on a property-by-property basis, and an indicated loss shall be recognized by providing a valuation allowance. When a reporting entity has a relatively large number of unproved properties whose acquisition costs are not individually significant, it may not be practical to assess impairment on a property-by-property basis,

V 43 / 177

in which case the amount of loss to be recognized and the amount of the valuation allowance needed to provide for impairment of those properties shall be determined by amortizing those properties, either in the aggregate or by groups, on the basis of the experience of the entity in similar situations and other information about such factors as the primarly lease term of those properties, the average holding period of unproved properties, and the relative proportion of such properties on which proved reserves have been found in the past.

(2) A property shall be reclassified from unproved properties to proved properties when proved reserves are discovered on or otherwise attributed to the property. Occasionally, a single property such as a foreign lease or concession covers so vast an area that only the portion of the property to which the proved reserves relate—determined on the basis of geological structural features or stratigraphic conditions—should be reclassified from unproved to proved. For a property whose impairment has been assessed individually, the net carrying amount (acquisition cost minus valuation allowance) shall be reclassified to proved properties; for properties amortized by providing a valuation allowance on a group basis, the gross acquisition cost shall be reclassified.

(d) *Surrender or abandonment of properties if the successful efforts method of accounting is followed.* When an unproved property is surrendered, abandoned, or otherwise deemed worthless, capitalized acquisition costs relating thereto shall be charged against the related allowance for impairment to the extent an allowance has been provided; if the allowance previously provided is inadequate, a loss shall be recognized. Normally, no gain or loss shall be recognized if only an individual well or individual item of equipment is abandoned or retired or if only a single lease or other part of a group of proved properties constituting the amortization base is abandoned or retired as long as the remainder of the property or group of properties continues to produce oil or gas. Instead, the asset being abandoned or retired shall be deemed to be fully amortized, and its costs shall be charged to accumulated depreciation, depletion, or amortization. When the last well on an individual property (if that is the amortization base) or group of properties (if amortization is determined on the basis of an aggregation of properties with a common geological structure) ceases to produce and the entire property or property group is abandoned, gain or loss shall be recognized. Occasionally, the partial abandonment or retirement of a proved property or group of proved properties or the abandonment or retirement of wells or related equipment or facilities may result from a catastrophic event or other major abnormality. In those cases, a loss shall be recognized at the time of abandonment or retirement.

(e) *Amortization of capitalized costs if the successful effects method of accounting is followed.* (1) Capitalized acquisition costs of proved properties shall be amortized using the unit-of-production method on the basis of total estimated units of proved oil and gas reserves.

(2) Capitalized costs of exploratory wells and exploratory-type stratigraphic test wells that have found proved reserves and capitalized development costs shall be amortized (depreciated) using the unit-of-production method on the basis of total estimated units of proved developed reserves. However, it may be more appropriate, in some cases, to depreciate natural gas cycling and processing plants by a method other than the unit-of-production method.

(3) Amortization, using the unit-of-production method as required by subparagraphs (1) and (2) of this paragraph, may be computed either on a property-by-property basis or on the basis of some reasonable aggregation of properties with a common geological structural feature or stratigraphic condition, such as a reservoir or field. Capitalized acquisition costs of a relatively large number of royalty interests that are not individually significant may be aggregated without regard to commonality of geological structural features or stratigraphic conditions; if information is not available to estimate reserve quantities applicable to royalty interests owned, a method other than the unit-of-production method may be used to amortize their acquisition costs. If significant development costs (such as the cost of an offshore production platform) are incurred in connection with a planned group of development wells before all of the planned wells have been drilled, it will be necessary to exclude a portion of those development costs in determining the unit-of-production amortization rate until the additional development wells are drilled. Similarly, it will be necessary to exclude, in computing the amortization rate, those proved developed reserves that will be produced only after significant additional development costs are incurred, such as for improved recovery systems. However, in no case should future development costs be anticipated in computing the amortization rate. Estimated dismantlement and abandonment costs and estimated residual salvage values shall be taken into account in determining amortization and depreciation rates. For those properties or groups of properties containing both oil reserves and gas reserves, the units of oil and gas used to compute amortization shall be converted to a common unit of measure on the basis of their approximate relative energy content (without considering their relative sales values). Unit-of-production amortization rates shall be revised whenever there is an indication of the need for revision but at least once a year; those revisions shall be accounted for prospectively as changes in accounting estimates.

(f) *Costs to be charged to expense as incurred if the successful efforts method of accounting is followed.* Costs incurred in oil and gas producing activities other than those described in paragraph (b) of this section shall be charged to expense. Examples include geological and geophysical costs, the costs of carrying and retaining undeveloped properties, the costs of drilling those exploratory wells and exploratory-type stratigraphic test wells that do not find proved reserves (see paragraph (g) of this section), and production costs.

(g) *Accounting for the costs of exploratory wells and exploratory-type stratigraphic test wells if the successful efforts method of accounting is followed.* The costs of drilling exploratory wells and the costs of drilling exploratory-type stratigraphic test wells shall be capitalized as part of the reporting entity's uncompleted wells, equipment, and facilities pending determination of whether the well has found proved reserves. If the well has found proved reserves, the capitalized costs of drilling the well shall become part of the entity's wells and related equipment and facilities (even though the well may not be completed as a producing well); if, however, the well has not found proved reserves, the capitalized costs of drilling the well, net of any salvage value, shall be charged to expense. The determination of whether proved reserves are found is usually made on or shortly after completion of drilling the well, and the capitalized costs shall either be charged to expense or be reclassified as part of the costs of wells and related equipment and facilities at that time. Information that becomes available after the end of the period covered by the financial statements but before those financial statements are issued shall be taken into account in evaluating conditions that existed at the balance sheet date. Occasionally, an exploratory well or an exploratory-type stratigraphic test well may be determined to have found oil and gas reserves, but classification of those reserves as proved cannot be made when drilling is completed. In those cases, one of the following subparagraphs shall apply:

(1) Exploratory wells that find oil and gas reserves in an area requiring a major capital expenditure, such as a trunk pipeline, before production could begin. On completion of drilling, an exploratory well may be determined to have found oil and gas reserves, but classification of those reserves as proved depends on whether a major capital expenditure can be justified which, in turn, depends on whether additional exploratory wells find a sufficient quantity of additional reserves. In that case, the cost of drilling the exploratory well shall continue to be carried as an asset pending determination of whether proved reserves have been found only as long as both of the following conditions are met: (i) The well has found a sufficient quantity of reserves to justify its completion as a producing well if the required capital expenditure is made, and (ii) drilling of the additional exploratory wells is under way or firmly planned for the near future. Otherwise, the exploratory well shall be assumed to be impaired, and its costs shall be charged to expense.

(2) All other exploratory wells that find oil and gas reserves. In the absence of a determination as to whether the reserves that have been found can be classified as proved, the costs of drilling such an exploratory well shall not be carried as an asset for more than 1 year following completion of drilling. If, after that year has passed, a determination that proved reserves have been found cannot be made, the well shall be assumed to be impaired, and its costs shall be charged to expense.

(3) Exploratory-type stratigraphic test wells that find oil and gas reserves. On completion of drilling, such a well may be determined to have found oil and gas reserves, but classification of those reserves as proved depends on whether a major capital expenditure (usually a production platform) can be justified which, in turn, depends on whether additional exploratory-type stratigraphic test wells find a sufficient quantity of additional reserves. In the case, the cost of drilling the exploratory-type stratigraphic test well shall continue to be carried as an asset pending determination of whether proved reserves have been found only as long as both of the following conditions are met: (i) The well has found a quantity of reserves that would justify its completion for production had it not been simply a stratigraphic test well, and (ii) drilling of the additional exploratory-type stratigraphic test wells is under way or firmly planned for the near future. Otherwise, the exploratory-type stratigraphic tests well shall be assumed to be impaired, and its costs shall be charged to expense.

(h) *Mineral property conveyances and related transactions if the successful efforts method of accounting is followed.* (1) Certain transactions, sometimes referred to as conveyances, are in substance borrowings repayable in cash or its equivalent and shall be accounted for as borrowings. The following are examples of such transactions:

(i) Entities seeking supplies of oil or gas sometimes made cash advances to operators to finance exploration in return for the right to purchase oil or gas discovered. Funds advanced for exploration that are repayable by offset against purchases of oil or gas discovered, or in cash if insufficient oil and gas is produced by a specified date, shall be accounted for as receivable by the lender and as a payable by the operator.

(ii) Funds advanced to an operator that are repayable in cash out of the proceeds from a specified share of future production of a producing property, until the amount advanced plus interest at a specified or determinable rate is paid in full, shall be accounted for as a borrowing. The advance is a payable for the recipient of the cash and a receivable for the party making the advance. Such transactions, as well as those described in subparagraph (5)(i) of this paragraph, are commonly referred to as production payments. The two types differ in substance, however, as explained in subparagraph (5)(i) of this paragraph.

(2) In the following types of conveyances, gain or loss shall not be recognized at the time of conveyance:

(i) A transfer of assets used in oil and gas producing activities (including both proved and unproved properties) in exchange for other assets also used in oil and gas producing activities.

(ii) A pooling of assets in a joint undertaking intended to find, develop, or produce oil or gas from a particular property or group of properties.

(3) In the following types of conveyances, gain shall not be recognized at the time of the conveyance:

(i) A part of an interest owned is sold and substantial uncertainty exists about recovery of the costs applicable to the retained interest.

(ii) A part of an interest owned is sold and the seller has a substantial obligation for future performance, such as an obligation to drill a well or to operate the property without proportional reimbursement for that portion of the drilling or operating costs applicable to the interest sold.

(4) If a conveyance is not one of the types described in subparagraphs (2) and (3) of this paragraph, gain or loss shall be recognized unless there are other aspects of the transaction that would prohibit such recognition under accounting principles applicable to enterprises in general.

(5) In accordance with subparagraphs (2) through (4) of this paragraph, the following types of transactions shall be accounted for as indicated in each example. No attempt has been made to include the many variations of those arrangements that occur, but subparagraphs (2) through (4) of this paragraph shall, where applicable, determine the accounting for those other arrangements as well.

(i) Some production payments differ from those described in subparagraph (1)(ii) of this paragraph in that the seller's obligation is not expressed in monetary terms but as an obligation to deliver, free and clear of all expenses associated with operation of the property, a specified quantity of oil or gas to the purchaser out of a specified share of future production. Such a transaction is a sale of a mineral interest for which gain shall not be recognized because the seller has a substantial obligation for future performance. The seller shall account for the funds received as unearned revenue to be recognized as the oil or gas is delivered. The purchaser of such a production payment has acquired an interest in a mineral property that shall be recorded at cost and amortized by the unit-of-production method as delivery takes place. The estimated oil or gas reserves and production data shall be reported, in accordance with paragraph (k) of this section, as those of the purchaser of the production payment and not of the seller.

(ii) An assignment of the operating interest in an unproved property with retention of a nonoperating interest in return for drilling, development, and operation by the assignee is a pooling of assets in a joint undertaking for which the assignor shall not recognize gain or loss. The assignor's cost of the original interest shall become the cost of the interest retained. The assignee shall account for all costs incurred as specified by paragraphs (b) through (g) of this section and shall allocate none of those costs to the mineral interest acquired. If oil or gas is discovered, each party shall report its share of oil and gas reserves and production, in accordance with paragraph (k) of this section.

(iii) An assignment of a part of an operating interest in an unproved property in exchange for a "free well" with provision for joint ownership and operation is a pooling of assets in a joint undertaking by the parties. The assignor shall record no cost for the obligatory well; the assignee shall record no cost for the mineral interest acquired. All drilling, development, and operating costs incurred by either party shall be accounted for as provided in paragraphs (b) through (g) of this section. If the conveyance agree-

SEP 12 78

ment requires the assignee to incur geological or geophysical expenditures instead of, or in addition to, a drilling obligation, those costs shall likewise be accounted for by the assignee as provided in paragraphs (b) through (g) of this section. If reserves are discovered, each party shall report its share of reserves and production, in accordance with paragraph (k) of this section.

(iv) A part of an operating interest in an unproved property may be assigned to effect an arrangement called a "carried interest," whereby the assignee (the carrying party) agrees to defray all costs of drilling, developing, and operating the property and is entitled to all of the revenue from production from the property, excluding any third party interest, until all of the assignee's costs have been recovered, after which the assignor will share in both costs and production. Such an arrangement represents a pooling of assets in a joint undertaking by the assignor and assignee. The carried party shall make no accounting for any costs and revenue until after recoupment (payout) of the carried costs by the carrying party. Subsequent to payout the carried party shall account for its share of revenue, operating expenses, and (if the agreement provides for subsequent sharing of costs rather than a carried interest) subsequent development costs. During the payout period the carrying party shall record all costs, including those carried, as provided in paragraphs (b) through (g) of this section, and shall record all revenue from the property including that applicable to the recovery of costs carried. The carried party shall report as oil or gas reserves, in accordance with paragraph (k) of this section, only its share of proved reserves estimated to remain after payout, and unit-of-production amortization of the carried party's property costs shall not commence prior to payout. Prior to payout the carrying party's reserve estimates and production data, reported in accordance with paragraph (k) of this section, shall include the quantities applicable to recoupment of the carried costs.

(v) A part of an operating interest owned may be exchanged for a part of an operating interest owned by another party. The purpose of such an arrangement, commonly called a joint venture in the oil and gas industry, often is to avoid duplication of facilities, diversify risks, and achieve operating efficiencies. Such reciprocal conveyances represent exchanges of similar productive assets, and no gain or loss shall be recognized by either party at the time of the transaction. In some joint ventures, which may or may not involve an exchange of interests, the parties may share different elements of costs in different proportions. In such an arrangement a party may acquire an interest in a property or in wells and related equipment that is disproportionate to the share of costs borne by it. As in the case of a carried interest or a free well, each party shall account for its own cost under the provisions of this section. No gain shall be recognized for the acquisition of an interest in joint assets, the cost of which may have been paid in whole or in part by another party.

(vi) In a unitization, all of the operating and nonoperating participants pool their assets in a producing area (normally a field) to form a single unit and in return receive an undivided interest (of the same type as previously held) in that unit. Unitizations generally are undertaken to obtain operating efficiencies and to enhance recovery of reserves, often through improved recovery operations. Participation in the unit is generally proportionate to the oil and gas reserves contributed by each. Because the properties may be in different stages of development at the time of unitization, some participants may pay cash and others may receive cash to equalize contributions of wells and related equipment and facilities with the ownership interests in reserves. In those circumstances, cash paid by a participant shall be recorded as an additional investment in wells and related equipment and facilities, and cash received by a participant shall be recorded as a recovery of cost. The cost of the assets contributed plus or minus cash paid or received is the cost of the participant's undivided interest in the assets of the unit. Each participant shall include its interest in reporting reserve estimates and production data.

(vii) If the entire interest in an unproved property is sold for cash or cash equivalent, recognition of gain or loss depends on whether, in applying paragraph (c) of this section, impairment had been assessed for that property individually, or by amortizing that property as part of a group. If impairment was assessed individually, gain or loss shall be recognized. For a property amortized by providing a valuation allowance on a group basis, neither gain nor loss shall be recognized when an unproved property is sold unless the sales price exceeds the original cost of the property, in which case gain shall be recognized in the amount of such excess.

(viii) If a part of the interest in an unproved property is sold, even though for cash or cash equivalent, substantial uncertainty usually exists as to recovery of the cost applicable to the interest retained. Consequently, the amount received shall be treated as a recovery of cost. However, if the sales price exceeds the carrying amount of a property whose impairment has been assessed individually in accordance with paragraph (c) of this section, or exceeds the original cost of a property amortized by providing a valuation allowance on a group basis, gain shall be recognized in the amount of such excess.

(ix) The sale of an entire interest in a proved property that constitutes a separate amortization base is not one of the types of conveyances described in paragraphs (h)(2) and (h)(3) of this section. The difference between the amount of sales proceeds and the unamortized cost shall be recognized as a gain or loss.

(x) The sale of a part of a proved property, or of an entire proved property constituting a part of an amortization base, shall be accounted for as the sale of an asset, and a gain or loss shall be recognized, since it is not one of the conveyances described in paragraphs (h)(2) and (h)(3) of this section. The unamortized cost of the property or group of properties, a part of which was sold, shall be apportioned to the interest sold and the interest retained on the basis of the fair values of those interests. However, the sale may be accounted for as a normal retirement under the provisions of paragraph (d) of this section with no gain or loss recognized if doing so does not significantly affect the unit-of-production amortization rate.

(xi) The sale of the operating interest in a proved property for cash with retention of a nonoperating interest is not one of the types of conveyances described in paragraphs (h)(2) and (h)(3) of this section. Accordingly, it shall be accounted for as the sale of an asset, and any gain or loss shall be recognized. The Seller shall allocate the cost of proved property to the operating interest sold and the nonoperating interest retained on the basis of the fair values of those interests.

(xii) The sale of a proved property subject to a retained production payment that is expressed as a fixed sum of money payable only from a specified share of production from that property, with the purchaser of the property obligated to incur the future costs of operating the property, shall be accounted for as follows: If satisfaction of the retained production payment is reasonably assured, the seller of the property, who retained the production payment, shall record the transaction as a sale, with recognition of any resulting gain or loss. The retained production payment shall be recorded as a receivable. The purchaser shall record as the cost of the assets acquired the cash consideration paid plus the present value of the retained production payment, which shall be recorded as a payable. The oil and gas reserve estimates and production data, including those applicable to liquida-

tion of the retained production payment, shall be reported by the purchaser of the property. If satisfaction of the retained production payment is not reasonably assured, the transaction is in substance a sale with retention of an overriding royalty that shall be accounted for in accordance with subparagraph (5)(xi) of this paragraph.

(xiii) The sale of a proved property subject to a retained production payment that is expressed as a right to a specified quantity of oil or gas out of a specified share of future production shall be accounted for in accordance with subparagraph (5)(xi) of this paragraph.

(i) *Application of the full cost method of accounting.* (Provisions of this paragraph have been proposed for public comment in Release No. 33-5968, dated August 31, 1978.)

(j) *Income taxes.* Comprehensive interperiod income tax allocation by the deferred method shall be followed for intangible drilling and development costs and other costs incurred that enter into the determination of taxable income and pretax accounting income in different periods. The excess of statutory depletion over cost depletion for income tax purposes shall be accounted for as a permanent difference in the period in which the excess is deducted for income tax purposes.

(k) *Disclosure of quantities of proved oil and gas reserves and historical financial data.* The following data shall be disclosed in the body of the financial statements, in the notes thereto, or in a separate schedule or other presentation that is an integral part of the financial statements.

(1) *Disclosure of method of accounting.* The reporting entity shall disclose on the face of its balance sheet that it is adhering to the successful efforts method of accounting or the full cost method of accounting.

(2) *Disclosure of capitalized costs.* The aggregate amount of capitalized costs relating to oil and gas producing activities and the aggregate amount of the related accumulated depreciations, depletion, amortization, and valuation allowances shall be reported as of the end of each period for which a balance sheet is presented, with separate presentation for each geographic area for which quantities of proved reserves are presented in accordance with paragraph (k)(5) of this section. If the capitalized costs of unproved properties are significant, aggregate amounts shall be reported separately for capitalized costs related to unproved properties and capitalized costs related to proved properties. Capitalized costs of support equipment and facilities may be disclosed separately or included, as appropriate, with capitalized costs of proved and unproved properties.

(3) *Disclosure of costs incurred in oil and gas producing activities.* The financial statements shall disclose the amounts of each of the following types of costs for each year for which an income statement is required (whether those costs are capitalized or charged to expense at the time they are incurred): (i) Property acquisition costs (disclose separately the costs of acquiring proved properties, if significant); (ii) Exploration costs; (iii) Development costs; and (iv) Production (lifting) costs.

Exploration, development, and production costs include depreciation of support equipment and facilities used in those activities rather than the expenditures to acquire support equipment and facilities. Production (lifting) costs do not include depreciation, depletion, and amortization of capitalized acquisition, exploration, and development costs. If some or all of those costs are incurred in foreign countries, the amounts shall be disclosed separately for each of the geographic areas for which reserve quantities are disclosed in accordance with paragraph (k)(5) of this section and for any other foreign geographic area in which significant costs have been incurred without discovery of significant proved reserves. Also, disclose depreciation, depletion, amortization, and valuation provisions relating to oil and gas producing activities, presented separately for each of these geographic areas. If the reporting entity's share of the oil and gas reserves of its investee companies accounted for by the equity method is reported in conformity with paragraph (k)(5) of this section, disclosure shall also be made of the investor's share of its investee's capitalized costs and costs incurred in oil and gas producing activities.

(4) *Revenues from producing oil and gas.* (i) For each full fiscal year for which an income statement is required, disclose, for each geographic area for which reserve quantities are disclosed in accordance with paragraph (k)(5) of this section, the net revenues from oil and gas production related to each of the following, if significant: (A) Proved developed oil and gas reserves, (B) reserves applicable to long-term supply or similar agreements with foreign governments in which the entity acts as producer (see paragraph (k)(5) of this section), and (C) the entity's proportional interest in reserves of investees accounted for by the equity method.

(ii) Net revenues shall be computed by subtracting production costs from gross revenues that are determined in accordance with the provisions of this subparagraph, as presented below. The following accounting practices shall be applied in determining gross revenues from sales or transfers of production of oil and gas:

(A) Sales to unaffiliated entities shall be included in gross revenues at the amount received in sales transactions attributable to net working interests, royalty interests, oil payments interests (see paragraph (h) of this section), net profits interests, etc., of the reporting entity. Production or severance taxes should not be deducted in determining gross revenues. Royalty payments and net profits disbursements should be excluded from gross revenues.

(B) Sales and transfers to unconsolidated affiliated persons and to other operations (such as refineries, chemical plants, etc.) of the reporting entity shall be separately disclosed and accounted for in the same manner as described in paragraph (k)(4)(ii)(A) of this section except that such sales and transfers shall be valued at estimated market prices based on the prices of comparable products using posted field prices, if applicable, or amounts estimated to represent prices equivalent to those that could be obtained in a competitive arm's-length market environment, giving recognition to transportation costs, quality differences, and arrangements with and regulation of governments.

(5) *Disclosure of estimated quantities of proved oil and gas reserves.* Net quantities of proved reserves and proved developed reserves of crude oil (including condensate and natural gas liquids) and natural gas shall be reported as of the beginning and the end of each full fiscal year for which an income statement is required. "Net" quantities of reserves include those relating to the operating and nonoperating interests in properties as defined in paragraph (b)(1) of this section. Quantities of reserves relating to royalty interests owned shall be included in "net" quantities if the necessary information is available; if reserves relating to royalty interests owned are not included because the information is unavailable, that fact and the reporting entity's share of oil and gas produced for those royalty interests shall be reported for each year for which a complete set of financial statements is presented. "Net" quantities shall not include reserves relating to interests of others in properties owned by the reporting entity.

(l) Changes in the net quantities of proved reserves of oil and gas during each full fiscal year for which an income statement is required shall be reported. Changes resulting from each of the following shall be shown separately, with appropriate explanation of significant changes:

(A) *Revisions of previous estimates.* Revisions represent changes in previ-

V 43 / 177 SE 12 78

V 4 3 / 1 7 7

ous estimates of proved reserves, either upward or downward, resulting from new information (except for an increase in proved acreage) normally obtained from development drilling and production history or resulting from a change in economic factors.

(B) *Improved recovery.* Changes in reserve estimates resulting from application of improved recovery techniques shall be separately shown if significant. If not significant, such changes shall be included in revisions of previous estimates.

(C) *Purchases of minerals-in-place.*

(D) *Extension, discoveries, and other additions.* Additions to proved reserves that result from extension of the proved acreage of previously discovered (old) reservoirs through additional drilling in periods subsequent to discovery and discovery of new fields with proved reserves or of new reservoirs of proved reserves in old fields.

(E) *Production.*

(F) *Sales of minerals-in-place.* (ii) If the reporting entity's proved reserves of oil and gas are located entirely within its home country, that fact shall be disclosed. If some or all of its reserves are located in foreign countries, the disclosures of net quantities of reserves of oil and gas and changes in them (as required above) shall be separately reported for the entity's home country (if significant reserves are located there) and each foreign geographic area in which significant reserves are located. Foreign geographic areas are individual countries or groups of countries, as appropriate, for meaningful disclosure in the circumstances.

(iii) Net quantities disclosed shall not include oil or gas subject to purchase under long-term supply, purchase, or similar agreements and contracts, including such agreements with foreign governments or authorities. However, quantities of oil and gas subject to such agreements with foreign governments or authorities as of the end of each full fiscal year for which an income statement is required, and the net quantity of oil or gas received under the agreements during each such year, shall be separately disclosed if the reporting entity participates in the operation of the properties in which the oil or gas is located or otherwise serves as the "producer" of those reserves, as opposed, for example, to being an independent purchaser, broker, dealer, or importer.

(iv) In determining the reserve quantities to be reported: (A) If consolidated financial statements are issued, 100 percent of the net reserve quantities attributable to the parent company and 100 percent of the net reserve quantities attributable to its consolidated subsidiaries (whether or not wholly owned) shall be included.

(B) If the financial statements include investments that are proportionately consolidated, reserve quantities shall include a proportionate share of the investee's net oil and gas reserves.

(C) If the financial statements include investments that are accounted for by the equity method, the investee's net proved oil and gas reserves shall not be included in the disclosures of reserves. However, the reporting entity's share of the investee's net proved oil and gas reserves shall be separately reported as of the end of each full fiscal year for which an income statement is required.

(v) If important economic factors or significant uncertainties affect particular components of proved reserves, explanations shall be provided. Examples include unusually high expected development or lifting costs; the necessity to build a major pipeline or other major facilities before production of the reserves can begin; or contractual obligations to produce and sell a significant portion of reserves at prices that are substantially below those at which the oil and gas could otherwise be sold in the absence of the contractual obligation.

(6) *Disclosure of future net revenues from estimated production of proved oil and gas reserves.* In conjunction with the disclosure of changes in net quantities of estimated proved reserves of crude oil (including condensate and natural gas liquids) and natural gas as required by paragraph (k)(5) of this section, the following information shall be disclosed in financial statements for each geographic classification for which quantities of oil and gas are disclosed:

(i) For each of the following categories: (A) Proved oil and gas reserves, (B) proved developed oil and gas reserves, (C) proved oil and gas reserves applicable to long-term supply or similar agreements with foreign governments in which the entity acts as producer, and (D) the entity's share of proved oil and gas reserves of investees accounted for by the equity method, an amount (the "Estimated Future Net Revenues"), in the aggregate, computed by applying current prices of oil and gas to estimated future production of proved oil and gas reserves as of the date of the latest balance sheet presented, less estimated future expenditures (based on current costs) to be incurred in developing and producing the proved reserves, and assuming continuation of existing economic conditions. Present separately the amounts applicable to each of the first 3 succeeding fiscal years, and the remainder in a single amount. Indicate the basis used to compute current prices and current costs.

(ii) The present vaue of the Estimated Future Net Revenues (the "Present Value of Estimated Future Net Revenues"), as of the end of each full fiscal year for which an income statement is required, computed using the Estimated Future Net Revenues and a discount factor of 10 percent. In addition, disclose the portions of the Present Value of Estimated Future Net Revenues, at such balance sheet dates, attributable to each of the following components of proved oil and gas reserves: (A) Proved reserves added in years prior to the current year; and (B) proved reserves added during the current year, with amounts attributable to application of improved recovery techiques or purchases of reserves in-place disclosed separately, if significant (which in this case shall generally be considered to be amounts greater than 10 percent of total proved reserves added during the current year).

(iii) The Present Value of Estimated Future Net Revenues, computed as set forth at (k)(6)(i) above, attributable to each of the following, stated separately: (A) Proved developed reserves of oil and gas, (B) proved reserves of oil and gas applicable to long-term supply agreements with foreign governments in which the company acts as producer, and (C) the entity's share of proved reserves of oil and gas of investees accounted for by the equity method.

(iv) Any additional information of which management is aware and which it believes is necessary to prevent the above information from being misleading.

(v) Information relating to the disclosure of future net revenues from estimated production of proved oil and gas reserves pursuant or supplemental to the requirements of this section shall be deemed not to be an untrue statement of a material fact; a statement false or misleading with respect to any material fact; an omission to state a material fact necessary to make a statement not misleading; or the employment of a manipulative, deceptive, or fraudulent device, contrivance, scheme, transaction, act, practice, course of business or an artifice to defraud; as those terms are used in the Securities Act of 1933, the Securities Exchange Act of 1934, or the Public Utility Holding Company Act of 1935, or rules and regulations thereunder, unless such information: (A) Was prepared without a reasonable basis; or (B) was disclosed other than in good faith.

These amendments are adopted pursuant to authority in sections 6, 7, 8, 10, and 19(a) (15 U.S.C. 77f, 77g, 77h, 77j, 77s) of the Securities Act of 1933; sections 12, 13, 15(d), and 23(a) (15 U.S.C. 78l, 78m, 78o(d), 78w) of the Securities Exchange Act of 1934; sections 5(b), 14, and 20(a) (15 U.S.C. 79e, 79n, 79t) of the Public Utility Holding Company Act of 1935; sections 8, 30, 31(c), and 38(a) (15 U.S.C. 80a-8, 80a-29, 80a-30(c), 80a-37(a)) of the Investment Company Act of 1940; and section 503 (42 U.S.C. 6383) of the Energy Policy and Conservation Act of 1975.

Pursuant to section 23(a)(2) of the Securities Exchange Act, the Commission has considered the impact that these rules might have on competition and has concluded that, to the extent the rules impose burdens on competition, such burdens are necessary and appropriate in furtherance of the purposes of the securities laws.

By the Commission.

GEORGE A. FITZSIMMONS,
Secretary.

AUGUST 31, 1978.

SECURITIES AND EXCHANGE COMMISSION

[17 CFR Part 229]

[Release Nos. 33-5967; 34-15109; 35-20691; IC-10385; File No. S7-752]

DISCLOSURE OF OIL AND GAS RESERVES AND OPERATIONS

Proposed Amendments to Regulation S-K

AGENCY: Securities and Exchange Commission.

ACTION: Proposed rulemaking.

SUMMARY: The Commission proposes to amend its disclosure requirements relating to oil and gas reserves. The proposed amendments would revise the disclosure by oil and gas enterprises in certain registration statements, periodic reports, and proxy and information statements filed with the Commission under the Securities Act of 1933 and the Securities Exchange Act of 1934 to require disclosure of proved reserves for each of the last 5 years, of any favorable or adverse event since the end of the most recent fiscal year, and of the present value of future net revenues from estimated production of proved oil and gas reserves. In addition, the proposed amendments would specify disclosures based upon definitions of "proved reserves" as adopted in regulation S-X in order to obtain consistency in language with the definitions published by the Department of Energy in form EIA-23.

DATE: Comments should be submitted on or before October 15, 1978.

ADDRESS: Comments should be submitted in triplicate to George A. Fitzsimmons, Secretary, Securities and Exchanged Commission, 500 North Capitol Street, Washington, D.C. 20549. Comment letters should refer to file No. S7-752. All comments received will be available for public inspection and copying in the Commission's Public Reference Room, 1100 L Street NW., Washington, D.C. 20549.

FOR FURTHER INFORMATION CONTACT:

Richard Smith, Office of Engineering, 202-376-2391; J. Rowland Cook, Office of Disclosure Policy and Proceedings, 202-755-1750; Joseph H. Schmitt, Division of Corporation Finance, 202-376-2380; or James L. Russell, Office of the Chief Accountant, 202-755-0222.

SUPPLEMENTARY INFORMATION: The Securities and Exchange Commission is publishing for comment proposed amendments to the Commission's disclosure requirements relating to oil and gas reserves. This release is being published in conjunction with a separate release adopting rules relating to financial accounting for oil and gas producing activities.[1] If adopted, these proposed amendments would revise the existing disclosure requirements for oil and gas reserves.

Background

In release No. 33-5966 the Commission adopted amendments to regulation S-X, a regulation which prescribes the form and content of financial statements included in documents filed under the Federal securities laws. Those rules also apply in the preparation of accounts by persons engaged, in whole or in part, in the production of crude oil or natural gas in the United States for purposes of filing with the Department of Energy ("DOE") reports of energy information that are subject to the requirements of the Energy Policy and Conservation Act of 1975, 89 Stat. 871 ("EPCA"). In addition, regulation S-K, sets forth certain disclosure requirements applicable to documents filed under the Securities Act of 1933 ("Securities Act") (15 U.S.C. 77a et seq., as amended by Pub. L. 94-29 (June 4, 1975)) and the Securities Exchange Act of 1934 ("Exchange Act") (15 U.S.C. 78a et seq., as amended by Pub. L. 94-29 (June 4, 1975)).

Basis for Proposed Amendments

In connection with the adoption of the amendments to regulation S-X relating to oil and gas activities,[2] the Commission has also reexamined the nonaccounting disclosure requirements of oil and gas enterprises to determine whether any new or amended rules or guidelines were necessary for the disclosure to be made in registration statements and reports. Presently, where oil and gas operations are material to the registrant's business operations or financial position, disclosure is required pursuant to item 2(b) of regulation S-K.[3] The following discussion summarizes the proposed amendments and generally compares them with the present item 2 of regulation S-K.

[1] Release No. 33-5966 (Aug. 31, 1978) (appearing in this same separate part).

[2] Id.

[3] See, release No. 33-5706 (May 12, 1976) (41 FR 21764) announcing the adoption of amendments to forms S-1 and S-7 and of publication of an amendment to guide 28 of the guides for the preparation and filing of registration statements under the Securities Act of 1933, and the adoption of amendments to forms 10 and 10-K and of publication of amendments to guide 2 of the guides for the preparation and filing of reports and proxy and registration statements under the Securities Exchange Act of 1934 relating to the disclosure of estimates of oil and gas reserves. See also, release No. 33-5893 (Dec. 23, 1977) (42 FR 65554) incorporating the disclosure required by release No. 33-5706 with regulation S-K.

ITEM 2(a)—INSTRUCTION 3

If individual properties are of major significance to an industry segment of an extractive enterprise, instruction 3 presently requires, among other things, more detailed information of "significant geological structures and formations." The Commission feels this terminology may be unduly restrictive and that more useful information may be obtained if the discussion included any "significant geological data."

ITEM 2(a)—INSTRUCTION 4

The first sentence of instruction 4 is an amendment of the existing last sentence of instruction 3 of item 2(a). The proposed amendment requires the registrant under certain conditions to contact the Commission's Office of Engineering in order to determine what documents, if any, should be supplied as supplemental information. Such consultations would help eliminate imcomplete or unnecessary documents being furnished to the engineering staff. The amended language of this sentence also states that it is inappropriate to file such information as part of or as an exhibit to the document.

The remainder of instruction 4 is new. It proposes that where certain information is or will be based on estimates proposed or reviewed by independent consultants, those independent consultants should be named in the report or registration statement and a letter from those consultants should be included in the document. The instruction also specifies what information should be contained in the letter. The provisions of this instruction generally follow the present practices of many registrants; the present value data is intended to complement the new requirements of regulation S-X.

ITEM 2(b)—NOTE 2

Note 2 is new, but it will only be effective for the fiscal year ending after December 25, 1978, and on or before December 25, 1979. It is intended that certain information be provided as nonfinancial statement data for such fiscal year; thereafter, this information will be required to be disclosed as part of the financial statements pursuant to 17 CFR 210.3-18(k).

Note 2 proposes disclosure as of the end of such fiscal year of capitalized costs, costs incurred in oil and gas producing activities, revenues from producing oil and gas, certain estimated quantities of proved oil and gas reserves, and information on future net revenue from estimated production of proved oil and gas reserves. This information will be in lieu of existing paragraph (b)(1) of item 2 which only requires disclosure of estimates of proved developed and proved undeveloped reserves.

ITEM 2(b)(1)

Proposed item 2(b)(1), which would not take effect until the fiscal year ending after December 25, 1979, expands the present disclosure of paragraph (b)(1) to reflect the estimates of proved reserves on a 5-year basis rather than "as of a reasonably current date." It should be noted that new article 3-18(k)(5) of regulation S-X requires disclosure of estimated quantities of proved oil and gas reserves as part of the financial statements. This information would be given for each year for which an income statement is required, and thus would be included for 2 fiscal years for a form 10-K and 3 fiscal years for a form S-1. The data required by regulation S-X would include detailed information about the nature of reserve changes from the beginning to the end of each of the years presented. Amended paragraph (b)(1) would serve as a summary of the information presented under article 3-18(k)(5) and would eventually bring the number of years presented to 5 in order to serve as a comparison with the presentation under proposed paragraph (b)(3) of oil and gas produced.

Proposed paragraph (b)(1) also would require new disclosure concerning reserves in the form of the "the registrant's share of reserves of investees accounted for by the equity method." This new disclosure and the modified disclosure in this paragraph of reportable gepgraphic areas has been proposed in order to conform this paragraph with the requirements of article 3-18 of regulation S-X.

Proposed paragraph (b)(1) would require disclosure relating to certain actions of foreign governments now required by instructions 3(a) and 3(c) of present item 2(b). However, this proposed paragraph is modified to require that the registrant notify the staff of the commission if any foreign government restricts the disclosure of estimated reserves for properties under their governmental authority. Presently, the registrant need not disclose such estimates. The commission has included this provision as a means of monitoring those instances in which data is not dislcosed due to the restriction of a foreign government. The Commission believes registrants should make every reasonable effort to disclose such data, and that the use of this provision should be as limited as possible.

The definitions of the term "proved oil and gas reserves" and various related terms would no longer be located under instruction 2 of item 2(b) of regulation S-K. Rather, proposed paragraph (b)(1) would contain a cross-reference to these definitions which are now located in article 3-18(a) of regulation S-X.[4] These definitions have been patterned after those published by the Department of Energy in form EIA-23.[5]

A new requirement proposed by paragraph (b)(1) is the disclosure of the present value of estimated future net revenues for each of the net quantities of reserves presented. This information is consistent with the requirements of article 3-18(k)(6) of regulation S-X.

The proposed instruction to (b)(1) is new. It would require management to make a statement in the documents, if true, that no significant change in the proved reserves has occurred since the end of the most recent fiscal year. However, if a significant change has occurred in the proved reserves, the event which caused such change would be discussed as well as disclosure of the proved reserves associated with such event. It is intended that the reserve information be updated only during any fiscal year when management knows of an event which would materially affect estimated quantities of proved reserves. The Commission feels that this method of "updating" reserve information would not subject the registrant to the costs and burdens of compiling complete, interim engineering and reserve estimates.

ITEM 2(b)(2)

Proposed paragraph (b)(2) contains substantially the same disclosure presently required by paragraph (b)(5) and instruction 7 of item 2.

ITEM 2(b)(3)

Proposed paragraph (b)(3) contains substantially the same disclosure presently required by paragraph (b)(2) and instruction 4 to item 2 except that it is proposed that the net quantities of oil, condensate and natural gas liquids produced would be combined. Presently, production of oil, condensate and natural gas liquids is shown separately. The purpose of this revision is to conform the disclosure of this paragraph with article 3-18(k) of regulation S-X.

Proposed paragraph (b)(3) would also require disclosure of: (a) The average sales price per unit of oil produced and of gas produced, (b) the average transfer value per unit of oil and of gas produced, and (c) the average production (lifting cost) per unit of production. The disclosure of this information would further conform this paragraph with the requirements of article 3-18 of regulation S-X.

[4] See Securities Act Release No. 5966 for a discussion of these definitions.

[5] 43 FR 6993.

ITEM 2(b)(4)

Proposed paragraph (b)(4) contains substantially the same disclosure presently required by paragraph (b)(3) and instruction 5 of item 2.

ITEM 2(b)(5)

Proposed paragraph (b)(5) contains substantially the same disclosure presently required by paragraph (b)(6) and instruction 8 of item 2.

ITEM 2(b)(6)

Proposed paragraph (b)(6) is new. The Commission feels that information concerning the number of productive and dry wells and the aggregate net drilling footage of such wells would be useful. It is also proposed that such information be furnished on the basis of appropriate geographic areas.

ITEM 2(b)(7)

Proposed paragraph (b)(7) contains substantially the same disclosure presently required by paragraph (b)(7) and instruction 9 of item 2.

ITEM 2(b)(8)

Paragraph (b)(4) presently requires disclosure of the availability of oil and gas from the present reserve and contract supplies. Additional disclosure is also specified for companies engaged in the gathering, transmission, or distribution of natural gas pursuant to guide 28 under the Securities Act and guide 2 under the Exchange Act.

Proposed paragraph (b)(8) would revise present paragraph (b)(4) by incorporating certain aspects of guides 28 and 2 into this paragraph. Moreover, the proposed revision specifies that this information, if material, would be required only for registrants who are obligated to provide oil and gas in the future under existing contracts or agreements. The Commission feels that the present provisions which limit the disclosure to companies engaged in gathering, transmission, or distribution of natural gas may not be broad enough to identify clearly all registrants whose operations necessitate disclosure of this type. It is expected that the information specified in proposed item 2(b)(8) can be presented in a tabular format which will highlight any anticipated shortfalls between the registrant's sources of oil and gas and its commitments to furnish oil and gas.

If this paragraph is adopted, it is expected that guide 28 of the Securities Act and guide 2 of the Exchange Act would be repealed.

Text of Proposed Amendments

The Commission hereby proposes to amend item 2 of regulation S-K, 17 CFR 229.20 to revise instruction 3 and

add a new instruction 4 to paragraph (a) and to revise paragraph (b) as set forth below:

§ 229.20 Information required in document.

* * * * *

Item 2. Description of property.

(a) (No change).

Instruction. 1. (No change).

2. (No change).

3. In the case of an extractive enterprise, material information should be given as to production, reserves, locations, developments, and the nature of the registrant's interest. If individual properties are of major significance to an industry segment, (i) more detailed information concering these matters should be furnished, including the results of development in the area and significant geological data, if appropriate, and (ii) appropriate maps should be used to disclose location data of significant properties except in cases for which numerous maps would be required.

4. If the report of an engineer or other expert is or will be referred to in the document, the staff of the Office of Engineering of the Division of Corporation Finance of the Commission should be consulted; that office may request that a copy of the full report be furnished as supplemental information, and not as part of the filing. If the estimates of proved reserves of oil and gas, or any estimated value thereof, are represented as being based on estimates prepared or reviewed by independent consultants, those independent consultants should be named in the document and a letter from such consultants which discloses summary information in substantially the following format should be included in the document:

Net proved oil and gas reserve information as of (date)

	Developed		Undeveloped	Total
	Producing	Nonproducing		
Oil, bbls				
Gas, mcf				
Estimated present value discounted [1] at 10 pct	$	$	$	$

[1] Estimated maximum productive life — years.

The present value should be determined in accordance with § 210.3-18(k)(6). If the document to be filed is a registration statement filed under the Securities Act of 1933, the letter should also contain the consent of the consultant to the use of the information in the prospectus and, if applicable, the naming of such persons in the prospectus as experts. At least one copy of the letter shoud be manually signed.

(b) If oil and gas operations are material to the registrant's and its subsidelaries' business operations or financial position, disclose the following under appropriate captions (in tabular form if practicable, and with cross-references, where applicable, to related information disclosed in finacial statements):

NOTE 1.—Limited partnerships or joint ventures that conduct, operate, manage, or report upon oil and gas drilling or income programs which acquire properties either for drilling and production, or for production of oil, gas, or geothermal steam or water are not required to include the information specified by this paragraph (b).

NOTE 2.—This note shall apply only for the fiscal year ending after December 25, 1978, and on or before December 25, 1979. For such fiscal year, registrants shall disclose (in lieu of paragraph (b)(1) below) the following:

(i) The capitalized costs specified by § 210.3-18(k)(2), as of the end of such fiscal year.

(ii) The costs incurred in oil and gas producing activities specified by § 210.3-18(k)(3) for such fiscal year.

(iii) The revenues from producing oil and gas specified by § 210.3-18(k)(4) for such fiscal year.

(iv) The estimated quantities of proved oil and gas reserves specified by § 210.3-18(k)(5) except that changes in net quantities of proved reserves and quantities of oil and gas applicable to long-term supply or similar agreements with foreign governments or authorities in which the registrant acts as producer need only be given for such fiscal year; and the estimated quantities of proved developed reserves, quantities applicable to long-term supply or similar agreements with foreign governments or authorities in which the registrant acts as producer and the registrant's share of proved reserves of its investees accounted for by the equity method need only be given as of the end of such fiscal year.

(v) The information on future net revenue from estimated production of proved oil and gas reserves specified by § 210.3-18(k)(6) as of the end of such fiscal year or for such fiscal year, as applicable.

For purposes of the requirements of this note, the definitions of § 210.3-18(a) shall apply. This note shall be deleted from this paragraph when the rules in § 210.3-18 become effective for financial statements.

(1) As of the end of each of the last 5 fiscal years (but not for fiscal years ending prior to December 25, 1978), estimated net quantities of: (i) Proved oil and gas reserves; (ii) proved developed oil and gas reserves; (iii) oil and gas applicable to long-term supply or similar agreements with foreign governments or authorities in which the registrant acts as producer; and (iv) the registrant's share of reserves of investees accounted for by the equity method. The definitions in § 210:3-18(a) shall apply to this paragraph (b)(1). For each of the net quantities reported, disclose the present value of estimated future net revenues, computed in accordance with § 210.3-18(k)(6). If these reserves are located entirely within the registrant's home country, that fact shall be disclosed. If some or all of the reserves are located in foreign countries, the disclosure of net quantities of reserves of oil and gas and present value of estimated future net revenues (as required above) shall be separately reported for the entity's home country (if significant reserves are located there and each foreign geographic area in which significant reserves are located. Foreign geographic areas are individual countries or groups of countries, as appropriate, for meaningful disclosure in the circumstances.

Disclosure shall be given of the effect on ownership of reserves of any takeover or nationalization by foreign government of properties owned by the registrant, including any possible change of a property interest into a long-term supply, purchase, or similar agreement. If any foreign government restricts the disclosure of estimated reserves for properties under their governmental authority, or amounts under long-term supply, purchase, or similar agreements, the registrant should notify the staff of the Commission. If the required information is not disclosed for this reason, the document should identify the country and indicate that the reported reserve estimates or amounts do not include figures for the named country.

The following instruction applies to this paragraph (b)(1):

If no major discovery or other favorable or adverse event that causes a significant change in the proved reserves has occurred since the end of the most recent fiscal year, a statement to that effect shall be made; otherwise, an explanation of any such discovery or event should be provided, including, to the extent reasonable, an estimate of the proved oil and gas reserves associated with such discovery or event.

(2) Any proved oil or gas reserve estimates filed with or included in reports to any other Federal or foreign governmental authority or agency since the beginning of the last fiscal year (or a statement that there were none), together with the name of the authority or agency and an explanation of the reasons for differences, if any, between such estimates and the estimates included in the document.

This requirement as it relates to estimates filed with a foreign governmental authority or agency shall not apply if: (a) The total foreign reserve estimate included in the Commission filing does not exceed 5 percent of the total reserve estimate; or (b) the difference between the foreign reserve estimate included in the Commission filing and the reserve estimate filed with the governmental authority or agency does not exceed 5 percent. However, a statement that the foreign reserve estimate or the difference, whichever is applicable, does not exceed 5 percent shall also be included.

(3) Net quantities of oil (including condensate and natural gas liquids) and of gas produced for each of the last 5 fiscal years and the net quantities of each received during each of these years applicable to long-term supply or similar agreements with foreign governments or authorities in which the registrant acts as producer, by areas no larger than the geographic areas used for estimated reserves in paragraph (b)(1) above. Also disclose separately, for the same geographic areas for which production data are presented, (a) the average sales price per unit of oil produced and of gas produced, (b) the average transfer value per unit of oil and of gas produced, and (c) the average production (lifting cost) per unit of production.

The following instructions apply to this paragraph (b)(3):

(a) Generally, net production should include only production that is owned by the registrant and produced to its interest, less royalties and production die others. However, in special situations (e.g., foreign production) net production before royalties may be provided if more appropriate. If "net before royalty" production figures are furnished, the change from the common usage of "net production" should be noted.

(b) Any part of natural gas liquids production obtained through or from processing plant ownership rather than through leasehold ownership should be reported separately, if material.

(c) Production of natural gas should include only marketable production of gas on an "as sold" basis. Production will include dry, residue, and wet gas, depending on whether liquids have been extracted before the registrant passed title. Flared gas, recovered gas-lift, injected gas, reproduced gas, and gas consumed in operations should be omitted.

(d) The transfer value of oil and gas produced shall be determined in accordance with § 210.3-18(k)(3).

(e) Production costs per unit produced shall be computed using the production costs disclosed pursuant to § 210.3-18(k)(3).

(4) As of a reasonably current date or as of the end of the most recent fiscal year, the total gross and net productive wells, expressed separately for oil and gas, and the total gross and net producing (i.e., developed) acres by the geographic areas for which production data are presented pursuant to paragraph (b)(3) above.

The following instructions shall apply to this paragraph (b)(4):

(a) For purposes of this requirement, one or more completions in the same borehole shall be counted as one well. A footnote shall disclose the number of wells with multiple completions. If one of the multiple completions in a given well is an oil completion, the well shall be classified as an oil well.

(b) A gross well or acre is a well or acre in which an interest is owned. The number of gross wells is the total number of wells in which an interest is owned.

(c) A net well or acre is deemed to exist when the sum of fractional ownership interests in gas wells or acres equals 1. The number of net wells or acres is the sum of the fractional interests owned in gross wells or acres expressed as whole numbers and fractions thereof.

(d) For those unusual situations in which gross and net data cannot be supplied, an alternative disclosure should be furnished that adequately describes the registrant's productive wells and producing acreage.

(5) As of a reasonably current date or as of the end of the most recent fiscal year, the amounts of undeveloped acreage, both leases and concessions, if any, expressed in both grass and net acres by appropriate geographic area, together with an indication of acreage concentrations, and, if material, the minmum remaining terms of leases and concessions. Undeveloped acreage is considered to be those lease areas not now held for production; it should not be confused with acreage for which proved undeveloped reserves can be estimated, which is to be included in producing acreage disclosed pursuant to paragraph (b)(4) above.

(6) For each of the last 5 fiscal years, disclose by appropriate geographic area: (a) the number of net productive and dry exploratory wells drilled; (b) the number of net productive and dry development wells drilled; and (c) the aggregate net drilling footage of exploratory wells and aggregare net drilling footage of development wells.

Instructions for purposes of this paragraph (b)(6) are:

(a) See § 210.3-18(a) for the definition of an exploratory well and a development well.

(b) A dry well (hole) is an exploratory or a development well found to be incapable of producing either oil or gas in sufficient quantities to justify completion as an oil or gas well. The term "completion" refers to the installation of permanent equipment for the production of oil or gas.

(c) A productive well is an exploratory or a development well that is not a dry well.

(d) The number of wells drilled refers to the number of holes completed at any time during the fiscal year, regardless of when drilling was initiated.

(e) Drilling footage is the deepest total depth (length of well bored) of all wells drilled from the surface, excluding (i) the total of all bypassed footage drilled in connection with reported wells and (ii) all new footage drilled for directional "sidetrack" wells. In the case of old wells drilled deeper, the reported footage is that which was drilled below the total depth of the old well.

(7) Present activities, such as the number of wells in process of drilling, waterfloods in process of installation, pressure maintenance operations, and any other related operations of material importance by appropriate geographic areas. This description of present activities whould be provided for an "as of" date as close to the date of filing the document as reasonably possible or as of the end of the most recent fiscal year. The disclosure of wells in the process of being drilled should include only those wells actually being drilled at the "as of" date and should be expressed in terms of both gross and net wells. The disclosure should not include wells planned but not commenced, unless there are factors involved which make such information material.

(8) If the registrant is obligated to provide oil or gas in the future under existing contracts or agreements, material information concerning the estimated availability of oil and gas from any principal sources.

(i) Such information shall be furnished as to current and future reserves and supplies, and should (1) identify the principal sources of reserves and supplies relied on or to be relied upon and the amounts received or to be received from each source; (2) disclose delivery commitment and customers' requirements; and (3) indicate steps taken to insure available supplies are sufficient to meet such commitments. Such future information shall be provided for an appropriate period of 1 to 5 years.

(ii) The term "availability" is used herein to mean an estimate of that quantity of oil and gas which can be produced from current proved developed reserves and an estimate of amounts that can be delivered under long-term supply or purchase agreements, using presently installed equipment under existing economic and operating conditions on a per-day, per-month, or per-year basis. However, this term is not intended to have the same meaning as "deliverability" as used by the Federal Energy Regulatory Commission in FPC form No. 15.

(iii) The registrant should develop disclosure based upon the facts and circumstances of its particular situation, including, where appropriate, disclosure by areas or regions. Such disclosure should be in a form understandable to investors and should include, but not be limited to, description of the following factors: (1) Supplies dedicated or contracted to the registrant; (2) any significant amounts of reserves or supplies subject to priorities which may affect quantities delivered to certain classes of customers, such as customers receiving services under low priority and interruptable contracts; (3) any priority, allocations or price limitations imposed by Federal or State regulatory agencies, as well as other factors beyond the control of the registrant which may affect the ability of the company to meet its contractual obligations (detailed discussions of historic price regulation need not be furnished); (4) any other factors beyond the control of the company, such as other parties having control over the drilling of new wells, competition for the acquisition of reserves and supplies, and the availability of foreign reserves and supplies which may affect the ability of the registrant to acquire additional reserves and supplies, or to maintain or increase the availability of reserves and supplies; and (5) any impact on the registrant's earnings and financing needs resulting from its inability to meet short or long-term contractual obligations. See guide 22 under the Securities Act of 1933 and guide 1 under the Securities Exchange Act of 1934.

(iv) If within the last 5 years the registrant has been unable to meet its delivery commitments or customers' requirements, describe the circumstances concerning such events and the impact on the registrant.

REQUEST FOR COMMENT

All interested persons are invited to submit their views and comment concerning the amendments proposed herein including whether implementation of such amendments would involve unwarranted costs to the issuer and whether the actions would have any impact or burden on competition. All comments should be received no later than October 15, 1978. The Commission will endeavor to review the comments on these proposals and take such actions as may appear necessary to have the amended disclosure requirements adopted in time for compliance by registrants whose fiscal years end after December 25, 1978.

AUTHORITY: These amendments are being proposed pursuant to the authority in sections 6, 7, 8, 19 and 19(a) (15 U.S.C. 77f, 77g, 77h, 77j, and 77s) of the Securities Act of 1933; sections 12, 13, 14, 15(d), and 23(a) (15 U.S.C. 78L, 78M, 78o(d), and 78w) of the Securities Exchange Act of 1934.

By the Commission.

GEORGE A. FITZSIMMONS,
Secretary.

AUGUST 31, 1978.

[Release Nos. 33-5968, 34-15110, 35-20689, IC-10383; File No. S7-715]

OIL AND GAS PRODUCERS—FULL COST ACCOUNTING PRACTICES

Proposed rules

AGENCY: Securities and Exchange Commission.

ACTION: Proposed rules.

SUMMARY: The Commission has published rules in accounting series release No. 253 that establish financial accounting and reporting practices for oil and gas producing activities. That release expresses the Commission's intention to seek development of a uniform method of reserve recognition accounting based on a valuation of proved oil and gas reserves. During the period of developing this method, however, producers will be required to follow a form of either the successful efforts or full cost methods of accounting. Accounting series release No. 253 prescribes the accounting measurement rules applicable to the successful efforts method. Proposed rules that would define the application of the full cost method are contained in this release.

DATE: Comments should be submitted on or before October 31, 1978.

ADDRESS: Comments should refer to file S7-715 and should be submitted in triplicate to George A. Fitzsimmons, Secretary, Securities and Exchange Commission, Washington, D.C. 20549. All comments will be available for public inspection.

FOR FURTHER INFORMATION CONTACT:

Richard C. Adkerson or James L. Russell, Office of the Chief Accountant, Securities and Exchange Commission, Washington, D.C. 20549, 202-755-0222.

SUPPLEMENTARY INFORMATION: The Commission is proposing rules to govern the application of the full cost method of accounting in order to conform existing practice to a relatively standardized method that, in the Commission's view, is generally consistent with the conceptual basis of full cost accounting.[1] The Commission's goal is to develop a practical approach for applying the full cost method that is logically consistent and not substantially different from existing practice.

Specifically, if an oil and gas producer follows the full cost method, it would be required under the proposed rules to:

1. Apply it to all its operations and the operations of its subsidiaries and investees accounted for by the equity method.
2. Disclose on the face of its balance sheet that it follows the full cost method of accounting.
3. Establish a separate cost center for each country in which it operates.
4. Capitalize all costs incurred in a cost center that are directly related to exploration and production activities.
5. Charge to expense all production (lifting) costs, general and administrative costs, all costs reimbursed by other persons, and all costs related to drilling arrangements in which income is recognized.
6. Amortize all capitalized costs in the cost center, including undeveloped leases, using a unit-of-production method based either on physical units or monetary units of net revenue.
7. Limit costs in the cost center to the sum of (1) the present value of future net revenue from estimated production of proved oil and gas reserves, and (2) the lower of cost or estimated market value of unproved properties.
8. Account for mineral conveyances and related transactions generally on the same basis as if the successful efforts method were followed except that ordinarily no gains or losses are to be recognized on sales and abandonment of properties.
9. Disclose the depreciation, depletion, and amortization expense per unit of production.
10. Disclose the approximate amount of total capitalized costs and costs incurred during the period that would have been charged to expense had the successful efforts method been followed.

The Commission's proceeding on oil and gas accounting practices resulted in substantial written comment and testimony on the application of the full cost method of accounting. Much of this discussion dealt with definition of the cost center and accounting for undeveloped leases.

Although it may be argued conceptually that the company's total operations should constitute the cost center, the proposed rules recognize that oil and gas reserves in different countries are not always interchangeable, either in kind or in monetary value, because of varying laws, market conditions, property rights, and political-economic climates. Many of the factors that, in the past, have justified the use of combined-country cost centers (e.g., United States and Canada, Western Europe, etc.) are no longer present, as countries have made substantial changes to their energy and tax laws, price controls, and national economic policies. Accordingly, the Commission proposes that property costs should be segregated on a country-by-country basis.

All of the costs incurred in a given country, including the costs of undeveloped leases, should be capitalized within the appropriate cost center, and thus be subject to amortization and to the ceiling limitation on capitalized costs. This would prohibit the practice followed by some companies of deferring the inclusion of undeveloped leases within cost centers until the leases either become productive or are abandoned. The Commission believes that the costs of undeveloped leases should be considered a component of the total costs of oil and gas properties under the full cost concept and thus be subject to amortization.

The proposed rules applicable to drilling arrangements are intended to clarify the Commission's position on the recognition of income from participation in such arrangements. If the consideration received is, in substance, an interest in properties, the recognition of income should not take place prior to the production of oil and gas from the properties involved.

Although the Commission concluded that both successful efforts and full costing have significant deficiencies and that neither should be prescribed as a uniform method of accounting for the petroleum industry, the Commission noted in ASR No. 253 that successful efforts accounting is, in its view, more consistent conceptually with financial accounting in general. The Commission also indicated a concern that, in certain circumstances, full cost accounting can obscure the existence of unprofitable current exploration activities. Because of these concerns and in reponse to comments received by the Commission expressing a need for comparative information, the Commission is proposing that full cost companies disclose: (1) The approximate amount of capitalized costs in their balance sheets that would have been previously charged to expense under the successful efforts method, and (2) the approximate amount of current period costs incurred in oil and gas producing activities that would be charged to expense if the successful efforts method were applied. The Commission recognizes that these disclosures will not provide a precise basis for converting the financial statements of full cost companies to a successful efforts basis since they omit consideration of amortization and valuation provisions; however, it believes that the disclosures will accomplish the objectives described above.

The Commission is publishing these proposed rules for comment in order to provide an opportunity for interested persons to identify potential implementation problems or to suggest areas for which additional clarification is required. It is anticipated that final

[1] For a discussion of the full cost mehtod, see section V, "Traditional Oil and Gas Accounting Methods" of accounting series release ("ASR") No. 253 (Aug. 31, 1978) published concurrently with this release appearing in this same separate part.

rules will be adopted prior to December 31, 1978, to be effective for fiscal years ending after December 25, 1979, with retroactive application to prior periods.

COMMISSION ACTION

The Commission hereby proposes to amend 17 CFR Part 210 by the addition of the new paragraph (i) to § 210.3-18, as presented below:

§ 210-3.18 Financial accounting and reporting for oil and gas producing activities pursuant to the Federal securities laws and the Energy Policy and Conservation Act of 1975.

* * * * *

(i) *Application of the full cost method of accounting.* The full cost method shall be applied as follows:

(1) *Determination of cost centers.* Cost centers shall be established on a country-by-country basis.

(2) *Costs to be capitalized.* All costs directly associated with property acquisition, exploration, and development activities within a cost center shall be capitalized. Any internal costs that are capitalized shall be limited to those costs that can be directly identified with acquisition, exploration, and development activities undertaken by the reporting entity for its own account, and shall not include any costs related to production, general corporate overhead, or similar activities.

(3) *Amortization of capitalized costs.* Capitalized costs within a cost center shall be amortized on the unit-of-production basis using proved oil and gas reserves, as follows:

(i) Costs to be amortized shall include (A) capitalized costs (including all undeveloped leases and uncompleted wells and facilities), less accumulated past amortization, and (B) estimated future costs to complete development of proved reserves and estimated dismantlement and abandonment costs (net of estimated salvage values).

(ii) Amortization may be computed on the basis of physical units or net revenue from production of proved reserves. If physical units are used, oil and gas shall be converted to a common unit of measure on the basis of their approximate relative energy content. Otherwise, amortization shall be computed on the basis of the current net revenue from production in relation to the future net revenue, based on current economic conditions (see paragraph (k)(6) of this section),[2] from estimated production of proved oil and gas reserves.

(iii) Amortization computations shall be made on a consolidated basis, including investees accounted for on a proportionate consolidation basis. However, investees accounted for on the equity method shall be treated separately.

(4) *Limitation on capitalized costs.* Unamortized costs capitalized within a cost center, less related deferred income taxes, shall not exceed an amount (the cost center "ceiling") equal to (i) the present value of future net revenues from estimated production of proved oil and gas reserves, as defined in paragraph (k)(6) of this section; (ii) plus the lower of the cost of unproved properties or their estimated fair market value based generally on the provisions of paragraph (c) of this section; and (iii) less related income tax effects. If unamortized costs capitalized within a cost center (including a cost center in which no oil and gas reserves have been discovered), less related deferred income taxes, exceed the cost center ceiling, the excess shall be charged to expense and separately disclosed during the period in which the excess occurs. The capitalized costs within a cost center shall not be reinstated for any subsequent increases in the cost center ceiling.

(5) *Production costs.* All costs relating to production activities, including costs to maintain or increase levels of production, shall be charged to expense as incurred.

(6) *Mineral property conveyances and related transactions.* The provisions of paragraph (h) of this section, "Mineral property conveyances and related transactions if the successful efforts method of accounting is followed," shall apply also to those reporting entities following the full cost method except as follows:

(i) *Sales and abandonments of oil and gas properties.* Sales of oil and gas reserves in place and abandonments of properties shall be accounted for as adjustments of capitalized costs, with no gain or loss recognized, unless an extraordinary sale occurs that significantly alters the relationship between the capitalized costs and proved reserves of oil and gas attributable to a cost center. If gain or loss is recognized for such a sale, total capitalized costs within the cost center shall be allocated between reserves sold and reserves retained on the same basis used to compute amortization.

(i) *Purchases of reserves.* Purchases of oil and gas reserves in place ordinarily shall be accounted for as additional capitalized costs within the applicable cost center; however, purchases or production payments with lives significantly shorter than the composite productive life of the cost center shall be accounted for separately.

Drilling arrangements. Consistent with the provisions of paragraph (h) of this section, no income shall be recognized from participation in the various forms of drilling arrangements involving oil and gas producing activities, e.g., carried interests, turnkey wells, management fees, etc., if the drilling arrangements, in substance, provide receipt of an interest in properties. If drilling arrangements provide for the receipt of remuneration, e.g., cash, for which income is recognized, then all related costs, including costs associated with the offering and sale or participations in the drilling arrangements and internal costs related to the drilling arrangements, shall be charged to expense as incurred.

(7) *Disclosures.* Reporting entities that adopt the full cost method of accounting shall disclose all of the information required by paragraph (k) of this section (with each cost center considered as a separate geographic area), plus the following:

(i) For each cost center for each year that an income statement is required, the total amount of amortization expense (per equivalent physical unit of production if amortization is computed on the basis of physical units or per dollar of net revenue from production if amortization is computed on the basis of net revenue).

(ii) In connection with the disclosure of capitalized costs required by paragraph (k)(2) of this section, the approximate amount of such capitalized costs that would have been charged to expense had the successful efforts method of accounting been followed.

(iii) In connection with the disclosure of costs incurred in oil and gas producing activities required by paragraph (k)(3) of this section, the approximate amount of costs incurred during the period that would have been charged to expense had the successful efforts method of accounting been followed.

* * * * *

These rules are proposed to be effective for financial statements for full fiscal years ending after December 25, 1979, although earlier application is encouraged. Accounting changes adopted to conform to the provisions of these rules shall be made retroactively be restating the financial statements of prior periods. Financial statements for the fiscal year in which these rules are first applied shall disclose the nature of the accounting changes and their effect on income before extraordinary items, net income, and related per share amounts for each period restated.

These amendments are proposed to be adopted pursuant to authority in section 6, 7, 8, 10, and 19(a) (15 U.S.C. 77f, 77g, 77h, 77j, 77s) of the Securities Act of 1933; sections 12, 13, 15(d), and 23(a) (15 U.S.C. 78l, 78m, 78o(d), 78w) of the Securities Exchange Act of

[2] For this and subsequent references to the requirements of § 210.3-18, see ASR No. 253.

1934; sections 5(b), 14, and 20(a) (15 U.S.C. 79e, 79n, 79t) of the Public Utility Holding Company Act of 1935; sections 8, 30, 31(c), and 38(a) (15 U.S.C. 80a-8, 80a-29, 80a-30(c), 80a-37(a)) of the Investment Company Act of 1940; and section 503 (42 U.S.C. 6383) of the Energy Policy and Conservation Act of 1975. Pursuant to section 23(a)(2) of the Securities Exchange Act, the Commission has considered the impact of these proposals on competition and is not aware at this time of any burden that such rule amendments, if adopted, would impose on competition. However, the Commission specifically invites comments as to the competitive impact of these proposals, if adopted.

By the Commission.

GEORGE A. FITZSIMMONS,
Secretary.

AUGUST 31, 1978.

OIL AND GAS PRODUCING ACTIVITIES

Proposed Supplemental Earnings Summary

AGENCY: Securities and Exchange Commission.

ACTION: Proposed rules.

SUMMARY: In accounting series release No. 253, the Commission published rules on financial accounting and reporting for oil and gas producing activities. That release stated the Commission's intention to propose rules requiring the presentation of a supplemental earnings summary of oil and gas producing activities prepared on the basis of reserve recognition accounting, i.e., recognizing changes in the present value of estimated future revenues from production of proved oil and gas reserves in income and including in expenses all costs of finding and developing additions to proved reserves. This release contains the proposed rules, which are proposed to be effective for fiscal years ending after December 25, 1979.

DATE: Comments should be submitted on or before April 30, 1979.

ADDRESS: Comments should refer to file S7-753 and should be submitted in triplicate to George A. Fitzsimmons, Secretary, Securities and Exchange Commission, Washington, D.C. 20549. All commments will be available for public inspection.

FOR FURTHER INFORMATION CONTACT:

Richard C. Adkerson or James L. Russell, Office of the Chief Accountant, Securities and Exchange Commission, Washington, D.C. 20549, 202-755-0222.

SUPPLEMENTARY INFORMATION: In accounting series release ("ASR") No. 253, issued concurrently with this release (appearing elsewhere in this same separate part), the Commission published financial accounting and disclosure rules for oil and gas producing activities. That release expressed the Commission's conclusion that significant improvements in financial reporting by oil and gas producing companies could best be achieved through the development and implementation of an accounting method that reflects a valuation of proved oil and gas reserves as assets, and changes in valuations of proved reserves in reported earnings. However, because of concern over the inherent imprecision of estimates of proved oil and gas reserves and the need for establishing methodologies for their valuation, the Commission has determined that development of this "reserve recognition accounting" or "RRA" should be undertaken gradually.

The rules published in ASR No. 253 require the disclosure in financial statements for fiscal years ending after December 25, 1979, of the present value of future net revenues from estimated production of proved oil and gas reserves. In release No. 33-5967, also published concurrently, the Commission proposed amendments to regulation S-K (17 CFR Part 229) that would require this disclosure in filings with the Commission (but not as part of the financial statements) for fiscal years ending after December 25, 1978.

The Commission believes that the next step in seeking the development of RRA should be a supplemental earnings summary of oil and gas producing activities prepared on that basis. The proposed summary would include as current period income the additions to proved reserves and changes in valuations of proved reserves, and as current period expenses all costs associated with finding and developing additions to proved oil and gas reserves together with all costs determined to be nonproductive during the period. The accompanying proposed rules describe the information proposed to be included in the supplemental earnings summary. The Commission proposes that this information be required as part of financial statements beginning in filings for fiscal years ending after December 25, 1979. If these rules are adopted, the information provided and the experiences gained in developing and reporting the supplemental data should aid in the Commission's assessment of the usefulness of the information provided from applying RRA.

IMPLEMENTATION CONSIDERATIONS

The Commission seeks to assure the development of a meaningful presentation of relevant data on which to evaluate the current results of operations of oil and gas producers. The rule proposals contained in this release require that the supplemental earings summary of oil and gas producing activities distinguish between the major activities of (1) exploration and development, and (2) production. Changes in the present value of proved reserves attributable to revisions of previous additions are to be reported separately, including (1) changes in estimated quantities of proved reserves, (2) changes in the estimated timing of future production, (3) changes to reflect current prices and costs used to compute the present values, and (4) holding gains resulting from the passage of time as a result of applying the discounted cash flow method of valuation.

In ASR No. 253, the Commission stated that "[w]hile the proposed rules provide a general format of the proposed presentation, the Commission views the proposals as establishing general rather than specific guidelines in this regard." An example of the presentation presently envisioned by the Commission for the proposed RRA supplemental earnings summary is presented below:

SUPPLEMENTAL EARNINGS SUMMARY OF
OIL AND GAS PRODUCING ACTIVITIES
YEAR ENDED DECEMBER 31, 19xx

Revenues from oil and gas:		
Sales to outsiders	$xxxx	
Transfers	xxxx	$xxxx
Costs of production:		
Lifting costs	$xxxx	
Amortization of proved properties	xxxx	(xxxx)
Income from producing activities		xxxx
Current additions to proved properties		xxxx
Costs of additions to proved properties:		
Exploration costs	$xxxx	
Development costs	xxxx	(xxxx)
Income from current exploration and development activities		xxxx
Revisions to previous additions to proved properties:		
Changes in estimated quantities of proved reserves		xxxx
Changes in rate of production		xxxx
Changes to reflect current prices and costs		xxxx
Holding gains from passage of time		xxxx
Total revisions		xxxx
Profit contribution from oil and gas producing activities before income taxes		xxxx
Provision for income taxes		(xxxx)
Profit contribution from oil and gas producing activities after income taxes		$xxxx

The Commission requests comments on whether these classifications are appropriate, as well as recommendations for additional information that might enhance the usefulness of the supplemental earnings summary.

The proposed rules indicate the manner in which costs of property acquisition, uncompleted wells, and other exploration and development costs should be included in the earnings summary. Generally, all costs incurred in the search for and development of oil and gas reserves would be charged to expense as incurred except for acquisition costs of unproved properties and the costs of uncompleted exploratory wells. These costs would be deferred until sufficient information is available to indicate whether or not proved oil and gas reserves have been discovered.

The Commission acknowledges that there are a number of unresolved problems relating to this proposed presentation and encourages interested persons to submit views on any pertinent matters prior to the due date for comments. In ASR No. 253, the Commission indicated that it will also seek to establish an advisory committee comprised of representatives of oil and gas producing companies, independent petroleum engineering firms, the investment community, academics, and public accounting firms to meet with the staff of the Commission to consider implementation problems, assess experiences in preparing and using the valuation information on oil and gas reserves, and assist in soliciting and evaluating public comments on the issues involved in this project.

Two major problems to be addressed involve the consideration of income taxes in the supplemental RRA earnings summary and the presentation to be made by integrated petroleum companies.

Under generally accepted accounting principles, income tax expense is determined on the basis of comprehensive interperiod tax allocation by the deferred method, as specified by Accounting Principles Board Opinion No. 11, "Accounting for Income Taxes." Comprehensive interperiod allocation of income taxes by the deferred method was adopted for oil and gas producing activities in ASR No. 253 and in FASB Statement No. 19.

The deferred income tax method, however, appears inconsistent with the basis of accounting for the proposed supplemental earnings summary, in that it does not provide for adjustment in income tax provisions for changes in tax rates or for the imposition of new taxes subsequent to the origination of a timing difference. For instance, if the deferred method were applied in the supplemental RRA earnings summary, the valuation of proved reserves would not be affected by a significant increase in income taxes imposed subsequent to their discovery.

Accordingly, the Commission is suggesting that income tax expense in the supplemental RRA earnings summary include a provision for the difference between the following amounts:

(1) The amount computed by applying the current income tax rates as of the end of the year to the difference between the present value of future net revenues from estimated production of proved oil and gas reserves and the income tax basis of proved properties at that date. (See § 210.3-18(k)(6)); and

(2) The amount computed by applying the income tax rates as of the beginning of the year to the difference between the present value of future net revenues from estimated production of proved oil and gas reserves and the income tax basis of proved properties at that date.

Explanations of the effect of significant changes in the income tax rate would be required.

Another issue for which comments are specifically requested involves the presentation required by integrated petroleum companies and other companies that produce oil and gas that is transferred to other activities, such as transportation or manufacturing, in which they are engaged. The proposed rules require that such companies present transfers of oil and gas in the supplemental RRA earnings summary separately, at a value based on the estimated fair market value at the point of transfer (see § 210.3-18(k)(4) adopted in ASR No. 253). Additional supplemental disclosure would also be required of:

(1) the historical profit contribution [1] from oil and gas producing activities, both before and after income taxes, on the basis of accounting (either successful efforts or full costing) used in the primary financial statements if transfers were recognized as revenues at estimated fair market values; and

(2) The effects on operations other than oil and gas producing activities, both before and after income taxes, resulting from the impact on inventories and related cost of sales of valuing transfers in this manner.

There are, of course, a number of other implementation questions that may require consideration. For example, a registrant may purchase a significant quantity of reserves in-place for an amount different from the present value of those reserves as computed using the methodology prescribed in ASR No. 253. Rather than resulting in a gain or loss in the current period, it could be argued that any such difference should be deferred and amortized as the related reserves are produced.

[1] Profit contribution as used in this instance is similar in concept to operating profit or loss as defined in FASB statement No. 14, except that income tax expense is required to be considered.

Comments are requested on these and other potential measurement and reporting problems associated with implementation of the supplemental RRA earnings summary. A comment period extending through April 30, 1979, has been established to permit respondents to consider experience in preparing and reporting valuation information on oil and gas reserves for year ending December 31, 1978.

Commission Action

The Commission hereby proposes to amend 17 CFR part 210 by adding a new subparagraph (7) to paragraph (k) of § 210.3-18 as presented below:

§ 210.3-18 Financial accounting and reporting for oil and gas producing activities pursuant to the Federal securities laws and the Energy Policy and Conservation Act of 1975.

* * * * *

(k) *Disclosure requirements.* * * *

(7) *Supplemental earnings summary.* For each year for which an income statement is required, a supplemental earnings summary of oil and gas producing activities shall be presented that includes in current period income the change during the year in the present value of future net revenues from proved reserves, as computed under paragraph (k)(6) of this section,[2] and includes in current operating expenses all costs associated with the discovery and development of proved oil and gas reserves, together with all costs determined to be nonproductive during the period.

Identify separately within the supplemental summary the income (loss) from each of the following:

(A) Producing activities;

(B) Current exploration and development activities; and

(C) Revisions to previous additions to proved properties. The revisions to previous additions shall further be segregated as to: (*1*) Changes in estimated quantities; (*2*) changes in estimated timing of production; (*3*) changes in prices and costs used to compute present values; and (*4*) holding gains arising from the passage of time.

(ii) For purposes of this summary, property acquisition cost shall be charged to expense at the time the property is determined to have proved reserves of oil or gas, or when evidence of impairment is ascertained pursuant to paragraph (c) or (d) of this section. Costs of uncompleted exploratory wells shall be deferred pending determination of whether or not the well has found proved reserves, at which time the capitalized costs of drilling the well shall be charged to expense. Other current costs of exploration and development shall be included in expenses of the period. Amortization of capitalized reserve valuations shall be computed on a unit-of-production method.

(iii) Income taxes shall be determined by the difference between (A) the amount that results from applying the income tax rates as of the end of the fiscal year to the difference between the present value of future revenues from estimated production of proved oil and gas reserves (determined in accordance with paragraph (k)(6) of this section) and the tax basis of proved properties as of that date, and (B) the amount that results from applying the income tax rates as of the beginning of the fiscal year to the difference between the present value to future revenues from estimated production of proved oil and gas reserves (determined) in accordance with paragraph (k)(6) of this section) and the tax basis of proved properties as of that date.

(iv) The supplemental earnings summary should include all items of revenue and expense applicable to oil and gas producing operations, but should not include other oil and gas operations or operations in other business segments, corporate administrative expense, interest expense, or extraordinary items. Indicate the related profit contribution, before and after income taxes, that would be reflected for oil and gas producing activities based on applying the method of accounting (successful efforts or full cost) used in the primary financial statements and valuing transfers of oil and gas to other operations of the reporting entity in accordance with paragraph (k)(4) of this section. Further, indicate the aggregate impact, both before and after income taxes, on operations other than oil and gas producing activities resulting from the effects of valuing transfers in this manner.

* * * * *

These amendments are proposed to be effective for financial statements for fiscal years ending after December 25, 1978, that are contained in filings that include fiscal years ending after December 25, 1979, although earlier application is encouraged.

[2] For this and subsequent references to the requirements of § 210.3-18, see ASR No. 253 in this same separate part.

These amendments are proposed to be adopted pursuant to authority in sections 6, 7, 8, 10, and 19(a) (15 U.S.C. 77f, 77g, 77h, 77j, 77s) of the Securities Act of 1933; sections 12, 13, 15(d), and 23(a) (15 U.S.C. 78l, 78m, 78o(d), 78w) of the Securities Exchange Act of 1935; sections 8, 30, 31(c), and 38(a) (14 U.S.C. 80a-8, 80a-29, 80a-30(c), 80a-37(a)) of the Investment Company Act of 1940; sections 5(b), 14, and 20(a) (15 U.S.C. 79e, 79n, 79t) of the Public Utility Holding Company Act of 1934; and section 503 (42 U.S.C. 6383) of the Energy Policy and Conservation Act of 1975. Pursuant to section 23(a)(2) of the Securities Exchange Act, the Commission has considered the impact of these proposals on competition and is not aware at this time of any burden that such rule amendments, if adopted, would impose on competition. However, the Commission specifically invites comments as to the competitive impact of these proposals, if adopted.

By the Commission.

George A. Fitzsimmons,
Secretary.

August 31, 1978.

Title 17—Commodity and Securities Exchanges

CHAPTER II—SECURITIES AND EXCHANGE COMMISSION

[Release No. SAB-23]

PART 211—INTERPRETATIVE RELEASES RELATING TO ACCOUNTING MATTERS

Subpart B—Staff Accounting Bulletins

STAFF ACCOUNTING BULLETIN No. 23

AGENCY: Securities and Exchange Commission.

ACTION: Publication of Staff Accounting Bulletin.

SUMMARY: These interpretations deal with matters relating to oil and gas producers in connection with the Commission's adoption in Accounting Series Release No. 253 of accounting and disclosure rules for this industry. This Staff Accounting Bulletin: (1) Rescinds Staff Accounting Bulletin No. 16, dealing with the FASB's Exposure Draft, "Financial Accounting and Reporting by Oil and Gas Producing Companies"; (2) provides additional guidance on costs to be classified as "mineral resource assets" for purposes of the replacement cost disclosure rule; and (3) indicates the manner in which the replacement cost of inventories and the replacement cost of sales for transfers from oil and gas producing activities should be determined.

EFFECTIVE DATE: The rescission of Staff Accounting Bulletin No. 16 (Topic 10-I) is effective immediately. The other interpretations are effective for fiscal years ending after December 25, 1978.

FOR FURTHER INFORMATION CONTACT:

Richard C. Adkerson or James L. Russell, Office of the Chief Accountant, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549, 202-755-0222.

SUPPLEMENTARY INFORMATION: In Accounting Series Release ("ASR") No. 253, August 31, 1978, appearing in this same separate part, the Commission adopted rules for the financial accounting and reporting practices of oil and gas producers. Staff Accounting Bulletin No. 16 (September 1, 1977) (42 FR 44983), had indicated the Commission staff's view of appropriate disclosure of the potential impact of adopting the standards set forth in the FASB's Exposure Draft, "Financial Accounting and Reporting by Oil and Gas Producing Companies." ASR No. 253 provides that registrants may follow either the successful efforts or the full cost method of accounting. In view of the Commission's actions, Staff Accounting Bulletin No. 16 is rescinded. However, in Release No. 33-5968 (August 31, 1978), the Commission has proposed rules for applying the full cost method that include disclosure of the capitalized costs and costs incurred during a period that would have been charged to expense under the successful efforts method.

The requirements of ASR No. 253 include the disclosure of the values of transfers of oil and gas production to other operations (refining, transportation, manufacturing, etc.), in which the registrant engages prior to making sales to other persons (see § 210.3-18(k)(4)). The staff believes that registrants with inventories and cost of sales that include oil and gas produced from their own properties should compute the replacement cost information for its inventories and cost of sales on the basis of the values of transfers required by § 210.3-18(k)(4), i.e., estimated fair market value at the point of transfer.

In Release No. 33-5878 (October 26, 1977) (42 FR 57651), the Commission requested comments on criteria for determining whether natural gas liquids ("NGL") plants should be excluded from mineral resource assets and therefore subject to the replacement cost disclosure requirements. The guidelines of previous staff accounting bulletins are being revised to indicate that an NGL plant should be excluded from mineral resource assets unless the value of the plant is dependent on specific reserves in which the registrant owns an interest and is therefore an integral part of the oil and gas producing properties. If not considered a mineral resource asset, the replacement cost of the plant should be determined in the same manner as other processing and transportation facilities.

The statements in Staff Accounting Bulletins are not rules or interpretations of the Commission, nor are they published as bearing the Commission's official approval; they represent interpretations and practices followed by the Division of Corporation Finance and the Office of the Chief Accountant in administering the disclosure requirements of the Federal securities laws.

GEORGE A. FITZSIMMONS,
Secretary.

AUGUST 31, 1978.

STAFF ACCOUNTING BULLETIN No. 23

The staff hereby adds subsection 10, item f, to Topic 6-I regarding replacement cost of inventories and cost of sales for transfers from oil and gas producing activities; amends the definition of mineral resource assets in Topic 6-I(10)(a); and deletes Topic 10-I, which discussed disclosure of the potential impact of the FASB's Exposure Draft, "Financial Accounting and Reporting by Oil and Gas Producing Companies."

TOPIC 6: INTERPRETATIONS OF ACCOUNTING SERIES RELEASES

. . . . . .

I. Accounting Series Release No. 190—Relating to Amendments to Regulation S-X Requiring Disclosure of Replacement Cost Data (§ 210.3-17)

. . . . . .

3. *Replacement Cost of Inventories*

. . . . . .

f. Inventories and Cost of Sales for Transfers from Oil and Gas Producing Activities

Facts:

Certain registrants, including integrated petroleum companies and natural gas transmission companies, engage in oil and gas producing activities and transfer their production to other operations for refining, processing, manufacturing, or transporting before sales are made to other persons. Consequently, an element of their inventories and cost of sales will be represented by oil and gas transferred from properties that they own and produce.

Question:

How should these registrants determine replacement cost information for the portion of their inventories and cost of sales represented by oil and gas transferred from properties that they own and produce?

Interpretative Response:

Consistent with the provisions of § 210.3-18(k)(4), transfers of oil and gas produced by registrants engaged in transporting, refining, processing, etc., of oil and gas should be valued for purposes of § 210.3-17 (c) and (d) at estimated market prices based on the prices of comparable products using posted field prices, if applicable, or amounts estimated to represent prices equivalent to those that could be obtained in a competitive arm's-length market environment, giving recognition to transportation costs, quality differences, and arrangements with and regulations of governments.

. . . . . .

10. *Applicability of § 210.3-17*
a. *Exemptions*

Facts:

Section 210.3-17 contains an exemption for mineral resource assets employed in the production of crude oil or natural gas. Delayed application was permitted for other mineral resource assets.

Question 1:

What are "mineral resource assets?"

Interpretive Response:

Mineral resource assets are defined as those costs shown on the balance sheet representing assets that are directly associated with and that derive value from mineral reserves. For the oil and gas industry these costs include the following:

1. Intangible drilling and development costs;
2. Capitalized nonproductive costs, delay rentals, overhead, and similar costs;
3. Producing and nonproducing leasehold costs;
4. Down-hole equipment;
5. Wellhead equipment;
6. Lease production facilities—tanks, flowlines, separators, above-ground pumps, compressors, etc.;
7. Gas cycling plants;
8. Processing facilities, including natural gas liquids plants, the value of which is primarily dependent on specific oil and gas reserves in which the registrant owns an interest;
9. Support facilities—powerplants, field living quarters, etc.;
10. Gathering systems to the point of market in the field;
11. Offshore platforms.

All costs which involve processing, transportation, refining, distribution, and marketing are not classified as mineral resource assets. Examples include the following:

1. Refineries;
2. Transportation equipment and facilities beyond the point of market in the field—including pipelines, barges, and trucking equipment;
3. Drilling equipment and related facilities used in drilling operations.

For the mining industry mineral resource assets include the following:

1. Capitalized costs related to—
a. Acquisition of mineral rights, leases or properties;
b. Exploration;
c. Development of ore bodies.
2. All assets employed in the extraction and conversion process which are necessary to produce mineral product or products which are commercially marketable;
3. Processing assets, located at or dedicated solely to a mine or mines in which the registrant has an economic interest, which are designed with specific regard to the particular physical or chemical characteristics of the ores being mined or the scale of operation, and which, by their nature, would have only nominal economic value in the absence of the ores they were designed to treat;
4. Supportive facilities such as power generating and distributing facilities, mine transportation facilities, townsites, other infrastructure, etc., which derive value solely because of the existence of the ore body.

All costs which involve processing, manufacturing, and fabricating facilities which are not directly associated with, nor derive value from, a particular mineral deposit in which the registrant has an economic interest, e.g., smelters and refineries which obtain their feed from outside shippers, are not mineral resource assets.

RECODIFICATION OF RECREATION REGULATIONS

V 43 / 177 SE 12 78

[4310-84]

Title 43—Public Lands: Interior

CHAPTER II—BUREAU OF LAND MANAGEMENT, DEPARTMENT OF THE INTERIOR

[Circular No. 2435]

RECODIFICATION OF RECREATION REGULATIONS

Final Rules

AGENCY: Bureau of Land Management, Interior.

ACTION: Final rulemaking.

SUMMARY: This final rulemaking removes the recreation management regulations from subchapter F and into subchapter H of title 43 and renumbers them in the 8000 series. Additional regulations developed under new laws have caused a need for a separate subchapter containing only recreation regulations. The intended effect is to improve the organization of the regulations in title 43 by separating wildlife and recreation regulations. The recreation regulations are reorganized and the wording simplified. However, no substantive change has been made in their meaning.

DATE: Effective date: October 12, 1978.

ADDRESS: Director (370), Bureau of Land Management, 1800 C Street NW., Washington, D.C. 20240.

FOR FURTHER INFORMATION, CONTACT:

Mr. Larry R. Young at the above address or telephone 202-343-9353.

SUPPLEMENTAL INFORMATION: This document was prepared by Mr. Larry R. Young of the Bureau of Land Management, Division of Recreation, assisted by the Division of Legislation and Regulatory Management.

Recreation demands upon public lands have increased in recent years causing a need to regulate the intensive recreation activities. In recognition of this increase, authority has been provided in recent legislation and Executive orders to develop the necessary regulations. The expanding recreation program regulations can be more logically and usably codified by separating them from the wildlife regulations and placing them in a previously reserved subchapter.

This rulemaking is primarily a recodification of existing regulations. Some reorganization and clarification of the provisions are made as part of the recodification process. However, no substantive changes are made in the regulations. Therefore, proposed rulemaking and public participation are not considered necessary.

Accordingly, under the authority of section 310 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1740), Chapter II of Title 43 of the Code of Federal Regulations is amended by removing all recreation regulations from the 6000 series in subchapter F and placing them in the 8000 series in subchapter H as set forth below.

1. All regulatory provisions except subpart 6224 are deleted from subchapter F. Subchapter F is amended to read as follows:

SUBCHAPTER F—WILDLIFE MANAGEMENT (6000)

PART 6000—[Deleted]

PART 6010—[Deleted]

PART 6200—[Deleted]

PART 6220—PROTECTION AND PRESERVATION OF NATURAL VALUES

Subpart 6221—[Deleted]

Subpart 6222—[Deleted]

Subpart 6223—[Deleted]

Subpart 6224—Viable Coral Communities

* * * * *

Subpart 6225—[Deleted]

PART 6250—[Deleted]

PART 6260—[Deleted]

PART 6270—[Deleted]

PART 6290—[Deleted]

2. The recreation management regulations are reorganized and recodified as follows:

8000.0-1 Purpose.
8000.0-2 Objective.
8000.0-3 Authority.
8000.0-4 Responsibility.
8000.0-6 Policy.

AUTHORITY: 16 U.S.C. 460(1-6a), 16 U.S.C. 670 (g-n), 16 U.S.C. 1241 et seq., 16 U.S.C. 1271 et seq., 43 U.S.C. 1181(a) and 1181(e), 43 U.S.C. 1201, 43 U.S.C. 1334, 43 U.S.C. 1701 et seq., and E.O. 11644, as amended.

PART 8000—RECREATION PROGRAMS

Subpart 8000—General

§ 8000.0-1 Purpose.

The regulations in this Subchapter H set forth procedures for the administration of recreation programs on public lands. The programs are cultural resource management, natural history resource management, recreation management, visual resource management, wilderness management, and environmental education and protection.

§ 8000.0-2 Objective.

The objective is to manage the public lands and the recreation use of those lands to protect the health and safety of recreationists who use the public lands, to protect natural resource values on the public lands, and promote public use and enjoyment of the public lands.

§ 8000.0-3 Authority.

These regulations are issued under authorities provided in 16 U.S.C. 460(1-6a), 16 U.S.C. 670 (g-n), 16 U.S.C. 1241 et seq., 16 U.S.C. 1271 et seq., 43 U.S.C. 1181(a) and 1181(e), 43 U.S.C. 1201, 43 U.S.C. 1334, 43 U.S.C. 1701 et seq., and Executive Order 11644, as amended.

§ 8000.0-4 Responsibility.

The authority of the Secretary of the Interior to develop and manage the public lands for recreational purposes, to authorize recreation use, and specify terms and conditions of such use on public lands, and to otherwise enforce the regulations in this Subchapter H has been delegated to the authorized officers of the Bureau of Land Management. Any exceptions are specifically provided for in regulations.

§ 8000.0-6 Policy.

(a) The recreation programs involving public lands shall be developed and managed in accordance with multiple-use management principles unless otherwise specified by law.

(b) State and local government and private agencies shall be encouraged to develop public recreation facilities when consistent with the long range management plans and programs of the Bureau of Land Management.

(c) Priority shall be given to these recreation programs:

(1) Recreation development and improvement as follows: (i) Undeveloped sites now under heavy, uncontrolled use that threatens public health and safety or is damaging to natural, cultural, and historical resources; (ii) Areas where public recreation demands exceed the opprtunities and facilities now available; and (iii) Areas that are near urban areas or bodies of water and unique scenic attractions that adjoin heavily traveled highway routes.

(2) Preservation and protection of natural and cultural resources, including but not limited to scientific, scenic, historic, and archeological values, and primitive environments.

(d) Reasonable fees may be established and collected by the authorized officer in accordance with part 18 of this title 43.

Group 8100—Cultural Resource Management [Reserved]

Group 8200—Natural History Resource Management

PART 8200—PROCEDURES

Subpart 8200—General

Sec.
8200.0-1 Purpose.

Subpart 8223—Research Natural Areas

8223.0-1 Purpose.
8223.0-5 Definitions.
8223.0-6 Policy.
8223.1 Use of research natural areas.

AUTHORITY: 43 U.S.C. 1181 (a) and (e), 43 U.S.C. 1201, 43 U.S.C. 1701 et seq.

Subpart 8200—General

§ 8200.0-1 Purpose.

This part 8200 provides procedures and practices for the management and use of public lands that have ecological or other natural history values of scientific interest.

Subpart 8223—Research Natural Areas

§ 8223.0-1 Purpose.

The purpose of this part is to provide procedures for the management and protection of public lands having natural characteristics that are unusual or that are of scientific or other special interest.

§ 8223.0-5 Definitions.

(a) "Research natural area" means an area that is established and maintained for the primary purpose of research and education because the land has one or more of the following characteristics: (1) A typical representation of a common plant or animal association; (2) an unusual plant or animal association; (3) a threatened or endangered plant or animal species; (4) a typical representation of common geologic, soil, or water features; or (5) outstanding or unusual geologic, soil, or water features.

§ 8223.0-6 Policy.

Areas established as research natural areas shall be of sufficient number and size to adequately provide for scientific study, research, and demonstration purposes.

§ 8223.1 Use of research natural areas.

(a) No person shall use, occupy, construct, or maintain facilities in a research natural area except as permitted by law, other Federal regulations,

V 43 177 SE 12 78

or authorized under provisions of this subpart 8223.

(b) No person shall use, occupy, construct, or maintain facilities in a manner inconsistent with the purpose of the research natural area.

(c) Scientists and educators shall use the area in a manner that is nondestructive and consistent with the purpose of the research natural area.

Group 8300—Recreation Management

PART 8300—PROCEDURES

Subpart 8300—General

Sec.
8300.0-1 Purpose.
8300.0-2 Objective.
8300.0-6 Policy.

AUTHORITY: 16 U.S.C. 460(1-6a), 16 U.S.C. 670(g-n), 16 U.S.C. 1241, 16 U.S.C. 1271, 43 U.S.C. 1701 et seq.

Subpart 8300—General

§ 8300.0-1 Purpose.

(a) This group sets forth procedures and practices for the management and use of public lands for specific kinds of public recreation activities, resource conditions, outdoor recreation occupancy, and resource development.

(b) Guidelines are provided regarding access to public lands and limitations on travel across public lands.

§ 8300.0-2 Objective.

The objectives are to provide access to the public lands for those who wish to use them, to minimize conflicts among users, and to prevent damage to natural resources by recreation activities.

§ 8300.0-6 Policy.

(a) As appropriate for management and public identification purposes, lands having significant natural values may be designated under provisions of part 2070 of this chapter and segregated under applicable authorities.

(b) In cooperation with State and local government and private landholders, the Bureau of Land Management shall endeavor to provide for public access to public lands with outdoor recreation values.

PART 8340—OFF-ROAD VEHICLES

Subpart 8340—General

§ 8340 Right-of-way.

Drivers of motor vehicles shall yield the right-of-way to pedestrians, saddle horses, pack trains, and horse-drawn vehicles.

(E.O. 11644.)

PART 8350—MANAGEMENT AREAS

Subpart 8351—Designated National Areas

Sec.
8351.0-1 Purpose.
8351.0-2 Objective.
8351.0-3 Authority.
8351.0-6 Policy.
8351.1 Trails [Reserved].
8351.2 Rivers [Reserved]

AUTHORITY: 16 U.S.C. 1241, 16 U.S.C. 1271, 43 U.S.C. 1701 et seq.

Subpart 8351—Designated National Areas

§ 8351.0-1 Purpose.

To provide procedures for the management of lands administered under provisions of the Wild and Scenic Rivers Act and the National Trails System Act.

§ 8351.0-2 Objective.

To assure that all public lands administered under provisions of the Wild and Scenic Rivers Act and the National Trails System Act are managed in a manner consistent with the purposes of these Acts.

§ 8351.0-3 Authority.

The Wild and Scenic Rivers Act of 1968 (16 U.S.C. 1271 et seq.).

The National Trails System Act of 1968 (16 U.S.C. 1241 et seq.).

§ 8351.0-6 Policy.

(a) Hiking, horse riding, and motor trails shall be located, constructed, and maintained where they are found to be feasible and would improve recreation opportunity and quality. Established trails shall be marked or signed and made known to the public by other means.

(b) Certain rivers and sections of rivers that are flowing free of the influence of dams or other major manmade alterations and that possess outstanding scenic, recreational, geological, biological, cultural, or historical features shall be preserved as free flowing streams. The immediate river area shall be managed to protect the natural, cultural, or historical features that make the river or river segment outstanding.

§§ 8351.1 and 8351.2 [Reserved]

Subpart 8352—Established Areas

§ 8352.0-1 Purpose.

To establish procedures for the management of recreation use to protect (a) lands that have unusual natural characteristics and (b) lands that are primitive in character.

§ 8352.0-2 Objectives.

(a) *Outstanding natural areas.* The objective is to manage for the maximum amount of recreation use possible on outstanding natural areas without damage to the natural features that make the areas outstanding.

(b) *Primitive areas.* The objective is to manage for the maximum amount of recreation use possible on primitive areas with a minimum of interference with natural ecological processes and to preserve the primitive recreation values of solitude, inspiration, and mental and physical challenge.

§ 8352.0-5 Definitions.

As used in this part the term:

(a) "Outstanding natural area" means an area of unusual natural characteristics where management of recreation activities is necessary to preserve those characteristics.

(b) "Primitive area" means an area that is composed of natural, undeveloped lands that are essentially unaffected by civilization and located where the natural environment can be preserved by management of recreation activities and exclusion of additional roads and commercial developments.

§ 8352.0-6 Policy.

(a) *Outstanding natural areas.* Outstanding natural areas shall be large enough to provide for protection of the outstanding natural features through management of recreation activities in the area.

(b) *Scenic areas.* Scenic areas established along highways, roads, trails, streams, or larger water bodies shall be managed to protect and enhance the scenic qualities that led to the establishment of the area.

(c) *Primitive areas.* Public use of primitive areas for recreation purposes shall be encouraged to the extent possible consistent with the objective of maintaining the primitive environment.

§ 8352.1 Use of outstanding natural areas.

(a) Facilities may be used, occupied, constructed, or maintained in an outstanding natural area only as permitted by law, other Federal regulations, or authorized under this subpart 8352.

(b) No person shall use, occupy, construct, or maintain authorized facilities in a manner that unnecessarily detracts from the quality of the outstanding natural features of the area.

§ 8352.2 Use of recreation lands. [Reserved]

§ 8352.3 Use of scenic areas. [Reserved]

§ 8352.4 Use of primitive areas.

(a) With the exception of essential search and rescue, fire control, or other emergency or administrative operations, no person shall travel in primitive areas except by nonmechanized means. With the exception noted, this provision prohibits the landing of aircraft in a primitive area.

(b) No person shall construct facilities in or on a primitive area except in connection with authorized nonrecreation uses of the lands and as necessary to the protection and administration of the area.

(c) No person shall conduct nonrecreational authorized activities except under conditions specified by the authorized officer to preserve the primitive characteristics of the area.

Subpart 8361—Services

§ 8361.0-6 Policy.

To the extent practicable within budget and personnel constraints, signs shall be posted, ownership maps published, and other available means used to inform the public of recreation areas and opportunities.

Subpart 8362 [Reserved]

Subpart 8363—Rules of Conduct

Sec.
8363.0-1 Purpose.
8363.0-2 Objective.
8363.1 Developed sites and areas.
8363.1-1 Sanitation.
8363.1-2 Audio devices.
8363.1-3 Occupancy and use.
8363.1-4 Vehicles.
8363.1-5 Public health, safety, and comfort.
8363.1-6 Public property and resources.
8363.2 Undeveloped sites and areas.
8363.2-1 Permitted activities.
8363.2-2 Prohibited activities.
8363.3 Supplemental rules.
8363.4 State and local laws.
8363.5 Criminal penalties.

AUTHORITY: 43 U.S.C. 1181(a-e), 43 U.S.C. 1201, 43 U.S.C. 1701 et seq.

Subpart 8362 [Reserved]

Subpart 8363—Rules of Conduct.

§ 8363.0-1 Purpose.

The purpose of this subpart is to set forth rules of conduct that provide for the comfort and well-being of the public in its use of outdoor recreation areas, sites, and facilities on public lands.

§ 8363.0-2 Objective.

The objective of this subpart is to insure that outdoor recreation areas, sites, and facilities on public lands are usable by the maximum number of people with a minimum amount of conflict among users and a minimum of damage to public lands and resources.

§ 8363.1 Developed sites and areas.

Rules for the public use and occupancy of developed recreation sites and areas where recreation facilities have been constructed will be posted in conspicuous locations. Failure to comply with posted rules may result in denial of the use of developed sites and facilities, and further action as determined appropriate by the authorized officer.

§ 8363.1-1 Sanitation.

All persons shall:

(a) Dispose of all garbage, paper, cans, bottles, and other waste materials by burning in authorized fires, removal from the public lands, or by disposal in designated places.

(b) Drain or dump refuse or waste from any trailer or other vehicle only in places or receptacles provided for that purpose.

(c) Refrain from cleaning fish, game, or other food and from washing clothing or articles of household use at outdoor hydrants or at water faucets located in restrooms.

(d) Avoid polluting or contaminating water supplies or water used for human consumption.

(e) Deposit body wastes only in toilet receptacles provided for that purpose.

(f) Use any refuse container or disposal facility only for the purposes for which they are supplied.

(g) Refrain from dumping any household or commercial garbage or trash brought from private property.

§ 8363.1-2 Audio devices.

The following acts are prohibited in developed recreation sites:

(a) Operating or using any audio devices, including radio, television, and musical instruments, and other noise-producing devices, such as electrical generator plants and equipment driven by motors or engines, in a manner to annoy other persons.

(b) Operating or using public address systems, whether fixed, portable, or vehicle mounted unless approved by the authorized officer.

(c) Installing aerial or other special radiotelephone or television equipment unless approved by the authorized officer.

§ 8363.1-3 Occupancy and use.

The following rules apply to the occupancy and use of developed camping and picnicking facilities on the public lands. As a condition to such occupancy and use, the user shall:

(a) Pitch tents or park trailers or place other camping equipment only in places provided for such purposes.

(b) Camp within a campground no longer than the period of time established by the authorized officer.

(c) Attend camping equipment within prescribed time limits. Camping equipment which is unattended for more than posted limits, without permission of the authorized officer, is subject to disposition under State and local laws.

(d) Before departure, remove equipment and clean any rubbish from the place occupied for recreation purposes.

(e) Build fires only in stoves, grills, fireplaces, or fire rings provided for such purposes.

(f) Camp overnight only in places provided or posted for such purposes.

(g) Maintain reasonable quiet in campgrounds between evening and morning hours as posted.

(h) Enter or remain in campgrounds closed during established night periods only as an occupant, or to visit persons occupying the campgrounds for camping purposes.

(i) Not enter or use a site or a portion of a site closed to public use.

§ 8363.1-4 Vehicles.

The following rules apply to operation of motor vehicles in developed recreation sites in the interest of public safety and comfort. Motor vehicles and trailers shall not be:

(a) Driven or operated in excess of posted speeds.

(b) Driven or parked except on roads and places provided for this purpose.

(c) Driven or operated in willful disregard of the rights or safety of others, or without due caution and at a speed, or in a manner, so as to endanger, or be likely to endanger, any person or property.

(d) Driven or operated on trails within developed recreation sites, except for purposes of maintaining such sites and facilities.

(e) Driven or operated in developed recreation sites, for any purpose other than access to or from the site.

(f) Driven or operated in developed recreation sites closed to such entrance by the authorized officer.

(g) Driven or operated at any time without a muffler in working order, or in such a manner as to create excessive or unusual noise, or annoying smoke or dust, or using a muffler cutoff, bypass, or similar device.

(h) Unnecessarily accelerated when not moving, or when approaching or leaving a stopping place.

§ 8363.1-5 Public health, safety, and comfort.

The following rules are adopted to further the public health, safety and comfort in the use and occupancy of developed recreation sites and facilities. The user shall not:

(a) Discharge firearms, or firecrackers, rockets, or other fireworks in developed recreation sites.

(b) Be accompanied by a dog, cat, or other animal unless it is crated, caged, leashed, or otherwise under physical, restrictive control at all times.

(c) Bring animals, other than seeing eye dogs, to swimming areas.

(d) Bring saddle, pack, or draft animals into any developed recreation

V 43 / 177

site except where specifically permitted or authorized.

§ 8365.1-6 Public property and resources.

The following rules are adopted to protect public property and to conserve the resources in developed recreation sites for public use and enjoyment. The user shall not:

(a) Intentionally or wantonly destroy, deface, or remove any natural feature or plant.

(b) Intentionally or wantonly destroy, injure, deface, remove, or disturb in any manner any public building, sign, equipment, marker, or other structure or property.

§ 8363.2 Undeveloped sites and areas.

§ 8363.2-1 Permitted activities.

(a) *Collecting—hobby specimens.* Flowers, berries, nuts, seeds, cones, leaves, and similar renewable resources and nonrenewable resources such as rocks, mineral specimens, common invertebrate fossils, and gem stones may be collected in reasonable quantities for personal use, consumption, or hobby collecting. Limitations on this privilege are contained in § 8363.2-2 of this subpart.

(b) *Collecting—for sale or barter.* Gathering or collecting of renewable or nonrenewable resources for the purpose of sale or barter may be done only where specifically authorized by law.

(c) *Petrified wood.* For regulations pertaining to collection of petrified wood see Subpart 3612 of this chapter.

(d) *Vegetative and mineral materials.* For regulations pertaining to removal of vegetative and mineral materials, see Subparts 3610, 3611, and 5400 of these regulations.

§ 8363.2-2 Prohibited activities.

In the use of lands for public outdoor recreation purposes, no one shall:

(a) Intentionally or wantonly destroy, deface, injure, sign, remove, or disturb any public building, sign, equipment, marker, or other public property.

(b) Harvest or remove any vegetative or mineral resources or object of antiquity, historic, or scientific interest unless such removal is in accordance with part 3 of this title, regulations of this section, or is otherwise authorized by law.

(c) Appropriate, mutilate, deface, or destroy any natural feature, object of natural beauty, antiquity, or other public or private property.

(d) Dig, remove, or destroy any tree or shrub.

(e) Gather or collect renewable or nonrenewable resources for the purpose of sale or barter unless specifically permitted or authorized by law.

(f) Drive or operate motorized vehicles or otherwise conduct himself in a manner that may result in unnecessary frightening or chasing of people, domestic livestock and wildlife.

(g) Use motorized mechanical devices or explosives for digging, scrapping, or trenching for purposes of collecting.

§ 8363.3 Supplemental rules.

Additional rules to protect the public health and safety and protect resources may be established by the authorized officer, as necessary. They shall be posted in appropriate locations to notify the public of requirements for the occupancy and use of lands, outdoor recreation facilities, and roads and trails. The posted rules may provide for, but need not be limited to, protection of public health and safety, protection of lands from fires, prevention of soil erosion, and utilization and protection of outdoor recreation and other resource values of the public lands.

§ 8363.4 State and local laws.

Except as otherwise provided by law, State and local laws and ordinances shall apply. This refers, but is not limited, to laws and ordinances governing:

(a) Operation and use of motor vehicles, aircraft, and boats.

(b) Hunting and fishing.

(c) Use of firearms.

(d) Injury to persons or destruction of property.

(e) Air and water pollution.

(f) Littering.

(g) Sanitation.

(h) Use of fire.

§ 8363.5 Criminal penalties.

Any person who knowingly and willfully violates any rule of conduct described in § 8363.1-6 or § 8363.2-2 shall be fined not more than $1,000 or imprisoned not more than 12 months, or both.

Subpart 8364—Closures

Sec.
8364.1 Closure of lands.
8364.1-1 Closure of access.
8364.2 Criminal penalties.

Subpart 8364—Closures

§ 8364.1 Closure of lands.

In the management of lands to protect the public and assure proper resource utilization, conservation, and protection, public use and travel may be temporarily restricted. For instance, areas may be closed during periods of high fire danger or unsafe conditions, or where use will interfere with or delay mineral development, timber, and livestock operations, or other authorized use of the lands. Areas may also be closed temporarily to:

(a) Protect the public health and safety.

(b) Prevent excessive erosion.

(c) Prevent unnecessary destruction of plant life and wildlife habitat.

(d) Protect the natural environment.

(e) Preserve areas having cultural or historical value.

(f) Protect scientific studies or preserve scientific values.

§ 8364.1-1 Closure of access.

Roads, trails, and lands providing access to other public lands may be closed entirely or open only for specifically authorized travel in the interest of public health and safety or preservation and protection of public lands and resources.

§ 8364.2 Criminal penalties.

Any person who knowingly and willfully violates any closure order issued under § 8364.1 shall be fined not more than $1,000 or imprisoned not more than 12 months, or both.

PART 8370—USE AUTHORIZATIONS

Subpart 8371—Recreation use permits, developed sites. [Reserved]

Subpart 8372—Special recreation permits, other than on developed recreation sites.

8372.2 Applications.
8372.3 Issuance of permits.
8372.4 Fees.
8372.5 Terms.

AUTHORITY: 16 U.S.C. 460(1-6a), 16 U.S.C. 670(g-n), 16 U.S.C. 1271-1287, 6 U.S.C. 1241-1249, 43 U.S.C. 1181(a), 43 U.S.C. 1201, 43 U.S.C. 1701 et. seq.

Subpart 8371—Recreation use permits, developed sites [Reserved]

Subpart 8372—Rules for Visitor Uses, other than on Developed Recreation Sites

§ 8372.0-1 Purpose.

This subpart sets forth the procedures for authorizing certain recreational uses of lands and waters administered by the Bureau.

§ 8372.0-2 Objective.

To establish a permit and fee system for certain recreation uses of lands and waters administered by Bureau.

SE 12 78

§ 8372.0-3 Authority.

The rules in this subpart are issued pursuant to: 43 U.S.C. 1201; 43 U.S.C. 1701 et seq.; 43 U.S.C. 1181a; 16 U.S.C. 460(1-6a); 16 U.S.C. 670g-n; 16 U.S.C. 1271-1287; 16 U.S.C. 1241-1249.

§ 8372.0-5 Definitions.

For the purposes of this subpart:

(a) "Commercial use" is recreational use of the public lands for business or financial gain. When any permittee, employee or agent of a permittee, operator, or participant makes or attempts to make a profit, salary, increase his business or financial standing, or supports, in any part, other programs or activities from amounts received from or for services rendered to customers or participants in the permitted activity, as a result of having the special recreation permit, the use will be considered commercial. Subsistence activities of Alaskan natives (as defined in the Alaska Native Claims Settlement Act) in Alaska are not considered recreational use. The collection by a permittee or his agent of any fee, charge, or other compensation which is not strictly a sharing of, or is in excess of, actual expenses incurred for the purposes of the activity or use shall make the activity or use commercial. Use by educational and therapeutic institutions is considered commercial when the above criteria are met. Profit making organizations are automatically classified as commercial, even if that part of their activity covered by the permit is not profit making. Nonprofit status of any group or organization under the Internal Revenue or Postal Laws or regulations does not in itself determine whether an event or activity arranged by such a group or organization is noncommercial. Any person, group, or organization seeking to qualify as noncommercial shall have the burden of establishing to the satisfaction of the authorized officer that no financial or business gain will be derived from the proposed use.

(b) "Actual costs or expenses" are costs or expenses necessarily incurred for the permitted activity or use. These terms include, but are not limited to, the actual costs of such items as expendable equipment and supplies. Actual costs or expenses will not include any salaries, profit, increase of capital worth, allowances, or subsidies of any other activities of the permittee or sponsor, the purchase or amortization of nonexpendable supplies or equipment, any allowance for undersubscribed events, or any monetary compensation for sponsors or participants.

(c) "Competitive use" is any formally organized or structured use, event, or activity on public land in which there are the elements of competition between two or more contestants, registration of participants, and/or a predetermined course or area is designated. The term also applies to one or more individuals contesting an established record such as speed or endurance.

(d) An "event" is a single, structured, organized, consolidated, or scheduled meeting or occurrence for the purpose of recreational use of the public lands. An event may be composed of several related activities.

(e) "Educational use" is use by an institution which has been recognized as educational by Federal, State, or local government bodies, or regional accrediting bodies. Such use must have learning as the major objective, and there must be a teacher-pupil relationship present. National, regional, State, or local accreditation will normally qualify a school as noncommercial, but such accreditation in and of itself does not assure noncommercial status.

(f) An "operator" is a group, association, individual, corporation, or organization which provides recreational services.

(g) A "special area" is an area established as a component of the National Trails System, the National Wild and Scenic Rivers System, the National Wilderness System, an area covered by joint agreement between the Bureau of Land Management and a State government as provided for in title II of the Sikes Act, or any other area where the authorized officer determines that the resources require special management and control measures for their protection.

(h) A "User day" is any calendar day, or portion thereof, for each individual accompanied or serviced by an operator or permittee on the public lands. Passenger day is synonymous with user day.

(i) An "off-road vehicle" is any motorized vehicle capable of, or designed for, travel on or immediately over land, water, or other natural terrain excluding: (1) Any nonamphibious registered motorboat; (2) any military, fire, emergency, or law enforcement vehicle while being used for emergency purposes; (3) any vehicle whose use is specifically authorized by the authorized officer or otherwise officially approved; (4) official use; or (5) any combat or combat support vehicle when used in times of national defense emergencies.

§ 8372.0-7 Enforcement.

Failure to pay any fee or failure to obtain a permit required by this subpart or operating with a suspended permit shall be punishable pursuant to the Federal Land Policy and Management Act of 1976, the Land and Water Conservation Fund Act, as amended, the Wild and Scenic Rivers Act, the National Trails Act, the Sikes Act, and other laws when applicable.

§ 8372.1 Permits required.

§ 8372.1-1 Public lands, general.

Special recreation permits are required for (a) commercial use, (b) competitive use, (c) off-road vehicle events involving 50 or more vehicles, and (d) special area use where the authorized officer determines the criteria of the Land and Water Conservation Fund Act, as amended, the Sikes Act, the Wild and Scenic Rivers Act, Federal Land Policy and Management Act, the Taylor Grazing Act, or National Trails Act require their issuance.

§ 8372.1-2 Special areas.

With the exception of use in special areas, special recreation permits are not required for recreational use by individuals, or individual immediate families. Notice will be given in the FEDERAL REGISTER and regional news media when special recreation permits are required for recreational use other than commercial, competitive, and off-road vehicle use in a special area. Access points in special areas will also be posted notifying the public of required permits for recreational use, other than commercial, competitive, and off-road vehicle use.

§ 8372.2 Applications.

(a) *Forms and maps.* Applications for special recreation permits shall be made to the authorized officer on forms approved by the Director, Bureau of Land Management. Applications shall include a map of sufficient scale and detail to allow identification of the proposed use area on the ground. The authorized officer, may waive the requirement for maps where appropriate.

(b) *Supplemental information.* The authorized officer may require the applicant to submit supplemental information in sufficient detail to evaluate the impact of the proposed event upon the lands and environment, including measures the applicant would take to mitigate impacts on the lands and environment.

(c) *Filing.* (1) The application shall be filed in the office of the Bureau having jurisdiction over the lands to be used. The application shall be filed a minimum of 120 days in advance of intended use unless a shorter time is authorized by the authorized officer. Applications may be filed by mail or in person. (2) Within 30 days of the filing date or within 15 days of the desired use date, whichever is earliest, the authorized officer shall inform the applicant if the decision on issuing the permit will be delayed. (3) The authorized officer may establish a maximum

V 43 / 177

time by which applications will be accepted prior to date of proposed use.

§ 8372.3 Issuance of permits.

The approval of an application and subsequent issuance of a special recreation permit is discretionary with the authorized officer.

§ 8372.4 Fees.

(a) *Filing fees.* Applicants for special recreation permits for commercial or competitive uses shall include with their application a $10 nonrefundable filing fee.

(b) *Use fees.* (1) Commercial use—a minimum of $25 is required for use if not in excess of 100 user days. Payment for use in excess of 100 user days shall be in the amount of $25 each additional 100 user days or fraction thereof. (2) Competitive use—the fee is 5 percent of the gross receipts, $1 per participant per day or $10 whichever is greater. When use is both commercial and competitive, the competitive fee shall be charged. (3) Special area use—fees may be required for special area uses by other than commercial, competitive, and off-road vehicle users where the authorized officer determines that such charges are consistent with the Land and Water Conservation Fund Act. A minimum fee of $1 shall be charged for each permit for such use. (4) Off-road vehicle use—a minimum fee of $1 will be charged for the permit for each event. (5) The authorized officer may charge larger fees than these minimums consistent with charges made for similar uses by other organizations and governmental agencies in the region of use. (6) Any change in established fees will be made in accordance with section 304 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1734).

(c) *Payment of use fees.* (1) Payment of fees will be required at the time a permit is issued. (2) Where the amount of intended use cannot be precisely determined, the fee will be based on an estimation and payment will be required of that amount. The fee will be adjusted, based on actual use, after use is made. Refunds will be made or additional payment will be required to the extent the payment requirement for actual use varies from the initial amount paid by $10. (3) If an applicant is unable to pay the fee in advance, the authorized officer may allow the posting of a payment bond or other guarantee in an amount equal to the actual or estimated fee. The authorized officer will establish a payment date which is no later than 15 days following the use period.

(d) *Exceptions, exclusions, and exemptions.* (1) Nothing contained herein shall authorize Federal hunting, trapping, or fishing licenses, permits, or fees. (2) Fees under provisions of this part shall not be charged and permits shall not be required for commercial or other activities not related to recreation. Permits may be required but fees shall not be charged for uses including, but not limited to, organized tours or outings conducted for educational or scientific purposes related to the resources of the area visited by bona fide institutions established for these purposes. (3) Applicants for waiver of fees on this basis shall be required to provide documentation of their official recognition as educational or scientific institutions by Federal, State, or local government bodies and shall also be required to provide a statement as to the purposes of the visit proposed. (4) The use of areas for which a fee waiver is requested must relate directly to scientific or educational purposes. (5) No fee shall be charged for those special recreation permits required for: (i) Any hospital patient actively involved in medical treatment or therapy in the area visited; (ii) educational and therapeutic institutions that are not commercial; and (iii) individuals, and individual immediate families except in certain special areas. The authorized officer may determine that permits and fees are unnecessary where an event begins and ends on nonpublic lands, traverses less than 1 mile of public lands, and poses no threat of significant damage to public resource values.

§ 8372.5 Terms.

(a) *General.* (1) The authorized officer may suspend a special recreation permit if necessary to protect public health, public safety, or the environment. The terms of the permit shall continue to run during any such suspension. (2) Permits may be issued for a day, season of use, or such other time period considered appropriate by the authorized officer for the use involved. (3) A special recreation permit will not be issued for an area larger than the authorized officer determines is necessary for the contemplated use. The land may be surveyed or unsurveyed. (4) The operator or permittee shall allow the authorized officer, or other duly authorized representative of the Bureau, to have access to and the right to examine any directly pertinent books, documents, papers, and records of the operator or permittee involving transactions related to the permit. The operator or permittee also will allow the authorized officer, or other duly authorized representative of the Bureau, to have access to and the right to examine any directly pertinent books, documents, papers, and records of any employee or agent of the permittee or operator. These allowances and rights terminate 3 years after the expiration of the permit.

(b) *Stipulations.* A special recreation permit will contain such stipulations as the authorized officer considers necessary to protect the lands and resources involved and the public interest in general.

(c) *Bonds.* In addition to a payment bond, the authorized officer may require the posting of a cash or surety bond or other guarantee in such form and in such amount as the authorized officer determines to be sufficient to defray the costs of restoration and rehabilitation of the lands affected by the permitted use. Bonds and guarantees will be returned to the permittee upon satisfactory compliance with all permit stipulations, including restoration and rehabilitation requirements.

(d) *Insurance.* The authorized officer shall require all commercial and competitive applicants, and may require other applicants, to obtain and submit a property damage, personal injury, and public liability insurance policy which he judges sufficient to protect the public and the United States. The policy shall name the U.S. Government as a co-insured and stipulate that the authorized officer of the Bureau of Land Mangement shall be notified 30 days in advance of the termination or modification of the policy.

(e) *Liability.* The permittee shall indemnify the United States against any responsibility or liability for damage, injury, or loss to persons and property which may occur during the permitted use period or as a result of such use.

(f) *Violation of law.* The conviction of a violation of any Federal or State law or regulation concerning the conservation or protection of natural resources, the environment, endangered species, or antiquities that is related to said special recreation permit may result in the cancellation of the permit.

Dated: September 7, 1978.

GUY R. MARTIN,
Assistant Secretary of the Interior.

[FRL 944-4]

GRANTS AND OTHER FEDERAL ASSISTANCE

Water Quality Programs

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is proposing to amend its regulations relating to water quality planning, management, and implementation funded under sections 106 and 208 of the Clean Water Act of 1977, as amended. Among other things, the regulations reflect modifications in the management of the program in the areas of the delineation of the partnership between States, areawide agencies, and EPA and the integration and consolidation of water quality programs and identification of tasks and funding arrangements through State/EPA agreements. The regulations respond to the President's initiative on consolidation of Federal requirements for State and local planning and the President's urban policy.

DATES: Comments must be received on or before November 13, 1978. Public hearing: October 24, 1978 from 1:30 p.m. to 5:30 p.m.; 7:30 p.m. to 10:30 p.m.

ADDRESSES: Public hearing: Interdepartmental Auditorium, Constitution Avenue NW. (between 12th and 14th Streets), Washington, D.C. Send requests to speak to: Patti Morris, Environmental Protection Agency (WH-554), 401 M Street SW., Washington, D.C. 20460. (For additional information regarding requests to speak and the agenda for the hearing see public hearing below). Send written comments to: Lin Eichmiller, Environmental Protection Agency (WH-554), 401 M Street SW., Washington, D.C. 20460. Comments submitted may be inspected at the Public Information Reference Unit, EPA Headquarters, Room 2922, Waterside Mall, 401 M Street SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT:

Lin Eichmiller, Environmental Protection Agency (WH-554), 401 M Street SW., Washington, D.C. 20460, 202-755-6965.

PUBLIC HEARING

A hearing to receive comments on the proposed regulations will be held at the Interdepartmental Auditorium, Constitution Avenue NW. (between 12th and 14th Streets), Washington, D.C., from 1:30 p.m. to 5:30 p.m. and 7:30 p.m. to 10:30 p.m., on October 24, 1978.

Individuals wishing to comment at the hearing are requested to submit their names, addresses, and telephone numbers to Patti Morris, Environmental Protection Agency (WH-554), 401 M Street SW., Washington, D.C. 20460. Requests should indicate the length of time each individual wishes to comment and any preference to time. Statements will be limited to a maximum of 10 minutes. Individuals who request to comment will be notified in advance of the time scheduled for their statement. Time will be reserved for unscheduled comments. Each individual who plans to comment is requested to submit one legible copy of his or her statement at the hearing. The hearing record will be closed at the end of the hearing; however, as indicated above, written comments on the proposed regulations will be accepted by EPA if they are received no later than [60 days from date of publication]. The agenda for the hearing is as follows: Afternoon session: Introductory presentation—1:30 to 1:50; Question and answer session—1:50 to 2:10; Scheduled presentations—2:10 to 4:45; Unscheduled testimony—4:45 to 5:30; Recess—5:30. Evening session: If there is adequate public interest, an evening session will be scheduled. The afternoon's agenda would be followed.

SUPPLEMENTARY INFORMATION

This proposed regulation governs the water quality management (WQM) program authorized by sections 106, 208, and 303(e) of the Clean Water Act of 1977. Until this consolidation, program requirements were set forth in four places in Title 40: Part 130; Part 131; § 35.200 through § 35.236; and § 35.551 through § 35.570. This revision responds to the President's initiative on consolidation of Federal requirements for State and local planning and the President's urban policy, and does not represent a change in basic program goals or objectives.

There are, however, significant changes in the way EPA will manage this program in the future, and the new regulation reflects those changes. EPA has assessed the need to modify the management of the program through a study required by the Office of Management and Budget entitled "Program Strategy for Water Quality Management, FY 1979-1983". This strategy identified the following areas which the regulation addresses:

(1) The need for a more defined role for the States with more specific delineation of the partnership between the States, areawide agencies, and EPA;

(2) The need for specific outputs to be identified in the grant agreement based on national/State/areawide priorities and for these outputs to be tied to funding;

(3) The need, in order to promote implementation, to establish a policy that beginning fiscal year 1980, no planning funds be awarded to an agency unless at least a significant portion of its plan is being implemented;

(4) The need to ensure greater integration and consolidation of water quality management environmental programs through State/EPA agreements, thereby developing the most cost-effective and environmentally sound decisions; and

(5) The need to focus attention on the difficult decisions that are required, through a greater use by EPA of incentives, sanctions, and technical assistance.

The proposed regulation also makes other adjustments in the structure of the water quality management program. These modifications emphasize continuing planning and implementation, implement applicable provisions of the 1977 Clean Water Act and other new executive orders and directives, and resolve problems with portions of the existing regulations based on the experience of the last several years.

The proposed regulation significantly reduces the number of specific requirements placed on State and local governments by the WQM program. Approximately 150 individual requirements have been eliminated from the existing regulations; numerous others have been simplified or consolidated. This reduction is consistent with EPA's commitment to the President as part of the effort to substantially lessen the burden of requirements on State and substate agencies.

THE STATE/EPA AGREEMENT

The State/EPA agreement required by existing regulations (§130.11 of this chapter) was designed to establish the level of detail and timing of State water quality management plan preparation and assure the orderly integration of planning efforts and control activities. The original emphasis was on initial plan preparation; the proposed regulation now stresses the integrative and coordinative aspects of the Agreement, and implementation.

Beginning with the publication of this regulation, the State/EPA agreement becomes the primary means to integrate the planning, management, implementation, and evaluation of programs under the Clean Water Act, the Resource Conservation and Recovery Act, and the Safe Drinking Water Act. EPA is considering consolidation of State work program submissions for various other environmental programs into the State/EPA agreement. While this subpart governs only that portion of the State/EPA agreement relating to the 106, 208, and 303(e) programs, other programs may be included in a State/EPA agreement but will be governed by the applicable provisions of regulations found elsewhere in this chapter. The responsibilities of affected programs regarding the agreement will be discussed in their regulations and EPA guidance on State/EPA agreements.

Every State/EPA agreement should perform four basic functions: serve as a decision document which reflects important decisions on environmental and programmatic problems at the State and local level and the process by which these problems will be solved; establish State and EPA program priorities, timing of efforts, State and substate responsibilities, and the allocation of funds; be a management tool which focuses top State and EPA decision-maker attention on evaluation and accomplishment of major pollution control objectives; and be a communication and information document useful to EPA, the States, areawide agencies, local governments, and interested or affected publics. These general objectives apply regardless of the specific programs and outputs covered by the Agreement.

One of the keys to a successful agreement is work program development. To provide tangible environmental improvements, work programs must focus on problem solutions rather than individual program activities. The State/EPA agreement will encourage the use of information or results produced in one program by other programs. At a minimum, the agreement will contain the work programs of the various EPA programs that are included (although, to avoid a voluminous package, portions may be incorporated by reference). In developing the agreement, program linkages will be defined and duplication between programs will be minimized, obtaining the greatest benefit from available resources. At the maximum, the agreement will produce a completely integrated and coordinated work program for each State.

Most EPA programs which may be included in the State/EPA agreement have distinct elements which require fiscal accountability. Therefore, all grant agreements will link outputs with statutory funding sources. However, EPA will not allow this requirement to hamper the development of maximum feasible consolidation, so that States and EPA can minimize submissions and other paperwork.

CONTINUING PLANNING AND IMPLEMENTATION

For water quality management under section 208 of the Act, the proposed regulation emphasizes planning and implementation activities that follow development of the initial plans. This change in emphasis occurs because the initial planning phase (generally 3 years) is approaching completion.

To avoid confusion, the old regulations will continue to govern the initial planning phase of existing grantees, except in instances specified in these regulations. WQM planning conducted after the initial phase, including plan update and revision, will be governed by these regulations. This phase of planning is commonly referred to as "continuing planning", and is distinguished from the "continuing planning process" required of States by section 303(e) of the Act, which is also covered by these regulations.

EPA intends to manage the grant funds in all programs covered under this subpart in a manner designed to assure that the grantees are accountable for meeting grant commitments. Eligibility for continuing 208 or 106 funding will depend upon EPA's assessment of the past performance of the applicant agency, be it State or areawide. Success will be determined, in part, based on the adequacy of output achievement, the funds saved by developing more cost-effective solutions, and, in the case of 208, the degree to which an agency can become self-sufficient.

The proposed regulation places new emphasis on use of sanctions during the continuing planning period (including the possibility of withholding construction grant funds after WQM plan approval; see § 35.1531-4(b)).

EPA will use these sanctions to ensure that WQM plans capable of meeting the goals of the Act are developed, approved, and implemented. Continuing planning grant funds may be withheld or terminated if a grantee fails to abide by a grant agreement or meet other planning responsibilities under this subpart. Funding from the various statutory sources covered by these regulations may be withheld for any of a number of failures specified in the regulations. For example, a WQM agency must implement a significant portion of a WQM plan to be eligible for continuing 208 grants beginning in fiscal year 1980.

EPA's funding strategy for the 208 program, if approved by the Office of Management and Budget, does not contemplate Federal 208 grants after fiscal year 1983. Therefore, all State and areawide agencies conducting planning with 208 funds should take steps to become self-supporting by that time.

With the approval of the initial plans, the WQM planning program is entering the implementation phase. EPA intends the planning supported under the Act to be implemented. The regulation emphasizes this phase because it is critical to the achievement of water quality goals. WQM plans must provide assurances that management agencies will implement the plans. Work programs will provide for evaluating the implementation of approved plans.

INCORPORATION OF NEW REQUIREMENTS

Section 208(j) of the Act establishes a cost-sharing program for financing the installation of best management practices to control agricultural nonpoint source pollution. While these proposed regulations outline the role of WQM plans and management agencies in implementing section 208(j), regulations prepared by the Secretary of Agriculture shall set forth the details of the program.

Section 208(b)(2)(A) of the Act requires identification during plan development of open space and recreational opportunities expected to result from implementation of WQM plans. The proposed regulations incorporate this requirement.

Section 208(b)(4) of the Act, added by the amendments, authorizes the development by States of programs for controlling the discharge of dredged and fill material. EPA presently anticipates that a regulation governing the 208(b)(4) program will be incorporated as § 35.1580 of this subpart. However, the 208(b)(4) provisions are still in the drafting stage, and will be published separately as a proposed regulation in the near future.

The definition of best management practices (BMPs) set forth at 40 CFR 130.2 has been broadened in an attempt to make it compatible with several provisions added by the Clean Water Act of 1977 which use the term (see sections 208(b)(4)(B), 304(e), and 404(f)(1)(E)). The process for developing BMPs for WQM nonpoint source programs is not affected by the new definition.

New requirements to deal with wetlands and floodplains imposed under Executive Orders 11988 and 11990 and the Agency's policy on agricultural lands have been included. Although section 511(c)(1) of the Act exempts the WQM programs under sections 106, 208, and 303 from the requirement for preparation of environmental impact statements, it is EPA policy that the spirit and intent of NEPA will continue to be served by the WQM program. EPA has issued guidance concerning compliance with NEPA in the water quality management pro-

V 4 3 / 1 7 7

gram, which is available to reviewers on request. The proposed regulation provides for consideration of water conservation in the development of WQM plans consistent with the President's national water resources policy.

In accordance with the President's urban policy announced on March 27, 1978, and EPA's Urban Initiative, the proposed regulation provides that WQM planning agencies shall assess impacts of the plan on urban development and consider measures for the prevention of urban sprawl. WQM plans must also be consistent with the cost-effectiveness guidelines of the construction grants program, which are also part of EPA's Urban Initiative.

ADDITIONAL CHANGES TO WQM REQUIREMENTS

Requirements for State certification of WQM plans have been changed in the proposed regulation. The existing Agency policy on State certification requires too many commitments and assurances to be workable. Experience has also shown that the existing plan review procedures, providing for EPA review only after open-ended State review and certification is completed, have led to lengthy delays and a lack of communication between EPA and States. To resolve such problems, the proposed regulations narrow the scope and number of commitments and assurances required of the States and provide for a concurrent State-EPA plan review.

The proposed regulation contains a provision which would cut off State 208 funds (and a relevant portion of 106 funds) for failure of the State to act in a timely manner on a WQM plan. An alternative approach would be to consider the inaction of the State to constitute certification. Comments are invited concerning how EPA can deal most effectively with State failure to take prompt action on WQM plans.

The proposed regulation provides procedures for changes in designation of planning and management agencies.

The regulations set forth in this subpart also constitute EPA's implementation, in cooperation with other Federal, State and substate agencies, of the provisions of section 102(a) of the Act concerning comprehensive programs for water pollution control. However, nothing in these regulations shall preclude EPA from undertaking activities under section 102(a) independently of the programs under this subpart, when EPA determines that such programs need supplementation in order to achieve the water quality goals of the Act.

The proposed regulation recognizes the important partnership role played by successful State, regional, and local planning agencies in water quality management planning and implementation. The regulation covers responsibilities of both State and areawide planning agencies. The WQM program relationships between these levels of government in the development of State/EPA Agreements and WQM plans, plan evaluation, and other areas are clarified.

New public participation requirements are included in the proposed regulations at appropriate points. The public participation requirements reflect the recent proposed regulations (40 CFR Part 25, 43 FR 34794) which will replace 40 CFR 105. EPA encourages consolidation of public participation programs at the State and local level to minimize duplication where consistent with public participation goals. The part 25 regulations establish membership and other requirements for the Advisory Committee required under § 35.1533-3 for 208 agencies. Only one official Advisory Committee should be established in accordance with these requirements; however, this should not discourage the formation of technical subcommittees with additional representation at the grantee's discretion to address particular issues.

The proposed regulation includes new detail on the relationship of the NPDES program and WQM. WQM plan provisions to be incorporated in NPDES permits under section 208(e) of the Act must be specifically identified in the plan itself and in any plan approvals. However, because this relationship is technically and institutionally complex, EPA solicits suggestions on enhancing the effectiveness of these programs through this regulation.

Section 35.1519-6 provides that 208 planning agencies must develop BMPs for nonpoint sources. BMPs may also be developed in the WQM process for certain categories of point sources, such as storm sewers. These BMPs can be used in NPDES permits as minimum requirements.

The proposed regulation significantly reduces the specificity for WQM plan content. This was done in part because of EPA's commitment to the President to simplify and consolidate the planning requirements placed on State and local governments, and in part because EPA feels that the grant agreement should be the means for setting out specific requirements and commitments. Several commentors have indicated that a greater level of detail, particularly with regard to plan content, is necessary to help the public and the government in the development of work programs and WQM plans, and to evaluate completed plans (by setting out criteria for plan approval). Other commentors have favored the structure proposed in these regulations, which establishes basic requirements and criteria and allows some regional office flexibility in implementation through the grant agreement. Areas where more detail may be desirable include monitoring, the attainment of water quality goals, and reporting requirements. EPA also encourages reviewers to comment on the desired level of detail.

Reviewers should note that EPA is presently studying implementation of the Federal Grant and Cooperative Agreement Act, and that this regulation, in final form, may use the term "cooperative agreement" rather than "grant". Such a change will have no effect other than a change in nomenclature.

Under EPA's new "sunset" policy for reporting requirements in regulations, the reporting requirements in this regulation will automatically expire 5 years from the date of promulgation unless EPA takes affirmative action to extend them. To accomplish this, a provision automatically terminating the reporting requirements at that time will be included in the text of the final regulations.

EPA is committed to evaluating this regulation three years from the date of publication. This evaluation will assess such factors as overlap of requirements, integration, alternative methods, enforceability, and reporting requirements.

Water quality standards policy now in § 130.17 is not affected by this regulation. The Agency expects that § 130.17 will be incorporated into part 120 of this chapter.

The Agency is developing guidance to complement the regulation. Draft policy on the State/EPA agreement is available for review and comment from the addressee. Availability of other draft guidance for review and comment will be announced in the FEDERAL REGISTER. This regulation and forthcoming guidance retain major elements of existing policy (e.g., policy on regulatory and nonregulatory programs, development and implementation of BMPs, and management agencies). The policy on regulatory and nonregulatory programs is set forth in SAM-31. SAM-31 was developed with public input and the Agency invites further comments on the policy which can be obtained from the addressee as part of the review.

Dated: September 1, 1978.

DOUGLAS M. COSTLE,
Administrator.

PART 35—STATE AND LOCAL ASSISTANCE

(1) 40 CFR is amended by deleting parts 130, 131, § 35.200 through § 35.236, and § 35.551 through § 35.570.

(2) 40 CFR is amended by adding a new subpart G as follows:

Subpart G—Grants for Water Quality Planning, Management and Implementation

Sec.
35.1500 Purpose and scope.
35.1501 Applicability.
35.1502 Definitions.
35.1503 Program summary.
35.1505 Water quality goals.
35.1507 State/EPA agreement for water quality management.
35.1507-1 General.
35.1507-2 Scope.
35.1507-3 Content.
35.1507-4 Role of areawide agencies.
35.1507-5 Grant agreements.
35.1507-6 Relationship to approved WQM plans.
35.1507-7 Development and submission.
35.1507-8 Public participation in development.
35.1507-9 Evaluation.
35.1509 Conflict resolution.
35.1511 WQM work programs of State and areawide agencies.
35.1511-1 General.
35.1511-2 Scope.
35.1511-3 Areawide agency work programs.
35.1511-4 Major work elements.

Appendix A, Water quality and pollutant source monitoring. [See Appendix A, Subpart B of Part 35.]

AUTHORITY: Section 501(a) of the Clean Water Act, as amended, 33 U.S.C. 1251 et seq.

Subpart G—Grants for Water Quality Planning, Management and Implementation

§ 35.1500 Purpose and scope.

This regulation establishes policies, program requirements, and procedures for water quality management planning and implementation under the Clean Water Act and for grants for such purposes under sections 106, 205(g), and 208 of the Act. This subpart supplements the general grant regulations set forth in part 30 of this chapter.

§ 35.1501 Applicability.

This regulation applies to the continuing planning process under 303(e) of this Act, and to all State and areawide water quality management planning and implementation activities and related grants under sections 106, 205(g), and 208 of the Act awarded subsequent to the date of publication of the final regulation in the FEDERAL REGISTER. This regulation does not apply to completion of initial plans under section 208. Completion of initial plans (and satisfaction of requirements pertaining to plans conditionally approved prior to the date of publication) is governed by the earlier regulations superseded by this part, except for plan evaluation, certification, and approval. Water quality standards development, review, and revision are covered under part 120 of this chapter.

§ 35.1502 Definitions.

(a) The term "the Act" means the Clean Water Act, as amended, 33 U.S.C. 1251 et seq.

(b) The term "grants under section 205(g) of the Act", and variations thereof, means grants under section 205(g)(2) of the Act for non-construction grants purposes such as administration of approved programs under sections 402 and 404 and grants for administering the statewide waste treatment management program under section 208(b)(4) of the Act. The term does not include construction management assistance grants under subpart F of this chapter.

(c) Other definitions shall be as set forth in the Act (see, e.g., sections 212 and 502). Further definitions are set forth in the provisions where the defined term is used.

§ 35.1503 Program summary.

(a) *General.* Water quality management (WQM) is the name EPA has given to a complex environmental program under the combined authority of several sections of the Act. The WQM program combines State water pollution programs funded under section 106, State and areawide comprehensive waste treatment management planning funded under sections 205(g) for nonconstruction activities and 208, and other State planning mandated by section 303 of the Act into a single planning and implementation program. Public participation is provided for in all aspects of the program.

(b) *Water quality management planning.* (1) Each State, along with areawide agencies in specially designated areas, conducts water quality management planning. Each such State and substate agency is required to have a plan, which identifies sources of pollution, the severity of the pollution, and control programs. Each plan will be revised periodically as needed. The control measures must be designed to attain the 1983 goal of the Act, which is water suitable for swimming, fishing, and the protection of wildlife, where attainable.

(2) Each State is required to have a continuing planning process, which consists of the procedures by which the State controls water pollution (including WQM planning and implementation). The State's system for prioritizing construction grants projects is included in the continuing planning process.

(c) *Public participation.* EPA considers public participation to be a high priority in the WQM program. Public participation is provided for in all aspects of the program, and is discussed in § 35.1533.

(d) *Annual work programs.* Each year, the State prepares a work program (which is submitted as part of the WQM portion of the State/EPA agreement discussed below) identifying the specific planning and implementation outputs the State will un-

V 43 / 177 SEP 12 78

dertake during the subsequent year with funds from sections 106, 205(g), and 208. Each designated areawide agency also develops an annual work program for planning activities funded under section 208. The priority problems which a State or areawide agency may address will vary, depending on the particular needs of the area.

(e) *Participants.* The WQM program is a cooperative effort of EPA and other Federal agencies, States, regional agencies, local governments, and the public. Each has a role in planning and in implementation. The Governor of each State has designated State agencies to manage the WQM program, and, in most cases, areawide agencies to plan in those areas where particularly complex waster quality problems exist. The State conducts planning in areas outside the designated areawide areas and coordinates activities of areawide agencies.

(f) *Implementation.* Implementation of solutions that States and areawide agencies develop for water quality problems involves many programs and agencies at all levels of government. Management agencies are designated by the Governor to carry out WQM plans. These agencies must have the capability, including resources, to implement the assigned programs. Implementation may involve construction of treatment works, regulatory programs, management program, legislative initiatives, enforcement, or other such activities. Implementation is the most important part of the WQM program, because only with successful implementation will water quality goals be achieved. Not all implementation relates to the 208 plan per se; the State uses funds under section 106 of the Act to manage a wide range of WQM activities, including permit activities under title IV of the Act. Various sanctions are available to EPA to deal with failures in implementation.

(g) *Funding.* State administration and management of the WQM program is supported primarily by grants under sections 106 and 205(g) of the Clean Water Act. WQM planning by State and substate agencies is supported primarily by grants (up to 75 percent of costs) under section 208. Implementation is funded from many sources, among them grants under sections 106, 201, 205, 208(j), and 314 of the Clean Water Act, State funds, local funds, and funds from other Federal agencies.

(h) *State/EPA agreement.* The WQM program is one of several EPA programs which will be included in State/EPA agreements. The agreement is negotiated each year between the Regional Administrator and the Governor. It identifies WQM problems and objectives, describes coordination with other environmental programs, summarizes major work program outputs, and includes a detailed annual work program for WQM.

§ 35.1505 Water quality goals.

The water quality goals are: (a) Those set forth in section 101 of the Act, including protection and propagation of fish, shellfish, and wildlife and provision for recreation in and on the water by 1983 whereever attainable, restoration and maintenance of the chemical, physicial, and biological integrity of the Nation's waters, and prohibition of toxic substances in toxic amounts;

(b) Achievement of water quality standards;

(c) Protection of public health and welfare; and

(d) Reduction of water pollutants from nonpoint sources to the maximum extent feasible.

§ 35.1507 State/EPA agreement for water quality management.

§ 35.1507-1 General.

(a) The State/EPA agreement integrates planning, management, and implementation of all EPA programs which the State and the Regional Administrator elect to include. In addition, the agreement reflects appropriate coordination with other Federal, State, regional, and local planning programs affecting or affected by the activities under this subpart. Starting in fiscal year 1980, the Regional Administrator shall not award assistance under this supart unless he or she has determined that the State has coodinated, and integrated to the maximum extent feasible, all work program elements of the WQM program with other EPA programs included under the State/EPA agreement.

(b) The Regional Administrator and the Governor will negotiate the WQM portion of State/EPA agreement on State and EPA responsibilities and funding. The agreement shall (1) ensure that water pollution is controlled in a cost effective manner; (2) coordinate programs, simplify paperwork, and improve program accountability; and (3) serve as the management tool for the WQM programs and as a public information document by identifying activities to be funded and describing the relationship between WQM activities and other environmental programs of the Agency. The agreement is negotiated annually, but may cover commitments to be performed over a longer period.

NOTE.—The State/EPA agreement is not the same as any memoranda of agreement negotiated between a State and EPA governing the operational aspects of other programs such as the permit programs approved under sections 402 and 404 of the Act and implementing regulations (see 40 CFR 123.5), and construction grant delegation agreements under section 205(g) of the Act and implementing regulations (see 40 CFR Part 35, subpart F). However, the State and the Regional Administrator may agree to include such agreements under the State/EPA agreement for ease of coordination, if the particular requirements applicable to those agreements are complied with.

§ 35.1507-2 Scope.

The WQM portion of the State/EPA agreement must cover the WQM program funded under sections 106, 208, and 205(g), and the State's responsibilities under section 303 (e) of the Act.

§ 35.1507-3 Content.

The WQM portion of the State/EPA agreement consists of the following:

(a) A statement of water quality management problems and objectives, based on the State's problem assessment and strategy developed under § 35.1515.

(b) A description of coordination among water quality management programs and other environmental programs to avoid inconsistent, duplicative, or environmentally unsound activities. (For example, coordination with programs to control solid and hazardous waste; in particular, residuals planning and management responsibilities in relation to the requirements of section 4006 of the Resource Conservation and Recovery Act (RCRA).)

(c) A summary of major work program outputs, associated funding (and sources), and agency responsibilities for completing the outputs.

(d) A work program under § 35.1511.

§ 35.1507-4 Role of areawide agencies.

For areawide agencies, the WQM portion of the State/EPA agreement sets a policy framework based on the State strategy, and should include priorities for areawide action and timing of major outputs. Because of the importance of their role, designated areawide planning agencies shall be continually involved in development of all relevant aspects of the agreement. Failure to involve the areawide agencies shall be a basis for disapproval of the WQM portion of the State/EPA agreement. Comments of the areawide agencies (if any), the State's responses, and a brief summary of the participation of areawide planning agencies in development shall be forwarded to EPA with the draft agreement. Nothing shall preclude the right of the designated areawide agency to submit comments directly to EPA.

§ 35.1507-5 Grant agreements.

To avoid duplication, the WQM portion of the State/EPA agreement should constitute the narrative portion of the application for grant funds. In the event of funding delay, the State/EPA agreement may be negotiated prior to grant award. No grant under this subpart shall be awarded unless the Regional Administrator and the Governor (or other State representative) have signed the WQM portion of the State/EPA agreement in accordance with § 35.1507-7(b). The Regional Administrator may award a grant to one agency, a grant which directs funds to more than one agency, or separate grants to the various agencies which will be performing under the agreement.

§ 35.1507-6 Relationship to approved WQM plans.

The Regional Administrator shall not enter into the WQM portion of a State/EPA agreement unless the Regional Administrator determines that it is compatible with the approved State WQM plan (which includes approved elements of areawide plans).

§ 35.1507-7 Development and submission.

(a) The State and the Regional Administrator shall develop a draft of the WQM portion of the State/EPA agreement on an agree-upon schedule. A draft agreement shall be submitted to the Regional Administrator not later than June 1 of each year. The Regional Administrator shall review the draft for compliance with the requirements of this subpart and provide comments to the State within 30 days of receipt.

(b) The final WQM portion of the State/EPA agreement shall be submitted to the Regional Administrator not later than September 1 of each year. The agreement shall be effective upon signature by the Regional Administrator and the Governor or, if the Regional Administrator and the Governor agree that it is appropriate, by one or more heads of State executive agencies.

§ 35.1507-8 Public participation in development.

Early in the process under § 35.1507-7(a), the State shall notify the public about the goals and scope of the agreement (including the work program) and shall schedule opportunities for consultation with the public. The State shall consult with the advisory committee established under § 35.1533-3. Prior to submission of the draft agreement to EPA, the State shall distribute to the public a fact sheet which explains in layman's terms the contents of the proposed agreement and hold a public hearing in accordance with part 25 of this chapter. A summary of significant public comments from the hearing and other sources (including the advisory committee) and the State's responses shall be forwarded to EPA with the draft agreement.

§ 35.1507-9 Evaluation.

Annual evaluation of implementation of the State/EPA agreement shall be conducted with the evaluation of the work program under § 35.1511-7, or on any other basis established in the State/EPA agreement.

§ 35.1509 Conflict resolution.

The State shall develop procedures for resolving conflicts among the State, designated areawide agencies, local governments, and potential and designated management agencies, in accordance with EPA guidance. A written statement of such procedures shall be submitted to the Regional Administrator for approval as an output of the fiscal year 1979 work program. Once approved, it need not be resubmitted, unless amended substantially. Nothing shall preclude the right of any agency to request EPA comment and review, after exhausting available procedures at the State level. All agencies and members of the public have the right to submit comments to EPA.

§ 35.1511 WQM work programs of State and areawide agencies.

§ 35.1511-1 General.

(a) The annual work program of States and areawide agencies provides the basis for tying available Federal and non-Federal funds to the requirements of this subpart, in order to achieve the water quality goals of the Act. It translates the requirements of this subpart and the EPA annual guidance into specific output commitments, including WQM planning.

Most State control program expenses (including expenses of staffing to meet 208 implementation responsibilities) will be funded under section 106 of the Act. State funding under section 208 of the Act is available primarily for planning in nondesignated areas. Thus, the major portion of the WQM program (including permits administration, monitoring, enforcement, and administration of nonpoint source programs) at the State level is a 106-related effort.

(c) The State's work program shall be based on the continuing planning process, the water quality problem assessment, and the State strategy, and shall indicate how the problems dentified in the strategy and assessment will be handled and how the WQM requirements will be met. Although the work program is an annual submission, the Regional Administrator may allow outputs to be addressed on a multiyear basis as long as the Regional Administrator determines that EPA oversight and evaluation capability remains unaltered. Areawide planning agency work programs are developed separately in accordance with §§ 35.1511-3 and 4. The Regional Administrator shall review work programs of both States and areawide agencies to assure that redundant outputs are not included.

§ 35.1511-2 Scope.

The State and areawide work programs shall identify outputs and associated funding within the appropriate work elements of § 35.1511-4. Specific consolidation efforts should be made concerning planning agencies' use of common data bases, simplified and coordinated reporting, and other elimination of conflict and redundancy among programs. Work programs shall meet the requirements of § 35.1529 concerning intergovernmental cooperation.

§ 35.1511-3 Areawide agency work programs.

The WQM portion of the State/EPA agreement sets the policy framework, based on the State strategy, for areawide work programs. The WQM portion of the State/EPA agreement should include priorities for areawide action and timing of major outputs. Areawide planning agencies which the Regional Administrator determines should receive 208 funding must submit a draft and final work program in accordance with the requirements of § 35.1511 concurrently to the State for review and to EPA for approval. Draft and final areawide work programs shall be submitted on the same schedule as the State submissions (see § 35.1507-7). The State shall have 30 days to review and comment on the adequacy of the areawide work program and its compatibility with the WQM portion of the State/EPA agreement and the State WQM plan, and shall submit its comments, if any, to both the areawide agency and EPA. Areawide agency work programs must also meet the public participation requirements of § 35.1507-8, including consultation with the areawide agency's advisory committee.

§ 35.1511-4 Major work elements.

(a) *General.* EPA will provide annual guidance (see § 35.404 of this chapter) identifying specific outputs under the major program elements listed below. Each work program shall be free from redundant or inconsistent outputs; common outputs (i.e., funded from more than one program) may be developed (§ 35.1537-7). An important output of the State is the annual project priority list for construction grants (both the fundable and extended portions), developed and approved in accordance with § 35.915.

(b) *Areawide agencies.* Areawide agencies shall receive grants directly from EPA. Grants to areawide agencies under this subpart are only for water quality management planning

under section 208 of the Act. In addition, such agencies may receive funds from the State, under interagency agreement, to perform specific activities on behalf of the State under sections 106, 205(g), 208, and 314 of the Act; however, such activities remain the responsibility of the State and are not outputs for which the areawide agency is directly accountable to EPA. Areawide agencies similarly may receive funds from other substate agencies; for example, to perform facilities planning activities.

(c) *State agencies.* With approval of the Regional Administrator after negotiation with the State, the State may receive funding for the following elements (potential funding sources shown in brackets):

(1) Construction grants management, including development of the project priority list (to the extent not funded under subpart F), and planning for and management of pretreatment programs [106, 205(g), 208].

(2) Administration of permits programs, including programs under sections 402 and 404 of the Act [106, 205(g)].

(3) WQM planning and certification [primarily 208; 106 where the Regional Administrator determines appropriate; 205(g) for development of the 208(b)(4) program].

(4) Water quality standards development, review, and revision [106, 208].

(5) Nonpoint source management activities [106].

(6) Monitoring and assessment [106,208].

(7) Enforcement (including compliance assurance and litigation support activities) [106].

(8) Training and facilities operation and maintenance [106].

(9) Emergency response programs [106].

(10) Evaluation [106, 208].

(11) Administration of regulatory and other water quality control programs [106].

(12) Planning for and coordination with section 208(j) programs [106, 208].

(13) Administration [106, 205(g), 208].

(14) Public participation in accordance with § 35.1533 [106, 205(g), 208].

§ 35.1511-5 Content.

The draft final work program submitted by an areawide agency or by the State shall contain the following:

(a) A summary and evaluation of the current year's program, including outputs produced and those not completed, and a summary of public participation.

(b) Identification of the outputs to be produced under each program element in § 35.1511-4, and, for each output, the person-years to be used; the costs; the funding source(s); milestones for completion of the output; a disbursement schedule; and the agency(ies) responsible.

§ 35.1511-6 EPA review and approval of work programs.

(a) The areawide agency work program, and the State work program submitted as a part of the State/EPA agreement, shall be forwarded to the Regional Administrator in accordance with the schedule in § 35.1507-7. Grants shall be awarded only upon approval of the work program. The Regional Administrator may award a grant under this subpart with special conditions if the work program requires minor changes. In such an event, the Regional Administrator shall provide the agency with a statement of deficiencies in the work program and revisions which must be made to obtain approval. The grant award shall include this statement and a schedule for making the corrections. Noncompliance may result in a reduction of grant amount or termination.

(b) The Regional Administrator shall not approve a designated areawide agency's work program if, based on the Regional Administrator's review and advice from the State, the Regional Administrator determines that the work program is incompatible with the State strategy and EPA guidance.

(c) The Regional Administrator shall review the work program of each State and areawide agency to determine if it meets these requirements, and to determine:

(1) The consistency of the work program and expected products with this subpart and EPA guidanee, including any EPA guidance designed to coordinate activities under this subpart with activities under other EPA programs.

(2) The feasibility of achieving expected results in relation to the nature of problems, authority, organization, past performance of the agency(ies) involved, and their available resources.

(d) The Regional Administrator shall not approve a work program for any agency which has had its WQM plan or an element thereof approved with conditions unless he or she determines that the agency is moving as rapidly as possible to fulfill the conditions.

§ 35.1511-7 Evaluation

It is EPA policy to limit EPA evaluation to that which is necessary for responsible management of the national effort to control pollution. Each Regional Administrator shall hold meetings to review and evaluate State and areawide programs as follows:

(a) *Mid-year evaluation.* The Regional Administrator shall conduct a joint, on-site, mid-year evaluation meeting with each State and designated areawide agency, and hold a public meeting, to review and evaluate the program accomplishments of the current budget period under the work program and to discuss the work projected for the coming year.

(b) *Other reviews.* The Regional Administrator may conduct an end-of-year evaluation meeting with appropriate State and other officials to review the accomplishments of the program year, and such other reviews as are deemed appropriate.

(c) *Reports.* The Regional Administrator shall prepare a written report of each evaluation, forward a copy to the grantee (and the State, where the grantee is an areawide agency), and notify the public of the report's availability.

§ 35.1513 Continuing planning process.

§ 35.1513-1 General.

Each State shall have an approved continuing planning process (CPP) for both point and nonpoint sources as required by section 303(e) of the Act and EPA guidance. The CPP shall respond to the objectives and requirements of all relevant provisions of the Act, and shall cover both planning and implementation reponsibilities. The CPP shall be described in a document submitted by the State to, and approved by, the Regional Administrator. It consists of the operating policies, procedures, and practices that comprise the water quality management program of the State; describes program working relationships; and sets forth the procedures that will govern the development of the WQM portion of the State/EPA agreement. Revisions to the approved CPP description shall be developed as outputs of the State's work program.

§ 35.1513-2 State priority system.

The CPP includes the State priority system for construction grants, developed in accordance with § 35.915 of this chapter. The State priority system describes the methodology used to rate and rank municipal wastewater treatment projects eligible for grant assistance under subpart E. It also sets forth the administrative, management, and public participation procedures required to develop and revise the State project priority list under § 35.915(c). Under § 35.1531-4(b)(2), areawide priorities are developed consistent with the State priority system.

§ 35.1513-3 Failure.

The CPP is the process under which State WQM planning is conducted. Therefore, a substantial failure of State WQM planning and implementation may indicate a deficiency in the CPP for which the Regional Administrator may withdraw approval of the CPP. Under section 303(e) of the Act, State failure to maintain an approved CPP constitutes grounds for withdrawal of National Pollutant Discharge Elimination System (NPDES) program approval. Further, if the Regional Administrator determines that the CPP, as implemented and revised, does not meet the requirements of the Act and this part, he may withhold grant funds available to the State under sections 106, 205(g), 208, and 314 of the Act. Disapproval of a portion of the CPP need not require disapproval of the whole CPP; for example, the priority system under § 35.1513-2 may be determined approvable by the Regional Administrator in spite of a failure of other portions of the CPP.

§ 35.1515 State assessment and strategy.

§ 35.1515-1 State water quality assessment.

(a) *General.* The State must conduct a water quality assessment based on water quality goals (§ 35.1505). The assessment shall identify water quality and source control problems for programs funded under sections 106, 205(g), and 208 of the Act, and shall link planning and implementation by determining the effectiveness of control programs (e.g., BMPs and NPDES permits) in achieving water quality goals and by indicating where additional controls are necessary to achieve those goals. Future assessment activities shall build on existing data. The Regional Administrator shall not approve funding for further assessment activities unless it is determined that the work will not duplicate past efforts. Except where otherwise determined by the Regional Administrator, State assessment activities shall be funded only under section 106 of the Act. Updates of the assessment will be developed as WQM outputs of the work program. Assessment data should be available to the State by the first of each calendar year for use in developing the State strategy and the WQM portion of the State/EPA agreement.

(b) *Content.* The problem assessment must include:

(1) The water quality descriptions and constituent analyses of point and nonpoint source problems and control needs in accordance with section 305(b) of the Act and EPA guidance for surface and ground waters. The assessment must be based on land use, demographic, and economic data and projections for 20 years in 5-year increments. (Data must be consistent with the EPA cost-effective guidelines under subpart E, appendix A.) For all areas (including rural areas), the relationship between the severity and geographic extent of water quality problems and other environmental problems, such as air quality or solid waste disposal problems, must be considered. The location and nature of the problems, and if possible, point and nonpoint source loads, must be identified.

(2) An analysis of the individual and cumulative impact on receiving waters of activities causing nonpoint source pollution.

(3) The classification of stream segments in accordance with section 303(d)(1)(A) of the Act and EPA guidance, consistent with the needs assessment prepared under section 516(b) of the Act.

(4) An evaluation of the effectiveness of existing point and nonpoint source control programs in achieving water quality goals.

(5) Other assessments required by programs not funded by sections 106 and 208 which are considered appropriate for developing the WQM work program and WQM plans; for example, relevant data from the inventory of land disposal under section 4005 of RCRA; the identification and classification of publicly owned fresh water lakes required under section 314 of the act; and estuarine reports required by section 104(n) of the Act.

(c) *Role of areawide agencies.* With the approval of the Regional Administrator, designated areawide agencies may also conduct problem assessment for their planning areas as necessary to meet areawide WQM responsibilities. State problem assessment activities under sections 106 and 208 may be delegated under interagency agreement to areawide agencies.

§ 35.1515-2 State strategy.

(a) *General.* The State shall prepare and annually update a 5-year strategy for controlling water pollution problems from point and nonpoint sources. It shall address the problems identified in the assessment developed under § 35.1515-1. It shall be consistent with the management agency performance evaluations developed under § 35.1523 and with approved and certified State and areawide WQM plans, although the strategy may be used to recommend revisions in approved plans. The strategy shall include:

(1) Goals for WQM over a 5-year period.

(2) Priorities for controlling the problems identified in the problem assessment, and in the management agency performance evaluation, including;

(i) The construction grant project priority list, and

(ii) Priority rankings for total maximum daily loads and wasteload allocations development under § 35.1519-6(a).

(3) A summary of anticipated planning and implementation activities for priorities identified in (a)(2) of this section.

(4) An identification of governmental entities responsible for conducting the activities identified in (a)(3) of this section.

(5) A summary of anticipated Federal and non-Federal funds for the 5-year period for the activities and entities identified in (a)(3) and (4) of this section, for use by EPA in determining resource needs and allocations.

(b) *Role of areawide agencies.* Since the State strategy is used in the Regional Administrator's review and approval of the areawide agency's work program (see § 35.1511-3), the State shall involve each affected areawide agency in development of the strategy, and shall consider priorities suggested by the areawide agency. The State shall forward a summary of areawide participation and State response to comments received from areawide agencies to EPA with the strategy.

(c) *Public participation.* (1) Early in the process of strategy development, the State shall notify the public about the goals and scope of the strategy and shall schedule opportunities for public participation. The State shall consult, in accordance with part 25 of this chapter, with the State advisory committee established under § 35.1533-3. The State shall distribute a fact sheet which explains in layman's terms the contents of the proposed strategy and hold a public meeting in accordance with part 25. The meeting may be consolidated with other meetings or hearings. A summary of significant public comments from the meeting and other sources and the State's responses shall be forwarded to EPA with the strategy.

(2) Public participation requirements for priority list development shall be as set forth in § 35.915 of this chapter. To avoid duplication, public participation activities for list development should be combined with other such activities under this section wherever practicable.

(d) *Submission.* Each year, the strategy shall be submitted by April 1 to the Regional Administrator for review and comment to provide guidance in work program development and assistance in negotiating the State/EPA agreement. With approval of the Regional Administrator, the priority list developed under § 35.915 of this chapter may be submitted separately.

§ 35.1517 Selection of 208 planning agencies.

§ 35.1517-1 Status of existing planning agency designation.

A designated State, interstate, or areawide planning agency shall retain

its designated status unless changed in accordance with this section. While planning grants funds will be awarded only to designated agencies, designation does not automatically entitle any agency to grant funds. An agency must meet all requirements of this subpart to become or continue to be eligible for funding.

§ 35.1517-2 Changes in designation status.

(a) *General.* (1) As of the date of publicaiton of the final regulations, virtually all areas of the United States are covered by 208 planning by existing State or designated areawide agencies. Generally, therefore, it is not necessary for Governors to designate new areawide planning agencies, since a change in planning responsibility usually can be accomplished through a change in designation. With EPA approval, the Governor may:

(i) Designate a new State planning agency to replace the existing State planning agency;

(ii) Designate a new areawide planning agency for an area previously administered by the State (note § 35.1517-2(a)(3));

(iii) Designate a replacement areawide planning agency for an existing designated agency in a planning area;

(iv) Remove the designation from an existing area and agency, thereby replacing it with the State planning agency;

(v) Alter the boundaries of existing planning areas.

(2) All actions under (a)(1) of this section require the approval of the Regional Administrator, and such changes will be approved only if he or she determines that there is a compelling need for the change and that the procedures set forth below have been followed. Generally, designation changes should not be made where delegation of specific responsibilities through interagency agreement may accomplish the desired objective. Preference should be given to replacement agencies and delegees which have planning responsibilities in other Federal, State, regional, and local environmental and land use planning programs.

(3) Designation of new areawide planning agencies for areas previously administered by the State shall be subject to the procedural requirements of this section and any additional procedures the Regional Administrator considers appropriate to meet the intent of section 208(a)(2) of the Act.

(b) *Procedures.* (1) The Governor shall propose any change in area or agency designation in a written statement, which shall contain the reasons for the proposed change, the impact on applicable time schedules and achievement of program requirements, and the identification of a proposed replacement agency or change in planning area boundaries. This statement shall be sent to the Regional Administrator, to the head of the agency to be replaced, and to the chief elected officials of general purpose governments in the affected area. The statement shall also be available for public review in the affected area.

(2) Except where the proposed change is contained in a certified and approved WQM plan, following distribution of the statement, and not less than 30 days prior to the effective date of the proposed change, the State shall hold a public meeting in the affected area. Advance notice of the meeting shall be given in accordance with part 25 of this chapter. Before the change is approved, the State shall submit a summary of significant public comments received at the meeting and elsewhere, and the State's responses, to the Regional Administrator.

(3) If there is significant public controversy concerning the proposed action, the Regional Administrator should conduct a public meeting in the area.

(4) The Regional Administrator shall approve the designation change if he determines that the proposed change is consistent with (a)(2) of this section and that the proposed replacement agency has the authority, capability (including resources) and willingness to undertake its responsibilites.

(c) *Grant Funds.* Generally, as soon as the Regional administrator determines that an agency may lose its designation, and if unexpended grant funds remain, the Regional Administrator should issue a stop work order under § 30.915 of this chapter. A stop-work order is not needed where the agency to be replaced is allowed by the Regional Administrator to complete its assigned tasks. Upon designation change, the Regional Administrator shall either tranfer the grant under § 30.900-3 of this chapter to the replacement agency, or terminate the grant under § 30.920 of this chapter and provide part or all the funds released to the replacement agency. The final decision of the Regional Administrator may be appealed in accordance with § 30.920-5.

§ 35.1517-3 Delegation of planning activities.

Designated State and areawide agencies may delegate (through interagency agreements) planning activities, but not ultimate responsibilities for planning, to other State, Federal, regional, local, and interstate agencies for the conduct of work under this subpart. Delegation shall take place through a written agreement executed by the two agencies, subject to the approval of the Regional Administrator, specifying outputs and time schedules. If a State or areawide agency intends to delegate any major planning activities under this paragraph then:

(a) Locally elected officials of governments having jurisdiction in the affected area shall be consulted prior to execution of the agreement, and

(b) The draft of the delegation agreement should be distributed widely, with a public meeting held thereafter at least 30 days prior to the execution of the agreement.

§ 35.1519 Water quality management planning.

§ 35.1519-1 General.

WQM plans shall be prepared as outputs of the work program by States under sections 208 and 303(e) of the Act and by areawide agencies under section 208 of the Act. The term "WQM plan" as used in the context of this regulation refers to the initial plan and subsequent revisions and additions prepared in accordance with section 208(b) of the Act. After a WQM plan is adopted by the areawide agency, certified by the Governor, and approved by EPA under § 35.1521, it shall be considered a part of the State's WQM plan. Water quality management decisions are controlled by the applicable provisions of the approved State and areawide plans.

§ 35.1519-2 Applicable regulations.

(a) Except as otherwise provided in this subpart, initial planning begun as of the date of publication of final regulations is governed by the requirements formerly published as 40 CFR Parts 130 and 131, and § 35.200 through § 35.236, which shall remain applicable in uncodified form to the development of initial WQM plans and, to the extent practicable, completion of work needed to fulfill conditional approvals prior to the date of publication of final regulations.

(b) All WQM planning subsequent to development of initial plans shall be in accordance with the requirements of this part.

§ 35.1519-3 Relationship to work programs.

All planning activities of State and areawide planning agencies under this subpart are controlled under work programs under § 35.1511. While funding generally will be available on an annual basis, the approved work program may include planning products which will be developed on a multi-year basis. Multi-year outputs generally shall be evaluated on an interim basis under § 35.1511.

§ 35.1519-4 Annual planning outputs.

To be eligible for grant funds for planning, each State and areawide agency shall submit, as part of its work program, specific proposed outputs under §§ 35.1519-5 and 35.1519-6. WQM planning eventually address all program area (see § 35.1519-6), although annual work programs will only deal with current priorities. Within the context of the WQM portion of the State/EPA agreement, the Regional Administrator shall negotiate with each State and areawide agency to determine activities which will have priority for funding in each year, in accordance with annual EPA guidance. The Regional Administrator shall not approve funding for any output unless he determines that it is consistent with section 208(b) of the Act and attainment of water quality goals.

§ 35.1519-5 Plan development requirements.

WQM plans shall be developed to address point and nonpoint program areas discussed in § 35.1519-6 in accordance with the following requirements:

(a) *Control needs.* The plan shall evaluate alternative control strategies and select point and nonpoint source control programs (in accordance with sections 208(b)(2)) for areas under § 35.1519-6. A schedule for implementing control programs shall be included. The specific conditions (including effluent limitations for water quality standards and BMP's) to be included in NPDES permits or categories of permits under section 208(e) of the Act shall be clearly identified in the proposed and final plan. The State is responsible for providing appeal procedures for these conditions. EPA permit appeal procedures are not available for such conditions. The plan must set forth an explanation of how these procedures have been or will be implemented.

(b) *Regulatory and other programs.* For control programs identified in § 35.1519-5(a), the plan must identify regulatory or other programs under which the control programs will be administered. Existing regulatory programs should be used where effective. Any necessary modifications to existing programs shall be described. Regulatory programs shall have adequate capability including: enabling legislation, ordinances, and other legislative requirements; financing, staffing, and other administrative arrangements; and inspection, enforcement, and surveillance authority. Nonregulatory programs shall have adequate administrative arrangements, financing, public education programs, and surveillance capability.

(c) *Management agencies.* (1) The plan shall propose management agencies for implementing the programs selected. Agencies identified shall have adequate authority and capability to fulfill responsibilities assigned under the plan and shall submit a brief written commitment to fulfill those responsibilities.

(2) No later than submission of the WQM plan under § 35.1519-2(b), the planning agency and each major management agency (those which have primary responsibility for controlling a source) shall forward to the Governor and the Regional Administrator a letter of commitment which will formalize the management agency's acceptance of responsibilities assigned to the management agency by the plan. The letter shall indicate the legal authority, the administrative and financial capability that the agency has or is seeking in order to carry out its assigned responsibilities, a time schedule, reporting procedures, assurance of coordination with the planning agency, public participation procedures, and implementation actions under way or completed.

(3) Proposed management agencies which are to receive construction grant funding shall meet the requirements of section 208(c)(2) of the Act and § 35.900 through § 35.965 of this chapter before they may be designated.

(4) A management agency shall not be designated to carry out regulatory responsibilities if the Regional Administrator determines that (i) a majority of membership of the agency consists of members or representatives of the regulated class, or (ii) the proposed agency is otherwise substantially under the control of members or representatives of the regulated class.

(d) *Environmental, social, and economic impacts and recreational opportunities.* The plan shall assess environmental, social, and economic impacts of implementing plan provisions. This assessment shall include an analysis of primary and, to the extent feasible, secondary impacts of alternative WQM programs and actions. The planning process and plan content shall be consistent with the intent of NEPA, the Executive Order on Flood Plain Management (11988), the Executive Order on Wetlands Protection (11990), published Agency policy on floodplain management and agricultural lands, and other applicable environmental requirements cited in part 30 of this chapter. Plans shall conform with applicable air quality State implementation plans. An analysis shall be made of open space and recreational opportunities shall be identified in the plan.

(e) *Urban impacts.* The plan shall assess the impact on urban development and contain measures for mitigation of adverse impacts to assure consistency with the President's urban policy and the EPA urban initiative to minimize urban sprawl, as implemented in subpart E, appendix A.

(f) *Public participation.* The planning process shall be conducted in accordance with § 35.1533. In addition, the WQM planning agency shall involve potentially affected agencies including general purpose units of local governments, proposed and designated management agencies, and other affected State and Federal agencies (e.g., air, solid waste, drinking water, and fish and game offices) in planning activities in the same manner as the general public.

(g) *Coordination with other programs.* Water quality program activities shall be coordinated during plan development with any other programs related to WQM, as discussed in § 35.1529. Efforts should be made to achieve common planning agencies and areas, data bases, advisory bodies, and public participation programs; to simplify and coordinate reporting requirements; and to develop programs which are consistent with other programs related to WQM.

(h) *Plan evaluation and revision.* The plan shall contain procedures for evaluating the effectiveness of plan implementation (e.g., application of BMP's) in achieving water quality goals. Provisions shall be made for revising WQM plans in an iterative manner as necessary to achieve those goals. The assessment developed under § 35.1515-1 will be a principal means of conducting the evaluation.

§ 35.1519-6 Program areas.

The following point and nonpoint program areas shall be addressed through the plan development process described in § 35.1519-5. The specific responsibilities of State and areawide WQM agencies are indicated below.

(a) *Total maximum daily loads, wasteload allocations.* States shall develop total maximum daily loads and wasteload allocations consistent with the priorities established under § 35.1515-2(a)(2). Areawide agencies shall perform this activity only where delegated under interagency agreement between the State and areawide agency. Wasteload allocations to be incorporated into NPDES permits under section 208(e) must be specifically identified (see § 35.1519-5(a)).

(b) *Dredged or fill programs.* The State may develop programs for the control of the discharge of dredged or fill material under section 208(b)(4)(B) of the Act in accordance with § 35.1580.

(c) *Nonpoint source control.* (1) Feasible best management practices (BMP's) for nonpoint surface water (and ground water) quality and source

V 43 / 177 SE 12 78

control problems shall be developed under section 208 (f) through (k) of the Act to achieve water quality goals (see § 35.1505). For nonpoint source control purposes, BMP's are those methods, measures, or practices to prevent or reduce water pollution and include but are not limited to structural and nonstructural controls, and operation and maintenance procedures. BMP's can be applied before, during, and after pollution-producing activities to reduce or eliminate the introduction of pollutants into receiving waters. Economic, institutional, and technical factors shall be considered in determining feasibility. BMP's shall be developed in a continuing process of identifying control needs (see § 35.1519-5(a)) and evaluating and modifying the BMP's as necessary to achieve the goals.

(2) Nonpoint source regulatory programs shall be identified for implementation of BMP's where regulation is necessary to ensure BMP implementation. Nonregulatory programs are acceptable only where such programs will result in achievement of water quality goals. Nonregulatory programs may supplement regulatory programs.

(3) Under section 208(b)(4)(A) of the Act, States may assume responsibility for identifying nonpoint source control needs and developing control programs in designated areas.

(d) *Municipal and industrial waste treatment systems.* (1) Wastewater treatment facilities needs for 20 years shall be determined after assessing alternative waste disposal facility needs. Operation and maintenance needs shall be identified. NPDES permit requirements (including pretreatment standards), results of prior step 1 facility planning, regulatory programs that control the location, modification, and construction of facilities for municipal and industrial wastewater treatment, water conservation needs, and pretreatment programs for industrial wastewater shall be considered. Under § 35.1531-4(b)(2), facilities needs lists shall be developed consistent with the State priority system. The Regional Administrator shall assure that work of the areawide agency in this area in consistent with the priority list development needs and activities of the State under § 35.915.

(2) Under § 35.915(b), the State is required to maintain a listing of all needed treatment works. This State needs inventory, prepared under section 516(b) of the Act, should be used to satisfy the wastewater treatment facilities needs requirement under paragraph (d)(1) of this section.

(3) All wastewater treatment facility needs in approved areawide WQM plans shall be included in the State needs inventory, except where the State or Regional Administrator determine that a project would be ineligible for a construction grant. Areawide agencies shall use procedures and criteria established by the State and EPA under section 516(b) of the Act when updating facility needs assessments.

(e) *Urban stormwater.* Requirements for improving stormwater systems must be identified. BMPs must be established in the same manner as described in (c) of this section. Regulatory programs must be established to control the location, modification, and construction of facilities for municipal stormwater management. Fiscal analysis of the necessary capital and operations and maintenance expenditures must be included.

(f) *Residual waste control, land disposal.* Control needs for waste disposal to protect water quality and ground water supplies shall be identified. Relationships of residual waste disposal needs to wastewater treatment facility needs (e.g., toxic solid waste disposal, land treatment) shall be described. Activities under WQM planning and the Resource Conservation and Recovery Act shall be coordinated. Regulatory programs to control the location, modification, and construction of facilities for residual waste disposal and other program needs shall be established to achieve water quality goals. States may assume responsibilities from areawide agencies under this paragraph in accordance with section 208(b)(4)(A) of the Act.

NOTE.—Control needs for waste disposal to protect surface and ground water from land disposal of solid waste and from hazardous waste are identified in programs under subtitles C and D of the Resource Conservation and Recovery Act (RCRA). To avoid redundancy and inconsistency, the Regional Administrator and the State shall establish (through the State/EPA Agreement) the planning and funding responsibilities attributable to the RCRA and WQM programs. The division of responsibilites shall be in accordance with annual EPA guidance.

(g) *Water quality standards.* State water quality standards shall be reviewed and appropriate recommendations made on revising such standards to meet water quality goals. The State shall consider the recommendations in the review and revision of standards.

§ 35.1519-7 Planning responsibilities.

(a) *Governor.* The Governor shall:

(1) Assure that adequate WQM planning consistent with this part is conducted throughout the State to control point and nonpoint pollution to meet water quality goals.

(2) Take action necessary to correct a failure in planning of a State or areawide agency by promptly designating a replacement State or local agency or otherwise assuring production of required planning products.

(3) Promptly take action on plans in accordance with § 35.1521-3.

(b) *State.* The State planning agency, and any other appropriate State agency designated by the Governor, shall:

(1) Review and comment on proposed areawide annual work programs in accordance with § 35.1511-3.

(2) Continually review development of areawide plans including revisions and additions.

(3) To the maximum extent feasible, act as a resource for areawide planning agencies, provide them with technical assistance and information on BMP's and pollution control technologies.

(4) Perform planning for nondesignated areas under section 208 of the Act and planning for which the State is responsible in designated areas. The State is responsible for timely completion of its initial planning responsibilities and those identified in its approved work program.

(5) If designated by the Governor, promptly assure completion of necessary additional planning in the event of failure of a designated areawide agency. In such an event, the former work program shall be examined and modified as determined by agreement between the sucessor agency and the Regional Administrator, consistent with the objectives of the Act.

(c) *Areawide agencies.* The are wide agency shall prepare and submit an areawide WQM plan, including revisions and additions, and shall carry out all responsibilities assigned to it under any grant agreement, its approved work program, and any agreement with the State, consistent with this part.

(d) *Local involvement.* State and areawide WQM planning agencies must assure that affected local governments are invloved in WQM plan development. Therefore, no grant will be awarded under this subpart to a State or areawide planning agency unless the Regional Administrator is satisfied that adequate provisions have been made for such local involvement (including the participation of local elected officials).

(e) *Failure.* Failure to meet any of the requirements of this section may result in withholding of all or part of grant funds available under sections 106, the nonconstruction related portion of 205(g), 208, or 314 of the Act and disapproval of the CPP under § 35.1511-2. 201 funds may be withheld in the circumstances described in § 35.1531-4(b).

§ 35.1519-8 Planning on Indian lands.

To the maximum extent feasible, States and areawide agencies shall coordinate with Indian tribal organizations within and adjacent to their

planning areas in the development of WQM plans. Where this is not feasible, the Regional Administrator shall work with the State and Indian tribe to ensure development of WQM planning on Indian lands. The WQM planning area should include all lands within the reservation regardless of ownership. Where the State finds it cannot legally deal with an Indian tribal organization through designation or interagency agreement, the State and the Regional Administrator may agree to allow EPA to use a portion of the State's 208 funds to support a cooperative agreement between EPA and the Indian tribe to accomplish 208 tasks on Indian land. The State shall review the Indian tribe's work program and work outputs for consistency with State and adjacent areawide agency work. Where the Governor determines that he or she has no authority to take action on Indian tribal plans under § 35.1521, the Governor shall, at a minimum, review and comment on the plan submission and provide his or her comments to EPA. All WQM plans for Indian lands shall be submitted to EPA for review and approval.

§ 35.1521 Evaluation, certification, and approval of WQM plans and designation of management agencies.

§ 35.1521-1 General.

The terms "certify" and "certification" mean the finding by the Governor that a State or areawide WQM plan meets the criteria in § 35.1521-2 (c). EPA approval constitutes the finding by the Regional Administrator that the plan meets those criteria. Areawide WQM plan outputs are officially incorporated into State WQM plans upon State certification and EPA approval. State certification is a prerequisite for EPA approval. Failure of the State to take action within the time specified in § 35.1521-3(a) will result in EPA action as specified in § 35.1521-3(b).

§ 35.1521-2 Plan evaluation.

(a) *Review of proposed WQM plans.* In accordance with part 25 of this chapter, the planning agency shall hold a public hearing on its proposed plan. The public hearing shall be preceded by 45 days notice. Comments shall be solicited from the public, the State, EPA, and agencies affected by the WQM plan. Affected agencies include general purpose units of local government, proposed and designated management agencies, and other State and Federal agencies whose lands or programs are impacted (e.g., air, solid waste, drinking water, and fish and game offices). Copies of the proposed plan must be made available to the public and affected agencies at a convenient location. All comments shall be considered.

(b) *Review of final WQM plans by the State and EPA.* Within 30 days after the public hearing under paragraph (a) of this section, the planning agency shall sumbit its WQM plan to the Governor and EPA for their concurrent review and evaluation. In accordance with part 25 of this chapter, a summary of comments received in the hearing and elsewhere and the planning agency's response shall accompany the submittal.

(c) *Evaluation criteria.* To be certified by the Governor and approved by EPA, a WQM plan shall:

(1) Be consistent with work program provisions, other relevant portions of the State/EPA agreement, this subpart, and the Act;

(2) Be consistent with other planning and implementation activities relevant to WQM planning provisions;

(3) Be technically valid;

(4) Be economically feasible; and

(5) Represent substantial progress toward achievement of water quality goals (see § 35.1505).

(d) *Management agency designation criteria.* Management agencies shall satisfy requirements of § 35.1519-5(c) to be designated by the State and accepted by EPA.

§ 35.1521-3 Plan certification; designation of management agencies.

(a) Within 120 days after receipt of the WQM plan for evaluation under § 35.1521-2(b), the Governor shall submit a letter to the Regional Administrator and the planning agency containing findings that the Governor certifies, or does not certify, each element of the plan. Prior to such submission, the Governor shall give public notification of the intended action on the WQM plan and allow an adequate public comment period. If there is sufficient public interest, a public hearing may be held in accordance with part 25 of this chapter. Plan provisions may be certified, and management agencies may be designated, with conditions. The certification letter shall be accompanied by a summary of public participation and comments received, and the Governor's response to those comments. The certification letter shall specify:

(1) Plan provisions the Governor certifies in accordance with § 35.1521-2(c). Specific conditions endorsed for incorporation into NPDES permits under section 208(e) shall be identified. Where provisions are certified under this section with conditions, a schedule for completing revisions shall be included.

(2) For plan provisions the Governor does not certify, the plan revisions necessary for certification.

(3) Designated management agencies for implementing certified plan provisions. Where such agencies are not identified, the plan revisions necessary to obtain designation must be stated. Where the Governor designates a management agency which differs from the agency set forth in the plan, he or she shall forward with the certification letter the rationale for the selection, a summary of comments of the planning agency on the substitution, the Governor's response to those comments, and the commitment letter of the management agency.

(b) Where the Regional Administrator determines that the Governor has failed without good cause to meet in a timely manner the certification requirements of paragraph (a), the Regional Administrator shall withhold further 208 grant awards (and appropriate portions of 106 and 205(g) grant awards) to the State pending compliance with the requirements, and may suspend or terminate the current 208 grant (and appropriate portions of the 106 and nonconstruction related 205(g) grants) in accordance with §§ 30.915 and 30.920 of this chapter.

§ 35.1521-4 EPA approval.

(a) Within 150 days after receipt of a WQM plan for evaluation under § 35.1521-2(b), the Regional Administrator shall take action under this section. Plan recommendations may be approved and designated management agencies accepted with conditions. The Regional Administrator shall notify the Governor and the planning agency in writing of the following:

(1) Plan provisions approved and designated management agencies accepted. Specific conditions approved for incorporation into NPDES permits under section 208(e) shall be identified. Where provisions are approved under this section with conditions, a schedule for completion of revisions shall be included.

(2) For plan recommendations disapproved and designated management agencies not accepted, the plan revisions necessary to obtain approval and acceptance.

(b) Periodically, EPA shall publish notices in the FEDERAL REGISTER describing actions taken under this section. Where a plan is approved with conditions, the notice shall specify an EPA contact for more information about the conditions.

§ 35.1522 Reviewing plan applicability after approval.

The State shall identify, with EPA approval, an agency to review facilities plans and advise EPA concerning whether proposed treatment works projects are in conformity with the approved WQM plan under sections 204(a)(1) and 208(d), and whether pro-

V 43 / 177 SE 12 78

posed permits under section 402 of the Act are in conflict with the plan under section 208(e) (if the permit program has been delegated to the State). EPA shall consider any comments provided by this agency in making the determinations required under sections 204(a), 208(d) and 208(e). The agency identified for wastewater treatment facility plan review shall be the agency which will have responsibility (whether by designation or through delegation from a designated agency) for the ongoing WQM planning functions related to wastewater treatment facilities. The identified agency shall also be responsible for reviewing conformity of treatment works projects with nonpoint source and other elements of the approved WQM plan.

§ 35.1523 Evaluation of management agency performance.

(a) Responsibility for evaluation of management agency performance resides primarily with the State, which shall provide a description of its evaluation output commitment in its work program. States may delegate portions of evaluation tasks to other appropriate agencies, but the State shall remain responsible for ensuring an adequate evaluation. The State shall consult with the areawide planning agency when evaluating a management agency responsible for implementing a portion of the areawide's plan. Results of the evaluation shall be reflected in the strategy and subsequent work programs.

(b) If the Regional Administrator determines it appropriate, EPA shall independently evaluate management agency performance.

(c) The State and EPA shall use the letters of commitment developed under § 35.1519-5(c) when evaluating management agency performance in implementing responsibilities assigned under the WQM plan.

§ 35.1525 Change in management agency designation by States.

Where evaluation of a management agency indicates a failure to implement assigned responsibilities, the Governor, in consultation with the appropriate planning agency, shall withdraw the existing designation and propose an alternate designation in accordance with § 35.1521, or take such other action as is needed to assure implementation. A change in management agency designation shall require EPA acceptance. In proposing to change a management agency's designation, the State shall follow the procedures under § 35.1517-2(b), except that such procedures may be modified with concurrence of the Regional Administrator.

§ 35.1529 Intergovernmental coordination and cooperation.

§ 35.1529-1 General.

Each agency receiving assistance under this part shall assure adequate involvement of appropriate local, regional, State, interstate, and Federal agencies and coordination with other planning activities of those governments. In accordance with the Presidential directive to consolidate planning requirements, Federal agencies may be delegated responsibility under interagency agreement for developing WQM plan outputs: WQM plans may incorporate planning products of other Federal programs. The Regional Administrator shall not approve any work program unless satisfied that the applicant has procedures which will assure coordination with, and the appropriate involvement of, other affected public agencies, and that the proposed work is in compliance with any applicable planning consolidation and other Federal environmental and community development program requirements. WQM plan development must be consistent with any applicable basin plan approved under section 209 of the Act.

§ 35.1529-2 Federal responsibility.

Federal agencies shall cooperate with and give support to State and areawide planning agencies in the formulation and implementation of plans for the control of point and nonpoint pollution relating to Federal property, facilities, or activities, and land areas contiguous with federally owned land, in accordance with section 313 of the Act and Executive Order 11752. Upon request, EPA shall assist in assuring that cooperation and coordination are achieved among States and Federal agencies.

§ 35.1529-3 Federal facility compliance.

(a) In accordance with section 313 of the Act and Executive Order 11752, Federal properties, facilities, and activities shall comply with all Federal, State, interstate, and local requirements, administrative authority, procedures and sanctions respecting the control and abatement of water pollution in the same manner and to the same extent as any nongovernmental entity.

(b) Generally, EPA will attempt to facilitate resolution of conflicts among Federal agencies and State, interstate, or local agencies in matters affecting the application of or compliance with a requirement for abatement of pollution. Where EPA determines that its efforts are or likely will be unsuccessful, the matter shall be referred to the Office of Management and Budget under provisions of Executive Order 11752.

§ 35.1531 Implementation.

§ 35.1531-1 General.

The fundamental objective of all activities of State and other agencies under this subpart shall be to achieve the water quality goals of the Act. Therefore, all planning shall aim at specific implementation action. The framework for implementation should be developed during the preparation of WQM plans. EPA shall not exercise any approval authority under this part, nor award any grant, unless the Regional Administrator is satisfied that the action for which approval or grant funds is sought accords with this policy. This policy shall also be a key elements in evaluations conducted under this part.

§ 35.1531-2 Funding.

Except for subsection 208(j), implementation activities are generally not eligible for funding under section 208 of the Act. In accordance with annual EPA guidance, funds under sections 106, 201, 205(g), and 314 of the Act may be used for implementation activities under approved water quality management plans, if such activities are eligible for funding under those sections. Funding may also be available for implementing BMPs in rural areas under section 208(j) and for certain activities of other Federal agencies under section 304(k) of the Act. Under RCRA, assistance is available to plan and implement programs to control disposal of solid and hazardous waste. Other Federal agencies, such as the Department of Housing and Urban Development, may have funding available for certain implementation activities.

§ 35.1531-3 Remedies for failure to implement.

The Regional Administrator may take any appropriate action for failure to implement, including the following:

(a) If the Regional Administrator determines that a State is not implementing any portion of an approved State WQM plan, or any portion of an approved areawide WQM plan for which the State has implementation responsibility, he may withhold all or part of funds which the State would otherwise receive under sections 106, 205(g), 208, and 314 of the Act. Since the State is responsible for WQM planning throughout the State (see § 35.1519-7), the Regional Administrator may also withold such grant funds from the State if he determines that: (1) Any approved portion of an areawide plan is not being implemented; (2) the State has the capability to implement those portions; and (3) after reasonable notice from the Regional administrator to the Governor, the State has failed to use its best efforts to implement those portions.

NOTE.—Reference to funds under section 205(g) of the Act must be read in light of the definition in § 35.1502(b). The term does not include construction management assistance grants unde subpart F of this chapter.

(b) The Regional Administrator, after consulting State and areawide planning agencies, and after public notification in accordance with part 25 of this chapter, may withdraw acceptance of a management agency designation or approval of a planning agency designation if the agency is not meeting its implementation responsibilities. The State shall then promptly designate a replacement agency under § 35.1517 or § 35.1525.

Under § 30.340, such a failure may provide a basis for EPA determination that the disapproved agency is not entitled to public trust and, therefore, is ineligible to receive funds under any EPA program.

(c) After fiscal year 1979, no funds under section 208 of the Act will be available to any planning agency which developed a certified and approved plan, unless a significant portion of the plan is being implemented.

§ 35.1531-4 Relationship to other programs.

(a) *Relationship to the NPDES program.* In accordance with section 208(e) of the Act, no NPDES permit may be issued to any point source which is in conflict with an approved WQM plan. Under § 35.1519-5(a), requirements for incorporation of conditions into permits under section 208(e) are identified during WQM planning. Permit conditions identified under section 208(e) may be superseded by applicable, more stringent NPDES permit requirements.

(b) *Relationship to the construction grants program.* (1) Under sections 208(d) and 204(a)(1) of the Act, after relevant portions of a WQM plan are approved, section 201 construction grants may be awarded only to designated management agencies for construction of treatment works in conformity with the approved WQM plan. The State or areawide agency which the State has selected under § 35.1522 shall review each facility plan in its area for consistency with the approved WQM plan. Facility planning shall be based on wasteload allocations, delineation of facility planning areas, and population projection totals and disaggregations in approved WQM plans. After October 1, 1979, the Regional Administrator shall not approve a grant for any municipal treatment works under section 201 of the Act where such facility-related information is not available in an approved WQM plan, unless the Regional Administrator determines in writing, based on information submitted by the State or grantee, that the facility related information was not within the scope of the WQM work program or that the award of the 201 grant is necessary to achieve water quality goals.

(2) Construction grant project needs and priorities established during WQM planning shall be developed by State and areawide planning agencies consistent with the priority system of the State under § 35.915 and § 35.1513-2. In developing its annual priority list, the State shall consider the construction grant needs and priorities set forth in certified and approved State and areawide WQM plans.

(c) *Relationship to the rural clean water program.* Under section 208(j) of the Act and regulations promulgated by the U.S. Department of Agriculture (with concurrence of the Administrator), financial assistance is available for installation of BMP's to control agricultural nonpoint source pollution.

NOTE.—The Governor, or his or her designee, must submit proposed projects in order of priority to the Secretary of Agriculture. Proposed projects are eligible if they are identified in approved portions of WQM plans. The management agency designated to implement the program must assure there will be an adequate level of participation in BMP implementation in terms of the percentage of critical acreage or source of the problem that will be controlled. The management agency must certify that the BMP's to be cost-shared are consistent with the approved WQM plan.

§ 35.1533 Public participation.

§ 35.1533-1 Purpose.

The public participation goals, policies and requirements in part 25 of this chapter apply to activities under this subpart. The purpose is to involve the public at appropriate implementation points and throughout the planning process (including determination of planning goals and objectives, identification and assessment of alternatives, evaluation of proposed plans, and development of implementation strategies) so that planning and implementation reflect public concerns and so that there is public understanding and support for WQM.

§ 35.1533-2 Work programs.

State and areawide work programs shall include a public participation element which identifies staff and budget resources; the schedule and anticipated nature activities; key decision points for outputs where public consultation will occur and agency responsiveness summaries will be prepared; a description of advisory committee membership; and mechanisms for coordinating public participation.

§ 35.1533-3 Planning and implementation.

State and areawide planning agencies shall establish mechanisms to encourage public participation in WQM plan development and implementation in accordance with part 25 of this chapter. Information concerning the nature, scope, and anticipated impact of planning alternatives under consideration and of the proposed WQM plans shall be readily available to the public. Opportunities shall be provided for the public to review and comment on proposed WQM plans in accordance with § 35.1521-2. An advisory committee shall be established in accordance with § 25.3(d)(4) of this chapter and shall be consulted at appropriate times during WQM plan development. Any necessary modifications to existing advisory committees to meet the requirements of part 25 of this chapter shall be completed within 45 days of the initial grant award under this subpart. The advisory committee shall have the opportunity to review and comment on the agency's annual grant application and proposed work program. A summary of public participation during WQM plan development shall be forwarded to the State and EPA when the final WQM plan is submitted under § 35.1521.

§ 35.1535 Allotments and reallotments.

§ 35.1535-1 Allotments.

(a) *Section 106.* Sums which the Administrator determines will be available for outputs funded under section 106 of the Act for each fiscal year will be allocated to State and interstate agencies on the basis of the extent of the pollution problem. The allotment formula, allotment ratios, and the amounts available shall be announced in a notice in the FEDERAL REGISTER and included in each year's annual guidance. Interstate agency allotment ratios are based on the level of funding received in fiscal year 1973, provided the total sum available under section 106 is at least $40 million.

(b) *Section 208.* Sums which the Administrator determines will be available for outputs funded under section 208 shall be allotted to each region generally on the basis of need, population, and land area of each region. The allotment formula, allotment ratios, and the amounts available shall be announced in a notice in the FEDERAL REGISTER and included in each year's annual guidance. Grant amounts shall be negotiated by the Regional Administrator and each State and areawide agency in accordance with § 35.1511.

(c) *Section 205(g).* Sums available to States under section 205(g) of the Act and subpart E of this chapter for permit program elements under sections 402 and 404 of the Act and for statewide 208(b)(4) planning will be

determined on a case-by-case basis by the Regional Administrator.

§ 35.1535-2 Reallotments.

(a) At the end of each fiscal year, unobligated funds available under sections 106 and 208 of the Act shall be reissued as carryover funds to the same Region for allocation to eligible agencies within that Region as determined by the Regional Administrator.

(b) Unobligated funds under section 205(g) of the Act shall be managed in accordance with § 35.1020(e) of this chapter.

§ 35.1537 Grant limitations and administration.

§ 35.1537-1 Grant amount.

(a) *For section 106 and 205(g) outputs.* Each State and interstate agency shall receive a grant from its final 106 allotment and 205(g) nonconstruction management assistance funds in an amount not to exceed the reasonable cost of carrying out its approved program, as determined by the Regional Administrator.

(b) *For section 208 outputs.* Each State and areawide planning agency shall receive a grant in an amount not to exceed 75 percent of the reasonable cost of carrying out its approved program, as determined by the Regional Administrator.

§ 35.1537-2 Reduction of grant.

(a) Should the Regional Administrator's evaluation of the work program proposed by a State, interstate, or areawide agency indicate that the proposed output commitment is not consistent with the level of funding requested or national priorities, he or she shall negotiate with the agency to change the output commitment or to reduce the grant amount. However, should an agency propose a different set of outputs than suggested in the EPA annual guidance due to unanticipated regional or statewide pollution problems, the Regional Administrator may approve the program provided he determines the outputs can and should be produced and the proposed funding is appropriate.

(b) If a State, interstate or areawide agency fails to submit its work program by the dates specified in § 35.1507-7, the grant amount may be reduced by an appropriate amount reflecting the significance of the delay in relation to accomplishment of the proposed program.

(c) Funds recovered under this section shall be available for allocation by the Regional Administrator to other agencies within the Region.

§ 35.1537-3 Budget period.

The budget period shall be for the Federal fiscal year.

§ 35.1537-4 Eligibility.

(a) *Section 106.* Grants may be awarded to a State or interstate water pollution control agency provided the agency has submitted a work program which satisfied the requirements of this subpart and is approved by the Regional Administrator.

(b) *Section 208.* (1) Statewide 208 planning grants for non-designated areas may be awarded to the State agency identified in the approved work program.

(2) Areawide planning agencies shall be eligible for grant awards under these provisions only if it:

(i) Is designated by the Governor under 208(a) and approved by the Regional Administrator as the official planning agency for the areas;

(ii) Agrees to develop or revise a 208 water quality management plan in accordance with an approved work program; and

(iii) Is deemed likely to be successful in its efforts by the Regional Administrator who shall take into account in making this determination the past efforts of the agency, evaluations, and comments of the Governor and the public.

§ 35.1537-5 Limitations on award.

(a) No funds under section 106 of the Act shall be awarded to any State or interstate agency for any fiscal year unless the agency has certified (and the Regional Administrator agrees) that its expenditures of non-Federal funds during that fiscal year for its recurrent 106 program expenditures will be not less than such expenditures during the fiscal year ending June 30, 1971, or the last year of Federal support is such Federal support was initiated subsequent to the fiscal year ending June 30, 1971.

(b) If a State has received a construction management assistance grant under section 205(g) of the Act, the provisions of § 35.1016(a) of this chapter determine the maintenance of effort level, but in no case shall a State reduce its expenditures below the amount required in paragraph (a) of this section.

(c) No funds under section 208 of the Act shall be awarded to a designated planning agency where previous planning by that agency for the same water quality problem was not certified by the State or was disapproved by EPA.

(d) No funds under section 106 of the Act shall be awarded to any State which has not provided or is not carrying out as part of its program: (1) The establishment and operation of appropriate devices, methods, systems, and procedures necessary to monitor, and to compile and analyze data on (including classification according to eutrophic condition) the quality of navigable waters and to the extent practicable, ground waters including biological monitoring; and provision for annually updating such data and including it in the report required under section 305(b) of the Act. (§ 35.1570 sets forth the minimum requirements for an acceptable monitoring strategy under the Act.) (2) Authority comparable to that in section 504 of the Act, "Emergency Powers", and adequate contingency plans to implement the authority, in accordance with EPA guidance.

(e) No grant shall be awarded for any activity which the Regional Administrator determines is not in conformity with an approved State Implementation Plan under the Clean Air Act.

(f) No funds under section 106 of the Act shall be awarded to a State unless the Regional Administrator determines that the level of funding for legal expenses related to enforcement activities is adequate (including funding for expenses of the State's attorney general or equivalent office, where the Regional Administrator determines such funding to be appropriate).

(g) No funds under section 106 of the Act shall be awarded to any State or interstate agency with respect to which there is in effect any federally assumed enforcement under section 309(a)(2) of the Act.

§ 35.1537-6 Allowable and unallowable costs.

Allowable and unallowable costs under sections 106, 208, and 205(g) shall be determined by the Regional Administrator in accordance with § 35.705 of this chapter if he or she determines that the costs are reasonable for carrying out approved activities. Costs related to the following activities shall be unallowable:

(a) Costs incurred in sewer evaluation surveys as required under § 35.927-2 of this chapter;

(b) Costs incurred in detailed sewer system mapping and related surveys;

(c) Costs related to sewage collection systems;

§ 276.

(d) Cost of special studies for the specific benefit of individual, industrial or commercial establishments; and

(e) Costs of activities which are primarily of a research nature.

§ 35.1537-7 Audit.

State or other agencies which receive funds under more than one paragraph of § 35.1535-1 shall develop outputs for the expenditure of those funds in such a manner as to assure the funds are used for permissible tasks and to permit accountability to each appropriation. However, commonly funded outputs serving more than one program shall be used where feasible. Generally, the audit shall be conducted only back to the approved work program. The Regional Administrator may establish procedures in the State/EPA agreement for accepting State audit results in lieu of EPA audit.

§ 35.1537-8 Adherence to budget estimates.

Grant expenditures shall be consistent with the resource estimates contained in the approved work program. If rebudgeting of funds among program elements becomes necessary, the provisions of § 30.610 of this chapter shall be applied.

§ 35.1537-9 Program changes.

The grantee shall conduct its activities in a manner consistent with the approved work program. If budget changes to the approved State program become necessary, the provisions of § 30.610 of this chapter shall be applied.

§ 35.1537-10 Payment.

Grant payments shall be made in accordance with § 30.615 of this chapter. Notwithstanding the provisions of § 30.345 of this chapter, the first grant payment subsequent to grant award may include reimbursement of all allowable costs incurred from the beginning of the approved budget period, provided that monthly costs incurred from the beginning of the budget period to the date of grant award do not exceed the level of costs approved by the Regional Administrator as reasonable.

§ 35.1537-11 Financial status report.

Within 90 days after the end of each budget period, the grantee shall submit to the Regional Administrator an annual report of all expenditures (Federal and non-Federal) which accrued during the budget period. Beginning in the second quarter of any succeeding budget period, grant payments may be withheld under § 30.615-3 of this chapter until this report is received.

§ 35.1537-12 Disputes under this subpart.

Final determinations of the Regional Administrator concerning refusal to award grant funds and termination or suspension of grants, and final determinations of the Regional Administrator concerning disputes as to Allowable costs or other matters arising under a grant, shall be final and conclusive unless appealed by the applicant or grantee in writing within 30 days from the date of receipt of such final determination. Procedures and further requirements are set forth in the "Disputes" provisions of part 30, subpart J of this subchapter.

§ 35.1580 Development of programs for controlling the discharge or placement of dredged or fill material. [Reserved]

Appendix A—Water quality and pollutant source monitoring.

[Remains the same. See Appendix A, subpart B, Part 35]

USE OF PERSONAL NOISE DOSIMETERS

Coal Mine Health and Safety

[4510-43]

Title 30—Mineral Resources

CHAPTER I—MINE SAFETY AND HEALTH ADMINISTRATION, DEPARTMENT OF LABOR

SUBCHAPTER O—COAL MINE HEALTH AND SAFETY

PART 70—MANDATORY HEALTH STANDARDS—UNDERGROUND COAL MINES

PART 71—MANDATORY HEALTH STANDARDS—SURFACE COAL MINES

Noise Dosimeters

AGENCY: Mine Safety and Health Administration, Department of Labor.

ACTION: Final rule.

SUMMARY: These amendments to 30 CFR Part 70 permit the use of personal noise dosimeters to determine noise exposure in coal mines and set forth the procedures to be followed in taking such noise measurements. The use of a personal noise dosimeter will for the first time allow accurate measurements of noise exposures for all miners working on mobile equipment. These amendments are also applicable to 30 CFR Part 71. Technical amendments to Parts 70 and 71 are also included.

EFFECTIVE DATE: October 1, 1978.

FOR FURTHER INFORMATION CONTACT:

Joseph A. Lamonica, Chief, Division of Health, Coal Mine Safety and Health, Mine Safety and Health Administration, Ballston Tower #3, Room 830, 4015 Wilson Boulevard, Arlington, Virginia 22203, phone 703-235-1358.

SUPPLEMENTARY INFORMATION:

Background Information

On June 2, 1977, the Mining Enforcement and Safety Administration, Department of the Interior, published in the FEDERAL REGISTER (42 FR 28151) proposed amendments to 30 CFR Part 70 that would permit the use of personal noise dosimeters to determine noise exposure in coal mines. The proposed amendments had been transmitted to the Department of the Interior by the Secretary of Health, Education, and Welfare under section 101(d) of the Federal Coal Mine Health and Safety Act of 1969 (30 U.S.C. 811(d)) (Coal Act).

Interested persons were afforded a period of 45 days within which to submit comments, suggestions, objections and requests for hearing. Pursuant to requests, a public hearing was conducted on September 29, 1977. On the basis of the evidence presented at the hearing and other available information, findings of fact were published in the FEDERAL REGISTER on January 27, 1978 (43 FR 3729).

Under the Federal Mine Safety and Health Amendments Act of 1977, Pub. L. 95-164 (Amendments Act), the rulemaking responsibilities of the Secretaries of the Interior and Health, Education, and Welfare under section 101 of the Coal Act were transferred to the Secretary of Labor on March 9, 1978. Rulemaking commenced under the Coal Act was authorized to be continued by the Department of Labor under the provisions of the Amendments Act.

Discussion of the Final Rule

Section 70.500(f) of the proposed rule contained a definition of "integrating sound level meter," a term which was used throughout the text of the proposal. Since the amendments pertain only to the use of personal noise dosimeters, which are a subclass of integrating sound level meters, the term "personal noise dosimeter" has been substituted wherever the term "integrating sound level meter" appeared in the proposed rule.

The term "noise level measurement" was used throughout the text of the proposed rule. The term "noise exposure measurement" has been substituted in the final rule for the following reasons. The word "level" denotes a sound pressure level or a weighted sound pressure level (e.g., A-weighted) and personal noise dosimeters measure noise dose and not noise level. In addition, the purpose of using either sound level meters or personal noise dosimeters is to assess individual noise exposure, which is a function of both noise level and time of exposure. Conforming technical amendments are also made to subpart F of part 70 and subpart D of part 71 to substitute the word "exposure" for "level" wherever it is appropriate.

The proposed amendment to § 70.505 stipulates that noise exposure measurements may be taken by personal noise dosimeters which have been found to be acceptable by the Mine Safety and Health Administration (MSHA). The tests and criteria used by MSHA to determine acceptability of personal noise dosimeters have been published in "MSHA Test Procedures and Acceptability Criteria for Noise Dosimeters", MSHA RI 1072, 1978, by Dennis Giardino, John Seiler, and Timothy Y. Yen. These tests are derived from procedures and data reported by Timothy Y. Yen and Kenneth C. Stewart in a report entitled "Noise Dosimeter Performance—A second Evaluation," Bureau of Mines Information Circular, IC8754, 1977. These tests and criteria as published in RI 1072 contain two changes from those used in establishing the list of acceptable instruments published in the preamble to the proposed regulations. These changes were made as a result of the Findings of Fact from the public hearing. The first change added a criterion for performance at dosimeter threshold (the level at which the dosimeter begins to record noise exposure) to the list of test criteria. This threshold test is based on exposing a dosimeter to a 1000 Hz, 88 dBA, puretone acoustic signal for one hour. The resultant dose must be equal to or less than 1.0 percent. The second change provided that two out of three instruments (instead of one of three) of a given model must pass all test criteria before the model is accepted by MSHA. Manufacturers whose instruments were removed from the current list of acceptable models because of these changes in criteria have been informed of the basis for such removal and given an opportunity to correct instrument errors and resubmit instruments for testing and inclusion on the list of acceptable models. The following dosimeters are now acceptable to MSHA:

Manufacturer	*Model No.*
Bruel and Kjaer, Inc.	4425.
Benidx	ADS-3000.
E. I. DuPont	D-100. D-376.
Edmont-Wilson Co	60-520.
GenRad, Inc.	1944. 1954.
Mine Safety Appliances Co	90.
Quest	M-7.
Simpson Electric Co.	891.

The results of several studies indicate that the positioning of the personal noise dosimeter microphone on an individual is critical for limiting measurement errors associated with body baffle and absorption effects. These studies include Bureau of Mines Report of Investigation 7810, "Response Variation of a Microphone Worn on the Human Body," by Terry L. Muldoon; "Optimum Microphone Location for Dosimeters," by Leonard C. Marraccini and Dennis A. Giardino (Proceedings of Noisexpo 1975); and "Summary of Dosimeter Microphone Placement Errors," by J. Alton Burks (Internal MESA Memorandum, 1977). The instructions in the proposed rule for positioning and orienting the personal noise dosimeter microphone (section 506(d)(1)) were somewhat unclear. These instructions have been reworded and supplemented with a diagram which will better describe the desired positioning of the microphone.

Although the personal noise dosimeter has been shown to be a reliable measurement instrument, equipment failure rates up to 4.5 percent have been reported. A frequent cause of equipment failure is attributed to microphone errors associated with dust accumulation or actual damage to the microphone from dropping the microphone on hard surfaces. To prevent damage to the microphone and minimize safety problems associated with the wearing of personal noise dosimeters, a statement has been added to § 70.506(d), which provides that the instrument case and microphone cable shall be positioned underneath exterior clothing whenever practical. Furthermore, since the potential for dust accumulation in the microphone is high in coal mine environments, a new paragraph (b)(3) has been added to § 70.506. This new paragraph requires annual recalibration of personal noise dosimeters including, as a minimum, frequency response testing and visual inspection of the microphone for any foreign matter or damage.

To compute noise exposure, information must be available on noise level or integrated noise dose together with information on the amount of exposure time. Therefore, space is provided on the Coal Mine Noise Data Report for recording the total measurement time for both sound level meter and personal noise dosimeter measurements.

Drafting Information

The principal persons responsible for the preparation of this final rule are: Joseph A. Lamonica, Chief, Division of Health, Coal Mine Safety and Health; William H. Sutherland, Division of Health, Coal Mine Safety and Health; and Frank A. White, Office of Standards, Regulations and Variances, MSHA.

Dated: August 25, 1978.

ROBERT B. LAGATHER,
Assistant Secretary for Mine Safety and Health.

Subchapter O of Chapter I of Title 30 of the Code of Federal Regulations is amended as follows:

1. In § 70.500, paragraph (a) is revised and a new paragraph (f) is added as follows:

§ 70.500 Definitions.

(a) "dBA" means noise level in decibels, relative to a reference level of 20 micro pascals, as measured by the use of an A-weighting and slow metering characteristic as specified in American National Standards Institute (ANSI), "Specification for Sound Level Meters," S1.4-1971 (Type S2A).

* * * * *

(f) "Personal noise dosimeter" means equipment worn by an individual, which performs noise level measurements along with exposure time measurements. The circuitry of the instrument is such that it automatically performs the computation of the multiple noise exposure specified in § 70.502.

§§ 70.503, 70.504, 70.504-1 and 70.504-2 [Amended]

2. Sections 70.504, 70.504-1 and 70.504-2 and the headings to §§ 70.503 and 70.504 are amended by deleting the word "level" wherever it appears and substituting the word "exposure" therefor.

3. Sections 70.505 and 70.506 are revised to read as follows:

§ 70.505 Noise exposure measurement equipment.

Noise exposure measurements shall be taken only with equipment which is approved by the Mine Safety and Health Administration as permissible electric face equipment under the provisions of Part 18 of this chapter and which in the case of sound level meters, meets American National Standards Institute (ANSI), "Specification for Sound Level Meters," S1.4-1971 (Type S2A), or in the case of personal noise dosimeters, has been found to be acceptable by the Mine Safety and Health Administration.

§ 70.506 Noise exposure measurement procedures; instrument setting; calibration.

(a) Noise exposure measurements made with sound level meters shall conform to the following:

(1) Noise exposure measurements shall be made at locations where the noise it typical of that entering the ears of the miner whose exposure is under consideration.

(2) Five measurements shall be made for each type of noise exposure producing operation to which the miner under consideration is exposed.

(3) Each measurement shall be made by observing the A-scale readings for 30 seconds and recording the noise level.

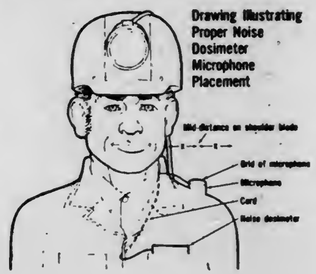
(4) The average of the five noise level measurements shall be considered as the noise level measurement which is representative of the operation.

(5) Where different and distinct noise levels occur at various phases of an operation, noise exposure measurements shall be made in accordance with this section for each distinct phase.

(6) The noise levels and the estimated length of time the miner is exposed to each level during a normal work shift shall be reported for the operation.

(b) Noise exposure measurements made with personal noise dosimeters shall conform to the following:

(1) For the miner whose noise exposure is under consideration, noise exposure measurements shall be made with the personal noise dosimeter microphone located at the top of the shoulder, midway between the neck and the end of the shoulder with the microphone pointing in a vertical upward direction in accordance with the diagram shown below:



(2) To the extent practical, the personal noise dosimeter instrument case and microphone cable shall be positioned underneath exterior clothing so as to minimize potential safety problems and damage to the instrument. The microphone shall not be covered by clothing.

(3) The personal noise dosimeter shall be worn by the miner whose noise exposure is under consideration for an entire normal work shift and the accumulated per centum of the noise exposure shall be reported.

(c) Noise exposure measurement instruments specified in § 70.505 shall be set to operate with the A-weighted network and slow response.

(d)(1) Sound level meters and personal noise dosimeters used by an operator in fulfilling the requirements of this subpart shall be acoustically calibrated in accordance with the manufacturer's instructions before and after each shift on which the meter is used.

(2) Sound level meters and personal noise dosimeters used by an authorized representative of the Secretary shall be acoustically calibrated in accordance with the manufacturer's instructions or by another equivalent procedure before and after each shift on which the meter is used.

(3) Personal noise dosimeters shall be recalibrated annually, including, as a minimum, the following:

(i) Visual inspection of the microphone for any foreign matter or damage,

(ii) Comparison of the dosimeter, at 100 Hz, with a laboratory type condensor microphone of known sensitivity, and

(iii) Frequency response testing in a free or diffused field where the sound field is established using a laboratory type condensor microphone of known sensitivity.

(4) A document containing the date of the annual recalibration of each personal noise dosimeter and the names of the individual and organization performing the calibration shall be kept on file at each mine office.

(e)(1) Acoustical calibrators which are used to calibrate sound level meters and personal noise dosimeters shall be recalibrated once a year using a laboratory type condensor microphone of known sensitivity as determined by a National Bureau of Standards calibration.

(2) A document containing the date of the annual calibration of each acoustical calibrator and the names of the indivdual and organization performing the calibration shall be on file at each mine office.

§§ 70.507—70.510 [Amended]

4. Sections 70.507, 70.508, 70.509 and 70.510 and the headings to §§ 70.507, 70.508 and 70.509 are amended by deleting the word "level" in the phrase "noise level survey" wherever it appears and substituting the word "exposure" therefor.

5. In § 70.509, paragraph (b) is amended by deleting the word "level" in the phrase "noise level measurements" wherever it appears and substituting the word "exposure" therefor.

6. A new § 70.511 is added as follows:

§ 70.511 Incorporation by reference.

In accordance with 5 U.S.C. 552(a)(1), the technical publication, "Specification for Sound Level Meters", S1.4-1971 (Type S2A), issued by the American National Standards Institute (ANSI), April 27, 1971, referenced in this subpart F is hereby incorporated by reference and made a part hereof. The incorporated technical publication is available for examination at MSHA, 4015 Wilson Blvd., Arlington, Va. 22203; the National Institute for Occupational Safety and Health, 5600 Fishers Lane, Rockville, Md. 20857; each Coal Mine Health and Safety District and Subdistrict Office and the Federal Register library. In addition, copies of the document can be purchased from the American National Standards Institute (ANSI), 1430 Broadway, New York, N.Y. 10018.

NOTE.—Incorporation by reference provisions approved by the Director of the Federal Register on June 14, 1978.

DEPARTMENT OF LABOR

Mine Safety and Health Administration

[30 CFR Parts 55, 56, and 57]

METAL AND NONMETAL MINES

Advisory Standards

AGENCY: Mine Safety and Health Administration, Department of Labor.

ACTION: Proposed rule.

SUMMARY: This proposed rule would revoke or revise and make mandatory existing advisory health and safety standards applicable to metal and nonmetal mines and mills pursuant to the requirements of section 301(b)(2) of the Federal Mine Safety and Health Amendments Act of 1977. The effect of the proposals will be to make mandatory and enforceable certain advisory standards in order to improve the health and safety of metal and nonmetal miners.

DATES: Comments must be received by October 9, 1978.

ADDRESS: Send comments to Frank A. White, Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 629, Ballston Tower No. 3, 4015 Wilson Boulevard, Arlington, Va. 22203, 703-235-1910.

FOR FURTHER INFORMATION CONTACT:

Roy L. Bernard, Chief, Division of Safety, Metal and Nonmetal Mine Safety and Health, Mine Safety and Health Administration, Room 717, Ballston Tower No. 3, 4015 Wilson Boulevard, Arlington, Va. 22203, 703-235-8646.

SUPPLEMENTARY INFORMATION:

I. Background Information

The Federal Mine Safety and Health Amendments Act of 1977, Pub. L. 95-164 (Amendments Act) applies to all coal mines and metal and nonmetal mines. The Amendments Act amended the Federal Coal Mine Health and Safety Act of 1969, Pub. L. 91-173, and repealed the Federal Metal and Nonmetallic Mine Safety Act of 1966, Pub. L. 89-577. Section 301(b)(2) of the Amendments Act provides that within 60 days after its enactment on November 9, 1977, the Secretary shall have established an advisory committee under section 102 of the Federal Mine Safety and Health Act of 1977, Pub. L. 91-173 as amended by Pub. L. 95-164, to review the existing health and safety advisory standards developed and promulgated under the Federal Metal and Nonmetallic Mine Safety Act of 1966 (Metal Act). The advisory committee had 180 days after its establishment to review and recommend to the Secretary those standards or modifications thereof which should be upgraded and promulgated as new, mandatory standards.

On January 5, 1978, the Secretary of Labor (Secretary) established the Advisory Committee to review metal and nonmetal mine safety and health standards. It consisted of three representatives each from labor and industry and seven public members with no economic interest in the mining industry. The advisory committee was chartered and conducted public meetings in accordance with the Federal Advisory Committee Act, Pub. L. 92-463. After publishing notices of meetings in the FEDERAL REGISTER, the advisory committee held four sets of meetings that were open to the public and heavily attended in Washington, D.C. on March 6-10, 1978 (43 FR 7071), Tuscon, Ariz., on April 4-7, 1978 (43 FR 11278), Arlington, Va., on May 1-5, 1978 (43 FR 15805), and again in Washington, D.C. on May 22-25, 1978 (43 FR 19477). The advisory committee made its final recommendations to the Secretary on July 5, 1978 which, with a few editorial changes, and updating of the incorporated publications used in the proposed revisions for the term "Flash point", comprise this proposed rule.

II. Discussion of the Proposed Rule

The advisory committee reviewed the 229 existing advisory standards published in 30 CFR Parts 55, 56, and 57. The committee recommended that 161 advisory standards be made mandatory and that 68 standards be revoked. The upgraded advisory standards apply to ground control; fire prevention and control; air quality, ventilation, radiation, and physical agents; aerial tramways; travelways and escapeways; electricity; compressed air and boilers; use of equipment; personal protection; material storage and handling; safety programs; man hoisting; explosives; and gassy mines.

Certain of the advisory standards were proposed to be revised and made mandatory in part III of the FEDERAL REGISTER on September 25, 1975 (40 FR 44272-44285) and were subject to formal public rulemaking hearings under the Metal Act. Administrative Law Judges submitted recommended decisions to the Secretary of Interior on November 16, 1977 and February 10, 1978 respectively, and no final action had been taken by the Department of Interior. The advisory committee considered the standards recommended by the Administrative Law Judges and generally the recommendations made to the Secretary by the advisory committee and republished in this proposed rule are substantially the same as those of Administrative Law Judges. Also included in the modifications recommended by the advisory committee are the following:

(1) The extension coverage of certain standards from part 57 for underground mines to parts 55 and 56 for open pit mines, and sand, gravel and crushed stone operations, respectively.

(2) A revision of the definition for the term "Flash point", and adding new definitions for the terms "combustible liquid" and "flammable liquid", all in parts 55, 56, and 57; and, the addition of a new definition for the term "designated underground fire area" in part 57 only.

(3) An expansion of coverage of certain standards previously applicable to surface only or underground only in part 57.

In addition to section 301 of the Amendments Act, the modifications recommended by the advisory committee and published in this proposed rule are authorized under sections 101 and 508 of the Federal Mine Safety and Health Act of 1977.

The advisory committee took considerable time discussing and making its recommendations on standards 57.4-61, 55.18-2, 56.18-2, and 57.18-2. Because of the importance of these standards and the desire of the Mine Safety and Health Administration (MSHA) to base its decisions with respect to these standards on comments and data which are as complete as possible, interested persons and organizations are further requested to submit specific comments and suggestions, including recommended wording, for these standards.

Standard 57.4-61 is applicable to underground operations of underground mines and covers the recognized potential for fire and the need to control air coursed into a mine in the event of fire underground. This control is essential to protect and evacuate miners during an emergency. Ventilation control doors and fire doors are needed for control of smoke and toxic products from a fire in the shaft and for protection from a fire on the underground levels. Another important consideration for doors is the need to establish a base station for rescuing miners trapped by a fire. Because time is essential in any rescue operation, having doors already installed saves valuable time. MSHA is particularly concerned that the portion of the proposed rule which provides for "review and comment" by the Secretary may not adequately ensure that these factors are fully considered and implemented in all cases.

Standards 55.18-2, 56.18-2, and 57.18-2 apply to all metal and nonmetal mines and recognize that regular examinations of each active working or installation is the mine operator's best method for preventing accidents, injuries, and occupational illnesses. Similar mandatory standards are published for coal mines in 30 CFR 75.303 through 75.315, and 30 CFR 77.1713. The coal standards are applicable to underground and surface operations respectively.

During the advisory committee's considerations for revising the definition of "Flash point" in parts 55, 56, and 57, MSHA suggested using the 1970 test for flash point by the tag closed tester ASTM D 56-70 and the 1973 test for flash point by Pensky-Martens closed tester ASTM D 93-73. However, since both publications are difficult to obtain and were updated in 1977 by the American Society of Testing and Materials, it is proposed to incorporate the 1977 publications in the term "Flash point" or ASTM D 56-77 and ASTM D 93-77, respectively.

III. Expedited Rulemaking

This rulemaking procedure being followed by Mine Safety and Health Administration with respect to this proposed rule is required by section 301(b)(2) of the Amendments Act. Under Executive Order No. 12044 issued on March 23, 1978, entitled "Improving Government Regulations" (see 43 FR 12661-12670), a comment period of at least 60 days would normally be allowed, during which any person may request a public hearing. Section 301(b)(2) of the Amendments Act provides an expedited procedure for review of existing advisory standards, comment period, and promulgation of the final mandatory standards. The Secretary is directed to afford interested persons a period of 25 days after publication of this proposed rule to submit written data or comments and the new, mandatory standards are to be promulgated in the FEDERAL REGISTER no later than 30 days after the close of such comment period. Accordingly, because of the limited time remaining before promulgation, it is requested that data or comments are submitted at the earliest possible date but no later than October 9, 1978.

Since the statutory comment period for this proposed rule is 25 days and final standards are to be promulgated within 30 days thereafter, it is not possible to give the public 60 days to comment on this proposed rule.

IV. Drafting Information

The principal persons responsible for drafting the proposed rule are: Herbert P. LeVan, Office of Standards, Regulations and Variances, MSHA; and Bernard R. McGuire, Attorney Advisor, Division of Mine Safety and Health, Office of the Solicitor, Department of Labor.

V. Regulatory Analysis

NOTE.—It has been determined that this document does not contain a major proposal requiring the preparation of a regulatory analysis under Executive Order No. 12044, or the Department of Labor's proposed guidelines for implementation of the Executive Order (43 FR 22915, May 26, 1978).

Dated: September 7, 1978.

ROBERT B. LAGATHER,
Assistant Secretary for Mine Safety and Health.

In consideration of the foregoing it is proposed to amend 30 CFR Chapter I, Parts 55, 56, and 57 as follows:

PART 55—HEALTH AND SAFETY STANDARDS—METAL AND NONMETALLIC OPEN PIT MINES

A. Section 55.2 "Definitions" is proposed to be amended as follows:

§ 55.2 [Amended].

1. It is proposed to add a definition of "Combustible liquid, class two combustible liquid, and class three combustible liquid" as follows:

"Combustible liquid" means a liquid having a flash point at or above 100° F. (38° C.). "Class two combustible liquid" means a liquid having a flash point at or above 100° F. (38° C.) and below 140° F. (60° C.). "Class three combustible liquid" means a liquid having a flash point at or above 140° F. (60° C.) and an auto ignition temperature below 1,500° F. (816° C.).

2. It is proposed to add a definition of "Flammable liquid" as follows:

"Flammable liquid" means a liquid having a flash point below 100° F. (38° C.), and is designated a class one liquid.

3. It is proposed to revise the definition of "Flash point" as follows:

"Flash point" means the minimum temperature of a liquid at which sufficient vapor is given off to form an ignitable mixture with the air near the surface of the liquid or within the vessel used as determined in accordance with the standard method of test for flash point by the tag closed tester, ASTM Designation: D 56-77, American Society for Testing Materials or a standard method of test for flash point by Pensky-Martens closed tester, ASTM Designation: D 93-77, whichever is applicable. ASTM D 56-70 and ASTM D 93-73 are hereby incorporated by reference and are made a part hereof and may be examined at any Metal and Nonmetal Mine Safety and Health Subdistrict Office, the Mine Safety and Health Administration, and may be obtained from the American Society of Testing and Materials, 1916 Ray Street, Philadelphia, Pa. 19103.

B. Section 55.3 "Ground control" is proposed to be amended as follows:

§ 55.3 [Amended].

1. It is proposed to revoke advisory standard 55.3-7.

2. It is proposed to revise advisory standard 55.3-10 and make it mandatory as follows:

55.3-10 *Mandatory.* Banks, benches, and terrain sloping into occupied working areas shall be examined after every freeze or thaw, and during, as well as after, abnormal rainfall. Should a potential fall of ground be detected, persons in affected working places shall be evacuated immediately.

3. It is proposed to revoke advisory standard 55.3-13.

4. It is proposed to add a new mandatory standard 55.3-58 as follows:

55.3-58 *Mandatory.* Where needed for ground support, rock bolts shall be installed as soon as practicable after an area is exposed.

C. Section 55.4 "Fire prevention and control" is proposed to be amended as follows:

§ 55.4 [Amended].

1. It is proposed to revise advisory standard 55.4-3 and make it mandatory as follows:

55.4-3 *Manatory.* Areas surrounding flammable and combustible liquid storage tanks and electric substations shall be kept free from grass (dry), weeds, underbrush, and other combustible materials for at least 25 feet in all directions.

2. It is proposed to revise advisory standard 55.4-5 and make it mandatory as follows:

55.4-5 *Mandatory.* Fixed unburied flammable and combustible liquid storage tanks shall be mounted securely on firm foundations. Piping shall be provided with flexible connections or other special fittings where necessary to prevent leaks caused from tank settling.

3. It is proposed to replace reserved numbers 55.4-27 with a series of numbers 55.4-27A through 55.4-27Z and to reserve number 55.4-27C through 55.4-27Z.

4. It is proposed to replace number 55.4-39 with a series of numbers 55.4-39A through 55.4-39Z, and to reserve numbers 55.4-39C through 55.4-39Z.

5. It is proposed to revise and renumber advisory standard 55.4-6 and make it mandatory as follows:

55.4-39A *Mandatory.* Buildings or rooms in which oil, grease, flammable liquids, or similar flammable materials are stored shall be of one-hour fire-resistance construction and well ventilated.

6. It is proposed to revise advisory standard 55.4-7 and make it mandatory as follows:

55.4-7 *Mandatory.* Means shall be provided to confine, remove, control, or drain away spilled or flowing flammable or combustible liquids.

V 43 / 177 SE 12 78

7. It is proposed to revise advisory standard 55.4-13 and make it mandatory as follows:

55.4-13 *Mandatory.* In areas where fire is a hazard, materials, such as oily waste and rags which are subject to spontaneous combustion, shall be placed in covered metal containers until disposed of properly.

8. It is proposed to revise advisory standard 55.4-16 and make it mandatory as follows:

55.4-16 *Mandatory.* Drip pans shall be provided to catch leakage or spillage when oil or combustible liquids or flammable liquids are dispensed in a place or manner which may create a hazard. Floor areas where drip pans are used shall be kept clean.

9. It is proposed to revoke advisory standard 55.4-17.

10. It is proposed to revise advisory standard 55.4-25 and make it mandatory as follows:

55.4-25 *Mandatory.* Fire hydrants shall have uniform fittings. Wrenches or keys to open the valves shall be readily available. Where necessary, adapters shall be provided that are capable of connecting hydrant fittings to the hose equipment of local fire departments, and they also shall be readily available.

11. It is proposed to revise advisory standard 55.4-26 and make it mandatory as follows:

55.4-26 *Mandatory.* Water pipes, valves, outlets, hydrants, and hoses that are designated for firefighting purposes shall be inspected every three months and tested annually.

12. It is proposed to revise advisory standard 55.4-30 and make it mandatory as follows:

55.4-30 *Mandatory.* Employees shall be trained in the use of fire extinguishers.

13. It is proposed to revise and renumber advisory standard 55.4-31 and make it mandatory as follows:

55.4-39B *Mandatory.* Emergency firefighting plans and training, in combination with suitable evacuation and rescue plans and equipment, shall be established and such plans shall be coordinated with available professional firefighting organizations. Drills shall be held at least twice a year.

14. It is proposed to revise and renumber advisory standard 55.4-34 and make it mandatory as follows:

55.4-47 *Mandatory.* Belt conveyors in locations where ignition of the conveyor belt would create a hazard to personnel shall be provided with a safety switch to stop the drive pully automatically in the event of excessive slippage.

15. It is proposed to revise and renumber advisory standard 55.4-39 and make it mandatory as follows:

55.4-27A *Mandatory.* No self-propelled mobile equipment shall be operated without a suitable fire extinguisher accessible to the operator.

16. It is proposed to revise advisory standard 55.4-41 and make it mandatory as follows:

55.4-41 *Mandatory.* Every building or structure, new or old, designed for human occupancy shall be provided with exits sufficient to permit the prompt escape of occupants in case of fire or other emergency. The design of exits and other safeguards shall be such that reliance for safety to life in case of fire or other emergency will not depend solely on any single safeguard; additional safeguards shall be provided for life safety in case any single safeguard is ineffective due to some human or mechanical failure.

17. It is proposed to revise and renumber advisory standard 55.4-49 and make it mandatory as follows:

55.4-27B *Mandatory.* All flammable and combustible waste materials, grease, lubricants, or flammable liquids shall be disposed of in a manner to prevent an accumulation where they can create a fire hazard to personnel.

D. Section 55.5 "Air quality and physical agents" is proposed to be amended as follows:

§ 55.5 [Amended].

1. It is proposed to revise advisory standard 55.5-4 and make it mandatory as follows:

55.5-4 *Mandatory.* At muckpiles, haulage roads, rock transfer points, crushers, and other points, where dust is produced in amounts sufficient to cause a health or safety hazard, such dust shall be suitably controlled.

E. Section 55.6 "Explosives" is proposed to be amended as follows:

§ 55.6 [Amended].

1. It is proposed to revoke advisory standards 55.6-3 and 55.6-4.

2. It is proposed to revise advisory standard 55.6-7 and make it mandatory as follows:

55.6-7 *Mandatory.* Explosives, detonators, and related materials such as safety fuse and detonating cord shall be:

(a) Stored in a manner to facilitate use of oldest stocks first.

(b) Stored according to brand and grade in such a manner as to facilitate identification.

(c) Stored with their top sides up.

(d) Stacked in a stable manner but not more than eight (8) feet high.

3. It is proposed to revoke advisory standard 55.6-9 and 55.6-10.

4. It is proposed to revise advisory standard 55.6-48 and make it mandatory as follows:

55.6-48 *Mandatory.* Explosives and blasting agents shall be transported without undue delay, and over routes and at times that expose a minimum number of persons

5. It is proposed to revoke advisory standard 55.6-55.

6. It is proposed to revise advisory standard 55.6-98 and make it mandatory as follows:

55.6-98 *Mandatory.* (a) Primers containing a detonator shall be prepared with the detonator contained securely and completely within the explosive charge or within a suitable tunnel or cap well.

(b) When using detonating cord to initiate another explosive, connections shall be prepared with the detonating cord threaded through, attached securely to, or otherwise in intimate contact with the explosive charge.

7. It is proposed to revise advisory standard 55.6-106 and make it mandatory as follows:

55.6-106 *Mandatory.* Faces and muckpiles shall be examined by a competent person for undetonated explosives or blasting agents and any undetonated explosives or blasting agents found shall be disposed of safely.

8. It is proposed to revise advisory standard 55.6-109 and make it mandatory as follows:

55.6-109 *Mandatory.* Safety fuse, ignitor cord, and detonating cord shall not be used if they have been kinked, bent sharply, or otherwise damaged.

9. It is proposed to revise advisory standard 55.6-118 and make it mandatory as follows:

55.6-118 *Mandatory.* When using safety fuses, where fly rock might damage unlit or burning fuses, timing shall be such that all fuses are burning within the holes before any hole detonates.

10. It is proposed to revise advisory standard 55.6-121 and make it mandatory as follows:

55.6-121 *Mandatory.* When blasting electrically, a blasting galvanometer or other instrument that is specifically designed for testing blasting circuits, shall be used to test:

(a) In surface operations:

(1) Continuity of each electric blasting cap in the borehole prior to the addition of stemming.

(2) Resistance of individual series or the resistance of multiple balanced series to be connected in parallel prior to their connection to the blasting line.

(3) Continuity of blasting lines prior to the connection of electric blasting cap series.

(4) Total blasting circuit resistance prior to connection to the power source.

(b) In underground operations:

(1) Continuity of each electric blasting cap series.

(2) Continuity of blasting lines prior to the connection of electric blasting caps.

11. It is proposed to revise advisory standard 55.6-130 and make it mandatory as follows:

55.6-130 *Mandatory.* At least a 15-foot gap shall be provided between the blasting circuit and the electric power source.

12. It is proposed to revise advisory standard 55.6-132 and make it mandatory as follows:

55.6-132 *Mandatory.* Delay connectors shall be treated and handled with the same safety precautions as detonators.

13. It is proposed to add a new mandatory standard 55.6-139.

55.6-139 *Mandatory.* Blasting areas shall not be reentered after firing until concentrations of smoke, dust, and fumes have been reduced to safe limits as required and determined in mandatory standards 55.5-1 and 55.5-2.

14. It is proposed to add a new mandatory standard 55.6-140 and make it mandatory as follows:

55.6-140 *Mandatory.* Blasting circuits and electric blasting caps (which are capable of being initiated by conventional power sources) shall be protected from sources of extraneous electricity.

15. It is proposed to revoke advisory standard 55.6-167.

16. It is proposed to revise and renumber advisory standard 55.6-169 and make it mandatory as follows:

55.6-142 *Mandatory.* Explosives or blasting agents shall not be loaded into drilled or sprung holes that could result in premature detonation from heat.

17. It is proposed to revise advisory standard 55.6-190 and make it mandatory as follows:

55.6-190 *Mandatory.* Ammonium nitrate based blasting agents shall be mixed and stored in accordance with the mixing and storage provisions in Bureau of Mines Information Circular 8179 "Safety Recommendations for Sensitized Ammonium Nitrate Blasting Agents", which is hereby incorporated by reference and made a part hereof. IC 8179 is available at each Metal and Nonmetal Mine Safety and Health District and Subdistrict Office of the Mine Safety and Health Administration.

18. It is proposed to revoke advisory standards 55.6-192 and 55.6-196.

F. Section 55.7 "Drilling" is proposed to be amended as follows:

§ 55.7 [Amended]

1. It is proposed to revoke advisory standard 55.7-1.

2. It is proposed to establish a series of numbers 55.7-50 through 55.7-100, and to reserve numbers 55.7-55 through 55.7-100

3. It is proposed to revise and renumber advisory standard 55.7-6 and make it mandatory as follows:

55.7-50 *Mandatory.* Receptacles or racks shall be provided for drill steel and tools stored or carried on drills.

4. It is proposed to revise and renmber advisory standard 55.7-7 and make it mandatory as follows:

55.7-51 *Mandatory.* To prevent injury to personnel, tools and other objects shall not be left loose on the mast or drill platform.

5. It is proposed to revise advisory standard 55.7-9 and make it mandatory as follows:

55.7-9 *Mandatory.* The drill helper when used shall be in sight of the operator at all times and shall assist the operator while the drill is being moved to a new drilling area.

6. It is proposed to revise advisory standard 55.7-14 and make it mandatory as follows:

55.7-14 *Mandatory.* Persons operating or working near jackhammers, jackleg drills, or other drilling machines, shall be instructed in the safe operation of such equipment and the potential hazards involved in case the steel breaks or bends.

7. It is proposed to revise and renumber advisory standard 55.7-15 and make it mandatory as follows:

55.7-52 *Mandatory.* Persons shall not drill from positions that hinder their access to the control levers, or from insecure staging, or from atop equipment not suitable for this purpose.

8. It is proposed to revoke advisory standards 55.7-16 and 55.7-17.

9. It is proposed to revise and renumber advisory standard 55.7-19 and make it mandatory as follows:

55.7-53 *Mandatory.* Before handheld drills are moved from one working area to another, air shall be turned off and bled from the hose.

10. It is proposed to add a new mandatory standard 55.7-54 as follows:

55.7-54 *Mandatory.* Drill operators shall be certain that all persons are in the clear before starting or moving drilling equipment.

G. Section 55.8 "Rotary jet piercing" is proposed to be amended as follows:

§ 55.8 [Amended]

1. It is proposed to revise advisory standard 55.8-1 and make it mandatory as follows:

55.8-1 *Mandatory.* Jet piercing drills shall be provided with: (a) A system to pressurize operator's cabs, when the cabs are provided; (b) A protective cover over the oxygen flow indicator.

2. It is proposed to revise advisory standard 55.8-4 and make it mandatory as follows:

55.8-4 *Mandatory.* With equipment requiring refueling at locations other than fueling stations, a system for fueling from the ground without spill shall be provided.

H. Section 55.9 "Loading, hauling, dumping" is proposed to be amended as follows:

§ 55.9 [Amended]

1. It is proposed to revise advisory standard 55.9-1 and make it mandatory as follows:

55.9-1 *Mandatory.* Self-propelled equipment that is to be used during a shift shall be inspected by the equipment operator before being placed in operation. Equipment defects affecting safety shall be reported to, and recorded by, the mine operator. The record shall be maintained at the mine or nearest mine office for at least six (6) months from the date the defects are recorded. Such records shall be made available for inspection by the Secretary of Labor or his authorized representative.

2. It is proposed to revoke advisory standard 55.9-8.

3. It is proposed to revise advisory standard 55.9-10 and make it mandatory as follows:

55.9-10 *Mandatory.* Equipment operator's cabs shall be constructed to permit operators to see without straining and shall be reasonably comfortable.

4. It is proposed to revise advisory standard 55.9-16 and make it mandatory as follows:

55.9-16 *Mandatory.* Roadbeds, rails, joints, switches, frogs, and other trackage elements on railroads shall be designed, installed and maintained in a safe manner consistent with the speed and type of haulage.

5. It is proposed to revoke advisory standard 55.9-18.

6. It is proposed to revise advisory standard 55.9-29 and make it mandatory as follows:

55.9-29 *Mandatory.* Operators shall sit facing the direction of travel while operating equipment with dual controls.

7. It is proposed to revise advisory standard 55.9-34 and make it mandatory as follows:

55.9-34 *Mandatory.* Haulage equipment shall be loaded in a manner to minimize spillage during haulage.

8. It is proposed to revise advisory standard 55.9-63 and make it mandatory as follows:

55.9-63 *Mandatory.* Ramps and dumping facilities shall be of substantial construction. They shall have suitable width, clearance, and headroom to accommodate the equipment serviced.

9. It is proposed to revise advisory standard 55.9-70 and make it mandatory as follows:

55.9-70 *Mandatory.* A tow bar of substantial construction shall be used

to tow heavy equipment unless the use of another suitable means of controlling the towed equipment proves advisable. A substantial safety chain or wire rope shall be used in conjunction with the tow bar or primary rigging.

10. It is proposed to revoke advisory standard 55.9-81.

11. It is proposed to revise advisory standard 55.9-82 and make it mandatory as follows:

55.9-82 *Mandatory.* Persons working in enclosed production equipment cabs where extreme weather and environmental conditions exist shall be protected by air conditioning, or heater with defroster, or both, which shall be maintained in a good working condition.

I. Section 55.10 "Aerial tramways" is proposed to be amended as follows:

§ 55.10 [Amended].

1. It is proposed to revise advisory standard 55.10-1 and make it mandatory as follows:

55.10-1 *Mandatory.* Buckets shall not be overloaded, and feed shall be regulated to prevent spillage.

2. It is proposed to revise advisory standard 55.10-2 and make it mandatory as follows:

55.10-2 *Mandatory.* Inspection and maintenance of carriers including loading and unloading mechanisms, ropes and supports, and brakes shall be performed by competent persons following recommendations of the manufacturer, and as conditions warrant.

3. It is proposed to revise advisory standard 55.10-4 and make it mandatory as follows:

55.10-4 *Mandatory.* Positive-action-type brakes and devices which apply the brakes automatically in the event of a power failure shall be provided on aerial tramways.

4. It is proposed to revise advisory standard 55.10-5 and make it mandatory as follows:

55.10-5 *Mandatory.* Track cable connections shall not obstruct the passage of carriage wheels.

5. It is proposed to revise advisory standard 55.10-6 and make it mandatory as follows:

55.10-6 *Mandatory.* Towers shall be suitably protected from swaying buckets.

J. Section 55.11 "Travelways and Escapeways" is proposed to be amended as follows:

§ 55.11 [Amended].

1. It is proposed to revise advisory standard 55.11-4 and make it mandatory as follows:

55.11-4 *Mandatory.* Portable rigid ladders shall be provided with suitable bases; and when used, they shall be securely placed.

2. It is proposed to revise advisory standard 55.11-7 and make it mandatory as follows:

55.11-7 *Mandatory.* Wooden members of ladders shall not be painted except with a transparent finish.

3. It is proposed to revise advisory standard 55.11-8 and make it mandatory as follows:

55.11-8 *Mandatory.* Ladderways, stairways, walkways, ramps, and platforms shall be kept free of material which could cause stumbling or slipping hazards, or injure persons below.

4. It is proposed to revise advisory standard 55.11-10 and make it mandatory as follows:

55.11-10 *Mandatory.* Vertical clearance above stair steps shall be a minimum of 7 feet or suitable warning shall be provided to indicate an impaired clearance.

5. It is proposed to revise advisory standard 55.11-11 and make it mandatory as follows:

55.11-11 *Mandatory.* Persons climbing or descending ladders shall face the ladders and have both hands free for climbing.

6. It is proposed to revoke advisory standard 55.11-15.

7. It is proposed to revise advisory standard 55.11-17 and make it mandatory as follows:

55.11-17 *Mandatory.* Fixed ladders shall not incline backwards.

8. It is proposed to revise advisory standard 55.11-25 and make it mandatory as follows:

55.11-25 *Mandatory.* When ladders are used to ascend to heights exceeding 20 feet (except on mobile equipment), landing platforms shall be provided for each 30 feet of height or fraction thereof, except that where no cage, well or ladder safety device is provided, landing platforms shall be provided for each 20 feet of height or fraction thereof. Each ladder section shall be offset from adjacent sections. Where installation conditions (even for a short, unbroken length) require that adjacent sections be offset, landing platforms shall be provided at each offset.

(a) Where a person has to step a distance greater than 12 inches from the centerline of the rung of a ladder to the nearest edge of structure or equipment, a landing platform shall be provided. The minimum step-across distance shall be 2½ inches.

(b) All landing platforms shall be equipped with standard railings and toeboards, so arranged as to give safe access to the ladder. Platforms shall not be less than 24 inches in width and 30 inches in length.

(c) One rung of any section ladder shall be located at the level of the landing laterally served by the ladder. Where access to the landing is through the ladder, the same rung spacing as used on the ladder shall be used from the landing platform to the first rung below the landing.

(d) Ladder safety devices may be used on tower, water tank, and chimney ladders over 20 feet in unbroken length in lieu of cage protection. No landing platform is required in these cases. All ladder safety devices such as those that incorporate life belts, friction brakes, and sliding attachments shall meet the design requirements of the ladders which they serve.

9. It is proposed to revise advisory standard 55.11-26 and make it mandatory as follows:

55.11-26 *Mandatory.* Cages or wells.

(a) Cages or wells (except on chimney ladders) shall be built, as shown on the applicable drawings, covered in detail in Figures 1, 2 and 3, or of equivalent construction.

(b) Cages or wells (except as provided in subparagraph (d) of standard 55.11-25) conforming to the dimensions shown in Figures 1, 2, and 3 shall be provided on ladders of more than 20 feet to a maximum unbroken length of 30 feet.

(c) Cages shall extend a minimum of 42 inches above the top of a landing, unless other acceptable protection is provided.

(d) Cages shall extend down the ladder to a point not less than 7 feet nor more than 8 feet above the base of the ladder, with bottom flared not less than 4 inches, or a portion of cage opposite ladder shall be carried to the base.

(e) Cages shall not extend less than 27 nor more than 28 inches from the centerline of the rungs of the ladder. Cages shall not be less than 27 inches in width. The insides shall be clear of projections. Vertical bars shall be located at a maximum spacing of 40 degrees around the circumference of the cage; this will give a maximum spacing of approximately 9½ inches, center to center.

(f) Ladder wells shall have a clear width of at least 15 inches measured each way from the centerline of the ladder. Smoothwalled wells shall be a minimum of 27 inches from the centerline of rungs to the well wall on the climbing side of the ladder. Where other obstructions on the climbing side of the ladder exist, there shall be a minimum of 30 inches from the centerline of the rungs.

K. Section 55.12 "Electricity" is proposed to be amended as follows:

§ 55.12 [Amended]

1. It is proposed to revise advisory standard 55.12-4 and make it mandatory as follows:

55.12-4 *Mandatory.* Electrical conductors shall be of sufficient size and current-carrying capacity for normal operation so that a rise in temperature resulting from such normal operation will not damage the insulating materials. Suitable protection from mechanical injury shall be provided.

2. It is proposed to revise advisory standard 55.12-19 and make it mandatory as follows:

55.12-19 *Mandatory.* Where access is necessary, suitable clearance shall be provided at stationary electrical equipment or switchgear.

3. It is proposed to revise advisory standard 55.12-22 and make it mandatory as follows:

55.12-22 *Mandatory.* Areas containing major electrical installations shall be entered only by authorized persons.

4. It is proposed to revoke advisory standard 55.12-24.

5. It is proposed to revise advisory standard 55.12-29 and make it mandatory as follows:

55.12-29 *Mandatory.* Electric equipment and wiring shall be inspected by a competent person as necessary to assure safe operating conditions.

6. It is proposed to revise advisory standard 55.12-31 and make it mandatory as follows:

55.12-31 *Mandatory.* Electric circuits and equipment shall be designed, constructed, installed and maintained to prevent injury and safeguard personnel.

7. It is proposed to revise advisory standard 55.12-35 and make it mandatory as follows:

55.12-35 *Mandatory.* Lamp sockets exposed to the weather or wet conditions shall be of a weatherproof type.

8. It is proposed to revise advisory standard 55.12-38 and make it mandatory as follows:

55.12-38 *Mandatory.* Trailing cables shall be attached to machines in a suitable manner to protect the cable from damage and to prevent strain on the electrical connections.

9. It is proposed to revise advisory standard 55.12-39 and make it mandatory as follows:

55.12-39 *Mandatory.* Surplus trailing cables to shovels, cranes and similar equipment shall be stored in cable boats or on reels mounted on the equipment or otherwise protected from mechanical damage.

10. It is proposed to revoke advisory standards 55.12-44 and 55.12-49.

11. It is proposed to revise advisory standard 55.12-50 and make it mandatory as follows:

55.12-50 *Mandatory.* Trolley wires shall be installed at least 7 feet above rails, where height permits, and aligned and supported to suitably control sway and sag.

12. It is proposed to revoke advisory standards 55.12-51 and 55.12-52.

13. It is proposed to revise advisory standard 55.12-53 and make it mandatory as follows:

55.12-53 *Mandatory.* Ground wires for lighting circuits powered from trolley wires shall be connected securely to the ground-return circuit.

14. It is proposed to revise advisory standard 55.12-54 and make it mandatory as follows:

55.12-54 *Mandatory.* Persons shall be instructed to carry tools and supplies so they will not come in contact with bare power conductors.

L. Section 55.13 "Compressed air and boilers" is proposed to be amended as follows:

§ 55.13 [Amended]

1. It is proposed to revise advisory standard 55.13-10 and make it mandatory as follows:

55.13-10 *Mandatory.* Reciprocating type air compressors rated over 10 horsepower shall be equipped with automatic temperature-actuated shutoff mechanisms unless fusible plugs were previously installed in the compressor discharge lines.

Temperature-actuated shutoff mechanisms shall be set to shut off at temperatures not to exceed the normal operating temperature of the compressor by more than 25 percent. Fusible plugs, where installed prior to the adopting of this standard, are acceptable if they melt at temperatures at least 50° less than the flash point of the lubricating oil.

2. It is proposed to revise advisory standard 55.13-11 and make it mandatory as follows:

55.13-11 *Mandatory.* Compressors and air receiver tanks shall be equipped with one or more automatic pressure relief valves. The total relieving capacity of such relief valves shall be such as to prevent pressure from exceeding the maximum allowable working pressure in a receiver tank by not more than 10 percent. Air receiver tanks also shall be equipped with: Indicating pressure gages designed to accurately measure pressure within the air receiver tanks; drain valves installed at the lowest point of the receiver tanks to provide for the removal of accumulated oil and moisture; and traps to prevent oil, moisture, and other contaminants from being expelled through the discharge lines.

3. It is proposed to revise advisory standard 55.13-12 and make it mandatory as follows:

55.13-12 *Mandatory.* Compressor air intakes shall be installed to insure that only clean, uncontaminated air enters the compressors.

4. It is proposed to revise advisory standard 55.13-13 and make it mandatory as follows:

55.13-13 *Mandatory.* Accumulations of water and oil shall be drained from compressed air receivers at least once each day the compressor is in operation.

5. It is proposed to revise advisory standard 55.13-14 and make it mandatory as follows:

55.13-14 *Mandatory.* Compressed air receivers shall have inspection openings. When the tanks are over 36 inches in diameter, the inspection openings shall be of a size to permit entry by persons.

6. It is proposed to revise advisory standard 55.13-15 and make it mandatory as follows:

55.13-15 *Mandatory.* Compressed air receivers and other unfired pressure vessels shall be inspected in accordance with the applicable chapters of the National Board Inspection Code, a Manual for Boiler and Pressure Vessel Inspectors, 1977, approved by the National Board Executive Committee on January 27, 1977, and published by the National Board of Boiler and Pressure Vessel Inspectors, which is hereby incorporated by reference and made a part hereof. Records of such inspections shall be kept. The National Board Inspection Code of 1977 may be examined at any Metal and Nonmetal Mine Health and Safety District Office, MSHA, and may be obtained from the National Board of Boiler and Pressure Vessel Inspectors, 1055 Crupper Avenue, Columbus, Ohio 43229.

7. It is proposed to revise advisory standard 55.13-16 and make it mandatory as follows:

55.13-16 *Mandatory.* Compressors shall be operated and lubricated in accordance with the manufacturer's recommendations.

8. It is proposed to revise advisory standard 55.13-17 and make it mandatory as follows:

55.13-17 *Mandatory.* Compressor discharge pipes where carbon buildup may occur shall be cleaned periodically as part of a systematic maintenance schedule and at least annually.

9. It is proposed to revoke advisory standard 55.13-18.

10. It is proposed to revise advisory standard 55.13-30 and make it mandatory as follows:

55.13-30 *Mandatory.* (a) All boilers shall be equipped with water level gages, pressure gages, automatic pressure-relief valves, blowdown piping, and other approved safety devices to protect against hazards from overpressure, flameouts, fuel interruptions and low water level, all as required by

the appropriate sections of the codes listed below.

(b) These gages, devices, and pipings shall be designed, installed, operated, maintained, repaired, altered, inspected, and tested by competent persons in accordance with the following listed sections, or chapters and appendixes—as applicable—of:

(1) The ASME Boiler and Pressure Vessel Code, 1977, published by the American Society of Mechanical Engineers.

Section and Title

I—Power boilers.
II—Material specifications.
II—Part A—Ferrous.
II—Part B—Nonferrous.
II—Part C—Welding rods, electrodes, and filler metal.
IV—Heating boilers.
V—Nondestructive examination.
VI—Recommended rules for care and operations of heating boilers.
VII—Recommended rules for care of power boilers.

(2) The National Board Inspection Code, a Manual for Boiler and Pressure Vessel Inspectors, 1977, approved by the National Board Executive Committee on January 27, 1977, and published by the National Board of Boiler and Pressure Vessel Inspectors.

Chapter and Title

I—Glossary terms.
II—Inspection of boilers and pressure vessels.
III—Repairs and alterations to boilers and pressure vessels by welding.
IV—Shop inspection of boilers and pressure vessels.
V—In-service inspection of pressure vessels by authorized owner-user inspection agencies.

Appendix and Title

A—Safety and safety relief valves.
B—Non-ASME code boilers and pressure vessels
C—Storage of mild steel covered arc welding electrodes.
D—National Board "R" (repair) symbol stamp.
E—Owner-user inspection agencies.
F—Inspection forms.

(c) Records of inspections and repairs shall be kept and made available to the Secretary or his authorized representative.

(d) Sections of the ASME Boiler and Pressure Vessel Code, 1977, to which references are made in this standard are hereby incorporated by reference and made a part hereof, and may be obtained from the American Society of Mechanical Engineers, United Engineering Center, 345 East Forty-Seventh Street, New York, N.Y. 10017. Chapters and appendixes of the National Board Inspection Code of 1977 to which references are made in this standard are hereby incorporated by reference and made a part hereof, and may be obtained from the National Board of Boiler and Pressure Vessel Inspectors, 1055 Crupper Avenue, Columbus, Ohio 43229. These publications may be examined at any Metal and Nonmetal Mine Safety and Health District Office of the Mine Safety and Health Administration.

11. It is proposed to revoke advisory standards 55.13-31, 55.13-32, 55.13-33, and 55.13-34.

M. Section 55.14 "Use of Equipment" is proposed to be amended as follows:

§ 55.14 [Amended]

1. It is proposed to revise advisory standard 55.14-3 and make it mandatory as follows:

55.14-3 *Mandatory.* Guards at conveyor-drive, conveyor-head, and conveyor-tail pulleys shall extend a distance sufficient to prevent a person from accidentally reaching behind the guard and becoming caught between the belt and the pulley.

2. It is proposed to revoke advisory standards 55.14-4 and 55.14-5.

3. It is proposed to revise advisory standard 55.14-7 and make it mandatory as follows:

55.14-7 *Mandatory.* Guards shall be of substantial construction and maintained to provide the required protection.

4. It is proposed to revise advisory standard 55.14-11 and make it mandatory as follows:

55.14-11 *Mandatory.* Guards, shields, or other suitable protection shall be provided in areas where flying or falling materials present a hazard.

5. It is proposed to revise advisory standard 55.14-25 and make it mandatory as follows:

55.14-25 *Mandatory.* Machinery or equipment that is to be used during the shift shall be inspected at the beginning of each shift by a competent person. Defects affecting safety shall be corrected before the machinery or equipment is used.

6. It is proposed to revise advisory standard 55.14-27 and make it mandatory as follows:

55.14-27 *Mandatory.* Operation of machinery or equipment shall be assigned only to competent persons; provided, however, that trainees may be permitted to operate machinery or equipment under the guidance of competent persons.

7. It is proposed to revoke advisory standard 55.14-28.

8. It is proposed to revise advisory standard 55.14-36 and make it mandatory as follows:

55.14-36 *Mandatory.* Tools and equipment shall be used within the design capacity for which they are intended and designed.

N. Section 55.15 "Personal protection" is proposed to be amended as follows:

§ 55.15 [Amended]

1. It is proposed to revoke advisory standards 55.15-8, 55.15-9, and 55.15-10.

2. It is proposed to revise advisory standard 55.15-11 and make it mandatory as follows:

55.15-11 *Mandatory.* Employees shall be instructed in the hazards of wearing finger rings and other jewelry on the job.

3. It is proposed to revoke advisory standard 55.15-13.

O. Section 55.16 "Materials storage and handling" is proposed to be amended as follows:

§ 55.16 [Amended].

1. It is proposed to revise advisory standard 55.16-1 and make it mandatory as follows:

55.16-1 *Mandatory.* When stacked or stored, supplies shall not create a stumbling or fall-of-material hazard.

2. It is proposed to revise advisory standard 55.16-2 and make it mandatory as follows:

55.16-2 *Mandatory.* Bins, hoppers, silos, tanks, and surge piles, where loose and unconsolidated materials are stored, handled, or transferred shall be:

(a) Equipped with mechanical devices or other effective means of handling material so that during normal operations persons are not required to enter or work where they are exposed to entrapment by the caving or sliding of these materials;

(b) Equipment with supply and discharge operating controls which are located so as to eliminate hazards to persons from spills or accidental overruns;

(c) Provided with suitable walkways where persons are required to walk over or around;

(d) Provided with ladders, platforms, or stagings where persons are required to enter a material storage facility for maintenance or inspection purposes. Where a possibility exists that moving material may create a hazardous condition, no person shall be allowed to enter this area for any reason, unless the supply and discharge of materials has ceased, the supply and discharge equipment is locked out, and the person is wearing a safety belt or harness equipped with a lifeline suitably fastened. Another person suitably secured with safety belt and line shall be stationed at a point near where the lifeline is fastened, so that he can adjust it or keep it tight as needed with minimum slack in the said lifeline at all times.

3. It is proposed to revise advisory standard 55.16-7 and make it mandatory as follows:

55.16-7 *Mandatory.* Hitches and slings used to hoist materials shall be designed and suitably used for the particular materials handled. Taglines shall be attached to loads that may require steadying or guidance while suspended.

4. It is proposed to revoke advisory standard 55.16-8.

5. It is proposed to revise advisory standard 55.16-10 and make it mandatory as follows:

55.16-10 *Mandatory.* To protect personnel, material shall not be dropped from an overhead elevation until the drop area is first cleared of personnel, and then is either guarded or a suitable warning given.

6. It is proposed to revise advisory standard 55.16-12 and make it mandatory as follows:

55.16-12 *Mandatory.* Concentrated acids and alkalies shall be stored in a manner that these chemicals cannot inadvertently mix with each other or with other substances with which they will react violently or cause the liberation of dangerous fumes.

7. It is proposed to revise advisory standard 55.16-13 and make it mandatory as follows:

55.16-13 *Mandatory.* A suitable warning shall be given before molten metal is poured, or a container of molten metal is moved.

8. It is proposed to revise advisory standard 55.16-16 and make it mandatory as follows:

55.16-16 *Mandatory.* Fork and other similar type lift trucks shall be operated:

(a) With the uprights tilted back to steady and secure load.

(b) With the load in the upgrade position when ascending or descending grades in excess of 10 percent.

(c) Except for minor adjustments, loads shall not be raised or lowered enroute.

(d) Unloaded trucks shall travel on all grades with the load engaging means downgrade.

9. It is proposed to add a new mandatory standard 55.16-17 as follows:

55.16-17 *Mandatory.* Where the stretching or contraction of a hoist rope could create a hazard, chairs or other suitable blocking shall be used to support conveyances at shaft landings before heavy equipment is loaded or unloaded.

P. Section 55.18 "Safety programs" is proposed to be amended as follows:

§ 55.18 [Amended].

1. It is proposed to revise advisory standard 55.18-1 and make it mandatory as follows:

55.18-1 *Mandatory.* The operator shall establish a definite, effective, and continually-functioning safety program which shall be made available to all personnel and make every attempt to prevent accidents and increase safety. All personnel shall actively participate in the safety program.

2. It is proposed to revise advisory standard 55.18-2 and make it mandatory as follows:

55.18-2 *Mandatory.* (a) Each active working area or installation shall be examined at least once each shift, or more often if necessary, by a supervisor or another competent person for hazardous conditions. Such conditions observed shall be promptly corrected by the operator.

(b) A condition noted by the person conducting the examination that may present an imminent danger shall be brought to the immediate attention of the operator who shall withdraw all persons from the area affected, except persons referred to in section 104(c) of the Act, until the danger is abated.

(c) Any hazardous conditions observed by the supervisor or competent person making the examination shall be uniformly recorded and will include the date, the condition observed and the location of the condition. The record shall be available for review by the Secretary or his authorized representative.

(d) All reports shall include the action taken to abate any hazardous conditions found and shall be countersigned by:

(1) The mine foreman, or

(2) The mine superintendent, or

(3) The person designated by the operator as responsible for safety and health at the mine.

3. It is proposed to revoke advisory standards 55.18-3, 55.18-4, 55.18-5 and 55.18-7.

4. It is proposed to revise advisory standard 55.18-8 and make it mandatory as follows:

55.18-8 *Mandatory.* To assure that work is being done in a safe manner, each active working place shall be visited each shift by a supervisor, or another competent person shall be designated to check that working place.

5. It is proposed to revise advisory standard 55.18-9 and make it mandatory as follows:

55.18-9 *Mandatory.* A supervisor or a designated competent person shall be in attendance on the property when persons are working to take charge in case of an emergency.

6. It is proposed to revoke advisory standard 55.18-11.

7. It is proposed to revise advisory standard 55.18-13 and make it mandatory as follows:

55.18-13 *Mandatory.* A suitable communications system shall be provided at the mine site in order to summons assistance in the event of an emergency.

Q. Section 55.19 "Man hoisting" is proposed to be amended as follows:

§ 55.19 [Amended]

1. It is proposed to revise advisory standard 55.19-12 and make it mandatory as follows:

55.19-12 *Mandatory.* Where grooved drums are used, the grooves shall be of suitable size and pitch for the rope used.

2. It is proposed to revoke advisory standard 55.19-20.

3. It is proposed to revise advisory standard 55.19-25 and make it mandatory as follows:

55.19-25 *Mandatory.* Wire ropes shall be used and maintained in accordance with the manufacturer's recommendations, or the equivalent.

4. It is proposed to revise advisory standard 55.19-35 and make it mandatory as follows:

55.19-35 *Mandatory.* Headframes shall be of substantial construction.

5. It is proposed to revise advisory standared 55.19-36 and make it mandatory as follows:

55.19-36 *Mandatory.* Headframes shall be high enough to provide clearance for overtravel and safe stopping of the conveyance.

6. It is proposed to revise advisory standard 55.19-37 and make it mandatory as follows:

55.19-37 *Mandatory.* Fleet angles shall not be greater than one and one-half degrees for smooth drums, and two degrees for grooved drums.

7. It is proposed to revise advisory standard 55.19-39 and make it mandatory as follows:

55.19-39 *Mandatory.* All man hoists, except emergency escape hoists, installed after the effective date of this standard shall have drums and sheaves of diameters at least 60 times the rope diameter.

8. It is proposed to revise advisory standard 55.19-67 and make it mandatory as follows:

55.19-67 *Mandatory.* During shift changes, an authorized person shall be in charge of each man trip.

9. It is proposed to revise advisory standard 55.19-72 and make it mandatory as follows:

55.19-72 *Mandatory.* When combinations of cages and skips are used in the same compartment, the cages shall be totally enclosed to protect personnel from flying material and the hoist speed reduced to man-speed as defined in section 55.19-61, but not to exceed 1,000 feet per minute. Muck shall not be hoisted with personnel during shift changes.

10. It is proposed to revise advisory standard 55.19-74 and make it mandatory as follows:

55.19-74 *Mandatory.* Persons shall not ride the bail, rim, bonnet, or crosshead of any shaft conveyance except where necessary for inspection and maintenance, and then only when suitable protection for persons is provided.

V 4 3 / 1 7 7

11. It is proposed to revise advisory standard 55.19-78 and make it mandatory as follows:

55.19-78 *Mandatory.* All buckets shall be stopped after being raised about three (3) feet above the shaft bottom. A bucket shall be stabilized before a hoisting signal is given to continue hoisting the bucket to the crosshead. After a hoisting signal is given, hoisting to the crosshead shall be at the minimum speed. The signaling device shall be attended constantly until a bucket reaches the guides. When persons are hoisted, the signaling devices shall be attended until the crosshead has been engaged.

12. It is proposed to revise advisory standard 55.19-81 and make it mandatory as follows:

55.19-81 *Mandatory.* Conveyances controlled by a hoistman, when not in use, shall be released and the conveyance shall be raised or lowered a suitable distance to prevent persons from boarding or loading the conveyance.

13. It is proposed to revise advisory standard 55.19-91 and make it mandatory as follows:

55.19-91 *Mandatory.* Hoistmen shall accept hoisting instructions only by the regular signaling system unless it is out of order. During an emergency, the hoistman shall accept instructions only from authorized persons to direct movement of the conveyance.

14. It is proposed to revise advisory standard 55.19-93 and make it mandatory as follows:

55.19-93 *Mandatory.* A standard code of hoisting signals shall be adopted and used at each mine. The movement of a shaft conveyance on a "one bell" signal shall be prohibited.

15. It is proposed to revise advisory standard 55.19-104 and make it mandatory as follows:

55.19-104 *Mandatory.* Suitable clearance at shaft stations shall be provided and maintained so as to allow for the safe movements of persons and the safe passage and handling of equipment and materials.

16. It is proposed to revise advisory standard 55.19-124 and make it mandatory as follows:

55.19-124 *Mandatory.* To distribute the wear of the rope, hoist ropes other than those on friction hoists shall be cut off at least six (6) feet above the highest connection to the conveyance, at intervals not to exceed one (1) year unless conditions of use and/or examination and inspection required in 55.19-126 indicate the necessity of a shorter time interval. The portion of the rope that is cut off shall be examined and inspected by a competent person for damage, corrosion, wear and fatigue.

17. It is proposed to revise advisory standard 55.19-125 and make it mandatory as follows:

55.19-125 *Mandatory.* Hoist ropes wound in multiple layers shall have a suitable length cut off at the drum end at least three (3) times during the anticipated life of the rope and whenever necessary, as determined by the inspection or tests required in standard 55.19-126, to distribute the wear at change of layers and crossover points and to preserve the integrity of the rope. The amount of rope cut off shall not be a whole number multiple of the circumference of the drum.

18. It is proposed to revise advisory standard 55.19-126 and make it mandatory as follows:

55.19-126 *Mandatory.* Hoist ropes shall be examined over its entire active length at least every month to evaluate wear and possible damage. Caliper measurements or non-destructive tests shall be made wherever wear is evident on the rope and at least every six (6) months and whenever necessary as determined by examination, inspection or tests as follows:

(a) Immediately above the socket or clips and above the safety connection;

(b) Where the rope rests on the sheaves;

(c) Where the ropes leave the drums when the conveyances are at the regular stopping point;

(d) Where a layer of rope begins to overlap another layer on the drum;

(e) At 100-foot intervals; measurements shall be made midway between the last previously calipered points.

19. It is proposed to revise advisory standard 55.19-127.

20. It is proposed to revoke advisory standard 55.19-130 and make it mandatory as follows:

55.19-130 *Mandatory.* Empty hoist conveyances shall be operated at least one round trip to assure the hoisting compartment is clear of obstruction before hoisting persons:

(a) After any hoist or shaft repairs or related equipment repairs that might restrict or obstruct conveyance clearance;

(b) After any oversize or overweight material or equipment trips that might restrict or obstruct conveyance clearance;

(c) After blasting in or near the shaft that might restrict or obstruct conveyance clearance;

(d) After remaining idle for one shift or longer.

21. It is proposed to revise advisory standard 55.19-131 and make it mandatory as follows:

55.19-131 *Mandatory.* Hoist conveyance connections shall be inspected at least once during any 24-hour period that the conveyance is used for hoisting persons.

22. It is proposed to revise advisory standard 55.19-132 and make it mandatory as follows:

55.19-132 *Mandatory.* A performance drop test of hoist conveyance safety catches shall be made at the time of installation, or prior to installation, in a mockup of the actual installation and certified to in writing by the manufacturer or registered professional engineer performing the test.

After installation, the conveyance shall be suitably rested at least once before use and the hoist rope slackened to test for the unrestricted functioning of the safety catches and their activitating mechanisms.

Thereafter, the safety catches shall be inspected by a competent person at the beginning of any 24-hour period that the conveyance is to by used, and the unrestricted functioning of the safety catches and their activitating mechanisms shall be tested (as before) at least once at the beginning of any 7-day period during which the conveyance is to be used.

R. Section 55.20 "Miscellaneous" is proposed to be amended as follows:

§ 55.20 [Amended]

1. It is proposed to revoke advisory standards 55.20-4, 55.20-6, and 55.20-7.

2. It is proposed to revise advisory standards 55.20-8 and make it mandatory as follows:

55.20-8 *Mandatory.* Toilet facilities shall be provided at locations that are compatible with the mine operations and that are readily accessible to mine personnel. The facilities shall be kept clean and sanitary. Separate toilet facilities shall be provided for each sex except where toilet facilities will be occupied by no more than one (1) person at a time and can be locked from the inside.

PART 56—HEALTH AND SAFETY STANDARDS—SAND, GRAVEL, AND CRUSHED STONE

S. Section 56.2 "Definitions" is proposed to be amended as follows:

§ 56.2 [Amended]

1. It is proposed to add a definition of "combustible liquid, class two combustible liquid, and class three combustible liquid" as follows:

"Combustible liquid" means a liquid having a flashpoint at or above 100° F. (38° C.). "Class two combustible liquid" means a liquid having a flashpoint at or above 100° F. (38° C.) and below 140° F. (60° C.). "Class three combustible liquid" means a liquid having a flashpoint at or about 140° F. (60° C.) and an auto ignition temperature below 1,500° F. (816° C.).

2. It is proposed to add a definition of "flammable liquid" as follows:

"Flammable liquid" means a liquid having a flashpoint below 100° F. (38° C.), and is designated a class one liquid.

S E 1 2 7 8

3. It is proposed to revise the definition of "flashpoint" as follows:

"Flashpoint" means the minimum temperature of a liquid at which sufficient vapor is given off to form an ignitable mixture with the air near the surface of the liquid or within the vessel used as determined in accordance with the Standard Method of Test for Flashpoint by the Tag Closed Tester, ASTM Designation: D 56-77, American Society for Testing Materials or a Standard Method of Test for Flashpoint by Pensky-Martens Closed Tester, ASTM Designation: D 93-77, whichever is applicable. ASTM D 56-70 and ASTM D 93-73 are hereby incorporated by reference and are made a part hereof and may be examined at any Metal and Nonmetal Mine Safety and Health Subdistrict Office, the Mine Safety and Health Administration, and may be obtained from the American Society of Testing and Materials, 1916 Ray Street, Philadelphia, Pa. 19103.

T. Section 56.3 "Ground control" is proposed to be amended as follows:

§ 56.3 [Amended]

1. It is proposed to revoke advisory standard 56.3-7.

2. It is proposed to revise advisory standard 56.3-10 and make it mandatory as follows:

56.3-10 *Mandatory.* Banks, benches, and terrain sloping into occupied working areas shall be examined after every freeze or thaw, and during, as well as after, abnormal rainfall. Should a potential fall of ground be detected, persons in affected working places shall be evacuated immediately.

3. It is proposed to revoke advisory standard 56.3-13.

4. It is proposed to add a new mandatory standard 56.3-58 as follows:

56.3-58 *Mandatory.* Where needed for ground support, rock bolts shall be installed as soon as practicable after an area is exposed.

U. Section 56.4 "Fire prevention and control" is proposed to be amended as follows:

§ 56.4 [Amended]

1. It is proposed to revise advisory standard 56.4-3 and make it mandatory as follows:

56.4-3 *Mandatory.* Areas surrounding flammable and combustible liquid storage tanks and electric substations shall be kept free from grass (dry), weeds, underbrush, and other combustible materials for at least 25 feet in all directions.

2. It is proposed to revise advisory standard 56.4-5 and make it mandatory as follows:

56.4-5 *Mandatory.* Fixed unburied flammable and combustible liquid storage tanks shall be mounted securely on firm foundations. Piping shall be provided with flexible connections or other special fittings where necessary to prevent leaks caused from tank settling.

3. It is proposed to replace reserved number 56.4-27 with a series of numbers 56.4-27A through 56.4-27Z and to reserve numbers 56.4-27C through 56.4-27Z.

4. It is proposed to replace number 56.4-39 with a series of numbers 56.4-39A through 56.4-39Z, and to reserve numbers 56.4-39C through 56.4-39Z.

5. It is proposed to revise and renumber advisory standard 56.4-6 and make it mandatory as follows:

56.4-39A *Mandatory.* Buildings or rooms in which oil, grease, flammable liquids, or similar flammable materials are stored shall be of 1-hour fire-resistance construction and well ventilated.

6. It is proposed to revise advisory standard 56.4-7 and make it mandatory as follows:

56.4-7 *Mandatory.* Means shall be provided to confine, remove, control, or drain away spilled or flowing flammable or combustible liquids.

7. It is proposed to revise advisory standard 56.4-13 and make it mandatory as follows:

56.4-13 *Mandatory.* In areas where fire is a hazard, materials such as oily waste and rags which are subject to spontaneous combustion, shall be placed in covered metal containers until disposed of properly.

8. It is proposed to revise advisory standard 56.4-16 and make it mandatory as follows:

56.4-16 *Mandatory.* Drip pans shall be provided to catch leakage or spillage when oil or combustible liquids or flammable liquids are dispensed in a place or manner which may create a hazard. Floor areas where drip pans are used shall be kept clean.

9. It is proposed to revoke advisory standard 56.4-17.

10. It is proposed to revise advisory standard 56.4-25 and make it mandatory as follows:

56.4-25 *Mandatory.* Fire hydrants shall have uniform fittings. Wrenches or keys to open the valves shall be readily available. Where necessary, adapters shall be provided that are capable of connecting hydrant fittings to the hose equipment of local fire departments, and they also shall be readily available.

11. It is proposed to revise advisory standard 56.4-26 and make it mandatory as follows:

56.4-26 *Mandatory.* Water pipes, valves, outlets, hydrants, and hoses that are designated for firefighting purposes shall be inspected every 3 months and tested annually.

12. It is proposed to revise advisory standard 56.4-30 and make it mandatory as follows:

56.4-30 *Mandatory.* Employees shall be trained in the use of fire extinguishers.

13. It is proposed to revise and renumber advisory standard 56.4-31 and make it mandatory as follows:

56.4-39B *Mandatory.* Emergency firefighting plans and training, in combination with suitable evacuation and rescue plans and equipment, shall be established and such plans shall be coordinated with available professional firefighting organizations. Drills shall be held at least twice a year.

14. It is proposed to revise and renumber advisory standard 56.4-34 and make it mandatory as follows:

56.4-47 *Mandatory.* Belt conveyors in locations where ignition of the conveyor belt would create a hazard to personnel shall be provided with a safety switch to stop the drive pulley automatically in the event of excessive slippage.

15. It is proposed to revise and renumber advisory standard 56.4-39 and make it mandatory as follows:

56.4-27A *Mandatory.* No self-propelled mobile equipment shall be operated without a suitable fire extinguisher accessible to the operator.

16. It is proposed to revise advisory standard 56.4-41 and make it mandatory as follows:

56.4-41 *Mandatory.* Every building or structure, new or old, designed for human occupancy shall be provided with exits sufficient to permit the prompt escape of occupants in case of fire or other emergency. The design of exits and other safeguards shall be such that reliance for safety to life in case of fire or other emergency will not depend solely on any single safeguard; additional safeguards shall be provided for life safety in case any single safeguard is ineffective due to some human or mechanical failure.

17. It is proposed to revise and renumber advisory standard 56.4-49 and make it mandatory as follows:

56.4-27B *Mandatory.* All flammable and combustible waste materials, grease, lubricants, or flammable liquids shall be disposed of in a manner to prevent an accumulation where they can create a fire hazard to personnel.

V. Section 56.5 "Air quality and physical agents" is proposed to be amended as follows:

§ 56.51 [Amended]

1. It is proposed to revise advisory standard 56.5-4 and make it mandatory as follows:

56.5-4 *Mandatory.* At muckpiles, haulage roads, rock transfer points, crushers, and other points, where dust is produced in amounts sufficient to cause a health or safety hazard, such dust shall be suitably controlled.

W. Section 56.6 "Explosives" is proposed to be amended as follows:

§ 56.6 [Amended]

1. It is proposed to revoke advisory standards 56.6-3 and 56.6-4.

2. It is proposed to revise advisory standard 56.6-7 and make it mandatory as follows:

56.6-7 *Mandatory.* Explosives, detonators, and related materials such as safety fuse and detonating cord shall be:

(a) Stored in a manner to facilitate use of oldest stocks first.

(b) Stored according to brand and grade in such a manner as to facilitate identification.

(c) Stored with their top sides up.

(d) Stacked in a stable manner but not more than eight (8) feet high.

3. It is proposed to revoke advisory standards 56.6-9 and 56.6-10.

4. It is proposed to revise advisory standard 56.6-48 and make it mandatory as follows:

56.6-48 *Mandatory.* Explosives and blasting agents shall be transported without undue delay, and over routes and at times that expose a minimum number of persons.

5. It is proposed to revoke advisory standard 56.6-55.

6. It is proposed to revise advisory standard 56.6-98 and make it mandatory as follows:

56.6-98 *Mandatory.* (a) Primers containing a detonator shall be prepared with the detonator contained securely and completely within the explosive charge or within a suitable tunnel or cap well.

(b) When using detonating cord to initiate another explosive, connections shall be prepared with the detonating cord threaded through, attached securely to, or otherwise in intimate contact with the explosive charge.

7. It is proposed to revise advisory standard 56.6-106 and make it mandatory as follows:

56.6-106 *Mandatory.* Faces and muckpiles shall be examined by a competent person for undetonated explosives or blasting agents and any undetonated explosives or blasting agents found shall be disposed of safely.

8. It is proposed to revise advisory standard 56,6-109 and make it mandatory as follows:

56.6-109 *Mandatory.* Safety fuse, ignitor cord, and detonating cord shall not be used if they have been kinked, bent sharply, or otherwise damaged.

9. It is proposed to revise advisory standard 56.6-118 and make it mandatory as follows:

56.6-118 *Mandatory.* When using safety fuses, where fly rock might damage unlit or burning fuses, timing shall be such that all fuses are burning within the holes before any hole detonates.

10. It is proposed to revise advisory standard 56.6-121 and make it mandatory as follows:

56.6-121 *Mandatory.* When blasting electrically, a blasting galvanometer or other instrument that is specifically designed for testing blasting circuits, shall be used to test:

(a) In surface operations:

(1) Continuity of each electric blasting cap in the borehole prior to the addition of stemming.

(2) Resistance of individual series or the resistance of multiple balanced series to be connected in parallel prior to their connection to the blasting line.

(3) Continuity of blasting lines prior to the connection of electric blasting cap series.

(4) Total blasting circuit resistance prior to connection to the power source.

(b) In underground operations:

(1) Continuity of each electric blasting cap series.

(2) Continuity of blasting lines prior to the connection of electric blasting caps.

11. It is proposed to revise advisory standard 56.6-130 and make it mandatory as follows:

56.6-130 *Mandatory.* At least a 15-foot gap shall be provided between the blasting circuit and the electric power source.

12. It is proposed to revise advisory standard 56.6-132 and make it mandatory as follows:

56.6-132 *Mandatory.* Delay connectors shall be treated and handled with the same safety precautions as detonators.

13. It is proposed to add a new mandatory standard 56.6-139.

56.6-139 *Mandatory.* Blasting areas shall not be reentered after firing until concentrations of smoke, dust, and fumes have been reduced to safe limits as required and determined in mandatory standards 56.5-1 and 56.5-2.

14. It is proposed to add a new mandatory standard 56.6-140 and make it mandatory as follows:

56.6-140 *Mandatory.* Blasting circuits and electric blasting caps (which are capable of being initiated by conventional power sources) shall be protected from sources of extraneous electricity.

15. It is proposed to revoke advisory standard 56.6-167.

16. It is proposed to revise and renumber advisory standard 56.6-169 and make it mandatory as follows:

56.6-142 *Mandatory.* Explosives or blasting agents shall not be loaded into drilled or sprung holes that could result in premature detonation from heat.

17. It is proposed to revise advisory standard 56.6-190 and make it mandatory as follows:

56.6-190 *Mandatory.* Ammonium nitrate-based blasting agents shall be mixed and stored in accordance with the mixing and storage provisions in Bureau of Mines information Circular 8179 "Safety Recommendations for Sensitized Ammonium Nitrate Blasting Agents," which is hereby incorporated by reference and made a part hereof. IC 8179 is available at each Metal and Nonmetal Mine Safety and Health District and Subdistrict Office of the Mine Safety and Health Administration.

18. It is proposed to revoke advisory standards 56.6-192 and 56.6-196.

X. Section 56.7 "Drilling" is proposed to be amended as follows:

§ 56.7 [Amended]

1. It is proposed to revoke advisory standard 56.7-1.

2. It is proposed to establish a series of numbers 56.7-50 through 56.7-100, and to reserve numbers 56.7-55 through 56.7-100.

3. It is proposed to revise and renumber advisory standard 56.7-6 and make it mandatory as follows:

56.7-50 *Mandatory.* Receptacles or racks shall be provided for drill steel and tools stored or carried on drills.

4. It is proposed to revise and renumber advisory standard 56.7-7 and make it mandatory as follows:

56.7-51 *Mandatory.* To prevent injury to personnel, tools and other objects shall not be left loose on the mast or drill platform.

5. It is proposed to revise advisory standard 56.7-9 and make it mandatory as follows:

56.7-9 *Mandatory.* The drill helper when used shall be in sight of the operator at all times and shall assist the operator while the drill is being moved to a new drilling area.

6. It is proposed to revise advisory standard 56.7-14 and make it mandatory as follows:

56.7-14 *Mandatory.* Persons operating or working near jackhammers, jackleg drills, or other drilling machines shall be instructed in the safe operation of such equipment and the potential hazards involved in case the steel breaks or bends.

7. It is proposed to revise and renumber advisory standard 56.7-15 and make it mandatory as follows:

56.7-52 *Mandatory.* Persons shall not drill from positions that hinder their access to the control levers, or from insecure staging, or from atop equipment not suitable for this purpose.

8. It is proposed to revoke advisory standards 56.7-16 and 56.7-17.

9. It is proposed to revise and renumber advisory standard 56.7-19 and make it mandatory as follows:

56.7-53 *Mandatory.* Before handheld drills are moved from one working area to another, air shall be turned off and bled from the hose.

10. It is proposed to add a new mandatory standard 56.7-54 as follows:

56.7-54 *Mandatory.* Drill operators shall be certain that all persons are in the clear before starting or moving drilling equipment.

Y. Section 56.8 "Rotary jet piercing" is proposed to be amended as follows:

§ 56.8 [Amended]

1. It is proposed to revise advisory standard 56.8-1 and make it mandatory as follows:

56.8-1 *Mandatory.* Jet piercing drills shall be provided with: (a) A system to pressurize operator's cabs, when the cabs are provided; (b) a protective cover over the oxygen flow indicator.

2. It is proposed to revise advisory standard 56.8-4 and make it mandatory as follows:

56.8-4 *Mandatory.* With equipment requiring refueling at locations other than fueling stations, a system for fueling from the ground without spill shall be provided.

Z. Section 56.9 "Loading, hauling, dumping" is proposed to be amended as follows:

§ 56.9 [Amended]

1. It is proposed to revise advisory standard 56.9-1 and make it mandatory as follows:

56.9-1 *Mandatory.* Self-propelled equipment that is to be used during a shift shall be inspected by the equipment operator before being placed in operation. Equipment defects affecting safety shall be reported to, and recorded by, the mine operator. The record shall be maintained at the mine or nearest mine office for at least six (6) months from the date the defects are recorded. Such records shall be made available for inspection by the Secretary of Labor or his authorized representative.

2. It is proposed to revoke advisory standard 56.9-8.

3. It is proposed to revise advisory standard 56.9-10 and make it mandatory as follows:

56.9-10 *Mandatory.* Equipment operator's cabs shall be constructed to permit operators to see without straining and shall be reasonably comfortable.

4. It is proposed to revise advisory standard 56.9-16 and make it mandatory as follows:

56.9-16 *Mandatory.* Roadbeds, rails, joints, switches, frogs, and other trackage elements on railroads shall be designed, installed, and maintained in a safe manner consistent with the speed and type of haulage.

5. It is proposed to revoke advisory standard 56.9-18.

6. It is proposed to revise advisory standard 56.9-29 and make it mandatory as follows:

56.9-29 *Mandatory.* Operators shall sit facing the direction of travel while operating equipment with dual controls.

7. It is proposed to revise advisory standard 56.9-34 and make it mandatory as follows:

56.9-34 *Mandatory.* Haulage equipment shall be loaded in a manner to minimize spillage during haulage.

8. It is proposed to revise advisory standard 56.9-63 and make it mandatory as follows:

56.9-63 *Mandatory.* Ramps and dumping facilities shall be of substantial construction. They shall have suitable width, clearance, and headroom to accommodate the equipment serviced.

9. It is proposed to revise advisory standard 56.9-70 and make it mandatory as follows:

56.9-70 *Mandatory.* A tow bar of substantial construction shall be used to tow heavy equipment unless the use of another suitable means of controlling the towed equipment proves advisable. A substantial safety chain or wire rope shall be used in conjunction with the tow bar or primary rigging.

10. It is proposed to revoke advisory standard 56.9-81.

11. It is proposed to revise advisory standard 56.9-82 and make it mandatory as follows:

56.9-82 *Mandatory.* Persons working in enclosed production equipment cabs where extreme weather and environmental conditions exist shall be protected by air conditioning, or heater with defroster, or both, which shall be maintained in a good working condition.

AA. Section 56.10 "Aerial tramways" is proposed to be amended as follows:

§ 56.10 [Amended].

1. It is proposed to revise advisory standard 56.10-1 and make it mandatory as follows:

56.10-1 *Mandatory.* Buckets shall not be overloaded, and feed shall be regulated to prevent spillage.

2. It is proposed to revise advisory standard 56.10-2 and make it mandatory as follows:

56.10-2 *Mandatory.* Inspection and maintenance of carriers including loading and unloading mechanisms, ropes and supports, and brakes shall be performed by competent persons following recommendations of the manufacturer, and as conditions warrant.

3. It is proposed to revise advisory standard 56.10-4 and make it mandatory as follows:

56.10-4 *Mandatory.* Positive-action-type brakes and devices which apply the brakes automatically in the event of a power failure shall be provided on aerial tramways.

4. It is proposed to revise advisory standard 56.10-5 and make it mandatory as follows:

56.10-5 *Mandatory.* Track cable connections shall not obstruct the passage of carriage wheels.

5. It is proposed to revise advisory standard 56.10-6 and make it mandatory as follows:

56.10-6 *Mandatory.* Towers shall be suitably protected from swaying buckets.

BB. Section 56.11 "Travelways and Escapeways" is proposed to be amended as follows:

§ 56.11 [Amended].

1. It is proposed to revise advisory standard 56.11-4 and make it mandatory as follows:

56.11-4 *Mandatory.* Portable rigid ladders shall be provided with suitable bases; and when used, they shall be securely placed.

2. It is proposed to revise advisory standard 56.11-7 and make it mandatory as follows:

56.11-7 *Mandatory.* Wooden members of ladders shall not be painted except with a transparent finish.

3. It is proposed to revise advisory standard 56.11-8 and make it mandatory as follows:

56.11-8 *Mandatory.* Ladderways, stairways, walkways, ramps, and platforms shall be kept free of material which could cause stumbling or slipping hazards, or injure persons below.

4. It is proposed to revise advisory standard 56.11-10 and make it mandatory as follows:

56.11-10 *Mandatory.* Vertical clearance above stair steps shall be a minimum of 7 feet or suitable warning shall be provided to indicate an impaired clearance.

5. It is proposed to revise advisory standard 56.11-11 and make it mandatory as follows:

56.11-11 *Mandatory.* Persons climbing or descending ladders shall face the ladders and have both hands free for climbing.

6. It is proposed to revoke advisory standard 56.11-15.

7. It is proposed to revise advisory standard 56.11-17 and make it mandatory as follows:

56.11-17 *Mandatory.* Fixed ladders shall not incline backwards.

8. It is proposed to revise advisory standard 56.11-25 and make it mandatory as follows:

56.11-25 *Mandatory.* When ladders are used to ascend to heights exceed-

V 43 / 177 SEP 12 78

ing 20 feet (except on mobile equipment), landing platforms shall be provided for each 30 feet of height or fraction thereof, except that where no cage, well, or ladder safety device is provided, landing platforms shall be provided for each 20 feet of height or fraction thereof. Each ladder section shall be offset from adjacent sections. Where installation conditions (even for a short, unbroken length) required that adjacent sections be offset, landing platforms shall be provided at each offset.

(a) Where a person has to step a distance greater than 12 inches from the centerline of the rung of a ladder to the nearest edge of structure or equipment, a landing platform shall be provided. The minimum step-across distance shall be 2½ inches.

(b) All landing platforms shall be equipped with standard railings and toeboards, so arranged as to give safe access to the ladder. Platforms shall not be less than 24 inches in width and 30 inches in length.

(c) One rung of any section of ladder shall be located at the level of the landing laterally served by the ladder. Where access to the landing is through the ladder, the same rung spacing as used on the ladder shall be used from the landing platform to the first rung below the landing.

(d) Ladder safety devices may be used on tower, water tank, and chimney ladders over 20 feet in unbroken length in lieu of cage protection. No landing platform is required in these cases. All ladder safety devices such as those that incorporate life belts, friction brakes, and sliding attachments shall meet the design requirements of the ladders which they serve.

9. It is proposed to revise advisory standard 56.11-26 and make it mandatory as follows:

56.11-26 *Mandatory.* Cages or wells.

(a) Cages or wells (except on chimney ladders) shall be built, as shown on the applicable drawings, covered in detail in figures 1, 2, and 3, or of equivalent construction.

(b) Cages or wells (except as provided in subparagraph (d) of standard 56.11-25) conforming to the dimensions shown in figures 1, 2, and 3 shall be provided on ladders of more than 20 feet to a maximum unbroken length of 30 feet.

(c) Cages shall extend a minimum of 42 inches above the top of a landing, unless other acceptable protection is provided.

(d) Cages shall extend down the ladder to a point not less than 7 feet nor more than 8 feet above the base of the ladder, with bottom flared not less than 4 inches, or a portion of cage opposite ladder shall be carried to the base.

(e) Cages shall not extend less than 27 nor more than 28 inches from the centerline of the rungs of the ladder. Cages shall not be less than 27 inches in width. The insides shall be clear of projections. Vertical bars shall be located at a maximum spacing of 40 degrees around the circumference of the cage; this will give a maximum spacing of approximately 9½ inches, center to center.

(f) Ladder wells shall have a clear width of at least 15 inches measured each way from the centerline of the ladder. Smoothwalled wells shall be a minimum of 27 inches from the centerline of rungs to the well wall on the climbing side of the ladder. Where other obstructions on the climbing side of the ladder exists, there shall be a minimum of 30 inches from the centerline of the rungs.

CC. Section 56.12 "Electricity" is proposed to be amended as follows:

§ 56.12 [Amended]

1. It is proposed to revise advisory standard 56.12-4 and make it mandatory as follows:

56.12-4 *Mandatory.* Electrical conductors shall be of sufficient size and current-carrying capacity for normal operation so that a rise in temperature resulting from such normal operation will not damage the insulating materials. Suitable protection from mechanical injury shall be provided.

2. It is proposed to revise advisory standard 56.12-19 and make it mandatory as follows:

56.12-19 *Mandatory.* Where access is necessary, suitable clearance shall be provided at stationary electrical equipment or switchgear.

3. It is proposed to revise advisory standard 56.12-22 and make it mandatory as follows:

56.12-22 *Mandatory.* Areas containing major electrical installations shall be entered only by authorized persons.

4. It is proposed to revoke advisory standard 56.12-24.

5. It is proposed to revise advisory standard 56.12-29 and make it mandatory as follows:

56.12-29 *Mandatory.* Electric equipment and wiring shall be inspected by a competent person as necessary to assure safe operating conditions.

6. It is proposed to revise advisory standard 56.12-31 and make it mandatory as follows:

56.12-31 *Mandatory.* Electric circuits and equipment shall be designed, constructed, installed and maintained to prevent injury and safeguard personnel.

7. It is proposed to revise advisory standard 56.12-35 and make it mandatory as follows:

56.12-35 *Mandatory.* Lamp sockets exposed to the weather or wet conditions shall be of a weatherproof type.

8. It is proposed to revise advisory standard 56.12-38 and make it mandatory as follows:

56.12-38 *Mandatory.* Trailing cables shall be attached to machines in a suitable manner to protect the cable from damage and to prevent strain on the electrical connections.

9. It is proposed to revise advisory standard 56.12-39 and make it mandatory as follows:

56.12-39 *Mandatory.* Surplus trailing cables to shovels, cranes and similar equipment shall be stored in cable boats or on reels mounted on the equipment or otherwise protected from mechanical damage.

10. It is proposed to revoke advisory standards 56.12-44 and 56.12-49.

11. It is proposed to revise advisory standard 56.12-50 and make it mandatory as follows:

56.12-50 *Mandatory.* Trolley wires shall be installed at least 7 feet above rails, where height permits, and alined and supported to suitably control sway and sag.

12. It is proposed to revoke advisory standards 56.12-51 and 56.12-52.

13. It is proposed to revise advisory standard 56.12-53 and make it mandatory as follows:

56.12-53 *Mandatory.* Ground wires for lighting circuits powered from trolley wires shall be connected securely to the ground-return circuit.

14. It is proposed to revise advisory standard 56.12-54 and make it mandatory as follows:

56.12-54 *Mandatory.* Persons shall be instructed to carry tools and supplies so they will not come in contact with bare power conductors.

DD. Section 56.13 "Compressed air and boilers" is proposed to be amended as follows:

§ 56.13 [Amended]

1. It is proposed to revise advisory standard 56.13-10 and make it mandatory as follows:

56.13-10 *Mandatory.* Reciprocating type air compressors rated over 10 horsepower shall be equipped with automatic temperature-actuated shutoff mechanisms unless fusible plugs were previously installed in the compressor discharge lines.

Temperature-actuated shutoff mechanisms shall be set to shut off at temperatures not to exceed the normal operating temperature of the compressor by more than 25 percent. Fusible plugs, where installed prior to the adopting of this standard, are acceptable if they melt at temperatures at least 50° less than the flashpoint of the lubricating oil.

2. It is proposed to revise advisory standard 56.13-11 and make it mandatory as follows:

56.13-11 *Mandatory.* Compressors and air receiver tanks shall be equipped with one or more automatic pressure relief valves. The total relieving capacity of such relief valves shall be such as to prevent pressure from exceeding the maximum allowable working pressure in a receiver tank by not more than 10 percent. Air receiver tanks also shall be equipped with: Indication pressure gages designed to accurately measure pressure within the air receiver tanks; drain valves installed at the lowest point of the receiver tanks to provide for the removal of accumulated oil and moisture; and traps to prevent oil, moisture, and other contaminants from being expelled through the discharge lines.

3. It is proposed to revise advisory standard 56.13-12 and make it mandatory as follows:

56.13-12 *Mandatory.* Compressor air intakes shall be installed to insure that only clean, uncontaminated air enters the compressors.

4. It is proposed to revise advisory standard 56.13-13 and make it mandatory as follows:

56.13-13 *Mandatory.* Accumulations of water and oil shall be drained from compressed air receivers at least once each day the compressor is in operation.

5. It is proposed to revise advisory standard 56.13-14 and make it mandatory as follows:

56.13-14 *Mandatory.* Compressed air receivers shall haye inspection openings. When the tanks are over 36 inches in diameter, the inspection opening shall be of a size to permit entry by persons.

6. It is proposed to revise advisory standard 56.13-15 and make it mandatory as follows:

56.13-15 *Mandatory.* Compressed air receivers and other unfired pressure vessels shall be inspected in accordance with the applicable chapters of the National Board Inspection Code, a manual for Boiler and Pressure Vessel Inspectors, 1977, approved by the National Board Executive Committee on January 27, 1977, and published by the National Board of Boiler and Pressure Vessel Inspectors, which is hereby incorporated by reference and made a part hereof. Records of such inspections shall be kept. The National Board Inspection Code of 1977 may be examined at any Metal and Nonmetal Mine Health and Safety District Office, MSHA, and may be obtained from the National Board of Boiler and Pressure Vessel Inspectors, 1055 Crupper Avenue, Columbus, Ohio 43229.

7. It is proposed to revise advisory standard 56.13-16 and make it mandatory as follows:

56.13-16 *Mandatory.* Compressors shall be operated and lubricated in accordance with the manufacturer's recommendations.

8. It is proposed to revise advisory standard 546.13-17 and make it mandatory as follows:

56.13-17 *Mandatory.* Compressor discharge pipes where carbon build-up may occur shall be cleaned periodically as part of a systematic maintenance schedule and at least annually.

9. It is proposed to revoke advisory standard 56.13-18.

10. It is proposed to revise advisory standard 56.13-30 and make it mandatory as follows:

56.13-30 *Mandatory.* (a) All boilers shall be equipped with water level gages, pressure gages, automatic pressure-relief valves, blow down piping, and other approved safety devices to protect against hazards from overpressure, flameouts, fuel interruptions, and low water level, all as required by

V 43 / 177 SE 12 78

the appropriate sections of the codes listed below.

(b) These gages, devices, and pipings shall be designed, installed, operated, maintained, repaired, altered, inspected, and tested by competent persons in accordance with the following listed sections, or chapters and appendixes—as applicable—of:

(1) The ASME Boiler and Pressure Vessel Code, 1977, published by the American Society of Mechanical Engineers.

Section and Title

I—Power Boilers.
II—Material Specifications.
II—Part A—Ferrous.
II—Part B—Nonferrous.
II—Part C—Welding Rods, Electrodes, and Filler Metal.
IV—Heating Boilers.
V—Nondestructive Examination.
VI—Recommended Rules for Care and Operations of Heating Boilers.
VII—Recommended Rules for Care of Power Boilers.

(2) The National Board Inspection Code, A Manual for Boiler and Pressure Vessel Inspectors, 1977, approved by the National Board Executive Committee on January 27, 1977, and published by the National Board of Boiler and Pressure Vessel Inspectors.

Chapter and Title

I—Glossary Terms.
II—Inspection of Boilers and Pressure Vessels.
III—Repairs and Alterations to Boilers and Pressure Vessels by Welding.
IV—Shop Inspection of Boilers and Pressure Vessels.
V—In-Service Inspection of Pressure Vessels by Authorized Owner-User Inspection Agencies.

Appendix and Title

A—Safety and Safety Relief Valves.
B—Non-ASME Code Boilers and Pressure Vessels.
C—Storage of Mild Steel Covered Arc Welding Electrodes.
D—National Board "R" (Repair) Symbol Stamp.
E—Owner-User Inspection Agencies.
F—Inspection Forms.

(c) Records of inspections and repairs shall be kept and made available to the Secretary or his authorized representative.

(d) Sections of the ASME Boiler and Pressure Vessel Code, 1977, to which references are made in this standard are hereby incorporated by reference and made a part hereof, and may be obtained from the American Society of Mechanical Engineers, United Engineering Center, 345 East 47th Street, New York, N.Y. 10017. Chapters and appendixes of the National Board Inspection Code of 1977 to which references are made in this standard are hereby incorporated by reference and made a part hereof, and may be obtained from the National Board of Boiler and Pressure Vessel Inspectors, 1055 Crupper Avenue, Columbus, Ohio 43229. These publications may be examined at any Metal and Nonmetal Mine Safety and Health District Office of the Mine Safety and Health Administration.

11. It is proposed to revoke advisory standards 56.13-31, 56.13-32, 56.13-33, and 56.13-34.

EE. Section 56.14 "Use of Equipment" is proposed to be amended as follows:

§ 56.14 [Amended]

1. It is proposed to revise advisory standard 56.14-3 and make it mandatory as follows:

56.14-3 *Mandatory.* Guards at conveyor drive, conveyor head, and conveyor tail pulleys shall extend a distance sufficient to prevent a person from accidently reaching behind the guard and becoming caught between the belt and the pulley.

2. It is proposed to revoke advisory standards 56.14-4 and 56.14-5.

3. It is proposed to revise advisory standard 56.14-7 and make it mandatory as follows:

56.14-7 *Mandatory.* Guards shall be of substantial construction and maintained to provide the required protection.

4. It is proposed to revise advisory standard 56.14-11 and make it mandatory as follows:

56.14-11 *Mandatory.* Guards, shields, or other suitable protection shall be provided in areas where flying or falling materials present a hazard.

5. It is proposed to revise advisory standard 56.14-25 and make it mandatory as follows:

56.14-25 *Mandatory.* Machinery or equipment that is to be used during the shift shall be inspected at the beginning of each shift by a competent person. Defects affecting safety shall be corrected before the machinery or equipment is used.

6. It is proposed to revise advisory standard 56.14-27 and make it mandatory as follows:

56.14-27 *Mandatory.* Operation of machinery or equipment shall be assigned only to competent persons; *Provided, however,* That trainees may be permitted to operate machinery or equipment under the guidance of competent persons.

7. It is proposed to revoke advisory standard 56.14-28.

8. It is proposed to revise advisory standard 56.14-36 and make it mandatory as follows:

56.14-36 *Mandatory.* Tools and equipment shall be used within the design capacity for which they are intended and designed.

FF. Section 56.15 "Personal protection" is proposed to be amended as follows:

§ 56.15 [Amended]

1. It is proposed to revoke advisory standards 56.15-8, 56.15-9, and 56.15-10.

2. It is proposed to revise advisory standard 56.15-11 and make it mandatory as follows:

56.14-11 *Mandatory.* Employees shall be instructed in the hazards of wearing finger rings and other jewelry on the job.

3. It is proposed to revoke advisory standard 56.15-13.

GG. Section 56.16 "Materials storage and handling" is proposed to be amended as follows:

§ 56.16 [Amended]

1. It is proposed to revise advisory standard 56.16-1 and make it mandatory as follows:

56.16-1 *Mandatory.* When stacked or stored, supplies shall not create a stumbling or fall-of-material hazard.

2. It is proposed to revise advisory standard 56.16-2 and make it mandatory as follows:

56.16-2 *Mandatory.* Bins, hoppers, silos, tanks, and surge piles, where loose and unconsolidated materials are stored, handled, or transferred shall be:

(a) Equipped with mechanical devices or other effective means of handling material so that during normal operations persons are not required to enter or work where they are exposed to entrapment by the caving or sliding of these materials;

(b) Equipment with supply and discharge operating controls which are located so as to eliminate hazards to persons from spills or accidental overruns;

(c) Provided with suitable walkways where persons are required to walk over or around;

(d) Provided with ladders, platforms, or stagings where persons are required to enter a material storage facility for maintenance or inspection purposes. Where a possibility exists that moving material may create a hazardous condition, no person shall be allowed to enter this area for any reason, unless the supply and discharge of materials has ceased; the supply and discharge equipment is locked out, and the person is wearing a safety belt or harness equipped with a lifeline suitably fastened. Another person suitably secured with safety belt and line shall be stationed at a point near where the lifeline is fastened, so that he can adjust it or keep it tight as needed with minimum slack in the said lifeline at all times.

3. It is proposed to revise advisory standard 56.16-7 and make it mandatory as follows:

56.16-7 *Mandatory.* Hitches and slings used to hoist materials shall be designed and suitably used for the particular materials handled. Taglines shall be attached to loads that may require steadying or guidance while suspended.

4. It is proposed to revoke advisory standard 56.16-8.

5. It is proposed to revise advisory standard 56.16-10 and make it mandatory as follows:

56.16-10 *Mandatory.* To protect personnel, material shall not be dropped from an overhead elevation until the drop area is first cleared of personnel, and then is either guarded or a suitable warning given.

6. It is proposed to revise advisory standard 56.16-12 and make it mandatory as follows:

56.16-12 *Mandatory.* Concentrated acids and alkalies shall be stored in a manner that these chemicals cannot inadvertently mix with each other or with other substances with which they will react violently or cause the liberation of dangerous fumes.

7. It is proposed to revise advisory standard 56.16-13 and make it mandatory as follows:

56.16-13 *Mandatory.* A suitable warning shall be given before molten metal is poured, or a container of molten metal is moved.

8. It is proposed to revise advisory standard 56.16-16 and make it mandatory as follows:

56.16-16 *Mandatory.* Fork and other similar type lift trucks shall be operated:

(a) With the uprights tilted back to steady and secure load.

(b) With the load in the upgrade position when ascending or descending grades in excess of 10 percent.

(c) Except for minor adjustments, loads shall not be raised or lowered en route.

(d) Unloaded trucks shall travel on grades with the load engaging means downgrade.

9. It is proposed to add a new mandatory standard 56.16-17 as follows:

56.16-17 *Mandatory.* Where the stretching or contraction of a hoist rope could create a hazard, chairs or other suitable blocking shall be used to support conveyances at shaft landings before heavy equipment is loaded or unloaded.

HH. Section 56.18 "Safety programs" is proposed to be amended as follows:

§ 56.18 [Amended]

1. It is proposed to revise advisory standard 56.18-1 and make it mandatory as follows:

56.18-1 *Mandatory.* The operator shall establish a definite, effective, and continually functioning safety program which shall be made available to all personnel and make every attempt to prevent accidents and increase safety. All personnel shall actively participate in the safety program.

2. It is proposed to revise advisory standard 56.18-2 and make it mandatory as follows:

56.18-2 *Mandatory.* (a) Each active working area or installation shall be examined at least once each shift, or more often if necessary, by a supervisor or another competent person for hazardous conditions. Such conditions observed shall be promptly corrected by the operator.

(b) A condition noted by the person conducting the examination that may present an imminent danger shall be brought to the immediate attention of the operator who shall withdraw all persons from the area affected, except persons referred to in section 104(c) of the Act, until the danger is abated.

(c) Any hazardous conditions observed by the supervisor or competent person making the examination shall be uniformly recorded and will include the date, the condition observed and the location of the condition. The record shall be available for review by the Secretary or his authorized representative.

(d) All reports shall include the action taken to abate any hazardous conditions found and shall be countersigned by:

(1) The mine foreman, or

(2) The mine superintendent, or

(3) The person designated by the operator as responsible for safety and health at the mine.

3. It is proposed to revoke advisory standards 56.18-3, 56.18-4, 56.18-5, and 56.18-7.

4. It is proposed to revise advisory standard 56.18-8 and make it mandatory as follows:

56.18-8 *Mandatory.* To assure that work is being done in a safe manner, each active working place shall be visited each shift by a supervisor, or another competent person shall be designated to check that working place.

5. It is proposed to revise advisory standard 56.18-9 and make it mandatory as follows:

56.18-9 *Mandatory.* A supervisor or a designated competent person shall be in attendance on the property when persons are working to take charge in case of an emergency.

6. It is proposed to revoke advisory standard 56.18-11.

7. It is proposed to revise advisory standard 56.18-13 and make it mandatory as follows:

56.18-13 *Mandatory.* A suitable communications system shall be provided at the mine site in order to summon assistance in the event of an emergency.

II. Section 56.19 "Man hoisting" is proposed to be amended as follows:

§ 56.19 [Amended]

1. It is proposed to revise advisory standard 56.19-12 and make it mandatory as follows:

56.19-12 *Mandatory.* Where grooved drums are used, the grooves shall be of suitable size and pitch for the rope used.

2. It is proposed to revoke advisory standard 56.19-20.

3. It is proposed to revise advisory standard 56.19-25 and make it mandatory as follows:

56.19-25 *Mandatory.* Wire ropes shall be used and maintained in accordance with the manufacturer's recommendations, or the equivalent.

4. It is proposed to revise advisory standard 56.19-35 and make it mandatory as follows:

56.19-35 *Mandatory.* Headframes shall be of substantial construction.

5. It is proposed to revise advisory standard 56.19-36 and make it mandatory as follows:

56.19-36 *Mandatory.* Headframes shall be high enough to provide clearance for overtravel and safe stopping of the conveyance.

6. It is proposed to revise advisory standard 56.19-37 and make it mandatory as follows:

56.19-37 *Mandatory.* Fleet angles shall not be greater than 1½ degrees for smooth drums, and 2 degrees for grooved drums.

7. It is proposed to revise advisory standard 56.19-39 and make it mandatory as follows:

56.19-39 *Mandatory.* All man hoists, except emergency escape hoists, installed after the effective date of this standard shall have drums and sheaves of diameters at least 60 times the rope diameter.

8. It is proposed to revise advisory standard 56.19-67 and make it mandatory as follows:

56.19-67 *Mandatory.* During shift changes, an authorized person shall be in charge of each man trip.

9. It is proposed to revise advisory standard 56.19-72 and make it mandatory as follows:

56.19-72 *Mandatory.* When combinations of cages and skips are used in the same compartment, the cages shall be totally enclosed to protect personnel from flying material and the hoist speed reduced to man speed as defined in section 56.19-61, but not to exceed 1,000 feet per minute. Muck shall not be hoisted with personnel during shift changes.

10. It is proposed to revise advisory standard 56.19-74 and make it mandatory as follows:

56.19-74 *Mandatory.* Persons shall not ride the bail, rim, bonnet, or crosshead of any shaft conveyance, except where necessary for inspection and maintenance, and then only when suitable protection for persons is provided.

V 43 / 177 SE 12 78

11. It is proposed to revise advisory standard 56.19-78 and make it mandatory as follows:

56.19-78 *Mandatory.* All buckets shall be stopped after being raised about three (3) feet above the shaft bottom. A bucket shall be stabilized before a hoisting signal is given to continue hoisting the bucket to the crosshead. After a hoisting signal is given, hoisting to the crosshead shall be at the minimum speed. The signaling device shall be attended constantly until a bucket reaches the guides. When persons are hoisted, the signaling devices shall be attended until the crosshead has been engaged.

12. It is proposed to revise advisory standard 56.19-81 and make it mandatory as follows:

56.19-81 *Mandatory.* Conveyances controlled by a hoistman, when not in use, shall be released and the conveyance shall be raised or lowered a suitable distance to prevent persons from boarding or loading the conveyance.

13. It is proposed to revise advisory standard 56.19-91 and make it mandatory as follows:

56.19-91 *Mandatory.* Hoistmen shall accept hoisting instructions only by the regular signaling system unless it is out of order. During an emergency, the hoistman shall accept instructions only from authorized persons to direct movement of the conveyance.

14. It is proposed to revise advisory standard 56.19-93 and make it mandatory as follows:

56.19-93 *Mandatory.* A standard code of hoisting signals shall be adopted and used at each mine. The movement of a shaft conveyance on a "one bell" signal shall be prohibited.

15. It is proposed to revise advisory standard 56.19-104 and make it mandatory as follows:

56.19-104 *Mandatory.* Suitable clearance at shaft stations shall be provided and maintained so as to allow for the safe movements of persons and the safe passage and handling of equipment and materials.

16. It is proposed to revise advisory standard 56.19-124 and make it mandatory as follows:

56.19-124 *Mandatory.* To distribute the wear of the rope, hoist ropes other than those on friction hoists shall be cut off at least six (6) feet above the highest connection to the conveyance, at intervals not to exceed one (1) year unless conditions of use and/or examination and inspection required in 56.19-126 indicate the necessity of a shorter time interval. The portion of the rope that is cut off shall be examined and inspected by a competent person for damage, corrosion, wear and fatigue.

17. It is proposed to revise advisory standard 56.19-125 and make it mandatory as follows:

56.19-125 *Mandatory.* Hoist ropes wound in multiple layers shall have a suitable length cut off at the drum end at least three (3) times during the anticipated life of the rope and whenever necessary, as determined by the inspection or tests required in standard 56.19-126, to distribute the wear at change of layers and crossover points and to preserve the integrity of the rope. The amount of rope cut off shall not be a whole number multiple of the circumference of the drum.

18. It is proposed to revise advisory standard 56.19-126 and make it mandatory as follows:

56.19-126 *Mandatory.* Hoist ropes shall be examined over its entire active length at least every month to evaluate wear and possible damage. Caliper measurements or nondestructive tests shall be made wherever wear is evident on the rope and at least every six (6) months and whenever necessary as determined by examination, inspection or tests as follows:

(a) Immediately above the socket or clips and above the safety connection;

(b) Where the rope rests on the sheaves;

(c) Where the ropes leave the drums when the conveyances are at the regular stopping point;

(d) Where a layer of rope begins to overlap another layer on the drum;

(e) At 100-foot intervals; measurements shall be made midway between the last previously calipered points.

19. It is proposed to revoke advisory standard 56.19-127.

20. It is proposed to revise advisory standard 56.19-130 and make it mandatory as follows:

56.19-130 *Mandatory.* Empty hoist conveyances shall be operated at least one round trip to assure the hoisting compartment is clear of obstruction before hoisting persons:

(a) After any hoist or shaft repairs or related equipment repairs that might restrict or obstruct conveyance clearance;

(b) After any oversize or overweight material or equipment trips that might restrict or obstruct conveyance clearance;

(c) After blasting in or near the shaft that might restrict or obstruct conveyance clearance;

(d) After remaining idle for one shift or longer.

21. It is proposed to revise advisory standard 56.19-131 and make it mandatory as follows:

56.19-131 *Mandatory.* Hoist conveyance connections shall be inspected at least once during any 24-hour period that the conveyance is used for hoisting persons.

22. It is proposed to revise advisory standard 56.19-132 and make it mandatory as follows:

56.19-132 *Mandatory.* A performance drop test of hoist conveyance safety catches shall be made at the time of installation, or prior to installation, in a mockup of the actual installation and certified to in writing by the manufacturer or registered professional engineer performing the test.

After installation, the conveyance shall be suitably rested at least once before use and the hoist rope slackened to test for the unrestricted functioning of the safety catches and their activitating mechanisms.

Thereafter, the safety catches shall be inspected by a competent person at the beginning of any 24-hour period that the conveyance is to be used, and the unrestricted functioning of the safety catches and their activitating mechanisms shall be tested (as before) at least once at the beginning of any 7-day period during which the conveyance is to be used.

JJ. Section 56.20 "Miscellaneous" is proposed to be amended as follows:

§ 56.20 [Amended]

1. It is proposed to revoke advisory standards 56.20-4, 56.20-6, and 56.20-7.

2. It is proposed to revise advisory standard 56.20-8 and make it mandatory as follows:

56.20-8 *Mandatory.* Toilet facilities shall be provided at locations that are compatible with the mine operations and that are readily accessible to mine personnel. The facilities shall be kept clean and sanitary. Separate toilet facilities shall be provided for each sex except where toilet facilities will be occupied by no more than one (1) person at a time and can be locked from the inside.

PART 57—HEALTH AND SAFETY STANDARDS—METAL AND NONMETALLIC UNDERGROUND MINES

KK. Section 57.2 "Definitions" is proposed to be amended as follows:

§ 57.2 [Amended]

1. It is proposed to add the definitions of "Combustible liquid, class two combustible liquid, and class three combustible liquid" as follows:

"Combustible liquid" means a liquid having a flash point at or above 100° F. (38° C.). "Class two combustible liquid" means a liquid having a flash point at or above 100° F. (38° C.) and below 140° F. (60° C.). "Class three combustible liquid" means a liquid having a flash point at or above 140° F. (60° C.) and an auto ignition temperature below 1,500° F. (186° C.).

2. It is proposed to add a definition of "Designated underground fire area" as follows:

"Designated underground fire area" means:

(a) An area where exposed ore is combustible or is susceptible to spontaneous ignition; or,

(b) An area where the exposed surface area of wood and other solid combustible materials in an opening exceeds 30 percent of the surface area of the opening, excluding the floor but including those areas covered by combustible material, in any 60-foot length of the opening; or,

(c) The area within explosive or blasting agents storage magazines.

3. It is proposed to add a definition of "Flammable liquid" as follows:

"Flammable liquid" means a liquid having a flash point below 100° F. (38° C.), and is designated a class one liquid.

4. It is proposed to revise the definition of "Flash point" as follows:

"Flash point" means the minimum temperature of a liquid at which sufficient vapor is given off to form an ignitable mixture with the air near the surface of the liquid or within the vessel used as determined in accordance with the standard method of test for flash point by the tag closed tester, ASTM designation: D 56-77, American Society for Testing Materials or a standard method of test for flash point by Pensky-Martens closed tester, ASTM designation: D 93-77, whichever is applicable. ASTM D 56-77 and ASTM D 93-77 are hereby incorporated by reference and are made a part hereof and may be examined at any Metal and Nonmetal Mine Safety and Health Subdistrict Office of the Mine Safety and Health Administration, and may be obtained from the American Society for Testing and Materials, 1916 Ray Street, Philadelphia, Pa. 19103.

LL. Section 57.3 "Ground control" is proposed to be amended as follows:

§ 57.3 [Amended]

1. It is proposed to revoke advisory standard 57.3-7.

2. It is proposed to revise advisory standard 57.3-10 which is applicable to surface only and make it mandatory as follows:

57.3-10 *Mandatory.* Banks, benches, and terrain sloping into occupied working areas shall be examined after every freeze or thaw, and during, as well as after, abnormal rainfall. Should a potential fall of ground be detected, persons in affected working places shall be evacuated immediately.

3. It is proposed to revoke advisory standards 57.3-13, 57.3-21, and 57.3-28.

4. It is proposed to revise advisory standard 57.3-29 which is applicable to underground only and make it mandatory as follows:

57.3-29 *Mandatory.* Shaft pillars shall have sufficient strength to protect operating shafts.

5. It is proposed to revoke advisory standards 57.3-30 and 57.3-31.

6. It is proposed to revise and renumber advisory standard 57.3-32, make it applicable to surface and underground, and make it mandatory as follows:

57.3-58 *Mandatory.* Where needed for ground support, rock bolts shall be installed as soon as practicable after an area is exposed.

MM. Section 57.4 "Fire prevention and control" is proposed to be amended as follows:

§ 57.4 [Amended]

1. It is proposed to revise advisory standard 57.4-3 which is applicable to surface and underground and make it mandatory as follows:

57.4-3 *Mandatory.* Areas surrounding flammable and combustible liquid storage tanks and electric substations shall be kept free from grass (dry), weeds, underbrush, and other combustible materials for at least 25 feet in all directions.

2. It is proposed to revise advisory standard 57.4-5 which is applicable to surface and underground and make it mandatory as follows:

57.4—5 *Mandatory.* Fixed unburied flammable and combustible liquid storage tanks shall be mounted securely on firm foundations. Piping shall be provided with flexible connections or other special fittings where necessary to prevent leaks caused from tank settling.

3. It is proposed to replace reserved number 57.4-27 with a series of numbers 57.4-27A through 57.4-27Z, and reserve numbers 57.4-27C through 57.4-27Z.

4. It is proposed to replace number 57.4—39 with a series of numbers 57.4-39A through 57.4-39Z, and to reserve numbers 57.4-39C through 57.4-39Z.

5. It is proposed to revise and divide advisory standard 57.4-6 into two standards, renumber them 57.4-39A and 57.4-87, make 57.4-39A applicable to surface only and 57.4-87 applicable to underground only, and make both mandatory as follows:

57.4-39A *Mandatory.* Buildings or rooms in which oil, grease, flammable liquids, or similar flammable materials are stored shall be of one-hour fire-resistance construction and well ventilated.

* * * * *

57.4-87 *Mandatory.* Facilities in which less than 55 gallons of combustible liquids, or flammable materials are stored shall:

(a) Be of one-hour fire-resistance rating construction.

(b) Be well ventilated.

6. It is proposed to revise advisory standard 57.4-7 which is applicable to surface and underground and make it mandatory as follows:

57.4-7 *Mandatory.* Means shall be provided to confine, remove, control, or drain away spilled or flowing flammable or combustible liquids.

7. It is proposed to revise advisory standard 57.4-13 which is applicable to surface and underground and make it mandatory as follows:

57.4-13 *Mandatory.* In areas where fire is a hazard, materials, such as oily waste and rags which are subject to spontaneous combustion, shall be placed in covered metal containers until disposed of properly.

8. It is proposed to revise advisory standard 57.4-16 which is applicable to surface and underground and make it mandatory as follows:

57.4-16 *Mandatory.* Drip pans shall be provided to catch leakage or spillage when oil or combustible liquids or flammable liquids are dispensed in a place or manner which may create a hazard. Floor areas where drip pans are used shall be kept clean.

9. It is proposed to revoke advisory standard 57.4-17.

10. It is proposed to revise advisory standard 57.4-25 which is applicable to surface and underground and make it mandatory as follows:

57.4-25 *Mandatory.* Fire hydrants shall have uniform fittings. Wrenches or keys to open the valves shall be readily available. Where necessary, adapters shall be provided that are capable of connecting hydrant fittings to the hose equipment of local fire departments, and they also shall be readily available.

11. It is proposed to revise advisory standard 57.4-26 which is applicable to surface and underground and make it mandatory as follows:

57.4-26 *Mandatory.* Water pipes, valves, outlets, hydrants, and hoses that are designated for firefighting purposes shall be inspected every 3 months and tested annually.

12. It is proposed to revise advisory standard 57.4-30 which is applicable so surface and underground and make it mandatory as follows:

57.4-30 *Mandatory.* Employees shall be trained in the use of fire extinguishers.

13. It is proposed to revise and renumber advisory standard 57.4-31, make it applicable to surface only, and make it mandatory as follows:

57.4-39B *Mandatory.* Emergency firefighting plans and training, in combination with suitable evacuation and rescue plans and equipment, shall be established and such plans shall be coordinated with available professional firefighting organizations. Drills shall be held at least twice a year.

14. It is proposed to revise and renumber advisory standard 57.4-39, make it applicable to surface and un-

derground, and make it mandatory as follows:

57.4-27A *Mandatory.* No self-propelled mobile equipment shall be operated without a suitable fire extinguisher accessible to the operator.

15. It is proposed to revise advisory standard 57.4-41 which is applicable to surface only and make it mandatory as follows:

57.4-41 *Mandatory.* Every building or structure, new or old, designed for human occupancy shall be provided with exits sufficient to permit the prompt escape of occupants in case of fire or other emergency. The design of exits and other safeguards shall be such that reliance for safety to life in case of fire or other emergency will not depend solely on any single safeguard; additional safeguards shall be provided for life safety in case any single safeguard is ineffective due to some human or mechanical failure.

16. It is proposed to revise advisory standard 57.4-42 which is applicable to surface only and make it mandatory as follows:

57.4-42 *Mandatory.* Combustible mine supplies in excess of one day's supply shall not be stored within 100 feet of mine ventilation fans or mine openings.

17. It is proposed to revise advisory standard 57.4-43 which is applicable to surface only and make it mandatory as follows:

57.4-43 *Mandatory.* Buildings and other structure, erected after the effective date of this standard within 100 feet of any mine opening, shall be of at least one-hour fire-resistant construction. Existing buildings shall conform to this standard within 3 years of its adoption.

18. It is proposed to revise advisory standard 57.4-44 which is applicable to surface only and make it mandatory as follows:

57.4-44 *Mandatory.* Areas within 25 feet of mine openings shall be kept free of combustible materials except for installed wiring and materials in use for ground support and track support.

19. It is proposed to revise advisory standard 57.4-45 which is applicable to surface only and make it mandatory as follows:

57.4-45 *Mandatory.* Blacksmith shops shall:

(a) Be well ventilated and equipped with exhaust vents over the forge;

(b) Be inspected carefully for smoldering vagrant fires at the end of each shift;

(c) Be of at least one-hour fire-resistant construction and located at least 100 feet from mine openings or fan installations and not in buildings or snowsheds adjoining mine openings or fan installation unless a reliable fire wall or fire doors approved by the Secretary is provided.

20. It is proposed to revise advisory standard 57.4-47 which is applicable to surface only and make it mandatory as follows:

57.4-47 *Mandatory.* Belt conveyors in locations where ignition of the conveyor belt would create a hazard to personnel shall be provided with a safety switch to stop the drive pulley automatically in the event of excessive slippage.

21. It is proposed to revise and renumber advisory standard 57.4-49, make it applicable to surface and underground, and make it mandatory as follows:

57.4-27B *Mandatory.* All flammable and combustible waste materials, grease, lubricants, or flammable liquids shall be disposed of in a manner to prevent an accumulation where they can create a fire hazard to personnel.

22. It is proposed to revise advisory standard 57.4-55 which is applicable to underground only and make it mandatory as follows:

57.4-55 *Mandatory.* Suitable fire protection shall be provided in transformer stations, pump rooms, and compressor rooms which are located in designated underground fire areas.

23. It is proposed to revise and divide advisory standard 57.4-56 into two standards, renumber them 57.4-56A and 57.4-56B, and make both of them applicable to underground only and mandatory as follows:

57.4-56A *Mandatory.* Permanent combustile liquid storage depots shall be:

(a) Located at least 100 feet of open space with a minimum pillar of 30 feet from shafts, slopes, raises, underground hoistrooms, shops, explosives magazines, main and booster ventilation fans, and working places other than the depot; at least 50 feet of open space from wooden bulkheads, and other designated underground fire areas, and designated escapeways; and at least 25 feet of open space from main haulageways, trolley wires, and electrical equipment or power cables not serving the depot.

(b) Enclosed by rock and/or materials having at least a 2-hour fire resistance rating, except for access door(s) as provided in subsection (c) below. The evaluation of fire resistance shall be made or based upon tests equivalent to the standard methods of fire tests of building construction and materials, NFPA No. 251-1972, pages 251-3 through 251-32, which is hereby incorporated by reference and made a part hereof. NFPA No., 251-1972 may be examined at any Metal and Nonmetal Mine Safety and Health Subdistrict Office of the Mine Safety and Health Administration and may be obtained from the National Fire Protection Association, 470 Atlantic Avenue, Boston, Mass. 02210.

(c) Provided with access door(s) which shall be kept closed except when the door(s) are in use. The door(s) shall be constructed to have at least a 1½-hour fire resistance rating. The maximum surface temperature developed on the unexposed face of the door at the end of the 30-minute test exposure shall not exceed 250° F. (121° C.). The evaluation of fire resistance shall be made or based upon tests equivalent to standard methods of fire tests of door assembles, NFPA No. 252-1972, pages 252-3 through pages 253-13, which is hereby incorporated by reference and made a part hereof. NFPA No. 252-1972 may be examined at any Metal and Nonmetal Mine Safety and Health Subdistrict Office of the Mine Safety and Health Administration and may be obtained from the National Fire Protection Association, 470 Atlantic Avenue, Boston, Mass. 02210.

(d) Provided with heat-actuated or equivalent sensing devices to automatically close ventilation openings, if such openings are used in case of fire. The closures for ventilation openings shall also meet the construction requirements for access doors given in (c) above.

(e) Provided with floors of rock, concrete or other impermeable, noncombustible material.

(f) Equipped with fire extinguisher(s) with a total minimum nominal capacity of 20 pounds of class B agent. Extinguisher(s) shall be located on the outside of the enclosure, adjacent to the exit.

* * * * *

57.4-56B *Mandatory.* Temporary combustible liquid storage depots shall be:

(a) Located at least 100 feet of open space from shaft, slopes, raises, explosives magazines; at least 50 feet of open space from wooden bulkheads, other designated underground fire areas; and at least 25 feet of open space from main haulageways.

(b) Enclosed by rock and/or materials meeting the standard method of tests, ASTM E-136-1973, noncombustibility of elementary materials which is hereby incorporated by reference and made a part hereof. ASTM E-136-1973, may be examined at any Metal and Nonmetal Mine Safety and Health Subdistrict Office of the Mine Safety and Health Administration, and may be obtained from the American Society for Testing and Materials, 1916 Race Street, Philadelphia, Pa. 19103.

(c) Of materials having a strength of at least equal to ⅛-inch thick steel plate or 4-inch concrete block.

(d) Provided with access doors meeting the requirements of (b) and (c) above which shall be kept closed except when the door is in use. Ventilation openings, if used, shall be provided with heat-actuated or equivalent sensing devices to automatically close the openings in case of fire.

(e) Equipped with fire extinguisher(s) with a total minimum nonminal capacity of 20 pounds of class B agent. Extinguisher(s) shall be located on the outside of the enclosure, adjacent to the exit.

24. It is proposed to revise advisory standard 57.4.57 which is applicable to underground only and make it mandatory as follows:

57.4-57 *Mandatory.* Trailing cables shall be flame-resistant in accordance with section 18.64, part 18, CFR 30.

25. It is proposed to revise advisory standard 57.4-60 which is applicable to underground only and make it mandatory as follows:

57.4-60 *Mandatory.* Power circuits shall be deenergized in all areas on idle shifts or idle days, except where power is required or when moisture will render the reenergized circuit hazardous to personnel. Circuits which remain energized shall be protected by fuses or circuit breakers of the correct type and capacity consistent with the power load on such idle shifts or idle days.

26. It is proposed to revise and divide advisory standard 57.4-61 into two standards, renumber them 57.4-61A and 57.4-61B, and make both of them applicable to underground only and mandatory as follows:

57.4-61A *Mandatory.* Fire doors or ventilation control doors shall be provided on shaft stations or other appropriate locations as a part of an overall evacuation plan where necessary to prevent the spread of smoke or gas; the door shall be equipped with latches operable from both sides, shall be remotely controlled where appropriate and equipped with suitable man doors. The location and design of these fire and ventilation control doors shall be submitted to the Secretary for his review and comments.

* * * * *

57.4-61B *Mandatory.* To confine and prevent the spread of toxic gases from a fire originating in an underground shop, where mine shop exhaust air cannot be routed directly to an exhaust system and people would be endangered elsewhere in the mine by toxic gases from a fire in the shop, the mine operator shall install a fire door or bulkhead of fire door construction in each opening to a shop and insure that each fire door is:

(a) Constructed so that, once closed, it will not reopen as a result of a differential air pressure.

(b) Provided with a man door that can be opened from either side.

(c) Suitably airtight.

(d) Kept clear of obstructions and extraneous material.

27. It is proposed to revise advisory standard 57.4-62 which is applicable to underground only and make it mandatory as follows:

57.4-62 *Mandatory.* Timber and mine entrances shall meet a flame spread rating of 25 or less as defined in ASTM M162-67 for at least two hundred feet inside the mine portal or collar or the mine entrance shall be provided with fire protection adequate to control a fire for at least two hundred feet inside the mine portal or collar.

28. It is proposed to revise advisory standard 57.4-63 which is applicable to underground only and make it mandatory as follows:

57.4-63 *Mandatory. When waterline outlets are located at shaft stations, they shall have at least one fitting suitably located for connecting firefighting equipment*

29. It is proposed to revoke advisory standard 57.4-64.

30. It is proposed to revise advisory standard 57.4-66 which is applicable to underground only and make it mandatory as follows:

57.4-66 *Mandatory.* Suitable fire protection shall be provided for head, tail, drive, and takeup pulleys of belt conveyors and at suitable intervals along the belt line.

31. It is proposed to revoke advisory standard 57.4-68.

32. It is proposed to revise advisory standard 57.4-71 which is applicable to underground only and make it mandatory as follows:

57.4-71 *Mandatory.* Mine rescue crews shall include supervisory and key personnel familiar with all mine installations who could provide vital to firefighting and rescue operations.

33. It is proposed to revise advisory standard 57.4-72 which is applicable to underground only and make it mandatory as follows:

57.4-72 *Mandatory.* Only trained mine rescue personnel shall participate in rescue and firefighting operations in advance of the fresh air base.

NN. Section 57.5 "Air quality, ventilation, radiation, and physical agents" is proposed to be amended as follows:

§ 57.5 [Amended]

1. It is proposed to revise advisory standard 57.5-4 which is applicable to surface and underground and make it mandatory as follows:

57.5-4 *Mandatory.* At muckpiles, haulage roads, rock transfer points, crushers, and other points, where dust is produced in amounts sufficient to cause a health or safety hazard, such dust shall be suitably controlled.

2. It is proposed to revoke advisory standard 57.5-21 and 57.5-23.

3. It is proposed to revise advisory standard 57.5-25 which is applicable to underground only and make it mandatory as follows:

57.5-25 *Mandatory.* Main fans shall be maintained either according to the manufacturer's recommendations or by a written periodic schedule adopted by the operator. Such schedule shall be available at the operation on request of the Secretary or his authorized representative.

4. It is proposed to revoke advisory standard 57.5-26.

5. It is proposed to revise advisory standard 57.5-27 which is applicable to underground only and make it mandatory as follows:

57.5-27 *Mandatory.* Flame safety lamps or other suitable devices shall be used to test for acute oxygen deficiency.

6. It is proposed to revise advisory standard 57.5-29 which is applicable to underground only and make it mandatory as follows:

57.5-29 *Mandatory.* When used, auxiliary fan systems shall be installed to prevent recirculation and shall be maintained to provide ventilation air that effectively sweeps the working places.

00. Section 57.6 "Explosives" is proposed to be amended as follows:

§ 57.6 [Amended]

1. It is proposed to revoke 57.6-3 and 57.6-4.

2. It is proposed to revise advisory standard 57.6-7 which is applicable to surface and underground and make it mandatory as follows:

57.6-7 *Mandatory.* Explosives, detonators, and related materials such as safety fuse and detonating cord shall be:

(a) Stored in a manner to facilitate use of oldest stocks first.

(b) Stored according to brand and grade in such a manner as to facilitate identification.

(c) Stored with their top sides up.

(d) Stacked in a stable manner but not more than eight (8) feet high.

3. It is proposed to revoke advisory standards 57.6-9, 57.6-10, and 57.6-28.

4. It is proposed to revise advisory standard 57.6-48 which is applicable to surface and underground and make it mandatory as follows:

57.6-48 *Mandatory.* Explosives and blasting agents shall be transported without undue delay, and over routes and at times that expose a minimum number of persons.

5. It is proposed to revoke advisory standard 57.6-55 and 57.6-78.

6. It is proposed to revise advisory standard 57.6-98 which is applicable to surface and underground and make it mandatory as follows:

V 43 / 177 SEP 12 78

57.6-98 *Mandatory.* (a) Primers containing a detonator shall be prepared with the detonator contained securely and completely within the explosive charge or within a suitable tunnel or cap well.

(b) When using detonating cord to initiate another explosive, connections shall be prepared with the detonating cord threaded through, attached securely to, or otherwise in intimate contact with the explosive charge.

7. It is proposed to revise advisory standard 57.6-106 which is applicable to surface and underground and make it mandatory as follows:

57.6-106 *Mandatory.* Faces and muckpiles shall be examined by a competent person for undet- onated explosives or blasting agents and any undetonated explosives or blasting agents found shall be disposed of safely.

8. It is proposed to revise advisory standard 57.6-109 which is applicable to surface and underground and make it mandatory as follows:

57.6-109 *Mandatory.* Safety fuse, ignitor cord, and detonating cord shall not be used if they have been kinked, bent sharply, or otherwise damaged.

9. It is proposed to revise advisory standard 57.6-118 which is applicable to surface and underground and make it mandatory as follows:

57.6-118 *Mandatory.* When using safety fuse, where fly rock might damage unlit or burning fuses, timing shall be such that all fuses are burning within the holes before any hole detonates.

10. It is proposed to revise advisory standard 57.6-121 which is applicable to surface and underground and make it mandatory as follows:

57.6-121 *Mandatory.* When blasting electrically, a blasting galvanometer or other instrument that is specifically designed for testing blasting circuits, shall be used to test:

(a) In surface operations:

(1) Continuity of each electric blasting cap in the bore hole prior to the addition of stemming.

(2) Resistance of individual series or the resistance of multiple balanced series to be connected in parallel prior to their connection to the blasting line.

(3) Continuity of blasting lines prior to the connection of electric blasting cap series.

(4) Total blasting circuit resistance prior to connection to the power source.

(b) In underground operations:

(1) Continuity of each electric blasting cap series.

(2) Continuity of blasting lines prior to the connection of electric blasting caps.

11. It is proposed to revise advisory standard 57.6-130 which is applicable to surface and underground and make it mandatory as follows:

57.6-130 *Mandatory.* At least a 15-foot gap shall be provided between the blasting circuit and the electric power source.

12. It is proposed to revise advisory standard 57.6-132 which is applicable to surface and underground and make it mandatory as follows:

57.6-132 *Mandatory.* Delay connectors shall be treated and handled with the same safety precautions as detonators.

13. It is proposed to revoke advisory standard 57.6-167.

14. It is proposed to revise and renumber advisory standard 57.6-169, make it applicable to surface and underground, and make it mandatory as follows:

57.6-142 *Mandatory.* Explosives or blasting agents shall not be loaded into drilled or sprung holes that could result in premature detonation from heat.

15. It is proposed to revise and renumber advisory standard 57.6-176, make it applicable to surface and underground and make it mandatory as follows:

57.6-139 *Mandatory.* Blasting areas shall not be reentered after firing until concentrations of smoke, dust, and fumes have been reduced to safe limits as required and determined in mandatory standards 57.5-1 and 57.5-2.

16. It is proposed to revise and renumber advisory standard 57.6-178, make it applicable to surface and underground, and make it mandatory as follows:

57.6-141 *Mandatory.* In secondary blasting, if more than one shot is to be fired at one time in a blasting area, the shots shall be initiated from one source.

17. It is proposed to revise and renumber advisory standard 57.6-180, make it applicable to surface and underground, and make it mandatory as follows:

57.6-140 *Mandatory.* Blasting circuits and electric blasting caps (which are capable of being initiated by conventional power sources) shall be protected from sources of extraneous electricity.

18. It is proposed to revoke advisory standard 57.6-181.

19. It is proposed to revise advisory standard 57.6-190 which is applicable to surface and underground and make it mandatory as follows:

57.6-190 *Mandatory.* Ammonium nitrate-based blasting agents shall be mixed and stored in accordance with the mixing and storage provisions in Bureau of Mines Information Circular 8179 "Safety Recommendations for Sensitized Ammonium Nitrate Blasting Agents," which is hereby incorporated by reference and made a part hereof. IC 8179 is available at each Metal and Nonmetal Mine Safety and Health District and Subdistrict Office of the Mine Safety and Health Administration.

20. It is proposed to revoke advisory standards 57.6-192 and 57.6-196.

PP. Section 57.7 "Drilling" is proposed to be amended as follows:

§ 57.7 [Amended]

1. It is proposed to revoke advisory standard 57.7-1.

2. It is proposed to add a new center subheading entitled "General—Surface and Underground" immediately below standard 57.7-32, to establish the series of numbers 57.7-50 through 57.7-100, and to reserve numbers 57.7-55 through 57.7-100.

3. It is proposed to revise and renumber advisory standard 57.7-6, make it applicable to surface and underground, and make it mandatory as follows:

57.7-50 *Mandatory.* Receptacles or racks shall be provided for drill steel and tools stored or carried on drills.

4. It is proposed to revise and renumber advisory standard 57.7-7, make it applicable to surface and underground, and make it mandatory as follows:

57.7-51 *Mandatory.* To prevent injury to personnel, tools and other objects shall not be left loose on the mast or drill platform.

5. It is proposed to revise advisory standard 57.7-9 which is applicable to surface only and make it mandatory as follows:

57.7-9 *Mandatory.* The drill helper when used shall be in sight of the operator at all times and shall assist the operator while the drill is being moved to a new drilling area.

6. It is proposed to revise advisory standard 57.7-14 which is applicable to surface only and make it mandatory as follows:

57.7-14 *Mandatory.* Persons operating or working near jackhammers, jackleg drills, or other drilling machines shall be instructed in the safe operation of such equipment and the potential hazards involved in case the steel breaks or binds.

7. It is proposed to revise and renumber advisory standard 57.7-15, make it applicable to surface and underground and make it mandatory as follows:

57.7-52 *Mandatory.* Persons shall not drill from positions that hinder their access to the control levers, or from insecure footing or insecure staging, or from atop equipment not suitable for this purpose.

8. It is proposed to revoke advisory standards 57.7-16 and 57.7-17.

9. It is proposed to revise and renumber advisory standard 57.7-19, make it applicable to surface and underground and make it mandatory as follows:

57.7-53 *Mandatory.* Before handheld drills are moved from one working area to another, air shall be turned off and bled from the hose.

10. It is proposed to revoke advisory standard 57.7-25, 57.7-26, and 57.7-27.

11. It is proposed to revise advisory standard 57.7-28 which is applicable to underground only and make it mandatory as follows:

57.7-28 *Mandatory.* Persons shall not rest their hands on the chuck or centralizer while drilling.

12. It is proposed to revoke advisory standards 57.7-29 and 57.7-30.

13. It is proposed to revise and renumber advisory standard 57.7-31, make it applicable to surface and underground, and make it mandatory as follows:

57.7-54 *Mandatory.* Drill operators shall be certain that all persons are in the clear before starting or moving drilling equipment.

14. It is proposed to revise advisory standard 57.7-32 which is applicable to underground only and make it mandatory as follows:

57.7-32 *Mandatory.* Columns and the drills mounted on them shall be anchored firmly before drilling is started and shall be so maintained while drilling.

QQ. Section 57.8 "Rotary jet piercing" is proposed to be amended as follows:

§ 57.8 [Amended]

1. It is proposed to revise advisory standard 57.8-1 which is applicable to surface only and make it mandatory as follows:

57.8-1 *Mandatory.* Jet piercing drills shall be provided with:

(a) A system to pressurize operator's cabs, when the cabs are provided;

(b) A protective cover over the oxygen flow indicator.

2. It is proposed to revise advisory standard 57.8-4 which is applicable to surface only and make it mandatory as follows:

57.8-4 *Mandatory.* With equipment requiring refueling at locations other than fueling stations, a system for fueling from the ground without spill shall be provided.

RR. Section 57.9 "Loading, hauling, dumping" is proposed to be amended as follows:

§ 57.9 [Amended]

1. It is proposed to revise advisory standard 57.9-1 which is applicable to surface and underground and make it mandatory as follows:

57.9-1 *Mandatory.* Self-propelled equipment that is to be used during a shift shall be inspected by the equipment operator before being placed in operation. Equipment defects affecting safety shall be reported to, and recorded by, the mine operator. The record shall be maintained at the mine or nearest mine office for at least six (6) months from the date the defects are recorded. Such records shall be made available for inspection by the Secretary of Labor or his authorized representative.

2. It is proposed to revoke advisory standard 57.9-8.

3. It is proposed to revise advisory standard 57.9-10 which is applicable to surface and underground and make it mandatory as follows:

57.9-10 *Mandatory.* Equipment operator's cabs shall be constructed to permit operators to see without straining and shall be reasonably comfortable.

4. It is proposed to revise advisory standard 57.9-16 which is applicable to surface and underground and make it mandatory as follows:

57.9-16 *Mandatory.* Roadbeds, rails, joints, switches, frogs, and other trackage elements on railroads shall be designed, installed, and maintained in a safe manner consistent with the speed and type of haulage.

5. It is proposed to revoke advisory standard 57.9-18.

It is proposed to revise advisory standard 57.9-29 which is applicable to surface and underground and make it mandatory as follows:

57.9-29 *Mandatory.* Operators shall sit facing the direction of travel while operating equipment with dual controls.

7. It is proposed to revise advisory standard 57.9-34 which is applicable to surface and underground and make it mandatory as follows:

57.9-34 *Mandatory.* Haulage equipment shall be loaded in a manner to minimize spillage during haulage.

8. It is proposed to revise advisory standard 57.9-63 which is applicable to surface and underground and make it mandatory as follows:

57.9-63 *Mandatory.* Ramps and dumping facilities shall be of substantial construction. They shall have suitable width, clearance, and headroom to accommodate the equipment serviced.

9. It is proposed to revise advisory standard 57.9-70 which is applicable to surface and underground and make it mandatory as follows:

57.9-70 *Mandatory.* A tow bar of substantial construction shall be used to tow heavy equipment unless the use of another suitable means of controlling the towed equipment proves advisable. A substantial safety chain or wire rope shall be used in conjunction with the tow bar or primary rigging.

10. It is proposed to revoke advisory standard 57.9-81.

11. It is proposed to revise advisory standard 57.9-82 which is applicable to surface only and make it mandatory as follows:

57.9-82 *Mandatory.* Persons working in enclosed production equipment cabs where extreme weather and environmental conditions exist shall be protected by air-conditioning, or heater with defroster, or both which shall be maintained in a good working condition.

12. It is proposed to revise advisory standard 57.9-104 which is applicable to underground only and make it mandatory as follows:

57.9-104 *Mandatory.* Warning devices or conspicuous markings shall be installed where chute lips, ventilation doors, and obstructions create a hazard to persons or equipment.

13. It is proposed to revise advisory standard 57.9-105 which is applicable to underground only and make it mandatory as follows:

57.9-105 *Mandatory.* Empty chutes shall be properly guarded prior to filling or sufficient material shall be left in the chute bottom to prevent rock from flying out when broken material is dumped into the chute.

14. It is proposed to revise advisory standard 57.9-115 which is applicable to underground only and make it mandatory as follows:

57.9-115 *Mandatory.* Covered mantrip cars shall be provided where there is danger of passengers contacting the trolley wire.

SS. Section 57.10 "Aerial tramways" is proposed to be amended as follows:

§ 57.10 [Amended]

1. It is proposed to revise advisory standard 57.10-1 which is applicable to surface only and make it mandatory as follows:

57.10-1 *Mandatory.* Buckets shall not be overloaded, and feed shall be regulated to prevent spillage.

2. It is proposed to revise advisory standard 57.10-2 which is applicable to surface only and make it mandatory as follows:

57.10-2 *Mandatory.* Inspection and maintenance of carriers including loading and unloading mechanisms, ropes and supports, and brakes shall be performed by competent persons following recommendations of the manufacturer, and as conditions warrant.

3. It is proposed to revise advisory standard 57.10-4 which is applicable to surface only and make it mandatory as follows:

57.10-4 *Mandatory.* Positive-action-type brakes and devices which apply the brakes automatically in the event of a power failure shall be provided on aerial tramways.

4. It is proposed to revise advisory standard 57.10-5 which is applicable to surface only and make it mandatory as follows:

57.10-5 *Mandatory.* Track cable connections shall not obstruct the passage of carriage wheels.

5. It is proposed to revise advisory standard 57.10-6 which is applicable to surface only and make it mandatory as follows:

57.10-6 *Mandatory.* Towers shall be suitably protected from swaying buckets.

TT. Section 57.11 "Travelways and escapeways" is proposed to be amended as follows:

§ 57.11 [Amended]

1. It is proposed to revise advisory standard 57.11-4 which is applicable to surface and underground and make it mandatory as follows:

57.11-4 *Mandatory.* Portable rigid ladders shall be provided with suitable bases; and when used they shall be securely placed.

2. It is proposed to revise advisory standard 57.11-7 which is applicable to surface and underground and make it mandatory as follows:

57.11-7 *Mandatory.* Wooden members of ladders shall not be painted except with a transparent finish.

3. It is proposed to revise advisory standard 57.11-8 which is applicable to surface and underground and make it mandatory as follows:

57.11-8 *Mandatory.* Ladderways, stairways, walkways, ramps, and platforms shall be kept free of material which could cause stumbling or slipping hazards, or injure persons below.

4. It is proposed to revise advisory standard 57.11-10 which is applicable to surface and underground and make it mandatory as follows:

57.11-10 *Mandatory.* Vertical clearance above stairsteps shall be a minimum of 7 feet or suitable warning shall be provided to indicate an impaired clearance.

5. It is proposed to revise advisory standard 57.11-11 which is applicable to surface and underground and make it mandatory as follows:

57.11-11 *Mandatory.* Persons climbing or descending ladders shall face the ladders and have both hands free for climbing.

6. It is proposed to revoke advisory standard 57.11-15.

7. It is proposed to revise advisory standard 57.11-17 which is applicable to surface and underground and make it mandatory as follows:

57.11-17 *Mandatory.* Fixed ladders shall not incline backwards.

8. It is proposed to revise advisory standard 57.11-25 which is applicable to surface only and make it mandatory as follows:

57.11-25 *Mandatory.* When ladders are used to ascend to heights exceeding 20 feet (except on mobile equipment), landing platforms shall be provided for each 30 feet of height or fraction thereof, except that where no cage, well, or ladder safety device is provided landing platforms shall be provided for each 20 feet of height or fraction thereof. Each ladder section shall be offset from adjacent sections. Where installation conditions (even for a short, unbroken length) require that adjacent sections be offset, landing platforms shall be provided at each offset.

(a) Where a person has to step a distance greater than 12 inches from the centerline of the rung of a ladder to the nearest edge of structure or equipment, a landing platform shall be provided. The minimum step-across distance shall be 2½ inches.

(b) All landing platforms shall be equipped with standard railings and toeboards, so arranged as to give safe access to the ladder. Platforms shall be not less than 24 inches in width and 30 inches in length.

(c) One rung of any section of ladder shall be located at the level of the landing laterally served by the ladder. Where access to the landing is through the ladder, the same rung spacing as used on the ladder shall be used from the landing platform to the first rung below the landing.

(d) Ladder safety devices may be used on tower, water tank, and chimney ladders over 20 feet in unbroken length in lieu of cage protection. No landing platform is required in these cases. All ladder safety devices such as those that incorporate lifebelts, friction brakes, and sliding attachments shall meet the design requirements of the ladders which they serve.

9. It is proposed to revise advisory standard 57.11-26 which is applicable to surface only and make it mandatory as follows:

57.11-26 *Mandatory.* Cage or wells:

(a) Cages or wells (except on chimney ladders) shall be built, as shown on the applicable drawings, covered in detail in figures 1, 2, and 3, or of equivalent construction.

(b) Cages or wells (except as provided in subparagraph (d) of standard 57.11-25) conforming to the dimensions shown in figures 1, 2, and 3 shall be provided on ladders of more than 20 feet to a maximum unbroken length of 30 feet.

(c) Cages shall extend a minimum of 42 inches above the top of a landing, unless other acceptable protection is provided.

(d) Cages shall extend down the ladder to a point not less than 7 feet nor more than 8 feet above the base of the ladder, with bottom flared not less than 4 inches, or portion of cage opposite ladder shall be carried to the base.

(e) Cages shall not extend less than 27 nor more than 28 inches from the centerline of the rungs of the ladder. Cages shall not be less than 27 inches in width. The insides shall be clear of projections. Vertical bars shall be located at a maximum spacing of 40 degrees around the circumference of the cage; this will give a maximum spacing of approximately 9½ inches, center to center.

(f) Ladder wells shall have a clear width of at least 15 inches measured each way from the centerline of the ladder. Smoothwalled wells shall be a minimum of 27 inches from the centerlines of rungs to the well wall on the climbing side of the ladder. Where other obstructions on the climbing side of the ladder exist, there shall be a minimum of 30 inches from the centerline of the rungs.

10. It is proposed to revoke advisory standard 57.11-35.

11. It is proposed to revise advisory standard 57.11-37 which is applicable to underground only and make it mandatory as follows:

57.11-37 *Mandatory.* Ladderways constructed after the effective date of this standard shall have a minimum unobstructed cross-sectional opening of 24 inches by 24 inches measured from the face of the ladder.

12. It is proposed to revise advisory standard 57.11-38 which is applicable to underground only and make it mandatory as follows:

57.11-38 *Mandatory.* Warning shall be given and acknowledged before entering a manway above or below where persons are working.

13. It is proposed to revoke advisory standard 57.11-39.

14. It is proposed to revise advisory standard 57.11-40 which is applicable to underground only and make it mandatory as follows:

57.11-40 *Mandatory.* Travelways steeper than 35 degrees from the horizontal shall be provided with ladders or stairways.

15. It is proposed to revise advisory standard 57.11-41 which is applicable to underground only and make it mandatory as follows:

57.11-41 *Mandatory.* Fixed ladders with an inclination of more than 70 degrees off the horizontal shall be offset with substantial landings at least every 30 feet or have landing gates at least every 30 feet.

16. It is proposed to revise advisory standard 57.11-56 which is applicable to underground only and make it mandatory as follows:

57.11-56 *Mandatory.* The systematic procedure of mandatory standard 57.19-120 for inspection, testing, and maintenance shall be exercised at least every 30 days for hoists designated as emergency hoists in any evacuation plan.

UU. Section 57.12 "Electricity" is proposed to be amended as follows:

§ 57.12 [Amended]

1. It is proposed to revise advisory standard 57.12-4 which is applicable to surface and underground and make it mandatory as follows:

57.12-4 *Mandatory.* Electrical conductors shall be of sufficient size and current-carrying capacity for normal operation so that a rise in temperature resulting from such normal operation will not damage the insulating materials. Suitable protection from mechanical injury shall be provided.

2. It is proposed to revise advisory standard 57.12-19 which is applicable to surface and underground and make it mandatory as follows:

57.12-19 *Mandatory.* Where access is necessary, suitable clearance shall be provided at stationary electrical equipment or switchgear.

3. It is proposed to revise advisory standard 57.12-22 which is applicable to surface and underground and make it mandatory as follows:

57.12-22 *Mandatory.* Areas containing major electrical installations shall be entered only by authorized persons.

4. It is proposed to revoke advisory standard 57.12-24.

5. It is proposed to revise advisory standard 57.12-29 which is applicable to surface and underground and make it mandatory as follows:

57.12-29 *Mandatory.* Electric equipment and wiring shall be inspected by a competent person as necessary to assure safe operating conditions.

6. It is proposed to revise advisory standard 57.12-31 which is applicable to surface and underground and make it mandatory as follows:

57.12-31 *Mandatory.* Electric circuits and equipment shall be designed, constructed, installed and maintained to prevent injury and safeguard personnel.

7. It is proposed to revise advisory standard 57.12-35 which is applicable to surface and underground and make it mandatory as follows:

57.12-35 *Mandatory.* Lamp sockets exposed to the weather or wet conditions shall be of a weatherproof type.

8. It is proposed to revise advisory standard 57.12-38 which is applicable to surface and underground and make it mandatory as follows:

57.12-38 *Mandatory.* Trailing cables shall be attached to machines in a suitable manner to protect the cable from damage and to prevent strain on the electrical connections.

9. It is proposed to revise advisory standard 57.12-39 which is applicable to surface and underground and make it mandatory as follows:

57.12-39 *Mandatory.* Surplus trailing cables to shovels, cranes and similar equipment shall be stored in cable boats or on reels mounted on the equipment or otherwise protected from mechanical damage.

10. It is proposed to revoke advisory standards 57.12-44 and 57.12-49.

11. It is proposed to revise advisory standard 57.12-50 which is applicable to surface and underground and make it mandatory as follows:

57.12-50 *Mandatory.* Trolley wires shall be installed at least 7 feet above rails, where height permits, and alined and supported to suitably control sway and sag.

12. It is proposed to revoke advisory standards 57.12-51 and 57.12-52.

13. It is proposed to revise advisory standard 57.12-53 which is applicable to surface and underground and make it mandatory as follows:

57.12-53 *Mandatory.* Ground wires for lighting circuits powered from trolley wires shall be connected securely to the ground-return circuit.

14. It is proposed to revise advisory standard 57.12-54 which is applicable to surface and underground and make it mandatory as follows:

57.12-54 *Mandatory.* Persons shall be instructed to carry tools and supplies so they will not come in contact with bare power conductors.

15. It is proposed to revise advisory standard 57.12-86 which is applicable to underground only and make it mandatory as follows:

57.12-86 *Mandatory.* Trolley and trolley feeder wire shall be installed opposite the clearance side of haulageways, except where it is not feasible.

16. It is proposed to revoke advisory standard 57.12-87.

17. It is proposed to revise advisory standard 57.12-88 which is applicable to underground only and make it mandatory as follows:

57.12-88 *Mandatory.* No splice except a vulcanized splice or its equivalent shall be made in a trailing cable within 25 feet of the machine unless the machine is equipped with a cable reel. A temporary splice may be made to move the equipment for repair.

VV. Section 57.13 "Compressed air and boilers" is proposed to be amended as follows:

§ 57.13 [Amended]

1. It is proposed to revise advisory standard 57.13-10 which is applicable to surface and underground and make it mandatory as follows:

57.13-10 *Mandatory.* Reciprocating type air compressors rated over 10 horsepower shall be equipped with automatic temperature-actuated shutoff mechanisms unless fusible plugs were previously installed in the compressor discharge lines.

Temperature-actuated shutoff mechanisms shall be set to shut off at temperatures not to exceed the normal operating temperature of the compressor by more than 25 percent. Fusible plugs, where installed prior to the adopting of this standard, are acceptable if they melt at temperatures at least 50° less than the flash point of the lubricating oil.

2. It is proposed to revise advisory standard 57.13-11 which is applicable to surface and underground and make it mandatory as follows:

57.13-11 *Mandatory.* Compressors and air receiver tanks shall be equipped with one or more automatic pressure relief valves. The total relieving capacity of such relief valves shall be such as to prevent pressure from exceeding the maximum allowable working pressure in a receiver tank by not more than 10 per cent. Air receiver tanks also shall be equipped with: Indicating pressure gages designed to ac-

V 4 3 / 1 7 7

curately measure pressure within the air receiver tanks; drain valves installed at the lowest point of the receiver tanks to provide for the removal of accumulated oil and moisture; and traps to prevent oil, moisture, and other contaminants from being expelled through the discharge lines.

3. It is proposed to revise advisory standard 57.13-12 which is applicable to surface and underground and make it mandatory as follows:

57.13-12 *Mandatory.* Compressor air intakes shall be installed to insure that only clean, uncontaminated air enters the compressors.

4. It is proposed to revise advisory standard 57.13-13 which is applicable to surface and underground and make it mandatory as follows:

57.13-13 *Mandatory.* Accumulations of water and oil shall be drained from compressed air receivers at least once each day the compressor is in operation.

5. It is proposed to revise advisory standard 57.13-14 which is applicable to surface and underground and make it mandatory as follows:

57.13-14 *Mandatory.* Compressed-air receivers shall have inspection openings. When the tanks are over 36 inches in diameter, the inspection openings shall be of a size to permit entry by persons.

6. It is proposed to revise advisory standard 57.13-15 which is applicable to surface and underground and make it mandatory as follows:

57.13-15 *Mandatory.* Compressed air receivers and other unfired pressure vessels shall be inspected in accordance with the applicable chapters of the National Board Inspection Code, a Manual for Boiler and Pressure Vessel Inspectors, 1977, approved by the National Board of Executive Committee on January 27, 1977, and published by the National Board of Boiler and Pressure Vessel Inspectors, which is hereby incorporated by reference and made a part hereof. Records of such inspection shall be kept. The National Board Inspection Code of 1977 may be examined at any Metal and Nonmetal Mine Safety and Health District Office of the Mine Safety and Health Administration, and may be obtained from the National Board of Boiler and Pressure Vessel Inspectors, 1055 Crupper Avenue, Columbus, OH 43229.

7. It is proposed to revise advisory standard 57.13-16 which is applicable to surface and underground and make it mandatory as follows:

57.13-16 *Mandatory.* Compressors shall be operated and lubricated in accordance with the manufacturer's recommendations.

8. It is proposed to revise advisory standard 57.13-17 which is applicable to surface and underground and make it mandatory as follows:

57.13-17 *Mandatory.* Compressor discharge pipes where carbon build-up may occur shall be cleaned periodically as part of a systematic maintenance schedule and at least annually.

9. It is proposed to revoke advisory standard 57.13-18.

10. It is proposed to revise advisory standard 57.13-30 which is applicable to surface and underground and make it mandatory as follows:

57.13-30 *Mandatory.* (a) All boilers shall be equipped with water level gages, pressure gages, automatic pressure-relief valves, blowdown piping, and other approved safety devices to protect against hazards from overpressure, flameouts, fuel interruptions and low water level, all as required by the appropriate sections of the codes listed below.

(b) These gages, devices, and pipings shall be designed, installed, operated, maintained, repaired, altered, inspected, and tested by competent persons in accordance with the following listed sections, or chapters and appendixes—as applicable—of:

(1) The ASME Boiler and Pressure Vessel Code, 1977, published by the American Society of Mechanical Engineers.

Section and Title
I—Power boilers.
II—Material specifications.
II—Part A—ferrous.
II—Part B—nonferrous.
II—Part C—welding rods, electrodes, and filler metal.
IV—Heating boilers.
V—Non-destructive examination.
VI—Recommended rules for care and operations of heating boilers.
VII—Recommended rules for care of power boilers.

(2) The National Board Inspection Code, A Manual for Boiler and Pressure Vessel Inspectors, 1977, approved by the National Board Executive Committee on January 27, 1977, and published by the National Board of Boiler and Pressure Vessels Inspectors.

Chapter and Title
I—Glossary terms.
II—Inspection of boilers and pressure vessels.
III—Repairs and alterations to boilers and pressure vessels by welding.
IV—Shop inspection of boilers and pressure vessels.
V—In-service inspection of pressure vessels by authorized owner-user inspection agencies.

Appendix and Title
A—Safety and safety relief valves.
B—Non-ASME code boilers and pressure vessels.
C—Storage of mild steel covered arc welding electrodes.
D—National board "R" (repair) symbol stamp.
E—Owner-user inspection agencies.
F—Inspection forms.

(c) Records of inspections and repairs shall be kept and made available to the Secretary or his authorized representative.

(d) Sections of the ASME Boiler and Pressure Vessel Code, 1977, to which references are made in this standard are hereby incorporated by reference and made a part hereof, and may be obtained from the American Society of Mechanical Engineers, United Engineering Center, 345 East Forty-Seventh Street, New York, N.Y. 10017. Chapters and appendixes of the National Board Inspection Code of 1977 to which references are made in this standard are hereby incorporated by reference and made a part hereof, and may be obtained from the National Board of Boiler and Pressure Vessel Inspectors, 1055 Crupper Avenue, Columbus, Ohio 43229. These publications may be examined at any Metal and Nonmetal Mine Safety and Health District Office of the Mine Safety and Health Administration.

11. It is proposed to revoke advisory standards 57.13-31, 57.13-32, 57.13-33, and 57.13-34.

WW. Section 57.14 "Use of equipment" is proposed to be amended as follows:

§ 57.14 [Amended]

1. It is proposed to revise advisory standard 57.14-3 which is applicable to surface and underground and make it mandatory as follows:

57.14-3 *Mandatory.* Guards at conveyor-drive, conveyor-head and conveyor-tail pulleys shall extend a distance sufficient to prevent a person from accidently reaching behind the guard and becoming caught between the belt and the pulley.

2. It is proposed to revoke advisory standards 57.14-4 and 57.14-5.

3. It is proposed to revise advisory standard 57.14-7 which is applicable to surface and underground and make it mandatory as follows:

57.14-7 *Mandatory.* Guards shall be of substantial construction and maintained to provide the required protection.

4. It is proposed to revise advisory standard 57.14-11 which is applicable to surface and underground and make it mandatory as follows:

57.14-11 *Mandatory.* Guards, shields, or other suitable protection shall be provided in areas where flying or falling materials present a hazard.

5. It is proposed to revise advisory standard 57.14-25 which is applicable to surface and underground and make it mandatory as follows:

57.14-25 *Mandatory.* Machinery or equipment that is to be used during the shift shall be inspected at the beginning of each shift by a competent person. Defects affecting safety shall be corrected before the machinery or equipment is used.

6. It is proposed to revise advisory standard 57.14-27 which is applicable to surface and underground and make it mandatory as follows:

57.14-27 *Mandatory.* Operation of machinery or equipment shall be assigned only to competent persons; provided, however, that trainees may be permitted to operate machinery or equipment under the guidance of competent persons.

7. It is proposed to revoke advisory standard 57.14-28.

8. It is proposed to revise advisory standard 57.14-36 which is applicable to surface and underground and make it mandatory as follows:

57.14-36 *Mandatory.* Tools and equipment shall be used within the design capacity for which they are intended and designed.

9. It is proposed to revise advisory standard 57.14-55 which is applicable to underground only and make it mandatory as follows:

57.14-55 *Mandatory.* Welding operations shall be shielded and well ventilated.

XX. Section 57.15 "Personal protection" is proposed to be amended as follows:

§ 57.15 [Amended]

1. It is proposed to revoke advisory standards 57.15-8, 57.15-9, and 57.15-10.

2. It is proposed to revise advisory standard 57.15-11 which is applicable to surface and underground and make it mandatory as follows:

57.15-11 *Mandatory.* Employees shall be instructed in the hazards of wearing finger rings and other jewelry on the job.

3. It is proposed to revoke advisory standard 57.15-13.

YY. Section 57.16 "Materials storage and handling" is proposed to be amended as follows:

§ 57.16 [Amended]

1. It is proposed to revise advisory standard 57.16-1 which is applicable to surface and underground and make it mandatory as follows:

57.16-1 *Mandatory.* When stacked or stored, supplies shall not create a stumbling or fall-of-material hazard.

2. It is proposed to revise advisory standard 57.16-2 which is applicable to surface and underground and make it mandatory as follows:

57.16-2 *Mandatory.* Bins, hoppers, silos, tanks, and surge piles, where loose and unconsolidated materials are stored, handled, or transferred shall be:

(a) Equipped with mechanical devices or other effective means of handling material so that during normal operations persons are not required to enter or work where they are exposed to entrapment by the caving or sliding of these materials;

(b) Equipped with supply and discharge operating controls which are located so as to eliminate hazards to persons from spills or accidental overruns;

(c) Provided with suitable walkways where persons are required to walk over or around;

(d) Provided with ladders, platforms, or stagings where persons are required to enter a material storage facility for maintenance or inspection purposes. Where a possibility exists that moving material may create a hazardous condition, no person shall be allowed to enter this area for any reason, unless the supply and discharge of materials has ceased, the supply and discharge equipment is locked out, and the person is wearing a safety belt or harness equiped with a lifeline suitably fastened. Another person suitably secured with a safety belt and line shall be stationed at a point near where the lifeline is fastened, so that he can adjust it or keep it tight as needed with minimum slack in the said lifeline at all times.

3. It is proposed to revise advisory standard 57.16-7 which is applicable to surface and underground and make it mandatory as follows:

57.16-7 *Mandatory.* Hitches and slings used to hoist materials shall be designed and suitably used for the particular materials handled. Taglines shall be attached to loads that may require steadying or guidance while suspended.

4. It is proposed to revoke advisory standard 57.16-8.

5. It is proposed to revise advisory standard 57.16-10 which is applicable to surface and underground and make it mandatory as follows:

57.16-10 *Mandatory.* To protect personnel, material shall not be dropped from an overhead elevation until the drop area is first cleared of personnel, and then is either guarded or a suitable warning given.

6. It is proposed to revise advisory standard 57.16-12 which is applicable to surface and underground and make it mandatory as follows:

57.16-12 *Mandatory.* Concentrated acids and alkalies shall be stored in a manner that these chemicals cannot inadvertently mix with each other or with other substances with which they will react violently or cause the liberation of dangerous fumes.

7. It is proposed to revise advisory standard 57.16-13 which is applicable to surface and underground and make it mandatory as follows:

57.16-13 *Mandatory.* A suitable warning shall be given before molten metal is poured, or a container of molten metal is moved.

8. It is proposed to revise advisory standard 57.16-16 which is applicable to surface and underground and make it mandatory as follows:

57.16-16 *Mandatory.* Fork and other similar type lift trucks shall be operated:

(a) With the uprights tilted back to steady and secure load.

(b) With the load in the upgrade position when ascending or decending grades in excess of 10 percent.

(c) Except for minor adjustments, loads shall not be raised or lowered enroute.

(d) Unloaded trucks shall travel on all grades with the load engaging means downgrade.

9. It is proposed to revise and renumber advisory standard 57.16-35, make it applicable to surface and underground, and make it mandatory as follows:

57.16-17 *Mandatory.* Where the stretching or contraction of a hoist rope could create a hazard, chairs or other suitable blocking shall be used to support conveyances at shaft landings before heavy equipment is loaded or unloaded.

ZZ. Section 57.18 "Safety programs" is proposed to be amended as follows:

§ 57.18 [Amended]

1. It is proposed to revise advisory standard 57.18-1 which is applicable to surface and underground and make it mandatory as follows:

57.18-1 *Mandatory.* The operator shall establish a definite, effective, and continually functioning safety program which shall be made available to all personnel and make every attempt to prevent accidents and increase safety. All personnel shall actively participate in the safety program.

2. It is proposed to revise advisory standard 57.18-2 which is applicable to surface and underground and make it mandatory as follows:

57.18-2 *Mandatory.* (a) Each active working area or installation shall be examined at least once each shift, or more often if necessary, by a supervisor or another competent person for hazardous conditions. Such conditions observed shall be promptly corrected by the operator.

(b) A condition noted by the person conducting the examination that may present an imminent danger shall be brought to the immediate attention of the operator who shall withdraw all persons from the area affected, except persons referred to in section 104(c) of the Act, until the danger is abated.

(c) Any hazardous conditions observed by the supervisor or competent person making the examination shall

SE 12 78

be uniformly recorded and will include the date, the condition observed and the location of the condition. The record shall be available for review by the Secretary or his authorized representative.

(d) All reports shall include the action taken to abate any hazardous conditions found and shall be countersigned by:

(1) The mine foreman, or

(2) The mine superintendent, or

(3) The person designated by the operator as responsible for safety and health at the mine.

3. It is proposed to revoke advisory standards 57.18-3, 57.18-4, 57.18-5, and 57.18-7.

4. It is proposed to revise advisory standard 57.18-8 which is applicable to surface and underground and make it mandatory as follows:

57.18-8 *Mandatory.* To assure that work is being done in a safe manner, each active working place shall be visited each shift by a supervisor, or another competent person shall be designated to check that working place.

5. It is proposed to revise advisory standard 57.18-9 which is applicable to surface and underground and make it mandatory as follows:

57.18-9 *Mandatory.* A supervisor or a designated competent person shall be in attendance on the property when persons are working to take charge in case of an emergency.

6. It is proposed to revoke advisory standard 57.18-11.

7. It is proposed to revise advisory standard 57.18-13 which is applicable to surface and underground and make it mandatory as follows:

57.18-13 *Mandatory.* A suitable communications system shall be provided at the mine site in order to summons assistance in the event of an emergency.

8. It is proposed to revoke advisory standard 57.18-26.

AAA. Section 57.19 "Man hoisting" is proposed to be amended as follows:

§ 57.19 [Amended]

1. It is proposed to revise advisory standard 57.19-12 and make it mandatory as follows:

57.19-12 *Mandatory.* Where grooved drums are used, the grooves shall be of suitable size and pitch for the rope used.

2. It is proposed to revoke advisory standard 57.19-20.

3. It is proposed to revise advisory standard 57.19-25 and make it mandatory as follows:

57.19-25 *Mandatory.* Wire ropes shall be used and maintained in accordance with the manufacturer's recommendations, or the equivalent.

4. It is proposed to revise advisory standard 57.19-35 and make it mandatory as follows:

57.19-35 *Mandatory.* Headframes shall be of substantial construction.

5. It is proposed to revise advisory standard 57.19-36 and make it mandatory as follows:

57.19-36 *Mandatory.* Headframes shall be high enough to provide clearance for overtravel and safe stopping of the conveyance.

6. It is proposed to revise advisory standard 57.19-37 and make it mandatory as follows:

57.19-37 *Mandatory.* Fleet angles shall not be greater than 1½ degrees for smooth drums, and 2 degrees for grooved drums.

7. It is proposed to revise advisory standard 57.19-39 and make it mandatory as follows:

57.19-39 *Mandatory.* All man hoists, except emergency escape hoists, installed after the effective date of this standard shall have drums and sheaves of diameters at least 60 times the rope diameter.

8. It is proposed to revise advisory standard 57.19-67 and make it mandatory as follows:

57.19-67 *Mandatory.* During shift changes, an authorized person shall be in charge of each man trip.

9. It is proposed to revise advisory standard 57.19-72 and make it mandatory as follows:

57.19-72 *Mandatory.* When combinations of cages and skips are used in the same compartment, the cages shall be totally enclosed to protect personnel from flying material and the hoist speed reduced to manspeed as defined in section 57.19-61, but not to exceed 1,000 feet per minute. Muck shall not be hoisted with personnel during shift changes.

10. It is proposed to revise advisory standard 57.19-74 and make it mandatory as follows:

57.19-74 *Mandatory.* Persons shall not ride the bail, rim, bonnet, or crosshead of any shaft conveyances except where necessary for inspection and maintenance, and then only when suitable protection for persons is provided.

11. It is proposed to revise advisory standard 57.19-78 and make it mandatory as follows:

57.19-78 *Mandatory.* All buckets shall be stopped after being raised about three (3) feet above the shaft bottom. A bucket shall be stabilized before a hoisting signal is given to continue hoisting the bucket to the crosshead. After a hoisting signal is given, hoisting to the crosshead shall be at the minimum speed. The signaling device shall be attended constantly until a bucket reaches the guides. When persons are hoisted, the signaling devices shall be attended until the crosshead has been engaged.

12. It is proposed to revise advisory standard 57.19-81 and make it mandatory as follows:

57.19-81 *Mandatory.* Conveyances controlled by a hoistman, when not in use, shall be released and the conveyance shall be raised or lowered a suitable distance to prevent persons from boarding or loading the conveyance.

13. It is proposed to revise advisory standard 57.19-91 and make it mandatory as follows:

57.19-91 *Mandatory.* Hoistmen shall accept hoisting instructions only by the regular signaling system unless it is out of order. During an emergency, the hoistman shall accept instructions only from authorized persons to direct movement of the conveyances.

14. It is proposed to revise advisory standard 57.19-93 and make is mandatory as follows:

57.19-93 *Mandatory.* A standard code of hoisting signals shall be adopted and used at each mine. The movement of a shaft conveyance on a "one bell" signal shall be prohibited.

15. It is proposed to revise advisory standard 57.19-104 and make it mandatory as follows:

57.19-104 *Mandatory.* Suitable clearance at shaft stations shall be provided and maintained so as to allow for the safe movements of persons and the safe passage and handling of equipment and materials.

16. It is proposed to revise advisory standard 57.19-124 and make it mandatory as follows:

57.19-124 *Mandatory.* To distribute the wear of the rope, hoist ropes other than those on friction hoists shall be cut off at least six (6) feet above the highest connection to the conveyance, at intervals not to exceed one (1) year unless conditions of use and/or examination and inspection required in standard 57.19-126 indicate the necessity of a shorter time interval. The portion of the rope that is cut off shall be examined and inspected by a competent person for damage, corrosion, wear, and fatigue.

17. It is proposed to revise advisory standard 57.19-125 and make it mandatory as follows:

57.19-125 *Mandatory.* Hoist ropes wound in multiple layers shall have a suitable length cut off at the drum end at least three (3) times during the anticipated life of the rope and whenever necessary, as determined by the inspection or tests required in standard 57.19-126, to distribute the wear at change of layers and crossover points and to preserve the integrity of the rope. The amount of rope cut off shall be not be a whole number multiple of the circumference of the drum.

18. It is proposed to revise advisory standard 57.19-126 and make it mandatory as follows:

57.19-126 *Mandatory.* Hoist ropes shall be examined over its entire active length at least every month to evaluate wear and possible damage.

Caliper measurements or nondestructive tests shall be made wherever wear is evident on the rope and at least every six (6) months and whenever necessary as determined by examination, inspection, or tests as follows:

(a) Immediately above the socket or clips and above the safety connection;

(b) Where the rope rests on the sheaves;

(c) Where the ropes leave the drums when the conveyances are at the regular stopping point;

(d) Where a layer of rope begins to overlap another layer on the drum;

(e) At 100-foot intervals; measurements shall be made midway between the last previously calipered points.

19. It is proposed to revoke advisory standard 57.19-127.

20. It is proposed to revise advisory standard 57.19-130 make it mandatory as follows:

57.19-130 *Mandatory.* Empty hoist conveyances shall be operated at least one round trip to assure the hoisting compartment is clear of obstruction before hoisting persons:

(a) After any hoist or shaft repairs or related equipment repairs that might restrict or obstruct conveyance clearance;

(b) After any oversize or overweight material or equipment trips that might restrict or obstruct conveyance clearance;

(c) After blasting in or near the shaft that might restrict or obstruct conveyance clearance;.

(d) After remaining idle for one shift or longer.

21. It is proposed to revise advisory standard 57.19-131 and make it mandatory as follows:

57.19-131 *Mandatory.* Hoist conveyance connections shall be inspected at least once during any 24-hour period that the conveyance is used for hoisting persons.

22. It is proposed to revise advisory standard 57.19-132 and make it mandatory as follows:

57.19-132 *Mandatory.* A performance drop test of hoist conveyance safety catches shall be made at the time of installation, or prior to installation, in a mockup of the actual installation and certified to in writing by the manufacturer or registered professional engineer performing the test.

After installation, the conveyance shall be suitably rested at least once before use and the hoist rope slackened to test for the unrestricted functioning of the safety catches and their activating mechanisms.

Thereafter, the safety catches shall be inspected by a competent person at the beginning of any 24-hour period that the conveyance is to be used, and the unrestricted functioning of the safety catches and their activating mechanisms shall be tested (as before) at least once at the beginning of any 7-day period during which the conveyance is to be used.

BBB. Section 57.20 "Miscellaneous" is proposed to be amended as follows:

§ 57.20 [Amended]

1. It is proposed to revoke advisory standards 57.20-4, 57.20-6, and 57.20-7.

2. It is proposed to revise advisory standard 57.20-8 which is applicable to surface and underground and make it mandatory as follows:

57.20-8 *Mandatory.* Toilet facilities shall be provided at locations that are compatible with the mine operations and that are readily accessible to mine personnel. The facilities shall be kept clean and sanitary. Separate toilet facilities shall be provided for each sex except where toilet facilities will be occupied by no more than one (1) person at a time and can be locked from the inside.

3. It is proposed to revise advisory standard 57.20-32 which is applicable to underground only and make it mandatory as follows:

57.20-32 *Mandatory.* Telephones or other two-way communication equipment shall be provided from underground operations to the surface and have legible instructions for their use which shall be posted inside the covers, or should there be no covers, posted adjacent to the communication equipment. Persons working underground shall be instructed as to the proper use of the equipment.

CCC. Section 57.21 "Gassy mines" is proposed to be amended as follows:

§ 57.21 [Amended]

1. It is proposed to revise advisory standard 57.21-21 and make it mandatory as follows:

57.21-21 *Mandatory.* Main fans shall be:

(a) Operated continuously while persons are underground except when stopped or slowed down for fan maintenance and/or fan adjustments and related ventilation system adjustments and compliance is made with the provisions of mandatory standard 57.21-24.

(b) Provided with pressure-recording gages which shall be examined daily for good operating condition. The charts of such gages shall be changed after completing one revolution.

(c) Inspected daily and logs kept of such inspection and of fan maintenance.

(d) Charts and logs shall be retained for a minimum of 1 year. Such records and charts shall be available for inspection by the Secretary of Labor or his authorized representative.

2. It is proposed to revoke advisory standard 57.21-37.

3. It is proposed to revise advisory standard 57.21-49 and make it mandatory as follows:

57.21-49 *Mandatory.* Brattice cloth shall be of flame-resistant material.

4. It is proposed to revise advisory standard 57.21-51 and make it mandatory as follows:

57.21-51 *Mandatory.* Crosscuts shall be provided where practicable at or within 18 feet of the face of drifts, entries, and rooms before the workings are abandoned in any unsealed area of the mine. When crosscuts are not practicable, line brattice or other suitable means of ventilating shall be provided to the drifts, entries, or rooms.

5. It is proposed to revise advisory standard 57.21-65 and make it mandatory as follows:

57.21-65 *Mandatory.* At intervals not greater than 7 days the mine foreman, or other competent person designated by the mine foreman shall make examinations for hazardous conditions and for compliance with mandatory health and safety standards, and shall make tests for methane and carbon monoxide. Such tests shall be made with approved devices at the following locations:

(a) In the return of each split where it enters the main return;

(b) Adjacent to retreat areas if accessible;

(c) At seals;

(d) In the main return;

(e) In at least one entry of each intake and return airway;

(f) In idle workings;

(g) In unsealed abandoned workings, insofar as conditions permit.

COMMERCIAL SALES OF AGRICULTURAL COMMODITIES
USDA/Sec'y proposes to revise existing regulations pertaining to ocean transportation of agricultural commodities; comments by 11-13-78 40872

CONTINUED INSIDE

SAINT PAUL, MINNESOTA, WORKSHOPS

HOW TO USE THE FEDERAL REGISTER

FOR: Any person who must use the Federal Register and Code of Federal Regulations.

WHAT: In cooperation with the Minnesota State Metropolitan Council of the Twin Cities Area, free public workshops (approximately 2½ hours) to present:

1. Brief history of the Federal Register system.
2. Difference between legislation and regulations.
3. Relationship of Federal Register and the Code of Federal Regulations.
4. Important elements of a typical Federal Register document.
5. An introduction to the finding aids of the FR/CFR system.

WHEN: October 2 and 3, 1978, at 9 a.m. (Each session identical)

WHERE: Suite 300, Metro Square Building, Seventh and Robert Streets, St. Paul, Minn.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them, as part of the General Services Administration's efforts to encourage public participation in Government actions. There will be no discussion of specific agency regulations.

RESERVATIONS: Call Chuck McDew, 612-291-6421.

HOW TO USE THE FEDERAL REGISTER

SAINT PAUL, MINNESOTA, WORKSHOPS

October 2 and 3, 1978

See inside cover for details.

federal register

Area Code 202 Phone 523-5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended, 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

Title 7—Agriculture

CHAPTER X—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; MILK), DEPARTMENT OF AGRICULTURE

[Milk Order No. 36]

PART 1036—MILK IN THE EASTERN OHIO-WESTERN PENNSYLVANIA MARKETING AREA

Order Suspending a Certain Provision

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Suspension of rule.

SUMMARY: This action relaxes for September 1978 the shipping requirement for supply plants to qualify for regulatory status under the order. The action was requested by the operator of a pool supply plant to avoid making unnecessary and uneconomic movements of milk in qualifying the supply plant for September. The suspension will provide interim relief for regulated handlers until amendments to the order, which were considered at a public hearing in October 1977, become effective on October 1, 1978.

DATE: Effective September 13, 1978.

FOR FURTHER INFORMATION CONTACT:

Maurice M. Martin, Marketing Specialist, Dairy Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250, 202–447–7183.

SUPPLEMENTARY INFORMATION: This order of suspension is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and of the order regulating the handling of milk in the eastern Ohio-western Pennsylvania marketing area.

It is hereby found and determined that for the month of September 1978 the following provision of the order does not tend to effectuate the declared policy of the Act:

In § 1036.7(b), the word "September".

STATEMENT OF CONSIDERATION

The suspension will reduce (from 50 to 40 percent) for September 1978 the proportion of milk receipts at a supply plant that must be shipped to pool distributing plants and/or sold as route disposition in the marketing area to qualify the supply plant as a pool plant. The current performance standards for the pooling of a supply plant require that for September such disposition be not less than 50 percent of the total quantity of milk approved for fluid use that is received at the plant from producers or cooperative associations, or diverted from it to pool plants and nonpool plants.

The suspension was required by a pool supply plant operator whose plant is located at Titusville, Pa. The handler indicated that without the suspension, he would have to make uneconomic movements of milk to maintain pool status for September. He asked for interim relief pending amendments to the order which were recently announced by the Department.

Beginning October 1, 1978, the supply plant shipping requirement under the order will be reduced 10 percentage points for each month. An amended order providing for this change was issued on August 28, 1978 (43 FR 38797).

In view of the indication that the present 50 percent shipping requirement for this September will likely cause the supply plant operator to have to make uneconomic movements of milk in order to maintain continued pool status for his plant and since it has been found appropriate on the basis of a hearing to lower the pool supply plant shipping requirement under the order, it is concluded that action should be taken to provide the same shipping requirement for pooling a supply plant this September that the amended order provides effective October 1, 1978. Such action will provide appropriate relief for the petitioner and for any other supply plant operator who may have similar marketing problems during September 1978.

All interested parties have had the opportunity through the amendatory proceeding to make their views known to the Department concerning relaxing the shipping requirements for a pool supply plant. All such views are fully considered in the determination of appropriate standards adopted in the amended order, which was approved by over 88 percent of the producers who participated in a referendum.

It is hereby found and determined that 30 days' notice of the effective date hereof is impractical, unnecessary and contrary to the public interest in that:

(a) This suspension is necessary to reflect current marketing conditions and to maintain orderly marketing conditions in the marketing area for the month of September 1978;

(b) This suspension does not require of persons affected substantial or extensive preparation prior to the effective date; and

(c) This suspension is based upon an amendatory proceeding for this order during which interested parties were afforded the opportunity to file written data, views or arguments concerning appropriate supply plant pooling standards.

Therefore, good cause exists for making this order effective upon publication in the FEDERAL REGISTER.

It is therefore ordered, That the aforesaid provision of the order is hereby suspended for September 1978.

((Secs. 1–19, 48 Stat. 31, as amended; (7 U.S.C. 601–674).)

Effective date: September 13, 1978.

Signed at Washington, D.C., on: September 8, 1978.

JERRY C. HILL,
Deputy Assistant Secretary.

Title 8—Aliens and Nationality

CHAPTER I—IMMIGRATION AND NATURALIZATION SERVICE, DEPARTMENT OF JUSTICE

PART 108—ASYLUM

PART 236—EXCLUSION OF ALIENS

Asylum: Filing of Application in Exclusion Proceedings

AGENCY: Immigration and Naturalization Service, Justice.

V 43 / 178 SE 13 78

ACTION: Final rule.

SUMMARY: This final rule contains amendments of the regulations of the Immigration and Naturalization Service pertaining to applications for asylum submitted by aliens seeking to enter the United States at airports or seaports of entry. Existing Service regulations provide that asylum applications by those seeking to enter the United States must be filed with and adjudicated by a District Director. In order to give alien asylum applicants the fullest possible opportunity to present their claims, the Service will change its policy and revise its procedures in order to provide aliens who apply for asylum at airports or seaports of entry an evidentiary hearing on their asylum claim before an immigration judge in exclusion proceedings. Any person under a pending order of exclusion and deportation who prior to November 1, 1977, has submitted an application for asylum which was denied by a District Director, or is pending but has not been previously considered by an immigration judge, may, prior to December 31, 1978, submit a motion to reopen the exclusion proceedings to have the asylum application decided by an immigration judge under the new procedures. In the future, only those applicants for admission, who, because they are stowaways, crewmen, or temporarily excluded on national security grounds, are not entitled to an exclusion hearing, will submit their asylum applications to the District Director. These rules are being published to give effect to the Service's new policy. A Notice of Proposed Rulemaking, also published today, sets forth the Service's proposal to eliminate the District Director's role in processing asylum claims by aliens already in the United States in an unlawful status.

EFFECTIVE DATE: September 13, 1978.

FOR FURTHER INFORMATION CONTACT:

James G. Hoofnagle, Jr., Instructions Officer, Immigration and Naturalization Service, 425 I Street NW., Washington, D.C. 20536, telephone 202-376-8373.

Chapter I of Title 8 of the Code of Federal Regulations is hereby amended as follows:

1. 8 CFR 108.1 is revised by adding a new second sentence between the existing first and second sentences; amending the existing second sentence; and adding three new sentences between the revised second, and existing third, sentences. As revised 8 CFR 108.1 reads as follows:

§ 108.1 Application.

An applicant who is seeking admission to the United States at a land border port or preclearance station who wishes to apply for asylum shall be referred to the nearest American consul. In all other cases, application for asylum shall be submitted on Form I-589, "Request for Asylum in the United States." Except as otherwise provided in this paragraph, an application for asylum by an alien who is applying for admission to the United States at an airport or seaport for entry shall be submitted to the docket clerk for the immigration judge who shall consider that application in connection with an exclusion hearing as provided in § 236.3 of this chapter. A crewman or stowaway or alien temporarily excluded pursuant to section 235(c) of the act who is at a seaport or airport shall submit his application for asylum to the district director. An application for asylum by an alien who is within the United States and who is not under deportation proceedings shall be submitted to the district director having jurisdiction over his place of residence in the United States. The applicant's spouse and unmarried children under the age of 18 years may be included in the application.

2. Section 108.2 is amended by revising the title to read as follows:

§ 108.2 Decision by District Director.

* * * * *

3. 8 CFR 236 is amended by adding a new § 236.3. The third sentence of § 236.6 is amended. The first sentence of § 236.7(c) is amended. The amendments are set forth below.

§ 236.3 Application for asylum.

(a) *Applications on and after November 1, 1977.* (1) An alien subject to exclusion proceedings under this part who believes that he would be subject to persecution in the country to which he would be returned under an order of exclusion and deportation because of race, religion, nationality, membership in a particular social group, or political opinion may apply for asylum on Form I-589. Four copies of such application shall be submitted to the docket clerk before an exclusion hearing is commenced. If application has not been made prior to commencement of the hearing, the hearing may be adjourned for not more than ten days to allow an application to be filed.

(2) Form I-589 may be accompanied by a motion for summary judgment. Within 10 days after the filing of Form I-589, the Service may file and serve on the alien a motion for summary judgment or a reply to any such motion by the alien. Within 10 days of service the alien may file a response to the Service's motion or reply. The grant of a motion for summary judgment shall be subject to appeal as provided in § 236.7 If the immigration judge denies such motion, or if no such motion has been filed within ten days after filing of the Form I-589, the docket clerk shall send two copies of Form I-589 with supporting evidence to the Office of Refugee and Migration Affairs of the Bureau of Human Rights and Humanitarian Affairs of the Department of State, and shall calendar the case for hearing, which shall be deferred for a period not to exceed 30 days pending receipt of the Department of State's views. The reply, if any, from the Department of State, unless classified under Executive Order No. 11652 (37 FR 5209, March 19, 1972), as requiring protection from unauthorized disclosure in the interest of national security shall be given by the docket clerk to the alien and to the trial attorney.

(3) During the exclusion hearing, the applicant shall be examined under oath on his application and may present evidence on his behalf. The applicant has the burden of satisfying the Immigration Judge that he would be subject to persecution on account of race, religion, nationality, membership in a particular social group, or political opinion as claimed. The Trial Attorney may also present evidence for the record, and may submit information not of record to be considered by the Immigration Judge provided that such information is classified under Executive Order No. 11652 and that the Immigration Judge or the Board has determined that such information is relevant. When the Immigration Judge receives such nonrecord information he shall inform the applicant thereof and shall also inform him whether it concerns conditions generally in a specified country or the applicant himself. Whenever he believes he can do so consistently with safeguarding both the information and its source, the Immigration Judge should state more specifically the general nature of the information in order that the applicant may have an opportunity to offer opposing evidence. A decision based in whole or in part on such classified information shall state that such information is material to the decision. An alien seeking admission to the United States at a land border port will be processed in accordance with the provisions of § 108.1 of this chapter.

(b) *Applications prior to November 1, 1977.* Any person under a pending order of exclusion and deportation who prior to November 1, 1977, has submitted an application for asylum which was denied by a district director but was not considered by an Immigration Judge may, prior to December 31, 1978, submit a motion to reopen the exclusion proceedings, without fee, to have such application decided by an Immigration Judge in accordance with paragraph (a).

§ 236.6 Finality of order.

* * * When the order of the Immigration Judge is to admit the applicant, or to grant asylum by parole under section 212(d)(5) of the Immigration and Nationality Act, or to grant the application for adjustment under the conditions specified in § 245.2(a) of this chapter, the Immigration Judge shall place the applicant on notice that the decision is subject to appeal by the district director as provided in § 236.7(c).

§ 236.7 Appeals.

(a) * * *

(b) * * *

(c) *By district director.* The district director may, within five days from date of decision, appeal from an order of the Immigration Judge to admit the applicant, or to grant asylum, or to grant the application for adjustment. * * *

* * * * *

(Sec. 103; 8 U.S.C. 1103; Interpret or apply sec. 212(d)(5) and sec. 236 (8 U.S.C. 1182(d)(5) and 1226))

The amendments contained in this order are issued pursuant to section 552 of Title 5 of the United States Code (80 Stat. 383), as amended by Pub. L. 93-502 (88 Stat. 1561) and the authority contained in section 103 of the Immigration and Nationality Act (8 U.S.C. 1103) 28 CFR 0.105(b) and 8 CFR 2.1. Compliance with the provisions of section 553 of Title 5 of the United States Code as to notice of proposed rulemaking and delayed effective date is unnecessary in this instance because the amendments relate to Service procedure and confer benefits on the persons affected thereby.

Effective date: The amendments contained in this order become effective on September 13, 1978.

Dated: September 8, 1978.

LEONEL J. CASTILLO,
Commissioner of Immigration and Naturalization.

[FR Doc. 78-25890 Filed 9-12-78; 8:45 am]

[4810-25]

Title 13—Business Credit and Assistance

CHAPTER IV—EMERGENCY LOAN GUARANTEE BOARD

DELETION OF CHAPTER

EDITORIAL NOTE: The Financial Counselor to the General Counsel, Department of the Treasury, informed the Office of the Federal Register that regulations presently codified as 13 CFR Chapter IV—Emergency Loan Guarantee Board have no future application, are of no current force or affect, and need no longer be published in the Code of Federal Regulations.

The basis for the requested deletion is the termination of the Board's authority to extend or renew guarantee commitments after December 31, 1978 (see Pub. L. 92-70), and a legal opinion on file in the Office of the General Counsel at the Treasury Department.

Therefore, pursuant to 1 CFR 8.2, Chapter IV—Emergency Loan Guarantee Board, of Title 13, Code of Federal Regulations, is deleted.

[6320-01]

Title 14—Aeronautics and Space

CHAPTER II—CIVIL AERONAUTICS BOARD

SUBCHAPTER E—ORGANIZATION REGULATIONS

[OR-132; Amdt. 71]

PART 385—DELEGATIONS AND REVIEW OF ACTION UNDER DELEGATION; NONHEARING MATTERS

Delegation of Authority to the Director, Bureau of International Aviation

AGENCY: Civil Aeronautics Board.

ACTION: Final rule.

SUMMARY: This rule delegates authority to the Director of the Bureau of International Aviation to waive the 30-day advance notice aspect of part 213 schedule-filing requirements, and to handle certain foreign air carrier requests for authority to operate additional flights. We are adopting this order so that timely relief can be granted when necessary.

DATES: Adopted: September 7, 1978. Effective: September 7, 1978.

FOR FURTHER INFORMATION CONTACT:

Mark Schwimmer, Civil Aeronautics Board, Office of the General Counsel, 1825 Connecticut Avenue NW., Washington, D.C. 20428, 202-673-5442.

SUPPLEMENTARY INFORMATION: Under § 213.3 of the Economic Regulations (14 CFR 213.3), when the public interest requires it the Board may order a foreign air carrier to file, within 7 days, copies of its existing schedules of service between the United States and any foreign point and then to file copies of any proposed new schedules, or amendments to existing ones, at least 30 days before the inauguration date of the proposed service. A carrier may inaugurate the operations described in a proposed schedule 30 days after filing it, unless the Board issues an order disapproving the schedule. The Board's order would itself be subject to stay or disapproval by the President within 10 days after adoption.

As a result of market conditions, equipment maintenance problems, and other circumstances, foreign air carriers that have been ordered to file schedules often need to alter their schedules on less than 30 days' notice. These changes require waivers of the 30-day advance filing requirement. The Board finds it in the public interest to establish a procedure under which applications for these waivers can be considered quickly, so that timely relief can be granted to the carrier applicant when necessary. U.S. carriers often require similar speedy relief from foreign aeronautical authorities.

The Board has therefore decided to delegate to the Director of the Bureau of International Aviation the authority to approve or disapprove these waiver applications. This delegation does not authorize the Director to make any determinations about the merits of a proposed schedule of service filed under part 213; it delegates only the authority to dispose of the foreign air carrier's request for waiver of the 30-day requirement. The authority to issue an order disapproving the schedule before its anticipated inauguration date remains with the Board.

The Board has also decided to delegate to the BIA Director the authority to approve or disapprove requests by foreign air carriers for authority to operate additional flights for up to a 30-day period where an agreement, permit, or order requires prior Board approval of the flights. This delegated authority will be used only to approve occasional extra flights, like those that a carrier may wish to operate during peak periods. The delegation will allow these requests to be handled more quickly.

Since these amendments are administrative in nature, affecting rules of

V 4 3 / 1 7 8

agency organization and procedure, the Board finds that notice and public procedure are unnecessary and that an immediate effective date is in the public interest.

Accordingly, the Civil Aeronautics Board amends part 385 of its Organization Regulations, Delegations and Review of Action under Delegation; Nonhearing Matters (14 CFR Part 385), as follows:

In § 385.26, new paragraphs (s) and (t) are added, to read:

§ 385.26 Delegation to the Director, Bureau of International Aviation.

The Board delegates to the Director, Bureau of International Aviation, the authority to:

* * * * *

(s) Approve or disapprove requests by foreign air carriers for waivers of the 30-day advance filing requirement for proposed service schedules whose filing the Board has ordered under § 213.3 of this chapter.

(t) Approve or disapprove requests by foreign air carriers for authority to operate additional flights for up to a 30-day period where an agreement, permit, or order requires prior Board approval of the flights.

(Sec. 204 of the Federal Aviation Act of 1958, as amended, 72 Stat. 743 (49 U.S.C. 1324); Reorganization Plan No. 3 of 1961, 75 Stat. 837, 26 F.R. 5989, (49 U.S.C. 1324 (note)).)

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,
Secretary.

Title 16—Commercial Practices

CHAPTER I—FEDERAL TRADE COMMISSION

[Docket C—2925]

PART 13—PROHIBITED TRADE PRACTICES, AND AFFIRMATIVE CORRECTIVE ACTIONS

Cooga Mooga, Inc., et al.

AGENCY: Federal Trade Commision.

ACTION: Final order.

SUMMARY: In settlement of alleged violations of Federal law prohibiting unfair acts and practices and unfair methods of competition, this provisionally accepted consent agreement, among other things, would require a Los Angeles, Calif., marketer and promoter of Acne-Statin, a product advertised for the treatment of acne, to cease disseminating advertisements which misrepresent, through endorsements or otherwise, the characteristics, performance, efficacy or superiority of its skin products. Additionally, the firm would be required to maintain ad substantiation records for a specified period of time; and to pay a pro rata share of any restitution which might be ordered by the Commission or a court.

DATES: Complaint and Decision issued August 9, 1978.[1]

FOR FURTHER INFORMATION CONTACT:

Thomas J. Donegan, Jr., Assistant Director for Food and Drug Advertising, Federal Trade Commission, 6th Street and Pennsylvania Avenue NW., Washington, D.C. 20580, 202-724-1511.

SUPPLEMENTARY INFORMATION: On Tuesday, May 16, 1978, there was published in the FEDERAL REGISTER, 43 FR 21009, a proposed consent agreement with analysis In the Matter of Cooga Mooga, Inc., a corporation, and Charles E. Boone, individually and as corporate president of Cooga Mooga, Inc., for the purpose of soliciting public comment. Interested parties were given sixty (60) days in which to submit comments, suggestions, or objections regarding the proposed form of order.

No comments having been received, the Commission has ordered the issuance of the complaint in the form contemplated by the agreement, made its jurisdictional findings and entered its order to cease and desist, as set forth in the proposed consent agreement, in disposition of this proceeding.

The prohibited trade practices and/or corrective actions, as codified under 16 CFR 13, are as follows: Subpart—Advertising Falsely or Misleadingly: § 13.15, Business status, advantages or connections; 13.15-150 Endorsement; 13.15-280 Unique or special status or advantage; § 13.20 Comparative data or merits; 13.20-20 Competitors' products; § 13.110 Endorsements, approval and testimonials; § 13.160 Promotional sales plans; § 13.170 Qualities or properities of product or service; 13.170 Cosmetic or beautifying; § 13.190 Results; § 13.210 Scientific tests: § 13.280 Unique nature or advantages. Subpart—Claiming or Using Endorsements or Testimonials Falsely or Misleadingly: § 13.330 Claiming or using endorsements or testimonials falsely; 13.330-69 Prominent persons. Subpart—Corrective Actions and/or Requirements: § 13.533 Corrective actions and/or requirements; § 13.533-45 Maintain records; § 13.533-45(a) Advertising substantiation; § 13.533-55 Refunds, rebates and/or credits. Subpart—Disseminating Advertisements, Etc.: § 13.1043 Dissemeninating advertisements, etc. Subpart—Misrepresenting Oneself and Goods—Goods: § 13.1575 Competitive inferiority; § 13.1710 Qualities or properties; § 13.1740 Scientific or other relevant facts; § 13.1762 Tests, purported; § 13.1770 Unique nature or advantages.—Promotional Sales Plans: § 13.1830 Promotional sales plans. Subpart—Offering Unfair, Improper and Deceptive Inducements To Purchase or Deal: § 13.2063 Scientific or other relevant facts.

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interprets or applies sec. 5, 38 Stat. 719, as amended; 15 U.S.C. 45.)

JAMES A. TOBIN,
Acting Secretary.

Title 19—Customs Duties

CHAPTER I—UNITED STATES CUSTOMS SERVICE, DEPARTMENT OF THE TREASURY

[T.D. 78-260]

PART 153—ANTIDUMPING

Antidumping Investigation Procedures Under Antidumping Act

Correction

In FR Doc. 78-22177 appearing on page 35262 in the issue of Wednesday, August 9, 1978 on page 35264 in the 3rd column, the last, paragraph "EFFECTIVE DATE", the first sentence should read, "These amendments will take effect on or after September 8, 1978, with respect to investigations initiated on or after that date, and to the extent practicable, will be applied to any investigations pending on the effective date.".

Title 25—Indians

CHAPTER I—BUREAU OF INDIAN AFFAIRS, DEPARTMENT OF THE INTERIOR

SUBCHAPTER B—LAW AND ORDER

PART 11—LAW AND ORDER ON INDIAN RESERVATIONS

Offenses Committed on the Menominee Reservation

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Final rule.

SUMMARY: There is an urgent and compelling need on the Menominee reservation for substantive law which would allow the CFR court to prosecute offenders for frequently occurring violations. At the present time, Part 11 of the Code of Indian Tribal Offenses does not prohibit certain conduct and contains other general offenses where more specificity is desirable both to the law enforcement personnel and to persons under the jurisdiction of the code. This rule adds additional violations and expands the scope of existing violations.

EFFECTIVE DATE: September 13, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. Elmer T. Nitzschke, Jr., Twin Cities Field Solicitor, Department of the Interior, 685 Federal Building, Fort Snelling Twin Cities, (Minn. 55111. Telephone: 612-725-3540.

SUPPLEMENTARY INFORMATION: Proposed regulations were published in the FEDERAL REGISTER, Vol. 43, No. 144 at 25448 and 25449 on June 13, 1978. No comments have been received during the 60 day commentary period. This rulemaking would amend the Code of Indian Tribal Offenses, 25 CFR § 11.38-11.87 NH, by adding several offenses that would be punishable only on the Menominee Indian Reservation. Wisconsin State law is adopted for traffic offenses, liquor violations, resisting or obstructing officers, juvenile offenses, breaking and entering and the possession of controlled substances. A provision of the Wisconsin Administration Code requiring a permit before setting a fire is also adopted. Menominee County ordinances are adopted concerning curfew and keeping of livestock. Ordinances of the town of Menominee are also adopted concerning firearms, control of dogs, and garbage and rubbish. The amendments also include a section providing for the extradition of Indians accused of committing a crime outside the reservation unless the Menominee Court of Indian Offenses finds there is probable cause to believe the Indian is guilty or that the Indian will probably not receive a fair trial in the State court.

The 30-day deferred effective date could result in a breakdown of the administration of justice on the Menominee Indian Reservation by seriously endangering life and property on the reservation. Therefore, the 30-day deferred effective date is dispensed with under the exception provided in subsection (d)(3) of 5 U.S.C. 553 (1970). Accordingly, this amendement will become effective September 13, 1978.

The primary authors of this document are: Elmer T. Nitzschke, Jr., whose address and telephone number are listed above, and Steven Felsenthal, formerly of Preloznik and Felsenthal (now Preloznik and Associates), 122 W. Mifflin Street, Madison, Wis. 53703. Telephone: 603-256-7711.

The authority for these amendments is contained in 5 U.S.C. 301 and 25 U.S.C. 2 and delegated by the Secretary of the Interior to the Assistant Secretary for Indian Affairs by 230 DM 2.

Part 11 of Subchapter B of Chapter I of Title 25 of the Code of Federal Regulations is hereby amended as follows:

1. By adding a § 11.50ME to read as follows:

§ 11.50ME Traffic violations.

Until such time as the Menominee Tribe enacts its own traffic code, the provisions of the Wisconsin State Traffic Laws (chapter 346, Title 32 of Wisconsin Statutes) are hereby applicable to the operation of motor vehicles on the Menominee Reservation with the exception that any Indian found guilty of violating such laws shall, in lieu of the penalties provided by State law, be sentenced to labor for a period not to exceed six (6) months and may be deprived of the right to operate any motor vehicle for a period not to exceed six (6) months.

2. By adding a § 11.55ME to read as follows:

§ 11.55ME Liquor violations.

Until such time as the Menominee Tribe enacts its own liquor control ordinance, the provisions of the Wisconsin State laws found in Wis. Ann. §§ 176.01-176.91 relating to liquor control, are hereby incorporated by reference and made applicable to the buying, selling, and consumption of alcholic beverages on the Menominee Reservation, with the exception that any Indian found guilty of violating such law shall, in lieu of the penalties provided by State law, be sentenced to labor for a period not to exceed sixty (60) days.

3. By adding a § 11.70ME to read as follows:

§ 11.70ME Resisting or obstructing officers.

Until such time as the Menominee Tribe enacts its own ordinances dealing with resisting or obstructing an officer, the provisions of Wisconsin Statutes 946.41 are hereby incorporated by reference and made applicable with the exception that any Indian found guilty of violating the provisions of Wisconsin Statues 946.41(1) shall, in lieu of the penalties therein provided, be sentenced to labor for a period not to exceed sixty (60) days.

4. By adding §§ 11.88ME-11.98ME to read as follows:

§ 11.88ME Curfew.

Until such time as the Menominee Tribe enacts its own curfew ordinance, the provisions of Menominee County Ordinance No. 23A relating to curfew are hereby incorporated by reference and made applicable with the exception that any Indian parent or guardian found guilty of violating such law shall in lieu of the penalties provided by Menominee County Ordinance No. 23A be sentenced to labor for a period not to exceed five (5) days.

§ 11.89ME Firearms.

Until such time as the Menominee Tribe enacts its own firearms ordinance, the provisions of the town of Menominee Ordinance No. 39 relating to the use of firearms are hereby incorporated by reference and made applicable within the unincorporated villages of Keshena, Neopit, and Zoar, according to the plats thereof and additions thereto as recorded with the Register of Deeds of Menominee County, Wis., with the exception that any Indian found guilty of violating such laws shall, in lieu of the penalties provided by the said ordinance, be sentenced to labor for a period not to exceed thirty (30) days.

§ 11.90ME Keeping of livestock.

Until such time as the Menominee Tribe enacts its own ordinances dealing with the keeping of livestock, the provisions of Menominee County Zoning Ordinance, Article 6, Section 41, prohibiting the keeping of livestock within 200 feet of residential property lines are hereby incorporated by reference and made applicable with the exception that any Indian found guilty of violating such law shall, in lieu of the penalties provided by the Menominee County Zoning Ordinance, be sentenced to labor for a period not to exceed thirty (30) days.

§ 11.91ME Control of dogs.

Until such time as the Menominee Tribe enacts its own ordinances regulating the keeping of dogs, the provisions of the town of Menominee Ordinance No. 1 regulating the licensing and control of dogs are hereby incorporated by reference and made applicable, with the exception that any Indian found guilty of violating such law, in lieu of the penalties provided by the said ordinance, be fined five dollars ($5.00) for the first offense and ten dollars ($10.00) for each succeeding offense.

§ 11.92ME Forest fire protection.

Until such time as the Menominee Tribe enacts its own ordinances dealing with fire protection, detection, control and suppression, the provisions of the Wisconsin Administration Code, DNR Section 26.12(5)(a) requir-

ing a written permit issued by Wisconsin Department of Natural Resources Fire Warden before any person sets any fire except for warming the person or cooking food, are hereby incorporated by reference and made applicable to the setting of fires on the Menominee Reservation. Any Indian found guilty of failing to obtain a permit shall be sentenced to labor for a period not to exceed thirty (30) days.

§ 11.93ME Possession of controlled substances.

Until such time as the Menominee Tribe enacts its own ordinances dealing with the possession of controlled substances, the provisions of Wisconsin Statutes 161.41(3) are hereby incorporated by reference and made applicable with the exception that any Indian found guilty of violating such law shall, in lieu of the penalties provided by Wisconsin Statutes 161.41(3), be sentenced to labor for a period not to exceed thirty (30) days.

§ 11.94ME Garbage and rubbish.

Until such time as the Menominee Tribe enacts its own ordinances dealing with garbage, rubbish, and inflammable material, the provisions of the town of Menominee Ordinance No. 4 regulating disposal of garbage, rubbish and inflammable material are hereby incorporated by reference and made applicable with the exception that the designation of Menominee Enterprises, Inc., shall include Menominee Tribal Enterprise, that public dumps may be designated by the Menominee Tribe as well as by the town of Menominee and that any Indian found guilty of violating such law shall, in lieu of the penalties provided by town of Menominee Ordinance No. 4, be sentenced to labor for a period not to exceed five (5) days in the event of the first offense and not to exceed thirty (30) days for each succeeding violation.

§ 11.95ME Extradition.

(a) Whenever the Area Director, Minneapolis Area Office, is informed and believes that an Indian has committed a crime outside the Menominee Reservation and is present on the Menominee Reservation, using it as an asylum from prosecution, the Area Director may order a police officer of the Menominee Reservation to apprehend such Indian and deliver him to the authorities seeking his arrest at the exterior boundaries of the reservation.

(b) If a person, apprehended pursuant to this section, so demands, he shall be taken by the arresting police officers to the Menominee Court of Indian Offenses where a Judge shall hold a hearing. If it appears that there is no probable cause to believe the Indian is guilty of the crime with which he is charged outside the reservation, or if it appears probable that the Indian will not receive a fair trial in the state court, the Judge shall order the Indian released from custody.

§ 11.96ME Breaking and entering.

Until such time as the Menominee Tribe enacts its own breaking and entering ordinance, the provisions of Wisconsin Statutes 943.14, "Criminal trespass to dwellings," are hereby incorporated by reference and made applicable, with the exception that any Indian found guilty of violating the provisions of Wisconsin Statutes 943.14 shall, in lieu of the penalties therein provided, be sentenced to labor for a period not to exceed six (6) months.

§ 11.97ME Juvenile services.

Until such time as the Menominee Tribe enacts its own juvenile code, the provisions of the Wisconsin State laws relating to juveniles, Wisconsin Statutes §§ 48.12-48.47, § 48.78, §§ 48.81-48.97, and Chapter 54, are hereby incorporated by reference and made applicable to juvenile cases arising on the Menominee Reservation. Provided, That the following statutes are not to apply: Wis. Stat. Ann. §§ 48.31, 48.32, 48.41, 48.83, and 48.89. And provided further, That rendering of juvenile services to the Menominee Tribe shall be in accordance with the agreement entered into on March 15, 1978, between the Wisconsin Department of Health and Social Services and the Menominee Restoration Committee.

§ 11.98ME Date of incorporated statutes.

All Wisconsin statutes, Menominee County ordinances, and ordinances of the town of Menominee, incorporated in §§ 11.50ME-11.97ME shall be those in effect on the date of publication of this rulemaking, together with any amendments hereafter adopted.

RICK LAVIS,
Deputy Assistant Secretary for Indian Affairs.

Title 32—National Defense

CHAPTER XII—DEFENSE LOGISTICS AGENCY

SUBCHAPTER B—MISCELLANEOUS

[DLAR 5720.3]

PART 1288—REGISTRATION OF PRIVATELY OWNED MOTOR VEHICLES

AGENCY: Defense Logistics Agency (DLA).

ACTION: Final rule.

SUMMARY: The Defense Logistics Agency is revising its regulation prescribing policy and procedures for the registration, inspection, and marking of privately owned vehicles of employees, contractors, and visitors at Defense Logistics Agency activities (42 FR 36997, July 19, 1977). The operation of privately owned vehicles on a DLA activity constitutes a conditional privilege extended by the head of the activity. Employees of, and visitors to DLA activities may be subject to vehicle searches upon entry, while on, and while departing such activities. The DLA command security program recognizes the need to deter acts of sabotage, terrorism, theft, pilferage against DLA personnel and activities. Such policy is an effective deterrent to unlawful acts and is recognized as a viable physical security practice.

EFFECTIVE DATE: August 10, 1978.

FOR FURTHER INFORMATION CONTACT:

LTC John W. Ross, Jr., Commercial, AC 202-274-6263, Autovon, 284-6263.

By order of the Director.

J. J. MCALEER, Jr.,
Colonel, USA,
Staff Director, Administration.

Part 1288, subchapter B, chapter XII of title 32 of the Code of Federal Regulations is revised to read as follows:

Sec.
1288.1 Purpose and scope.
1288.2 Policy.
1288.3 Definitions.
1288.4 Responsibilities.
1288.5 Procedures.
1288.6 Forms and reports.

Appendix A—Decal specifications.
Appendix B—Standard DLA private vehicle identification device.

AUTHORITY: 5 U.S.C. 301; DOD Directive 5105.22, June 8, 1978.

§ 1288.1 Purpose and scope.

To prescribe policy and procedures for the registration, inspection, and marking of privately owned vehicles (POV) on Defense Logistics Agency (DLA) activities. This regulation is applicable to individuals serving in or employed by the Defense Logistics Agency, and to all other individuals subject to motor vehicle registration requirements set forth in this part 1288 and DLAR 5720.1/AR 190-5/OPNAVINST 11200.5B/AFR 125-14/MCO 5110.1B, Military Police Motor Vehicle Traffic Supervision.

§ 1288.2 Policy.

(a) The operation of a POV on a DLA activity constitutes a conditional privilege extended by the Head of the activity. The Heads of DLA primary level field activities (PLFA's) have the authority to supplement this regulation to implement additional controls and restraints warranted by existing conditions at a PLFA. For example, commanders of depots and supply centers may impose searches of vehicles as warranted to reduce pilferage, and protect Government interests.

(b) POV's permanently registered for operation on a DLA activity will be identified by use of one of the decals prescribed in this part 1288 (appendices A and B).

(c) The DLA vehicle decal will be valid for a period of 3 years from the year and month of issue.

(d) Activities will use DLA Form 1454, Vehicle Registration/Driver Record, as the basic vehicle registration and driver record.

(e) DLA tenant activities will comply with host installation policies and procedures for registering POV's.

§ 1288.3 Definitions.

Terms used in this part 1288 are contained in DLAR 5720.1.

§ 1288.4 Responsibilities.

(a) *HQ DLA*—(1) The command security officer, DLA (DLA-T) will provide staff supervision and assistance to DLA activities on matters concerning this part 1288.

(2) The inspector general, DLA (DLA-I) will procure, issue, and control inspector general (IG) vehicle decals in accordance with § 1288.6 below with the exception of the 3-year validation requirement. (Vehicles bearing such decals will be permitted entry to all DLA activities.)

(b) The heads of DLA primary level field activities will:

(1) Insure that personnel adhere to the provisions of this part 1288 when implemented.

(2) Procure, issue, and control vehicle decals in accordance with this DLAR.

(3) Periodically inform personnel of the requirements of this DLAR, DLAR 5720.1, and local requirements concerning the motor vehicle registration program.

(4) Activity/tenant employees are not considered visitors and will not be issued visitor passes. Employees operating loaner/rental vehicles may be temporarily registered in accordance with DLAR 5720.1, paragraph 3-2c.

§ 1288.5 Procedures.

(a) Issuance of DLA POV decal and 3-year validation sticker. (1) One decal will be affixed to the left front bumper (operator's side) of a four-wheel vehicle. An additional decal may be placed on the rear bumper of the vehicle. For vehicles not equipped with bumpers and two-wheeled vehicles, the placement of decals will be determined locally.

(2) A 3-year validation sticker indicating the decal expiration will be issued at the same time the DLA decal is issued. Every 3 years, or following a significant change, registrants will be required to update their registration information. Evidence of compliance will be documented by the issuance and display of a new 3-year validation sticker.

(3) The validation sticker will be placed next to the DLA decal affixed to the front bumper of the vehicle. This sticker will reflect the month and year of the decal expiration, e.g., vehicles registered during the month of June 1978 will have affixed a validation sticker with the numbers "6-81", indicating expiration of the decal at the end of June 1981. The specifications for the validation sticker will be determined locally.

(4) Decals or other media used to identify vehicles of temporary registrants or visitors will be locally prescribed.

(5) Decals will be removed from POV's by the registrant when activity registration is terminated. See DLAR 5720.1, chapter 3, for information on termination of registration.

(6) Vehicle decals will be purchased with appropriated funds for issuance at no cost to authorized users.

(b) Proof of insurance. (1) Individuals registering vehicles will certify possession of insurance per DLAR 5720.1, paragraph 3-3c.

(2) The certification contained on DLA form 1454 will, as indicated thereon, be witnessed and manifested by a signature.

(c) Vehicle inspection. (1) DLA activities located in States or jurisdictions having mandatory vehicle safety inspections will reflect the provisions of DLAR 5720.1, paragraph 3-3d, in the supplementation of this DLAR.

(2) Vehicle safety inspections are not mandatory for DLA activities located in areas not requiring such inspections.

(d) Registrant. Registrant must inform the vehicle registration office within 72 hours as information on DLA form 1454 becomes invalid.

§ 1288.6 Forms and reports.

(a) DLA form 1454 will be prepared at the time of initial registration of the vehicle and will remain valid for as long as the registrant retains ownership of the vehicle and complies with registration requirements. A Privacy Act statement for use in conjunction with DLA form 1454 will be made available to the individual supplying data on the form.

(b) Data blocks 3, 4, and 14 on DLA form 1454 will be entered in ink; remaining entries will be in pencil.

(c) One copy of DLA form 1454 will also serve as the driver record of the registrant.

(d) Upon permanent change of station of the military service registrant, activity clearance procedures will provide for DLA form 1454 to be included in the registrant's military personnel folder for transmittal to the gaining activity. DLA forms 1454 for transferring civilian personnel will be forwarded to the security officer of the gaining activity.

(e) The DLA form 1454 for military personnel being discharged or separated will be forwarded to the appropriate personnel office for inclusion in the records folder for subsequent retirement.

APPENDIX A—DECAL SPECIFICATIONS

A. The design format of the standard DLA decal to be used for identifying POV's permanently registered for operation on DLA activities is shown in enclosure 2. The IG decal will be of the same design and color as that prescribed for the standard DLA decal except that the registration letter/number scheme will consist of the letters "IG" followed by a number. Standard DLA decals may be procured from the U.S. Disciplinary Barracks, USDB, Fort Leavenworth, Kans. 66027, which is an approved Federal printing plant. Existing stocks of decals with "DSA" inscribed will be used until exhausted.

B. The following specifications apply to the separate elements of the decal:

1. *Basic construction.* Decal will meet Federal Specification L-5300A, 7 Jan 70, type I, class 4, reflectivity 1.

2. *Colors:*

a. Background—Silver.

b. DLA emblem, field activity name, and scroll, the letters DLA, and year/date—Black.

c. Registration letters/numbers:

(1) Mandatory categories:

(a) Officer personnel—Blue.

(b) Enlisted personnel—Red.

(c) Civilian employees—Green.

(2) The following additional colors will be used to categorize registration further:

(a) Noncommissioned officer personnel—Brown.

(b) Civilian employees (nonappropriated fund), Red Cross, concessionaires, contractors, and other similar categories—Black.

3. *Registration letters/numbers.* For each registration category a combination of letters and number(s) separated by the DLA emblem will be used. The number-letter system will progress from AA-1 to AA-2, and so on, to AA-99, from AB-1 to AB-99, eventually from AZ-1 to AZ-99, and so on from ZZ-1 to ZZ-99.

4. *Dimensions:*

a. Maximum size: 3 inches by 6 inches. For economy a reduced size decal may be used on POV's to include those with less than four wheels.

b. Registration letters and numerals: 1¼ to 1½ inches in height.

c. DLA emblem letters: 1½ inches to 1¾ inches in height.

d. DLA letters: ½ inch to ¾ inch in height.

e. Activity designation scroll and lettering: See appendix B.

Title 36—Parks, Forests, and Public Property

CHAPTER XII—HERITAGE CONSERVATION AND RECREATION SERVICE, DEPARTMENT OF THE INTERIOR

PART 1207—THE SECRETARY OF THE INTERIOR'S STANDARDS FOR HISTORIC PRESERVATION PROJECTS

Interim Standards

AGENCY: Heritage Conservation and Recreation Service, Interior.

ACTION: Interim standards.

SUMMARY: This document sets forth interim standards established by the Secretary of the Interior for planning, undertaking, and supervising historic preservation grant-in-aid projects under the provisions of the National Historic Preservation Act of 1966, as amended through the creation of a National Historic Preservation Fund. The 1966 act authorizes the Secretary to grant funds to States and the National Trust for Historic Preservation for the purposes of preserving properties for public benefit that are significant in American history, architecture, archeology, and culture.

DATES: Effective date: September 13, 1978. Since there is a current need for the standards, they will be effective immediately on an interim basis pending publication of final standards. However, interested persons may submit comments, suggestions, or objections regarding the standards to the address noted below. Comments must be received on or before October 13, 1978.

ADDRESS: Send comments to Office of Archeology and Historic Preservation, Heritage Conservation and Recreation Service, Department of the Interior, Washington, D.C. 20240.

FOR FURTHER INFORMATION CONTACT:

W. Brown Morton, III, Departmental Consultant for Historic Architecture, Chief, Technical Perservation Services Division, Office of Archeology and Historic Preservation, Heritage Conservation and Recreation Service, Department of the Interior, Washington, D.C., 202-523-5891.

SUPPLEMENTARY INFORMATION: In preparing these regulations and reviewing the National Register and the Historic Preservation Fund grant-in-aid program, the intent, requirements, and spirit of the National Environmental Policy Act of 1969 (Pub. L. 91-190, 42 U.S.C. 4321-4347) have been carefully considered. As established by the 1966 National Historic Preservation Act (80 Stat. 915, 16 U.S.C. 470 et seq.) and amended by title II, Pub. L. 94-422 through the creation of a National Historic Preservation Fund, these programs have as their purpose the identification, protection, and enhancement of the historic, architectural, archeological, and cultural resources of the manmade environment. It has been administratively determined that, beyond the overall program purpose which is intended to enhance the environment, this rulemaking will have no significant effect on the environment. These regulations serve to expand the regulations previously published in the FEDERAL REGISTER and should further insure the environmentally beneficial effects of the National Register and grants programs. Further information, including a memorandum of environmental assessment, is on file in the Office of Archeology and Historic Preservation, Heritage Conservation and Recreation Service, Department of the Interior, Washington, D.C. 20240.

The primary authors of this document are W. Brown Morton, III and Gary L. Hume, Heritage Conservation and Recreation Service, 202-523-5891.

Accordingly, a new chapter XII, part 1207 is added to title 36 to read as follows:

Sec.

1207.1 Intent.
1207.2 Definitions.
1207.3 General standards for historic preservation projects.
1207.4 Specific standards for acquisition, protection, stabilization, preservation, rehabilitation, restoration, and reconstruction projects.

AUTHORITY: The National Historic Preservation Act of 1966, as amended, 16 U.S.C. 470 et seq.; section 2124 of the Tax Reform Act of 1976, 90 Stat. 1918; Executive. Order No. 11,593, 3 CFR 75 (1971).

§ 1207.1 Intent.

The intent of this part is to set forth standards for historic preservation projects, containing general standards and specific standards for acquisition, protection, stabilization, preservation, rehabilitation, restoration, and reconstruction. These standards apply to all proposed grant-in-aid projects assisted through the National Historic Preservation Fund.

§ 1207.2 Definitions.

The standards for historic preservation projects will be used by the Heritage Conservation and Recreation Service and State historic preservation officers and their staff members in planning, undertaking, and supervising grant-assisted projects for acquisition, protection, stabilization, preservation, rehabilitation, restoration, and reconstruction. For the purposes of this part:

(a) *Acquisition.* Means the act or process of acquiring fee title or interest other than fee title of real property (including the acquisition of development rights or remainder interest).

(b) *Preservation.* Means the act or process of applying measures to sustain the existing form, integrity, and material of a building or structure, and the existing form and vegetative cover of site. It may include initial stabilization work where necessary, as well as ongoing maintenance of the historic building materials.

(c) *Protection.* Means the act or process of applying measures designed to affect the physical condition of a property by defending or guarding it from deterioration, loss, or attack, or to cover or shield the property from danger or injury. In the case of buildings and structures, such treatment is generally of a temporary nature and anticipates future historic preservation treatment; in the case of archeological sites, the protective measure may be temporary or permanent.

(d) *Reconstruction.* Means the act or process of reproducing by new construction the exact form and detail of a vanished building, structure, or object, or a part thereof, as it appeared at a specific period of time.

(e) *Rehabilitation.* Means the act or process of returning a property to a state of utility through repair or alteration that makes possible an efficient contemporary use while preserving those portions or features of the property that are significant to its historical, architectural, and cultural values.

(f) *Restoration.* Means the act or process of accurately recovering the form and details of a property and its setting as it appeared at a particular period of time by means of the removal of later work or by the replacement of missing earlier work.

(g) *Stabilization.* Means the act or process of applying measures designed to reestablish a weather-resistant enclosure and the structural stability of an unsafe or deteriorated property while maintaining the essential form as it exists at present.

§ 1207.3 General standards for historic preservation projects.

The general standards listed below shall apply to all historic preservation grant-in-aid projects; additional standards in § 1207.4 for acquisition, protection, stabilization, preservation, rehabilitation, restoration, and reconstruction apply to specific grant-in-aid projects as appropriate:

(a) Every reasonable effort shall be made to provide a compatible use for a property that requires minimal alteration of the building structure, or site and its environment, or to use a property for its originally intended purpose.

(b) The distinguishing original qualities or character of a building, structure, or site and its environment shall not be destroyed. The removal or alteration of any historic material or distinctive architectural features should be avoided when possible.

(c) All buildings, structures, and sites shall be recognized as products of their own time. Alterations, which have no historical basis and which seek to create an earlier appearance, shall be discouraged.

(d) Changes, which may have taken place in the course of time, are evidence of the history and development of a building, structure, or site and its environment. These changes may have acquired significance in their own right, and this significance shall be recognized and respected.

(e) Distinctive stylistic features or examples of skilled craftsmanship which characterize a building, structure, or site shall be treated with sensitivity.

(f) Deteriorated architectural features shall be repaired rather than replaced, wherever possible. In the event replacement is necessary, the new material should match the material being replaced in composition, design, color, texture, and other visual qualities. Repair or replacement of missing architectural features should be based on accurate duplications of features, substantiated by historical, physical, or pictorial evidence rather than on conjectural designs or the availability of different architectural elements from other buildings or structures.

(g) The surface cleaning of structures shall be undertaken with the gentlest means possible. Sandblasting and other cleaning methods that will damage the historic building materials shall not be undertaken.

(h) Every reasonable effort shall be made to protect and preserve archeological resources affected by, or adjacent to, any acquisition, protection, stabilization, preservation, rehabilitation, restoration, or reconstruction projects.

§ 1207.4 Specific standards for acquisition, protection, stabilization, preservation, rehabilitation, restoration, and reconstruction projects.

In addition to the general standards set forth in § 1207.3 the following specific standards shall be applied as appropriate:

(a) *Acquistion.* (1) Careful consideration shall be given to the type and extent of property rights that are re-

V 4 3 / 1 7 8

quired to assure the preservation of the historic resource. The preservation objective shall determine the exact property rights to be acquired.

(2) Properties shall be acquired in fee simple when absolute ownership is required to insure their preservation.

(3) The purchase of less-than-fee-simple interests, such as open space or facade easements, shall be undertaken when a limited interest achieves the preservation objective.

(4) Every reasonable effort shall be made to acquire sufficient property with the historic resource to protect its historical, archeological, architectural, or cultural significance.

(b) *Protection.* (1) Before applying protective measures, which are generally of a temporary nature and imply future historic preservation work, and analysis of the actual or anticipated threats to the property shall be made.

(2) Protection shall safeguard the physical condition or environment of a property or archeological site from further deterioration or damage caused by weather or other natural, animal, or human intrusions.

(3) If any historic material or architectural features are removed, they shall be properly recorded and, if possible, stored for future study or reuse.

(c) *Stabilization.* (1) Stabilization shall reestablish the structural stability of a property through the reinforcement of loadbearing members or by arresting material deterioration leading to structural failure. Stabilization shall also reestablish weather resistant conditions for a property.

(2) Stabilization shall be accomplished in such a manner that it detracts as little as possible from the property's appearance. When reinforcement is required to reestablish structural stability, such work shall be concealed wherever possible so as not to intrude upon or detract from the esthetic and historical quality of the property, except where concealment would result in the alteration or destruction of historically significant material or spaces.

(d) *Preservation.* (1) Preservation shall maintain the existing form, integrity, and materials of a building, structure, or site. Substantial reconstruction or restoration of lost features generally are not included in a preservation undertaking.

(2) Preservation shall include techniques of arresting or retarding the deterioration of a property through a program of ongoing maintenance.

(e) *Rehabilitation.* (1) Contemporary design for alterations and additions to existing properties shall not be discouraged when such alterations and additions do not destroy significant historic, architectural, or cultural material, and such design is compatible with the size, scale, color, material, and character of the property, neighborhood, or environment.

(2) Wherever possible, new additions or alterations to structures shall be done in such a manner that if such additions or alterations were to be removed in the future, the essential form and integrity of the structure would be unimpaired.

(f) *Restoration.* (1) Every reasonable effort shall be made to use a property for its originally intended purpose or to provide a compatible use that will require minimum alteration to the property and its environment.

(2) Reinforcement required for structural stability or the installation of protective or code required mechanical systems shall be concealed whenever possible so as not to intrude or detract from the property's esthetic and historic qualities, except where concealment would result in the alteration or destruction of historically significant materials or spaces.

(3) When archeological resources must be disturbed by restoration work, recovery of archeological material shall be undertaken in conformance with current professsional practices.

(g) *Reconstruction.* (1) Reconstruction of a part or all of a property shall be undertaken only when such work is essential to reproduce a significant missing feature in a historic district or scene, and when a contemporary design solution is not acceptable.

(2) Reconstruction of all or a part of a historic property shall be appropriate when the reconstruction is essential for understanding and interpreting the value of a historic district, or when no other building, structure, object, or landscape feature with the same associative value has survived and sufficient historical documentation exists to insure an accurate reproduction of the original.

(3) The reproduction of missing elements accomplished with new materials shall duplicate the composition, design, color, texture, and other visual qualities of the missing element. Reconstruction of missing architectural features shall be based upon accurate duplication of original features, substantiated by historical, physical, or pictorial evidence rather than upon conjectural designs or the availability of different architectural features from other buildings.

(4) Reconstruction of a building or structure on an original site shall be preceded by a through archeological investigation to locate and identify all subsurface features and artifacts.

(5) Reconstruction shall include measures to preserve any remaining original fabric, including foundations, subsurface, and ancillary elements. The reconstruction of missing elements and features shall be done in such a manner that the essential form and integrity of the original surviving features are unimpaired.

ROBERT L. HERBST,
Assistant Secretary for Fish and Wildlife and Parks.

Title 39—Postal Service

CHAPTER I—U.S. POSTAL SERVICE

PART 111—GENERAL INFORMATION ON POSTAL SERVICES

Postal Service Manual; Miscellaneous Amendments

AGENCY: Postal Service.

ACTION: Final rule.

SUMMARY: The Postal Service hereby describes and publishes the full text of numerous miscellaneous revisions of the Postal Service Manual. Some of the revisions are minor, editorial, and technical; other are substantive. As to substantive changes, the Postal Service previously published in the FEDERAL REGISTER the complete text of those changes in the course of informal rulemaking proceedings. Publication of all the changes at this time is in accordance with the incorporation by reference in the FEDERAL REGISTER of all amendments to chapter I of the Postal Service Manual. This document also corrects several technical errors appearing in Transmittal Letter 44, issue 120. The errors are explained below in Supplementary Information.

EFFECTIVE DATE: August 21, 1978, except that the rates and fees referred to in .1b in the Explanation of Changes in the Supplementary Information below became effective, in the case of phased rates, on July 6, 1978, 43 FR 27620, and in all other cases, on May 29, 1978 (43 FR 23039, 23773); except that the revised mail security regulations covered by .2b became effective May 5, 1978 (43 FR 14308); except that the revisions to the regulations concerning publication numbers and identification statements in second-class and controlled circulation publications covered by .3b, .3c, .4e, .4f, .4g, .4i, and .4j became effective August 11, 1978 (43 FR 29943); except that the revisions of the regulations on business reply mail covered by .4c and .4d became effective June 17, 1978 (43 FR 21327); except that the revision of the regulations on newspaper receptacles on rural mailboxes covered by .6b became effective May 4, 1978 (43 FR 14018); and except that the revision to the regulations concerning material found loose in the mail, including books and sound recordings, covered by .6d, .6e, .6f, .6g, and .6h became effective June 3, 1978 (43 FR 19042).

FOR FURTHER INFORMATION CONTACT:

Paul J. Kemp, 202-245-4638.

SUPPLEMENTARY INFORMATION: Chapter I of the Postal Service manual, which has been incorporated by reference in the FEDERAL REGISTER (see 39 CFR 111.1), has been amended by the issuance of Post Office Services (Domestic) Transmittal Letter 44, issue 120, dated August 21, 1978.

Transmittal Letter 44, issue 120, contains several technical errors which are corrected in this document. The misspelling of "Postal" in the caption of 114.2, of "divulged" in 115.24, and of "COD" in 157.31b is corrected. A printing omission in 115.21 which eliminated most of (d) and garbled (c) is corrected. The proper accent marks for "à découvert" are inserted in 115.813 and 115.82. The last paragraph of 115.91 is redesignated "d" instead of a second consecutive "c". An outdated rate in 132.124 is corrected from 6.7 to 7.9 cents per pound. A printing error inserting the text of 132.224 within 132.223a is corrected by supplying the proper text for that provision, which is the same as the full text of 132.223 before new paragraph b was added.

Consistent with 39 CFR 111.3, the amendments made by Transmittal Letter 44, issue 120, are hereby published in full text, and notice of this publication is added as an amendment to § 111.3. In addition, the text of the changes is filed with the Director, Office of the Federal Register. Subscribers to the manual will receive these amendments automatically from the Government Printing Office. (For other availability of chapter I of the Postal Service manual, see 39 CFR 111.2.)

Explanation of the principal changes follows:

EXPLANATION OF CHANGES

.1 General

a. This transmittal contains regulations previously published in Postal Bulletins prior to May 29, 1978. Changes appearing in Postal Bulletins after that date are in effect and will be incorporated in the next Issue.

b. The rates and fees for most classes of mail, special mail services, parcel airlift mail, ZIP Coding mailing lists, second-class applications, envelopes, on-site meter setting and the permit imprint application have changed.

.2 Subchapter 110

a. Amended 112 to add reference to revised 115.

b. Revised 115 to define authority and conditions under which Postal and Customs personnel may open mail.

.3 Subchapter 120

a. Revised 122.514d to prescribe submission of reports covering address correction notices furnished to Federal Government agencies.

b. Amended 125 to include eligibility and preparation requirements and rates for second-class publications.

c. Revised instructions for preparing wrappers and covers for second-class publications. Now includes requirement for publication identification number to be displayed.

d. Renumbered 126.154 to 126.155 without change.

e. Added new 126.154 to make it clear that parcels sent to overseas military post offices for resale or distribution are ineligible for SAM or PAL service.

f. Amended 126.2 to revise the listing of MPO's and mailing restrictions where appropriate.

.4 Subchapter 130

a. Amended 131 to allow mailers under specified conditions to rate residual metered first-class pieces at the first-class presort rate.

b. Revised 131.121 to change the term *bulk presort rate* to *presort rate.*

c. Expanded 131.235 to include new format provisions for business reply mail (BRM). New 131.235b(2)(b) requires facing identification marks (FIM) on BRM cards and envelopes. Provision made for voluntary inspection of BRM pieces. Procedures governing revocation of BRM permits for distribution of BRM pieces not in compliance with the format requirements of this section will be promulgated before May 1, 1979.

d. Revised 131.236 and 131.237 and renumbered them 131.237 and 131.238 respectively.

e. Amended 132 to include eligibility and preparation requirements and rates for second-class publications, and to promulgate new eligibility requirements for second-class in-county rates. Headquarters and local per copy rates are eliminated.

f. Revised 132.2 to change location, content and format of identification statements. Publication numbers must appear in the identification statement.

g. Revised 132.223 to require that the publication name be on the front.

h. Revised 132.33e to show that the entry office, where postage is paid, must request the verification of exceptional dispatch.

i. Revised 133.21 to require that the publication name be on the front.

j. Revised 133.3 to require that controlled circulation identification statements more closely parallel second-class identification statements and that postal publication identification numbers be displayed. Clarified instructions for preparing wrappers and covers.

k. Amended 137.272 to cross reference 122.514d.

l. Revised 137.273e(1) to remove first- and fourth-class limitation of official mail sent under the permit imprint system.

m. Amended 137.8 to add reference to 115.

.5 Subchapter 140

a. Amended 144.13 to update the names and addresses of authorized postage meter manufacturers.

b. Added 146.123 to define uniform procedures for handling unpaid parcels intended for private delivery companies but found in the mail.

c. Amended 147.23c to show that exchanges of unused adhesive stamps may be made under the conditions in 147.11 and 147.12.

.6 Subchapter 150

a. Amended 154.6 to add reference to 115.

b. Amended 156.532 to be consistent with 151.12 and 146.221.

c. Revised 157 to conform with 156.52.

d. Amended 159.441 to require that when loose matter is moved to another location for processing material of no value must be removed before the transfer.

e. Amended 159.721g to include an option of sending material found loose in the mail at bulk mail centers to the dead parcel branch post office for processing and to reemphasize that all loose matter must be held for 30 days before it is sold as dead mail.

f. Amended 159.724c(3) to reemphasize that all loose matter must be held for 30 days before it is sold as dead mail.

g. Amended 159.813b to establish books and sound recordings as separate category of undeliverable mail, and to cross reference the new section containing instructions for their processing.

h. Added 159.814 to establish a new retention period at dead parcel branches for books and sound recordings received from bulk mail centers and to establish new procedures for release of books and sound recordings in dead mail.

.7 Subchapter 160

a. Reprinted several pages to correct printing errors and to include old issues which have only a few current pages.

b. Revised 169.521 and .522a to clarify that lockbox caller service fees are charged on a semi-annual basis.

c. Revised 169.522c, .524, and .525 to establish optional fixed payment peri-

ods at certain categories of offices and to provide necessary procedures.

.8 Subchapter 170

Revised 172.12 to correct the price of migratory-bird hunting stamps.

.9 Subchapter 180

Added 180 to provide instruction for Express Mail.

OBSOLETE MATERIAL

Issues 43, 79, 102, and 108 are now obsolete.

In consideration of the foregoing, 39 CFR 111.3 is amended as follows:

§ 111.3 Amendments to chapter I of the Postal Service Manual.

* * * * *

Transmittal letter	Issue	Date	Federal Register Publication
44	120	Aug. 21, 1978.	43 FR.

ROGER P. CRAIG,
Deputy General Counsel.

(5 U.S.C. 552 (a), 39 U.S.C. 401.)

Accordingly, the amendments made by Transmittal Letter 44, issue 120, are hereby published and read as follows:

PART 112—DOMESTIC MAIL SERVICE

Domestic mail is mail transmitted within, among and between the United States; its territories and possessions; Army-Air Force (APO) and Navy (FPO) post offices (except as provided in Part 115); also mail for delivery to the United Nations, N.Y. The term *territories and possessions* includes:

Baker Island
Canal Zone [1]
Canton Island
Caroline Islands
Enderbury Island
Guam
Howland Island
Jarvis Island
Johnston Island
Kingman Reef
Manual Island
Mariana Islands
Marshall Islands
Midway Islands
Navassa Island
Commonwealth of Puerto Rico
Saint Croix Island
Saint John Island
Saint Thomas Island
Samoa (American)
Sand Island
Swain's Island
Trust Territory of the Pacific
Virgin Islands (U.S.)
Wake Island

See 124.155, 131.235b, 142.6, 161.223, 163.16, 164.44, 164.52, and 168.42.

* * * * *

PART 114—COMPLAINTS

* * * * *

114.2 POSTAL LAW VIOLATIONS

Send information and complaints of postal law violations to the nearest Postal Inspector in Charge at the address listed below:

Atlanta, GA 30202—P.O. Box 4327
Boston, MA 02107—P.O. Box 2217
Chattanooga, TN 37401—P.O. Box 711
Chicago, IL 60607—Main Post Office Bldg., Room 642
Cincinnati, OH 45201—P.O. Box 2057
Detroit, MI 48232—P.O. Box 119
Fort Worth, TX 76101—P.O. Box 1230
Los Angeles, CA 90030—P.O. Box 30456
Memphis, TN 38103—P.O. Box 3180
Newark, NJ 07101—Post Office and Courthouse Bldg.
New York, NY 10001—8th Ave. and 33rd Street
Philadelphia, PA 19101—P.O. Box 7500
Pittsburgh, PA 15222—Room 1700, Centre City Tower Bldg.
San Francisco, CA 94101—P.O. Box 367
Seattle, WA 98111—P.O. Box 400
St. Louis, MO 63199—200 S. Hanley Rd., 10th Floor
St. Paul, MN 55164—P.O. Box 43558
Washington, DC 20013—P.O. Box 1820

* * * * *

PART 115—MAIL SECURITY

115.1 IMPORTANCE OF MAIL SECURITY

The Postal Service must preserve and protect the security of all mail in its custody from unauthorized opening, inspection, or reading of contents or covers, tampering, delay, or other unauthorized acts. Any postal employee committing or allowing any of these unauthorized acts is subject to administrative discipline, or criminal prosecution leading to fine, imprisonment, or both. An employee having a question about proper mail security procedures, which is not clearly and specifically answered by postal regulations or by written direction of the Inspection Service or Law Department, shall resolve the question by protecting the mail in all respects and moving it, or letting it move, without interruption to its destination.

115.2 OPENING, READING, AND SEARCHING OF SEALED MAIL GENERALLY PROHIBITED

.21 In general, no person may open, read, search, or divulge the contents of mail sealed against inspection, even though such mail may be believed to contain criminal or otherwise nonmailable matter or evidence of the commission of a crime. The only exceptions to this general rule are: (a) a postal employee in a dead mail office acting in accordance with dead mail regulations, part 159; (b) a postal employee acting with the consent of the addressee or sender; (c) a person executing a search warrant in accordance with section 115.6; (d) a person handling potentially dangerous mail in accordance with section 115.4; or, (e) an authorized Customs or Agriculture employee, acting in accordance with sections 115.91 or 115.92.

.22 MAIL NOT SEALED AGAINST INSPECTION

Mail not sealed against inspection may be opened, surrendered, its contents inspected and read, or information concerning it released, by an authorized postal employee, only: (a) under a search warrant in accordance with section 115.6; (b) without a search warrant in order to determine the mailability of the contents or whether the correct postage has been paid; or, (c) as otherwise expressly permitted by postal regulations.

.23 DEFINITIONS

.231 *Mail Sealed Against Inspection*

For purposes of this part, the terms, "mail sealed against inspection", or "sealed mail", mean mail on which appropriate postage is paid, and which under postal laws and regulations is included within a class of mail maintained by the Postal Service for the transmission of letters sealed against inspection. The terms do not include international transit mail (section 115.8). They include first class mail, Express Mail, international letter mail ("LC Postal Union mail" as defined in USPS Publication 42, International Mail), and Mailgram. When sealed mail is properly inserted inside unsealed mail or attached to it in accordance with postal regulations, the sealed mail component of the combination item shall be treated as sealed mail under this part, except 115.3.

.232 *Mail Not Sealed Against Inspection*

For purposes of this part, the terms, "mail not sealed against inspection", or "unsealed mail", mean mail on which appropriate postage for sealed mail has not been paid, and which under postal laws or regulations is not included within a class of mail maintained by the Postal Service for the transmission of letters sealed against inspection. The terms do not include international transit mail (section 115.8). They include second, third, and fourth class mail, international parcel post mail, and "AO Postal Union Mail" (as defined in USPS Publication 42, International Mail).

.24 CORRESPONDENCE PERMITTED TO BE ENCLOSED IN UNSEALED MAIL

The contents of correspondence permitted to be sent by the blind in special or raised characters or in the form of sound recordings and by school children at the international printed matter rate shall not be divulged except to a postal employee acting with the consent of the addressee or sender or person executing a search warrant in accordance with section 115.6.

115.3 PERMISSIBLE DETENTION OF MAIL

.31 SEALED MAIL GENERALLY NOT DETAINED

No postal employee may detain mail sealed against inspection (other than dead mail) except: (a) a postal inspector acting diligently and without avoidable delay upon reasonable suspicion, for a brief period of time, to assemble evidence sufficient to satisfy the probable cause requirement for a search warrant in accordance with section 115.6, and to apply for, obtain, and execute the warrant; (b) a postal employee acting in strict accordance with postal regulations (for example, sections 115.4 or 154.145); (c) a postal employee acting under postal regulations with the express consent of the addressee or sender (for example, section 153.5 or 154.19); (d) a postal employee acting under an order issued under 39 U.S.C. 3005, relating to false representations, lotteries, and unlawful matter; (e) a postal employee acting under section 115.62; (f) a postal employee conducting a mail count by direction of his postmaster or a postal inspector; (g) a postal employee acting under an order of a Federal court; or, (h) a postal employee during the period required to seek and obtain instructions under section 154.7 concerning mail whose delivery is in dispute, or under section 331.1 concerning legal process other than a search warrant duly issued under Rule 41 of the Federal Rules of Criminal Procedure, purporting to require the surrender of mail matter.

.32 UNSEALED MAIL

Mail not sealed against inspection may be delayed or detained for the reasons stated in section 115.31 and as otherwise expressly permitted by postal regulations.

115.4 MAIL REASONABLY SUSPECTED OF BEING DANGEROUS TO PERSONS OR PROPERTY

Mail, sealed or unsealed, reasonably suspected of posing an immediate danger to life or limb, or an immediate and substantial danger to property, may, without a search warrant, be detained, opened, removed from postal custody, and processed or treated, but only to the extent necessary to determine and eliminate the danger, and only if a complete written and sworn statement of the detention, opening, removal, or treatment, and the circumstances that prompted it signed by the person purporting to act under this subsection, is promptly forwarded to the Chief Inspector. Any person purporting to act under this subsection who does not report his action in accordance with the requirements of this subsection to the Chief Inspector, or whose action is determined after investigation not to have been authorized, is subject to disciplinary action or criminal prosecution or both.

115.5 DISCLOSURE OF INFORMATION ABOUT MAIL SENT OR RECEIVED BY PARTICULAR SENDERS OR ADDRESSEES

Except as provided in 115.5(a)-(f), no employee shall disclose: information on the outside cover of any piece of mail; information obtained from any inspection of the contents of mail; or any other information which concerns any mail sent or received by any particular sender, addressee, or group of senders or addressees, which the employee obtains or controls in the performance of his official duties. An employee may disclose such information:

a. To the Postal Inspection Service for its official use, including appropriate reference to law enforcement authorities, when there is a reasonable basis to suspect that such information is evidence of the commission of a crime under State or Federal law, except that information obtained by opening sealed mail in a dead letter office may be used only to determine an address at which the mail can be delivered;

b. Under section 233.2, regarding mail covers;

c. Under a search warrant in accordance with section 115.6;

d. Under an order of a Federal court;

e. At the request of the sender or addressee or the authorized agent of either; or,

f. Otherwise in accordance with postal regulations, *provided that* any such information obtained from an inspection of the contents of mail may only be disclosed if the inspection accords with the regulations contained in this Part.

115.6 EXECUTION OF SEARCH WARRANTS

.61 WARRANT ISSUED BY FEDERAL COURT OR SERVED BY FEDERAL OFFICER

A search warrant duly issued under Rule 41 of the Federal Rules of Criminal Procedure shall be executed as provided in section 115.62. Usually, a warrant issued by a Federal court or served by a Federal officer is issued under Rule 41, and is "duly issued" if signed and dated within the past ten days. No employee shall permit the execution of a search warrant issued by a State court and served by a State officer. If in doubt, an employee should temporarily detain the mail in question and promptly call a postal inspector for guidance.

.62 SEARCH WARRANT EXECUTION PROCEDURES

A postal inspector may execute a search warrant. A person other than a postal inspector executing a search warrant must be accompanied by a postal employee authorized by the head of the postal installation at which the warrant is to be executed. Mail may be taken from postal custody under the authority of a search warrant only if the person executing the warrant leaves a copy of the warrant and a receipt or inventory, made out in the presence of the postal employee accompanying him, which particularly describes each piece of mail taken, including all service endorsements on the cover (such as, "Return Receipt Requested") and any official postal identity numbers (such as registry, insurance, or certified mail numbers). The receipt or inventory may be attached to the copy of the warrant, or written on the reverse side of the copy of the warrant. The installation head or his designee shall make a copy of the receipt or inventory and of the copy of the warrant and send it to the Inspector-in-Charge of the Division in which the installation is located. The installation head or his designee shall also furnish a report of the seizure of any domestic mail to the addressee's post office and of any seized international mail to the appropriate international claims office.

.63 NOTICE TO SENDER OR ADDRESSEE

If the cover of domestic mail has been endorsed and stamped to show that the sender has requested and paid for a return receipt, the sender shall be notified of the seizure of the mail under the warrant by an endorsement to that effect on the return receipt, or on a duplicate if the original receipt is taken. The receipt shall be dispatched as soon as possible, unless the officer executing the warrant presents a Federal court order to delay the dispatch. In that event the dispatch shall be delayed in accordance with the order.

115.7 COOPERATION WITH FEDERAL AND STATE AND LOCAL AGENCIES FOR ACCESS TO MAIL

A postal employee receiving a request from a Federal, State, or local law enforcement, intelligence, or other government agency, for access to, or

information about, particular mail matter of any class in the custody of the Postal Service shall refer the request to the Postal Inspection Service, with the explanation that the Inspection Service is responsible for liaison with all government agencies with respect to a request of this kind. No employee of the Inspection Service shall comply with such a request, except as authorized by postal regulations.

115.8 INTERNATIONAL TRANSIT MAIL

.81 DEFINITIONS

.811 *International Transit Mail*

As used in this part, the term "international transit mail" applies to mail of foreign origin which is passed by a foreign postal administration to the United States Postal Service for forwarding to a foreign postal administration under a postal treaty or convention. It includes closed mails and a decouvert letter post items.

.812 *Closed Mail*

The term "closed mail" refers to any bag, container, or mail passed to the United States Postal Service by a foreign postal administration, the entire contents of which are required by applicable postal treaties or conventions to be passed to a foreign postal administration.

.813 *À Découvert Letter Post Item*

The term "à découvert letter post item" refers to any international letter post item ("Postal Union mail" as defined by USPS Publication 42, International Mail) which is addressed for delivery by a foreign postal administration, and is passed to the United States Postal Service by a foreign postal administration in a bag, container, or mail that must be opened by the United States Postal Service in accordance with applicable postal treaties or convention because it also contains items addressed for delivery by the United States Postal Service.

.82 SPECIAL SECURITY RULES

International transit mail is entitled to freedom of transit. It shall not be opened, seized, or searched. It is not subject to Customs or Agriculture inspection under section 115.91 or 115.92. In accordance with the Universal Postal Convention, any international transit mail consisting of closed mails, a decouvert letter-post items, and airmail correspondence, shall not be detained, but shall instead be forwarded to the next foreign postal administration by the quickest routes which the United States Postal Service uses for mail sealed against inspection.

115.9 MAIL SECURITY, LAW ENFORCEMENT, AND OTHER GOVERNMENT AGENCIES

.91 CUSTOMS SERVICE

Without a search warrant but upon reasonable cause to suspect that the mail contains dutiable or prohibited items, designated personnel of the U.S. Customs Service may open or inspect the contents of mail in the customs inspection of mail (including APO-FPO mail) which has originated outside the Customs Territory of the United States ("CTUS") and is addressed for delivery either inside the CTUS or inside the Customs district of the Virgin Islands, on the following terms and conditions:

a. *Other regulations.* Such inspections may be conducted only in accordance with 820, USPS Publication 42, International Mail, relating to cooperation with the U.S. Customs Service on inspection of imports.

b. *Virgin Islands.* Postal employees in the Virgin Islands may permit designated personnel of the U.S. Customs Service, without a search warrant, to examine the exterior (but not open or read the contents) of sealed mail which has originated in the CTUS and is addressed for delivery in the Customs district of the Virgin Islands. Upon the request of such Customs personnel, postal employees in the Virgin Islands may ask the addressee of such sealed mail which such Customs personnel have reasonable cause to believe contains dutiable or prohibited matter to authorize such Customs personnel to open and inspect the contents of the sealed mail, or to appear at the post office to accept delivery of the sealed mail in the presence of a Customs official.

c. *Privacy of Correspondence.* No customs personnel may read, allow any other person to read, divulge, or transfer to any other person any correspondence contained in sealed mail; nor may Customs personnel divulge, allow any other person to read or listen to, transfer to any other person, or knowingly listen to any paper or recording which is correspondence for the blind contained in unsealed mail; nor may Customs personnel divulge, allow any other person to read, or transfer to any person correspondence of school children permitted transmission in unsealed mail; unless such action is authorized by a search warrant issued under Rule 41 of the Federal Rules of Criminal Procedure.

d. *Search Warrant Required for Domestic and Certain International Mail.* No Customs personnel may, without a search warrant, open, inspect, read, or seize any mail in postal custody (including APO-FPO mail) which has not originated outside the CTUS, or which has diplomatic or consular immunity from customs inspection (USPS Publication 42, International Mail, sections 821.1a and 821.1b).

.92 DEPARTMENT OF AGRICULTURE

a. *Foreign Origin Mail.* Without a search warrant, but with the written consent of the sender, designated personnel of the U.S. Department of Agriculture may open and inspect (but not read) the contents of mail (including APO-FPO mail) which has originated outside the Customs Territory of the United States ("CTUS") and is addressed for delivery inside the CTUS. Such inspection may be conducted only in accordance with 830, USPS Publication 42, International Mail, relating to cooperation with the Department of Agriculture on plant quarantine inspections of imports.

b. *Domestic Mail from Hawaii or Puerto Rico.* Without a search warrant, designated USDA personnel may open and inspect (but not read) the contents of mail reasonably suspected of containing plant matter or plant pests, which has been mailed in Hawaii or Puerto Rico and is addressed to the United States mainland, either with the consent of the sender, or if the mail is unsealed. Such inspections may take place only in designated areas of the Hawaii or Puerto Rico post office, and only so long as the Federal plant quarantine of Hawaii or Puerto Rico remains in effect.

c. *State Terminal Inspections.* Postal employees may cooperate with the Department of Agriculture and with State terminal inspection officials in accordance with the Terminal Inspection Act, 7 U.S.C. 166, or implementing regulations in USPS Publication 14, Plant Quarantines.

.93 MILITARY POSTAL SYSTEM

This part applies to the military postal system and to all military personnel performing postal duties, including unit mail clerks. A search authorization issued by or under the authority of a commanding officer or a military judge is not a "search warrant" within the meaning of this part. Offenses committed against the security of mail in the custody of the military postal system, at home or abroad, are punishable under Federal criminal laws relating to postal offenses in Title 18, United States Code, as well as under the Uniform Code of Military Justice. Mail in the custody of the military postal system, if mailed outside the Customs Territory of the United States for delivery to an address within the Customs Territory of the United States, may be opened and searched (but correspondence in sealed mail may not be read) without a search warrant, by authorized personnel of the U.S. Customs Service in accordance with section 115.91, relating to customs imspection, and by authorized personnel of the Department of Agriculture in accordance with section 115.92a, relating to plant quarantines of imports, even though for other purposes such mail is domestic mail, part 112.

.94 CUSTOMS INSPECTION IN GUAM

Postal employees in the Agana post office may permit designated customs officials of the Government of Guam, without a search warrant to open, inspect, and read the contents of unsealed mail, and to examine the exterior (but not open or read the contents) of sealed mail which is addressed for delivery within the Territory of Guam. Upon the request of Guam customs officials, postal employees in the Agana post office may ask the addressee of sealed mail which Guam Customs reasonably suspects of containing dutiable or prohibited matter to authorize Guam custom to open and inspect the contents of the sealed mail, or to appear at the post office to accept delivery of the sealed mail in the presence of a Guam customs official.

.95 CANAL ZONE POSTAL SERVICE

.951 *International Transit Mail*

The Canal Zone Postal Service shall comply with section 115.8 with regard to any international transit mail passed to it by a foreign postal administration.

.952 *Mail Addressed to the United States or any Area for Which it is Responsible*

The Canal Zone Postal Service shall comply with part 115 with regard to any mail passed to it by a foreign postal administration which is addressed for delivery in the United States or any area for which the United States is responsible (other than the Canal Zone).

.953 *Mail Passed to the Canal Zone Postal Service by the United States Postal Service Not Addressed for Delivery in the Canal Zone*

The Canal Zone Postal Service shall comply with part 115 with regard to any mail passed to it by the United States Postal Service which is not addressed for delivery in the Canal Zone.

.954 *Definitions*

For purposes of subsections 115.952 and 115.953, the words "postal employee" or words of like import in part 115 refer to an employee of the Canal Zone Postal Service; and the words "Postal Service" or "United States Postal Service" or words of like import refer to the Canal Zone Postal Service.

.96 PUERTO RICO

Under 48 U.S.C. 741a, postal employees in the San Juan Post Office are authorized to permit excise tax collection officials of the Commonwealth of Puerto Rico to record the names and addresses that appear on the exterior of incoming insured, certified, or C.O.D. mail, so long as no mail is opened or detained.

.97 MAIL ADDRESSED TO PRISONERS

Authorized personnel of prisons, jails, or other correctional institutions, in accordance with lawful rules and regulations, may open, examine, and censor mail addressed to an inmate of the institution, if the inmate-addressee consents to receive his mail at the institution through the institutional authorities. If the inmate does not consent, the personnel may either deliver the inmate's mail to the inmate unopened, or return it to the post office unopened marked, "Refused." An inmate may designate in writing an agent outside the institution to receive his mail, either through an authorized address of the agent if the mail is so addressed, or at the delivery post office serving the institution if the mail is addressed to the inmate at the institution.

PART 122—ADDRESSES

* * * * *

.514 *Charges*

* * * * *

d. Payment for correction of lists submitted by Federal agencies and for address correction notices furnished to them on Forms 3547 and 3579 is made under the official mail reimbursement program. Submit a report on Item 013, *Routing Slip,* or by memorandum indicating the applicable charges and the name of the Federal agency, including the bureau, for which these services were provided, to:

Manager, Government Revenue and Examination Branch, Finance Department, U.S. Postal Service, Washington, D.C. 20260.

* * * * *

.552 *Multi-ZIP-Coded Post Offices*

Under the following conditions, post offices will sort mailing lists consisting of addresses for the multi-ZIP-Coded post offices described in section 122.633 (see also 122.634) according to five digit ZIP Code delivery units at a charge of $23.00 per thousand addresses or fraction thereof, payable to the local postmaster upon submission of the list:

* * * * *

PART 125—SECOND-CLASS BULK MAILINGS

* * * * *

125.2 WRAPPING

* * * * *

.26 Sealed or unsealed envelopes used as wrappers and sealed covers must show a notice of entry in the upper right corner of the address area. The upper left corner must show the name of the publication followed immediately by the publication number furnished by the Office of Mail Classification and the mailing address to which undeliverable copies or change of address notices are to be sent. The publication number includes an alpha prefix and is to be within parentheses; for example, *THE NATIONAL WEEKLY* (ISSN 9876-543X) or *THE COMMUNITY JOURNAL* (USPS 123-456). See 132.25f and 159.224 for additional instructions. An alternative to printing these required endorsements on the wrapper is to print them directly on the outside of the publication, provided they can be readily recognized and easily read when the wrapper is in place. This alternative permits the use of clear plastic wrappers and also enables the use of opaque sleeves which only partially cover the publication.

* * * * *

125.3 MAILING

* * * * *

.326 *Packages and Sacks*

When there are six or more individually addressed copies to the destinations described in 125.326 a, b, c, d, and e, they must be securely wrapped or tied together as a package by the mailer (the mailer may package less than six copies in the same manner). Packages must be sacked by the mailer when there are enough for the same destination to fill approximately one-third of a standard No. 2 sack or when the copies for the same destination weigh at least 20 pounds. Some publishers may be equipped to prepare the required separations without using mail sacks. For example, the publisher might prepare banded bundles, place the copies on pallets, or place the copies in various kinds of containers. If arrangements mutually beneficial to the publishers and the Postal Service can be made for handling copies outside of mail sacks, a detailed explanation of the arrangements must be submitted by the postmaster of the post office of original second-class entry to his Regional Postmaster General who will inform the postmaster whether

the arragements have been approved or disapproved. See 125.328

• • • • •

.329 Outside County Per Piece Rates (Regular Rate and Science of Agriculture Publications)

There are several different piece rates provided for regular and science of agriculture publications which reflect the level of presort. Presort levels A, B and C are provided for mailings of 5,000 or more copies of Regular and Science of Agriculture publications being sent to destinations outside the country of publication. Presort levels D and E are provided for mailings of less than 5,000 pieces of Regular and Science of Agriculture publications being sent to destinations outside the county of publication.

a. To qualify for the level B or level E piece rate, a piece must be presented in a sack addressed to a city having a unique 3-digit, or a 5-digit ZIP Code destination, containing sufficient pieces to fill ⅓ of a number 2 postal sack (1,000 cubic inches) or sufficient pieces to weigh at least 20 pounds.

b. To qualify for the level C piece rate, a piece must be presented in a sack addressed to a particular carrier route containing sufficient pieces to fill ⅓ of a number 2 postal sack or sufficient pieces to weigh at least 20 pounds.

c. Pieces presented in bundles in lieu of sacks, in accordance with 125.328 may receive this lower rate providing they are of sufficient volume to fill one-third of a standard number 2 sack (1,000 cubic inches) or if they weigh at least 20 pounds.

d. One sack to a 5-digit ZIP Code or to a city with a unique 3-digit ZIP Code, containing less than one-third of a sack or 20 pounds may qualify for this lower per piece rate provided it is part of a mailing which contains other substantially full sacks to the same ZIP Code destination. This allows for the overflow to that destination which cannot be practicably put with previously sacked mail to that destination.

e. Mailers must be prepared to document or otherwise confirm the number of pieces mailed and paid for at the levels B, C, and E piece rates. This may be done in any of the following ways:

(1) By separating sacks paid at the various piece rates when they are presented for mailing, or

(2) By attaching to the mailing statement a listing of the number of copies (and pieces) to each 5-digit, unique 3-digit city, and carrier route for which level B, C, or E piece rates are being paid, or

(3) By maintaining records for each mailing which will confirm the number of pieces in unique 3-digit city, 5-digit, and carrier route sacks. The records must document the number of copies (and pieces) to each unique 3-digit city, 5-digit, and carrier route destination for which sacks are made up. A printout must be presented prior to the first mailing made under this arrangement, but not prior to August 1, 1978. These records must be retained for at least 2 months.

f. The mailer must provide a copy of the record for a particular mailing, or portions of it, within 30 days of a request by the postmaster of the office of entry. Postmasters shall advise the Region's Revenue Protection Program Manager of all publications being mailed under this arrangement. Acceptance units will maintain a listing of publications authorized to mail under this arrangement.

PART 126—MAIL ADDRESSED TO MILITARY POST OFFICES OVERSEAS

• • • • •

.15 AIRLIFT MAIL

• • • • •

.153 Any parcel other than a parcel mailed as priority mail not exceeding 30 pounds in weight or 60 inches in length and girth combined which is mailed at or addressed to any overseas military post office outside the 48 contiguous States will be transported by air on a space available basis, upon payment of a PAL (parcel air lift) fee in addition to the regular surface rate of postage. The PAL fee is 25¢ for parcels weighing 2 pounds or less, 50¢ for parcels weighing over 2 pounds and not exceeding 3 pounds, 75¢ for parcels weighing over 3 pounds and not exceeding 4 pounds and $1.00 for parcels weighing over 4 pounds. These parcels must be marked with the large letters PAL on the address side, preferably below the postage and above the name of the addressee. Postal employees will place these letters on all such parcels at the time of acceptance.

.154 Airlift service in 126.152 and 126.153 shall not be provided for mailings of publications sent in bulk to exchanges or news agents for subsequent resale or distribution.

.155 Second-class publications published once each week or more frequently and featuring principally current news of interest to members of the Armed Forces and the general public, which are mailed at or addressed to any Armed Forces post office *outside the 48 contiguous States*, will be given the airlift service provided in 126.152.

FOOTNOTES

A. No mail of any class may contain securities or currency. Precious metals in their raw, unmanufactured state are also prohibited. Official shipments are exempt from these restrictions.

B. Customs Declaration form required, except that prepaid mail from a contractor, addressed to a military organization for official use, NEED NOT bear Customs Declaration but must be endorsed "Contents For Official Use—Exempt from Customs Requirement." Official mail from Government agencies DOES NOT require customs declaration or exemption endorsement."

B[1]. Two customs declarations required. One Form 2966—A and one Form 2966.

*Articles will be liable for customs duty and/or purchase tax unless thay are bona fide gifts, personal use intended for military personnel or their dependents. When the contents of a parcel meet these requirements, the mailer should place a certificate similar to the following on the customs form under the heading—"Description of Contents" "Certified to be a bona fide gift, personal effects or items for personal use of military personnel and dependents thereto."

B[2]. Form 2966, Customs Declaration, required except on official mail which does not require customs declaration or exemption endorsement. Army and Air Force Exchange Service (AAFES) will furnish computer listing on all items mailed from their activities to Phillipine APO's indicated. Other major mail order companies will either use Form 2966 on each item or provide computer listings. These listings should include description of item, dollar value of item, complete address including PSC box number and APO of addressee, date of mailing, insurance or registry number if applicable, and serial number of any item over $25.00 in value and any electrical item with a plug over $15.00 in value.

C. Cigarettes and other tobacco products prohibited.

D. Coffee prohibited.

E. Mail may not contain: 1. Medicines or vaccines not conforming to French laws. 2. Nonauthorized publications, reprints, and publications prohibited on account of their political character or immoral contents.

F. Mail of all classes may not contain firearms of any type. See definition of firearms in 124.4 Exception: Not applicable to firearms mailed to or by official U.S. government agencies.

F[1]. No mail of any class may contain privately owned weapons addressed to an individual.

F[2]. "Importation of firearms is restricted to one shotgun and one single shot 22 caliber rifle per individual."

G. Only first-class letters, second- and third-class mail authorized.

H. Meats, including preserved meats whether, hermetically sealed or not, are prohibited.

H[1]. Pork and/or pork by-products prohibited.

I. Mail of all classes may not exceed the following dimensions:

Length	
45"	72" length and girth combined.
Over 42" to 44"	24" girth.
Over 44" to 46"	20" girth.
Over 46" to 48"	16" girth.

Maximum length 48".

[1] Provisions of this footnote are not applicable to registered mail.

[2] Provisions of this footnote are not applicable to official Government mail marked MOM.

J. Weight for other than registered mail is restricted to 50 pounds.

K. Mail which includes in the address the words "Dependent Mail Section" may consist only of letter mail, newspapers, magazines and books. No parcel of any class containing any other matter may be mailed to Dependent Mail Section. This footnote is not applicable if the address does not include the words "Dependent Mail Section."

L. All official mail prohibited.

M. Fruits, animals, and living plants are prohibited.

N. No registered mail accepted.

O. Personal mail addressed to vessels using this number is limited to unregistered first-class mail, and certified mail. Other classes of mail may not be accepted.

P. APO will be used for the receipt and dispatch of official mail only.

Q. Mail may not exceed 66 pounds and size is limited to 42 inches maximum length and 72 inches maximum length and girth combined.

R. All alcoholic beverages, including those mailable under part 124.81 are prohibited.

S. No parcels (merchandise) of any kind accepted.

T. Mailings of case lots of food and supplemental household shipments must be approved by the sender's parent agency prior to mailing.

U. Parcels must weigh less than 16 ounces when addressed to Box R.

V 43 / 178 SE 13 78

MAIL CLASSIFICATION AND RATES
Part 131
FIRST CLASS

131.1 RATES

.11 SINGLE PIECE RATES

The single piece rates are applied to each letter or piece of first-class mail according to its weight.

Kind of Mail	Rate
All first-class mail weighing 12 ounces or less except postal and post cards. See 136.1 for rates on first-class mail weighing more than 12 ounces.	15¢ for the first ounce or fraction of an ounce, 13¢ for each additional ounce or fraction of an ounce.
Single postal cards sold by the post office (see 141.13)	10¢ each.
Double postal cards sold by the post office (see 141.13)	20¢ (10¢ each portion).
Single post cards (see 131.222)	10¢ each.
Double post cards (see 131.222) (Reply portion of double post card does not have to bear postage when originally mailed.)	20¢ (10¢ each portion).
Presort rate (see 131.12)	The applicable first-class rate, less 2¢ per piece for letters and less 1¢ for cards
Business Reply:	
When the advance deposit trust account option is *not* used	The appropriate first-class postage; plus a surcharge of 12¢ per piece.
When the advance deposit trust account option is used	The appropriate first-class postage; plus a surcharge of 3.5¢ per piece.

.12 PRESORT RATE

.121 *Identical Pieces*

The presort rate is equal to the applicable single piece first-class rate, less 2 cents for each letter and 1 cent for each card that is part of a group of ten or more pieces sorted to the same five-digit ZIP Code, or of a group of fifty or more pieces sorted to the same three-digit ZIP Code, when they are presented at one post office as part of a single mailing of not less than 500 pieces of first-class mail of identical size and weight, each weighing 12 ounces or less. All pieces must be individually addressed and lower rated pieces must be sorted to the maximum extent; i.e., all five-digit sorts in groups of ten or more must be exhausted before proceeding to make up all three-digit sorts in groups of fifty or more. Full first-class postage must be paid on the residue not sorted to groups of 5- or 3-ZIP Code digits as decribed above. The mailing must be presented at a place and between the hours designated by the postmaster and must comply with the preparation requirements in 131.5. Deposit of metered presort mail at other than these designated places will be considered misuse of a postage meter and grounds for revocation of the meter license in accordance with 144.23. Cards subject to sortation requirements of 131.224 are eligible for the presort rate if they meet all requirements for the rate.

.122 *Nonidentical Pieces*

a. Metered. Pieces of first-class metered mail which are nonidentical in size and weight may be mailed at presort rates providing all other requirements contained in 131.121 and 131.5 are met. Residual pieces must be *metered* at the full rate.

b. Mailings of nonidentical pieces with *permit imprints* may only be made under the provisions of 145.8 or 145.9.

• • • • •

.23 BUSINESS REPLY MAIL

• • • • •

.233 *Postage and Fees*

• • • • •

f. When payment is not by use of an advance deposit trust account, postage is collected on each piece of business reply mail at the time it is delivered. Postage due stamps for the amount due will be affixed to the mail or to Form 3582-A, *Postage Due Bill.* The stamps will be canceled and delivered to the addressee with the mail when he pays the amount due. Business reply mail will not be mixed with other mail in direct packages or sacks for individuals or concerns. See 131.233g for amount to be collected which may not include fees for any special services

• • • • • •

.235 *Format*

a. General. Any photographic, mechanical or electrical process or any combination of such processes, other than handwriting, typewriting or handstamping, may be used to prepare the address side of business reply mail. The background of business reply mail pieces may be any light color that allows the address, postmark and other required endorsements to be readily discerned. Brilliant colors may not be used. Green diamond and other printed borders are not authorized on business reply letters and cards; however, they may be included on business reply labels and cartons and envelopes larger than 6"×11".

b. Required Format Elements. (1) *Preprinted Endorsements.* (a) The endorsement "NO POSTAGE NECESSARY IF MAILED IN THE UNITED STATES" must be printed in the upper right corner of the face of the piece. The arrangement of the endorsement may vary, but it may extend no further than 1¾ inches from the right edge of the mail piece.

(b) The appropriate "Business Reply" legend must appear above the address and must be in capital letters at least 3/16 inches in height. Authorized legends are:

Legend—For Use On

BUSINESS REPLY MAIL—Letters, Cartons, and Cards at Letter Rate

BUSINESS REPLY CARD—Cards qualifying for post card rate. (The legend "Business Reply Card" must be used to be eligible for the lower card rate. See 131.222 for the maximum dimensions for post cards.)

BUSINESS REPLY LABEL—Labels. (Business Reply envelopes and cards may not be used as labels to return matter to the permit holder. However, the permit holder of a business reply label guarantees payment of first-class postage upon the return of any mailable matter having his business reply label affixed.)

(c) Immediately below the "Business Reply" legend the words "FIRST CLASS, PERMIT NO • • • " followed by the permit number, and the name of the issuing post office. (city and state) must be shown in capital letters.

(d) The legend "POSTAGE WILL BE PAID BY ADDRESSEE" must appear above the address.

(e) The complete address, including ZIP Code, must appear in accordance with sections 122.1 and 122.2. A margin of at least one inch is required between the left edge and the address.

(2) *Required Markings*

Horizontal Bars—To facilitate rapid recognition of business reply mail, a series of horizontal bars parallel to the length of the mail piece must be printed immediately below the endorsement "NO POSTAGE NECESSARY IF MAILED IN THE UNITED STATES". The bars must be uniform in length, at least 1 inch long and 1/16 to 3/16 inches thick. The spacing between the bars must be nearly equal to the thickness of the bars. A ⅝ inch space must be left between the bottom horizontal bar and the bottom edge of the mail piece on business reply letters and cards. The series of horizontal bars on business reply labels must be at least 1½ inces high.

(b) *Facing Identification Mark (FIM)*—An area measuring ⅝ of an inch in height and 1¼ inches in length, located along the top edge of the piece and to the left of the endorsement "No Postage Necessary if Mailed in the United States" is reserved for the use of Facing Identification Mark (FIM). FIM is a vertical bar code pattern in the top right portion of the address side which functions as an orientation mark for automatic facing and cancelling equipment. The Facing Identification Mark area being 3 inches from the right edge of the piece and extends 1¼ inches to the right (see 131.236). In all cases, U.S. Postal Services specifications and negatives must be used. The specifications and negatives for Facing Identification Mark can be obtained from local post office customer services representatives. FIM must be used on all letter size business reply mail and on business reply post cards. (Letter size mail is defined as being from 4¼ inches to 11½ inches long, 3 inches to 6⅛ high, and .006 inches to .25 inches thick.) On or after November 30, 1978, the minimum dimensions for letter size mail will change to 5 inches long, 3½ inches high, and .007 inch thick.)

(c) *Optional Format Elements.* (1) *Voluntary Review*—Normally, postal inspection of sample business reply pieces or artwork is not required prior to distribution by permit holders. However, permit holders are encouraged to submit such materials to their local postmaster for review and approval prior to printing and distribution. Doing so would avoid the possible inconvenience and cost of reprinting if the Postal Service were to determine that business reply format requirements are not being met and that existing unapproved pieces are not mailable. When postal review is desired, two pieces should be submitted to the postmaster either where the permit is held or where the mail will be returned. One piece will be returned after being marked to indicate either postal approval or suggested changes.

(2) *Bar Code*—The bottom ⅝ inch of business reply cards and letter size envelopes is reserved for USPS bar codes. The USPS bar code is the only information that may appear in this area.

(3) *BRM Legend Box*—It is recommended that the "Business Reply" legend and other preprinted endorsements described in 131.235b(1) (b) and (c) be placed in a box for greater visual impact.

(4) *Company Logo*—A company logo used as part of the company name may appear in the address provided it is located no lower than the top of the street address line or the post office box line and does not interfere with any of the required business reply endorsements.

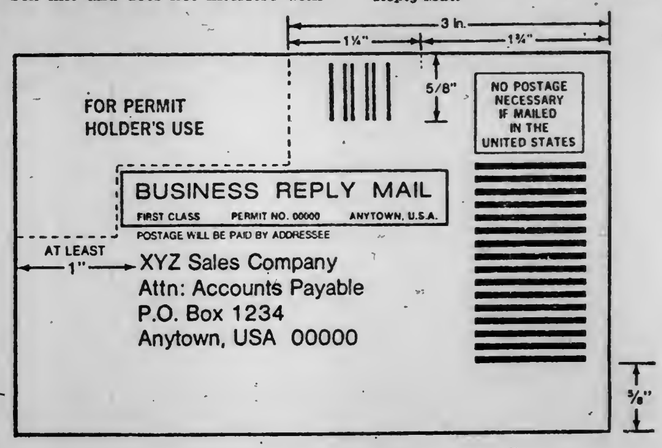
(5) *Space For Permit Holders Use*—The upper left corner of the address side is available fur use by the permit holder. This area is bordered on the right by the FIM area (see 131.235b(2)(b)) and the legend "BUSINESS REPLY MAIL" and is above the address. It may contain the return address, logos, distributor codes, "strad" marks, etc. (see 131.236).

(6) *Attention Lines*—Attention lines or key lines may be included as the first or second line of the distributor's address.

(7) *Window Envelopes*—Window envelopes, if used, must comply with Part 141, Postal Service Manual.

(d) *Implementation Deadline*—BRM material distributed after May 1, 1979, must comply with the format requirements contained in this section. Material complying with previous BRM format requirements may continue to be distributed until May 1, 1979. Postmasters may authorize distribution, on a case by case basis, until May 1, 1979, of material already printed which does not comply with the former format requirements, but which is not expected to cause mail processing problems. Distribution after May 1, 1979, of BRM material which does not comply with the format requirements contained in this section will be grounds for revocation of BRM permits.

.236 *Illustration of Business Reply Mail*



V 43 / 178 SE 13 78

.237 *Distribution*

Business reply cards, envelopes, cartons, and labels may be distributed:

a. In any quantity for return to any post office in the United States and its Territories and possessions, including military post offices overseas; except in the Canal Zone, where they may not be returned without prepayment of postage. They should not be sent to any foreign country.

b. In any manner except by depositing in receptacles provided by customers for receipt of mail.

.238 *Permit Holder*

The permit holder guarantees payment on delivery of postage on returned business reply mail. Any concern distributing business reply cards, envelopes, cartons, or labels under one permit for return to its branches or dealers guarantees to pay postage on any returns refused by any authorized addressees.

* * * * *

.42 PRESORT RATE

.421 Mailings made at presort rates must be paid only by meter stamps or permit imprints. When meter stamps are used, postage must be affixed for the first-class presort rate on qualifying pieces and for the full first-class rate on residual pieces except as provided in 131.422.

.422 *Metered Identical Pieces*

For mailings paid by metered postage, the entire presorted mailing may be metered at the lower presort rate, if the entire mailing consists of pieces of identical size and weight. The additional postage for residual pieces for which the full single-piece rate is required is to be paid by means of a meter strip affixed to the back of Form 3602-PC, Statement of Mailing, Bulk Rates.

.43 ANNUAL FEE

A first-class presort mailing fee of $30 must be paid once each calendar year at each office of mailing by or for any person who mails first-class matter at presort rates. Any person who engages a business concern or another individual to mail for him must pay the $30 fee. This fee is separate from the fee that must be paid for a permit to mail under the permit imprint system (145.1).

* * * * * *

.54 SORTING REQUIREMENTS—LOWER PRESORT RATE

.541 *Packages*

When there are 10 or more pieces to the same five-digit ZIP Code destination and/or 50 or more pieces to the same three-digit ZIP Code prefix destinations described in 131.545 b and c, they must be secured as a package by the mailer. Rubber bands are the only acceptable means of securing packages of trayed mail. See exhibit 131.541.

HOW TO PREPARE PRESORTED FIRST-CLASS MAIL (500 PIECE MINIMUM)

Pieces qualifying for the presort rate MUST be prepared in the following sequence:

DIRECT	CITY	SCF	STATE	MIXED STATES
10 or more to the same 5-digit ZIP Code.	50 or more to the same first 3-digit ZIP Code uniquely* assigned to a City. *Applies ONLY to those Cities listed in upper case letters in the ZIP Code Prefixes Section of the National ZIP Code Directory.	50 or more to a first 3-digit ZIP Code assigned to a Sectional Center Facility.* (Each first 3-digit ZIP Code assigned to a SCF MUST be bundled separately) *See National ZIP Code Directory for SCF list.	(Recommended but not mandatory)	
Qualifying Direct pieces that do not fill a DIRECT TRAY must be bundled into packages and trayed in the following priority order. CITY TRAY - When the first three digits of the Direct packages are the same as the first three digits uniquely assigned to a City. SCF TRAY - When the first three digits of the Direct packages are the same as any of the first three digits assigned to the SCF. STATE TRAY (Recommended but not mandatory) - When the State name on the Direct packages is the same as the State name on all the packages in the tray. MIXED STATES TRAY - When the Direct packages are not presortable in full trays to the required or recommended categories.	Qualifying City pieces that do not fill a CITY TRAY must be bundled into packages and trayed in the following priority order. SCF TRAY - When the first three digits of the City packages are the same as any of the first three digits assigned to the SCF. STATE TRAY (Recommended but not mandatory) - When the State name on the City packages is the same as the State name on all the bundles in the tray. MIXED STATES TRAY - When the City packages are not presortable in full trays to either the required or recommended category.	Qualifying SCF pieces that do not fill a SCF TRAY must be bundled into packages and trayed in the following priority order STATE TRAY (Recommended but not mandatory) - When the State name on the SCF bundles is the same as the State name on all the packages in the tray. MIXED STATES TRAY - When the SCF packages are not presortable in full trays to the recommended category.	REMAINING (RESIDUAL) MAIL Any remaining mail not presorted into DIRECT, CITY, or SCF categories is INELIGIBLE for the lower rate. However, it must be placed in trays to maintain the ZIP Code sequence. It is recommended that a State bundle be prepared when there are 10 or more pieces of residual mail for the same State. All residual mail must be clearly separated from the presorted mail.

Exhibit 131.541

Exhibit 131.541

* * * * * * * *

.545 *Sortation*

• • • • •

b. *City Packages and Trays.*

• • • • •

(2) *Presorted Trays.* City mail plus any packages for five-digit ZIP Code delivery units within those cities not trayed, as provided for by 131.545a(2), must be prepared in City trays. A mixed city pouch label must be firmly affixed to the end of each tray. City trays must be labeled in the following manner:

PHILADELPHIA PA 191
FCM PRESORTED
FR JAY MAILING CO
CINCINNATI OH

Mail left over after filling trays must be bundled into packages and placed in an SCF tray.

c. *Sectional Center Facility (SCF) Packages and Trays.*

• • • • •

(2) *Presorted Trays.* SCF packages plus any five-digit and city packages not trayed, as provided for by 131.545 a(2) and b(2), and which are destined for the same sectional center facility must be prepared in SCF trays. An SCF pouch label must be firmly affixed to the end of each tray. SCF trays must be labeled in the following manner:

SCF PHILADELPHIA PA 190
FCM PRESORTED
FR Q MAILERS BALTO MD

Presorted mail left over after filling SCF trays must be bundled into packages. It is recommended, but not required, that these be placed in state trays. If state trays are not prepared, bundles must be placed in mixed states trays.

d. *State Trays.* It is recommended, but not required, that qualifying packages remaining after traying, in accordance with 131.545 a(2), b(2), and c(2), be sorted to State distribution centers. (SDC's) and placed in State trays. See exhibit 131.541. Postmasters will provide mailers with listings of SDC's and the areas they serve. A state pouch label in the format below must be firmly affixed to the end of the tray except for trays for the State of mailing. State trays for the State of mailing shall not be labeled.

DIS CHICAGO IL 606
IL FCM PRESORTED
FR RECORD BOSTON MA

e. *Mixed States Trays.* Packages remaining after traying in accordance with 131.545 a(2), b(2), c(2) and d, must be prepared in Mixed States trays. A mixed States pouch label in the following format must be firmly affixed to the end of the tray:

DIS CHICAGO IL 606
MIXED STATES FCM
PRESORTED
FR RECORD CHICAGO IL

f. *Exceptions to Bundling.* (1) The bundling requirements for presorted mail left over after filling full trays described in 131.545a-e may be waived when the use of separating tabs is approved by the local postmaster.

(2) The local postmaster may also waive the bundling requirements for loose-packed presorted flat mail sorted to one five-digit ZIP Code destination, when there is enough quantity to fill a number 3 sack. The flats must measure not less than approximately 8 inches high by 10 inches long.

.55 RESIDUAL MAIL

.551 *Maintain ZIP Code Sequence*

Pieces remaining after packages have been prepared in accordance with 131.545a-e and exhibit 131.541 are residual mail and are ineligible for the lower presort rate. Residual mail must be placed in trays in a way which maintains the orientation and the ZIP Code sequence of the presort. Trays of residual mail prepared in ZIP Code sequence are not to bear a pouch label.

.552 *Keep Residual Mail Segregated*

Residual mail must be presented together with the lower rated portion of a mailing, but must be clearly segregated therefrom to facilitate verification of the quantities of both the lower rated and residual pieces.

.553 *Optional Residual Sort*

In order to speed processing of the mail, it is recommended, but not required, that the mailer prepare state packages when there are 10 or more pieces to the same state. Orange label S must be affixed to the lower left corner of the address side of the top piece in each package.

131.6 PRESORT VERIFICATION

.61 PROCEDURE

h. For metered mailings select a sample of ten pieces of the mailing at random. Each piece of the sample is to be weighed and verified for proper payment of postage and the correct date. Based on the results of the ten pieces checked use the following procedures for disposition of the mailing:

(6) When the additional postage for metered identical residual pieces for which the full single piece rate is required is attached to Form 3602-PC, acceptance employees must verify the count of the residual pieces and insure that the postage value of the meter strip equals the number of residual pieces multiplied by the difference between the full rate and the lower presort rate.

PART 132—SECOND CLASS

132.1 RATES

.11 WHEN MAILED AT OFFICE OF ORIGINAL ENTRY OR ADDITIONAL ENTRY

.111 *In-County Rates*

In-county rates apply to copies of publications which are to be delivered to addressees within the county of publication, if such copies are:

a. Mailed at the office of original entry; or

b. Mailed at an office of additional entry within the county of publication.

If the postmaster of an office of entry directs a publisher to deposit copies of the publication at a postal facility serving that office, those copies shall be considered as mailed at the office of entry. The rates include a per-piece rate which must be paid in addition to a per-pound rate. These rates are:

Per Piece—1.1 cents
Per Pound—2.5 cents

.112 *Independent Cities*

Each publication having original entry at an incorporated city which is situated entirely within a county or which is situated contiguous to one or more counties in the same State, but which is politically independent of such county or counties, shall be considered to be within and a part of the county with which it is principally contiguous and copies mailed into that county are chargeable with postage at the rates in 132.111. Where more than one county is involved, the publisher will select the principal county and notify the postmaster.

• • • • •

.121 *All Publications, Except Those Accepted at the Special Rate (132.122), Classroom Rate (132.123), or Science of Agriculture Rate (132.124)*

All publications are subject to the charges in both a and b.

a. Rates in cents per pound or fraction of a pound:

Nonadvertising portion	11.0
Advertising portion:	
Zones 1 and 2	14.7
Zone 3	15.6
Zone 4	17.1
Zone 5	19.7
Zone 6	22.6
Zone 7	25.4
Zone 8	27.8

b. Per piece charge (cents):

(1) For mailings of 5,000 or more copies per issue outside the county:

(a) Level A; pieces not qualifying for Level B or C	5.4
(b) Level B; unique 3-digit city and 5-digit ZIP Code destinations	4.3
(c) Level C; Carrier route or finer sort	3.6

(2) For mailings of less than 5,000 copies per issue outside the county:

(a) Level D; material not qualifying for presort level E	1.6
(b) Level E; unique 3-digit city and 5-digit ZIP Code destination	1.3

c. Copies of second-class publications that do not qualify for level B, C, or E per piece charges must be sorted to the finest extent possible as prescribed by part 125.

.122 *Special Rate Publications*

All publications are subject to the charges in both a and b.

a. Rates in cents per pound or fraction of a pound:

Nonadvertising portion	5.0
Advertising portion:	
Zones 1 and 2	7.8
Zone 3	8.5
Zone 4	9.9
Zone 5	11.6
Zone 6	13.1
Zone 7	14.2
Zone 8	15.3
b. Per piece charge (cents)	1.7

• • • • •

.123 *Classroom Publications*

(Religious, educational, or scientific publications designed specifically for use in school classrooms or in religious instruction classes.) All publications are subject to the charges in both a and b.

a. Rates in cents per pound or fraction of a pound:

Nonadvertising portion	3.5
Advertising portion:	
Zones 1 and 2	4.6
Zone 3	5.2
Zone 4	6.4
Zone 5	8.3
Zone 6	10.4
Zone 7	11.9
Zone 8	13.7
b. Per piece charge (cents)	1.1

• • • • •

.124 *Science of Agriculture Publications*

The rates in 132.124 a and b apply to publications devoted to promoting the science of agriculture. Exception: When the total number of copies furnished during any 12-month period to subscribers residing in rural areas consists of at least 70 percent of the total number of copies distributed by any means for any purpose, the rate for zones 1 and 2, for the advertising portion, is 7.9 cents per pound.

.13 RATES FOR NONSUBSCRIBER COPIES

.131 *Commingled and Presorted with Subscribers' Copies*

Sample copies in excess of 10 percent allowance.	15.3 cents per pound or fraction of a pound, plus 5.8 cents per piece.
Copies to persons not included in the list of subscribers.	Do.

• • • • •

.223 *Preparation*

a. Publications must be formed of printed sheets. They may not be reproduced by stencil, mimeograph, or hectograph processes or reproduced in imitation of typewriting. Reproduction by stencil, mimeograph, or hectograph processes is reproduction in imitation of typewriting and is not permissible. Reproduction by any other printing process is permissible. Any style of type may be used.

b. The name of the publication must be shown on the front/cover page in a position and in a style and size of type that makes it clearly distinguishable from the name of the publisher or other items on the front.

• • • • •

.25 IDENTIFICATION STATEMENTS IN COPIES

Copies of publications entered as second-class mail and copies of publications awaiting approval of their Application for Second-Class Mail Privileges must have an identification statement conspicuously shown in type no smaller than can be easily read (1) on one of the first five pages (preferably in the masthead) or (2) in the masthead on the editorial page (provided the location of the editorial page is shown on the front page of the publication in the table of contents). The identification statement must contain all of the following items:

a. *Name of Publication and Publication Number*—The publication number includes an alpha prefix and is to be within parentheses immediately following or below the name of the publication, for example, *THE WEEKLY JOURNAL* (ISSN 9876-543X) or *THE CIVIC BULLETIN* (USPS 876-690). The publication number will be furnished by the Office of Mail Classification and must be included within 90 days of the notification. The publication number may be omitted if it appears on the front/cover page.

b. *Date of Issue*—The date of issue may be omitted if it appears on the front/cover page.

c. *Statement of Frequency.*

d. *Issue Number*—Every issue of each publication must be numbered consecutively. The consecutive numbers of published issues may not be broken by assigning numbers to issues unavoidably omitted. The issue number may be omitted if it appears on the front/cover page.

e. *Subscription Price*—If the publication has one.

f. *Name and Address of Known Office of Publication*—Including street number, street name and ZIP Code. The street name and number are optional if there is no letter carrier service. The "Known Office of Publication" must be clearly distinguishable from the names of other offices of the publication. If there is no United States Post Office at the place where published (foreign publication) the name of the post office where mailed must be shown as the office of publication.

g. *Second-Class Imprint*—Which reads "Second-Class Postage Paid at ————." If a publication is mailed at two or more offices, the imprint must read "Second-Class Postage Paid at ———— and at additional mailing offices".

Notice of Pending Application—If copies are mailed while an application is pending, a notice must be included which reads "Application To Mail At Second-Class Postage Rates Is Pending At ————".

h. *Mailing Address For Change of Address Orders*—A statement, in normal text type of the publication, indicating where change of address orders are to be sent, which reads: "POSTMASTER: Send address changes to (Publication name and mailing address)". See 125.26 regarding publications which are wrapped.

V 43 / 178 SE 13 78

V 43 / 178

The following is an example of an appropriate identification statement format:

"THE DAILY TIMES (ISSN 7132-698X) is published daily except Sundays and holidays for $28 per year by Wright News, Co., 123 Main Avenue, Washington, DC 20024. Second-class postage paid at Washington, DC and additional mailing offices. POSTMASTER: Send address changes to *THE DAILY TIMES*, P.O. Box 4, Boulder, CO 80302."

In the above example the publisher's "known office of publication" is located in Washington, DC, where his circulation records must be made available for postal examination. His fulfillment office is located at Boulder, Colorado.

.31 FILING BY PUBLISHER

* * * * *

e. *Application for exceptional dispatch.* An application to deliver copies of a second-class publication at the publisher's expense and risk from the post office of original entry or an additional entry post office to other post offices or elsewhere may be filed by the publisher at the office of original or additional entry where the postage is paid on the copies which will be transported. Applications for exceptional dispatch may be filed jointly with applications for original entry, reentry, or special rates. A form is not provided for applications for exceptional dispatch. The postmasters at the office of original or additional second-class entry will approve or disapprove applications on the basis of whether the exceptional dispatch will improve service. They will notify other post offices concerned and the sectional center manager of approved arrangements and include a list showing how the sacks or outside bundles are to be labeled and the approximate number of copies. Only after notification by the postmaster at the entry office where the postage is paid shall copies be accepted at another office directly from the publisher. Upon request of the entry office, the accepting office will verify the number of copies received directly from the publisher. The entry office request will be made at least once every 6 months and include the issue to be verified. The results of this verification and any noticeable change in the number of copies received at other times will be immediately reported to the entry office where postage is paid. Denial of an application for exceptional dispatch may be appealed to the Director, Office of Mail Classification, who will issue the final agency ruling.

* * * * *

.33 FEES

The fees to accompany applications for second-class original entry, reentry, or additional entry, or for registration as a news agent, are:

Kind	Amount
Original entry	$120
News-agent registry	30
Reentry because of change in title, frequency of issue, office of publication, or other reasons	30
Additional entry (Only one fee is collectible for an application for additional entry even though the additional entry being applied for modifies one or more additional entries previously approved.)	50

If an application is not approved, no part of the fee is returned to the applicant.

PART 133—CONTROLLED CIRCULATION PUBLICATIONS

133.1 RATES

	Cents
Per pound or fraction of a pound	13.8
Per piece charge	4.9

The per piece charge is in addition to the pound rate.

133.2 PERMITS

.21 QUALIFICATIONS

* * * * *

e. The name of the publication must be shown on the front/cover page in a position and in a style and size of type that makes it clearly distinguishable from the name of the publisher or other items on the front.

.22 APPLICATIONS

Apply by letter to the postmaster at the office where mailings are to be made. State the name of the publication, frequency of issue, where published, the name of the publisher, and whether the publication is circulated free or mainly free. Submit two copies of the issue published nearest to the date of application marked to show the nonadvertising content as required in 133.53. The postmaster will submit the application and one copy of the publication to the Office of Mail Classification, Rate and Classification Department, Washington, DC 20260. Notice of authorization or denial will be furnished by the General Manager, Domestic Mail Classification Division.

* * * * *

133.3 IDENTIFICATION STATEMENTS IN COPIES

.31 Copies of publications entered as controlled circulation mail and copies of publications awaiting approval of their application for controlled circulation mail privileges must have an identification statement conspicuously show in type no smaller than can be easily read (1) on one of the first five pages (preferably in the masthead) or (2) in the masthead on the editorial page (provided the location of the editorial page is shown on the front page of the publication in the table of contents). The identification statement must contain all of the following items:

a. *Name of Publication and Publication Number*—The publication number includes an alpha prefix and is to be within parentheses immediately following or below the name of the publication, for example, *MANAGING WIDGETS* (USPS 123-456). The publication number will be furnished by the Office of Mail Classification and must be included within 90 days of the notification. The publication number may be omitted if it appears on the front/cover page.

b. *Date of Issue*—The date of issue may be omitted if it appears on the front/cover page.

c. *Statement of Frequency*

d. *Issue Number*—Every issue of each publication should be numbered consecutively. The consecutive numbering of published issues may not be broken by assigning numbers to issues unavoidably omitted. The issue number may be omitted if it appears on the front/cover page.

e. *Subscription Price*—If the publication has one.

f. *Name and Address of Known Office of Publication*—Including street number, street name and ZIP Code. The street name and number are optional if there is no letter carrier service. The "Known Office of Publication" must be clearly distinguishable from the names of other offices of the publication.

g. *Controlled Circulation Imprint*—Which reads "Controlled Circulation Postage Paid at ————." If a publication is authorized to be mailed at two or more offices, the imprint must read "Controlled Circulation Postage Paid at ———— and at ————."

OR

Notice of Pending Application—If copies are mailed under deposits of money while an application is pending, a notice must be included which reads "Application To Mail At Controlled Circulation Postage Rates Is Pending At ———— (and at ————.)"

h. *Mailing Address For Change of Address Orders*—A statement in normal text type of the publication, indicating where change of address orders are to be sent, which reads: "POSTMASTER: Send address changes to (Publication name and mailing address)". Follow section 125.26 in preparing publications which are wrapped.

.32 The following is an example of an appropriate identification statement format:

"MANAGING WIDGETS (USPS 123-456) is published daily except Sundays and holidays for $28 per year by Business Ideas Co., 44 South Street, Hyattsville, MD 20784. Controlled Circulation Postage Paid at Hyattsville, MD. POSTMASTER: Send address changes to *MANAGING WIDGETS*, P.O. Box 4, Boulder, CO 80302."

.33 In the above example the publisher's "known office of publication" is located in Hyattsville, Maryland where his circulation records must be made available for postal examination. His fulfillment office is located at Boulder, Colorado.

.34 When a controlled circulation publication is enveloped or wrapped for mailing, a printed or hand stamped notice of entry as in 133.3g must appear on the envelopes or wrappers in which the copies are mailed. Follow 125.2 in preparing publications in wrappers and envelopes for mailing.

* * * * *

PART 134—THIRD CLASS

134.1 RATES

.11 SINGLE PIECE RATE

.111 All matter not in the first or second class (see 134.31 for weight limit) except mailings made under 134.12 and 134.13:

0 to 2 ozs	$0.20
Over 2 to 4 ozs	.40
Over 4 to 6 ozs	53
Over 6 to 8 ozs	66
Over 8 to 10 ozs	.79
Over 10 to 12 ozs	.92
Over 12 to 14 ozs	1.05
Over 14 but less than 16 ozs	1.18

* * * * *

.12 BULK RATES

NOTE.—The annual bulk mailing fee is $40. (See 134.222 and 134.42.)

	Special rate for authorized organizations only (see 134.5)	Regular rates
.121 Books and catalogs having 24 or more bound pages with at least 22 printed, seeds, cuttings, bulbs, roots, scions, and plants (see 134.31 for weight limit).	14¢ per pound or fraction.	36¢ per pound or fraction.
Minimum rate per piece:	2.7¢ [Applies when a piece weighs not more than 3.0857 oz. or .19286 pounds or 87.479 grams]	8.4¢ [Applies when a piece weighs not more than 3.7333 oz. or .23333 pounds or 105.838 grams]
.122 All matter, except the items in 134.121, not included in the first- or second-class (see 134.31 for weight limit).	17¢ per pound or fraction.	41¢ per pound or fraction.
Minimum rate per piece:	2.7¢ [Applies when a piece weighs not more than 2.5412 oz. or .15882 pounds or 72.041 grams]	8.4¢ [Applies when a piece weighs not more than 3.2780 oz. or .20488 pounds or 92.931 grams]

.13 KEYS, IDENTIFICATION CARDS, IDENTIFICATION TAGS, OR SIMILAR IDENTIFICATION DEVICES

Keys, identification cards, identification tags, or similar identification devices that are without cover and that bear, contain, or have securely attached the name and complete post office address of a person, organization, or concern with instructions to return to such address and a statement guaranteeing the payment of the postage due on delivery: 32 cents for the first 2 ounces, 18 cents for each additional 2 ounces or fraction thereof.

* * * * *

134.6 PERMISSIBLE ADDITIONS

The additions authorized for fourth-class mail in 135.52 are permissible with matter mailed at third-class rates of postage.

134.7 ENCLOSURES

.71 BOOKS AND CATALOGS MAILED AT BULK RATES PROVIDED BY 134.121

External attachments are not permitted. The covers of a catalog or book for postal purposes are the outermost bound sheets. Only the following specifically named items may be enclosed loose provided they relate exclusively to the book or catalog they accompany:

a. A single reply envelope or reply post card, or both.

b. A single order form.

c. A printed circular. Circulars fastened securely along the entire bound edge inside the book or catalog by

SEP 13 78

paste, stitches, or staples are not loose enclosures.

d. If no circular is enclosed, a printed price list listing only articles featured in the catalog and showing only the same prices and discounts as the catalog.

e. An invoice. (See 135.522.)

f. Samples of merchandise attached to pages.

.72 ALL OTHER THIRD-CLASS MATTER

The following are permissible enclosures:

a. An invoice (see 135.522).

b. Manuscripts accompanying related proof sheets (see 135.521f(2)).

134.8 SEALING

.81 EXAMINATION

Third-class mail must be prepared by the mailer so that it can be easily examined. Third-class mail which is not sealed or secured so that it may be handled by machines is not recommended. Mailing of sealed articles at the third-class rates of postage is considered consent by the mailer to postal inspection of the contents.

.82 MARKING

Each sealed piece mailed at the single piece third-class postage rate provided for by 134.11 must be legibly marked on the address side, preferably below the postage and above the name of the addressee, with the two words *Third Class*. The marking may be included as a part of a permit imprint, and it may be printed adjacent to the meter stamp by a postage meter. The marking will not be considered adequate if it is included as a part of a decorative design or advertisement. Only the markings required by 134.423 need be carried on sealed pieces mailed at the bulk third-class postage rates provided for by 134.12.

EXCEPTION: Parcels weighing less than 15 pounds, measuring over 84 inches but not exceeding 100 inches in length and girth combined, are chargeable with a minimum rate equal to that for a 15-pound parcel for the zone to which addressed.

136.2 CLASSIFICATION

.21 DESCRIPTION

Priority mail consists of first-class mail weighing more than 12 ounces and other mail which is mailed for expeditious handling and transportation.

* * * * *

Part 137
OFFICIAL MAIL

* * * * *

.271 Treatment.—All official mail must be treated as first-class mail, unless it is endorsed to a lower class. EXCEPTION: Pieces weighing over 12 ounces must be treated as third- or fourth-class mail unless endorsed as priority mail. Official mail endorsed to indicate a special service must be given the service indicated. (See Publication 42 regarding international mail.) EXCEPTION: Reply envelopes and labels and envelopes and labels used by contractors must be preprinted with special service endorsements (see 137.256). Endorsements which are typewritten, handwritten, rubber stamped or applied by adhesive stickers are not acceptable on preprinted reply envelopes and labels.

.272 Forwarding, Return, and Address Correction Services.—Official mail on which forwarding, return, or address correction service has been requested must be given the service requested without being rated for collection of postage due. The Postal Service is reimbursed pursuant to 137.11 and 137.21 for postage due accruing on official mail. See 122.514d for post office reporting procedures for address correction services furnished to Federal agencies.

.273 Mailing Permits.—Applications for mailing permits must be handled in the following manner:

* * * * * * *

e. Permit Imprints

(1) Application. Federal Government agencies may apply to mail identical pieces of mail of any class under the permit imprint system. The application may be filed by letter, memorandum or on Form 3601, Application to Mail Without Affixing Postage Stamps, either at the post office where the mailings will be made or sent directly to the Director, Office of Mail Classification. Applications filed at local post offices must be forwarded by the postmaster to the Director. A special form of permit imprint is prescribed for official mail (see 145.4).

* * * * * * *

137.8 GENERAL INSTRUCTIONS

.81 OFFICAL MAIL NOT TO BE DETAINED

Official mail of any kind must not be detained except in accordance with Part 115, even though there are indications of abuse of official mailing privileges. It must be promptly dispatched and delivered to the addressee. Reports of the indicated abuse must be submitted to the Office of Mail Classification, Rates and Classification Department.

* * * * * * *

Part 141

ENVELOPES, POSTAL CARDS, AEROGRAMMES

* * * * * * *

.12 PLAIN STAMPED ENVELOPES

.121 *Envelopes Available at Post Offices*

Kind	Size	Denomination	Item No.	Prices		
				Less than 500	500	1,000
Regular	6¾	15¢	641	$0.18ea	$79.50	$159.00
	10	15¢	141	0.18ea	80.50	161.00
Window	6¾	15¢	642	No sales	80.00	160.00
	10	15¢	142	except	81.00	162.00
Precanceled	6¾	2.7¢	673	full box	18.00	36.00
	10	2.7¢	173	lots	19.00	38.00

Limit requisitions to a 3-accounting period supply. A minimum quantity of 500 plain stamped envelopes must be ordered even though this may cause some post offices to exceed the 3-accounting period stock level.

.123 *Discount on Sales of Plain Regular Stamped Envelopes*

* * * * * * *

b. *Recording Sales and Discount.* The selling employee reports the sale of full box lots of 500 envelopes at discount as postage sales *at the discounted amount* on the day of sale. The difference between the discounted amount and the full retail value is claimed by the employee on Form 3220, Stamp Envelope Sales at Discount. The following entries will be made in ink on Form 3220: the date, purchaser's name (firm name if applicable) and quantity, by size, in the appropriate column. Do not refuse sales to a purchaser declining to provide a name, but annotate the form that the purchaser refused to identify himself.

c. *Reporting Discount.* Employees claiming credit for envelopes sold at discount may submit Form 3220 as often as necessary but no less frequently than once each accounting period. The amount of the discount will be applied to the employee's stamp accountability upon submission of Form 3220. The unit manager, or designated employee, must verify the computations on Form 3220, determine the claim is reasonable, and initial the form. After verification, the form will be forwarded with the daily financial report to the employee maintaining the Accountbook.

.124 *Precanceled Envelopes*

Only nonprofit organizations or associations covered in 134.5 may purchase 2.7 cent precanceled envelopes. Sales are made in full box lots only.

* * * * * * *

.13 POSTAL CARDS AVAILABLE

Denomination (cents)	Description
	CUT SINGLE CARDS:
10	Domestic regular single (available also in sheets of 40).
10	Domestic commemorative single.
14	Foreign regular single.
21	Foreign airmail single.
	DOUBLE REPLY-PAID CARDS:
20	Domestic regular reply (10 cents each half).

All domestic postal cards are precanceled. Postal cards in sheets for use in printing must be cut to regulation size, 3½x5½ inches so that the stamp appears in the upper right corner. Cases of sheet postal cards may be broken for sale. Return addresses are not printed on postal cards by the Postal Service.

* * * * * * *

141.2 PRINTED STAMPED ENVELOPES (Special-Request)

.21 PRINTED STAMPED ENVELOPES AVAILABLE

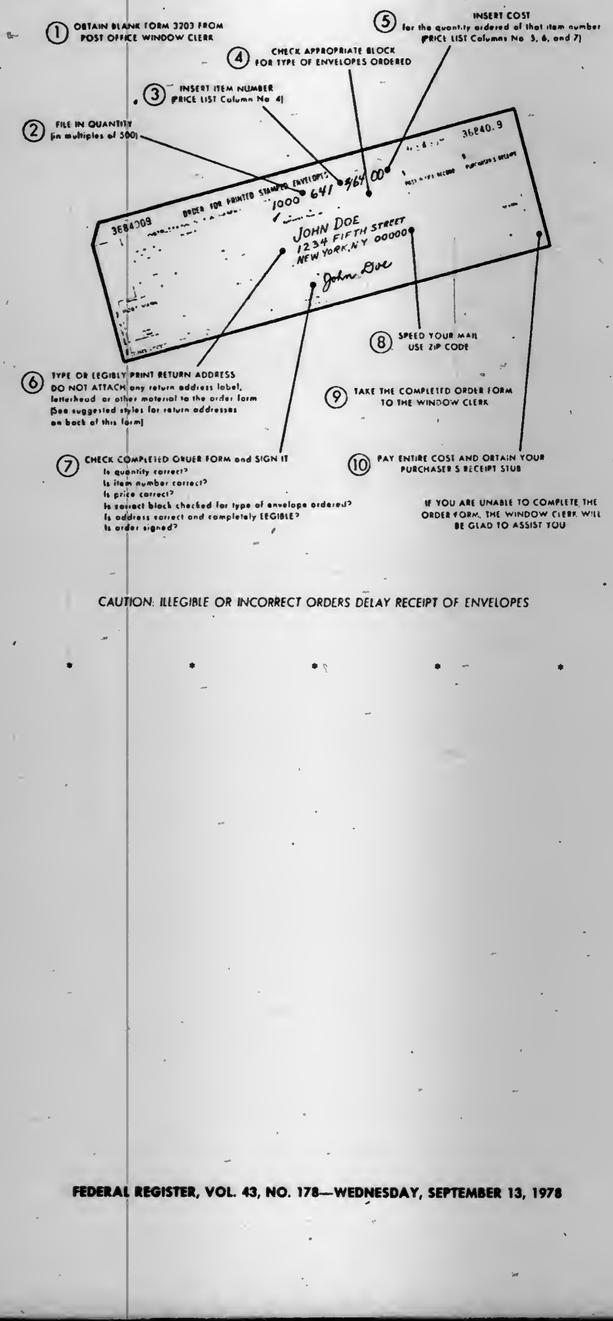
Kind	Size	Denomination	Item Number	Prices	
				500	1000
Regular	6¾	15¢	641	$82.00	$164.00
	10	15¢	141	83.00	166.00
Window	6¾	15¢	642	82.50	165.00
	10	15¢	142	83.50	167.00
Precanceled	6¾	2.7¢	673	20.50	41.00
	10	2.7¢	173	21.50	43.00

*Minimum order—Please note that the price for 500 only is more than ½ of the per-thousand price.

V 4 3 / 1 7 8

.23 STYLE OF PRINTING RETURN ADDRESSES

.231 All lines of the return address will be printed in capitals and lowercase letters with flush left margin, using 8-point Helvetica type. See sample in 141.232.



CAUTION: ILLEGIBLE OR INCORRECT ORDERS DELAY RECEIPT OF ENVELOPES

PART 142
STAMPS (ADHESIVE)

142.1 AVAILABILITY AND USE

Postage-due (for post office use only).	Single or sheet.	1, 2, 3, 4, 5, 6, 7, 8, 10, 11, 13, 30, and 50 cents; $1 and $5.

*Will be discontinued when stock is exhausted.

Part 144
POSTAGE METERS AND METER STAMPS

.13 METER MANUFACTURERS

Postage meters may be leased from authorized manufacturers who are held responsible by the Postal Service for the control, operation, maintenance, and replacement, when necessary, of meters manufactured by them. The following manufacturers are presently authorized to lease meters to mailers:

a. POSTALIA, INC., 1423 Centre Circle Drive, Downers Grove, Il 60515
b. F.M.E. Corporation, 31285 San Clemente Street, Hayward, CA 94544
c. National Cash Register Co., Dayton, OH 45409
d. Pitney Bowes, Inc., Pacific & Walnut Streets, Stamford, CT 06904

SE 13 78

• • • • •

144.3 SETTING METERS

.31 REQUIREMENT

.311 A customer may not have any postage meter in his possession until it has been set, sealed, and checked into service by the Postal Service. The manufacturer will bring the meter to the post office where it is to be regularly set for setting and sealing prior to delivery to the customer, unless it is serviced in accordance with 144.38.

.312 Post offices shall not set any meter which is not licensed at that post office, except as specified in 144.344. In the event that a customer moves from one post office to another, the meter(s) shall be checked out of service in accordance with 144.351 and it, or another meter(s), shall be licensed at the new post office before the meter(s) is reset or initial settings are made in a new meter(s). This does not apply to branches or stations within a post office (see 144.345).

• • • • •

.33 PAYMENT

.331 Payment must be made for postage at the time the meter is set. Payment may be made by cash, check, money order, or by a withdrawal from a trust fund previously established with the post office for that purpose. See 330, Fiscal Handbook F–1, regarding the acceptance of checks. Trust accounts may be established when the monthly mailing of a license is $500 or more. No activity in the account over a 60-day period shall be grounds for closing of the account by the post office and returning the trust funds to the mailer.

.332 Receipts for payment *to* a trust account shall be made on Form 3544, *Post Office Receipt for Money.* The original will be given to the customer, the duplicate sent to the office maintaining the cashbook, and the triplicate retained by the employee setting the meter. Trust account transactions shall be recorded on Form 25, *Trust Fund Account,* kept on the individual account by the employee setting the meter. Daily totals of the money received for such trust funds shall be listed on the *Daily Cash Report,* Form 1412.

.333 Receipts for individual meter settings shall be made on Form 3603, *Receipt for Postage Meter Settings,* in accordance with 144.342.

.334 Refer to 144.384b and .385d for payment procedures under the onsite meter setting program.

• • • • •

.38 ON-SITE METER SETTING PROGRAM

.381 *General*

• • • • •

c. The schedule of fees for on-site meter setting follow:

Private businesses	Meter company offices
$7.00 first meter on scheduled basis.	$5.00 each meter on a scheduled basis.
$12.00 first meter on emergency basis.	Do.
$3.50 each additional meter.	Do.

• • • • •

PART 145—PERMIT IMPRINTS

145.1 PERMIT

.11 APPLICATION

A permit to use permit imprints and pay postage in cash at the time of mailing may be obtained by submitting Form 3601, *Application to Mail Without Affixing Postage Stamps,* with a fee of $30, to the post office where mailings will be made. The postmaster will give the applicant a receipt for the fee on Form 3544. No other fee for use of permit imprints has to be paid so long as the permit is active. However, the applicant must also pay an annual bulk mailing fee if he mails third-class matter at bulk rates. See 134.421.

• • • • •

PART 146—PREPAYMENT AND POSTAGE DUE

146.1 Postage Payment

• • • • •

.12 UNPAID MATTER FOUND IN THE MAIL

.121 Matter of any class, including that for which special services are indicated, received at either the office of mailing or office of address without any postage (see 146.41), will be endorsed *Returned for Postage* and returned to the sender without an attempt at delivery. If no return address is shown, or if the delivery and return address are identical, the piece will be disposed of in accordance with 159.4. (Note that letters, but not post cards, are to be sent to dead mail offices as prescribed in 159.412m.)

.122 Metered reply mail, which is prepared in accordance with 144.112, except for the mailer's inadvertent failure to imprint a meter stamp on the envelope, will be treated as business reply mail (see 131.23), and will be delivered upon payment of postage and the corresponding business reply surcharge specified in 131.233.

.123 *Unpaid* parcels intended for handling by a private delivery company but found in the mail will be returned to sender "postage due" rather than to the addressee or private delivery company. Postage due will be assessed by computing postage due from the point at which the unpaid parcel entered the mail to its destination. However, when the point where the unpaid parcel entered the mail is unknown, compute postage due from the point where the parcel was first found in the mail to destination. See 159.4 if sender cannot be identified or parcel is refused by sender.

.13 INSUFFICIENT PREPAYMENT

.131 Mail of any class, including that for which special services is indicated (except registered mail—see 161.31), received at either the office of mailing or office of address without sufficient postage will be:

a. Marked to show the total deficiency of postage and fees.

b. Dispatched promptly to the addressee by means of the regular or special service indicated.

c. Delivered to addressee on payment of the charges marked on the mail. When quantity mailings of ten or more pieces are received at the office of mailing without sufficient postage, the mailer will be notified, without charge, preferably by telephone, in order that the postage charges may be adjusted before the mail is dispatched.

.132 When the addressee refuses to pay the deficient postage, and when the mail is undeliverable for any other reason, it will be handled as follows:

a. First-class mail bearing a return address will be returned to the sender and delivered on payment by him of the deficient postage.

b. Mail other than first-class bearing a return address will be returned to the sender and delivered on payment by him of the total of the deficient postage, the forwarding postage, if any, and the return postage.

c. All mail that does not bear a return address will be disposed of in accordance with 159.4 (Note that letters, but not post cards, are to be sent to dead mail offices as prescribed in 159.412m.)

.14 POSTAGE ON MAIL INSUFFICIENTLY PREPAID

Postage stamps stuck to mail are canceled when the mail is first received in the post office. Postage stamps or meter stamps originally affixed to insufficiently prepaid mail will, when it is again presented for mailing, be accepted in payment of postage to the amount of their face value.

.15 CONTESTED CLASSIFICATION

.151 If a mailer disagrees with a classification decision made by a local post office, the decision may be appealed by the mailer, in writing, to the postmaster within 30 days. The postmaster will forward the appeal to his mail classification center where a decision will be made on the appeal. An unfavorable decision by the mail classification center may be appealed, in writing, within 10 days following receipt of the decision. The appeal must be filed with the postmaster. The postmaster will forward the appeal to the General Manager, Domestic Mail Classification Division, U.S. Postal Service, Washington, DC 20260, who will issue the final agency decision.

.152 Any mail classification decision made initially by the General Manager, Domestic Mail Classification Division, or General Manager, Special Services Division, or General Manager, International Mail Division, for which there is no specified appeal procedures may be appealed within 15 days to the Director, Office of Mail Classification, who will issue the final agency decision. If, however, the Director participated in any such decision, the appeal will be decided by the Assistant Postmaster General, Rates and Classification Department.

.153 Pending resolution of an appeal, the mailer may, by letter to the local postmaster, request to mail under a deposit arrangement. The mailer must deposit with the postmaster an amount adequate to cover postage at the higher rate. The difference between the amount deposited and a lower rate subsequently determined to be appropriate will be returned to the mailer if his appeal is sustained. If the appeal is denied, the deposit will not be returned; the applicable postage will be deducted from the deposit and entered in A/C 114 as postage revenue through the use of a postage-due invoice in lieu of postage due stamps. The customer will be requested to sign the invoice and will be given a duplicate. If a balance remains in the deposit after the postage has been deducted, it should be refunded if the customer so wishes.

• • • • •

PART 147—EXCHANGES AND REFUNDS

• • • • •

.230 UNALLOWABLE REFUNDS

No refund will be made:

• • • • •

c. For unused adhesive stamps (see 147.11 and 147.12).

• • • • •

PART 154—CONDITIONS OF DELIVERY

• • • • •

.62 MAIL ADDRESSED TO PERSONS AT HOTELS, SCHOOLS, AND SIMILAR PLACES is delivered to the hotel or school. If the addressee is no longer at that address, the mail shall be redirected to his current address. If the forwarding address is unknown, the mail shall be returned to the post office. For mail addressed to prisoners, see 115.97.

• • • • •

PART 156—RURAL SERVICE

• • • • •

.532 *Newspaper Receptacles*

A receptacle for the delivery of newspapers may be attached to the post of a letter box which is used by the Postal Service: *Provided,* That no part of the receptacle touches or is attached to or is supported by any part of the box, interferes with the delivery of mail, obstructs the view of the flag, or presents a hazard to the carrier or his vehicle. The receptacle must not extend beyond the front of the box when the box door is closed. No advertising shall be displayed on the outside of the receptacle except that the name of a publication may be shown.

• • • • •

PART 157—HIGHWAY CONTRACT ROUTE SERVICE

157.1 DESCRIPTION

Highway contract route service provides for the transportation of mail between post offices or other designated points where mail is received or dispatched. Box delivery, collection service, and other mail service are also performed on a majority of routes. Every highway contract route carrier shall receive any mail matter presented to him, if properly prepaid by stamps, and deliver it for mailing at the next post office at which he arrives.

157.2 ESTABLISHMENT

.21 NEW SERVICE

Contracts for regular service are awarded after public advertisements. Temporary service may be established on short notice without advertising. Address requests or petitions for new routes to the general manager, logistics division, having supervision over the transportation of mail in the area involved.

.22 CHANGES

Changes in line of travel, extensions of service and schedules may be ordered by the general manager, logistics division, at any time. Address requests for changes and extensions to him.

157.3 BOX-DELIVERY AND COLLECTION SERVICE

.31 SERVICE REQUIRED

Highway contract route advertisements and contracts state whether box delivery, collection service, or other mail services are required and specify the area to be served. In addition to usual box delivery and collection service, on some routes the carriers are required to:

a. Sell stamp supplies.

b. Deliver registered, insured, certified, and COD matter.

c. Accept matter presented by customers to be registered, insured, certified, or mailed COD, and money with applications for money orders and give receipts.

.32 AVAILABILITY

Contract route box delivery and collection service is provided without charge to customers who:

a. Are not eligible for city carrier service.

b. Reside on or near a route on which box delivery and collection service is required.

c. Erect a mailbox on the highway contract route carrier's existing line of travel. Where a box is newly installed or a present box is being replaced, an approved rural-type box must be used. Preferably, rural boxes and posts or supports should be painted white, but they may be painted other colors if desired. Where box numbers are used, the box number must be inscribed in contrasting color in neat letters and numerals not less than 1 inch high on the side of the box that is visible to the carrier as he regularly approaches, or on the door if boxes are grouped. Where street names and house numbers have been assigned by local authorities, and the postmaster has authorized use of a street name and house number as a postal address, the house number will be shown on the

box. If the box is located on a different street from the customer's residence, the street name and house number will be inscribed on the box. The placing of the owner's name on the box is optional. Advertising on boxes or supports is prohibited.

d. Request, from the post office to which mail is addressed, delivery and collection service on Form 5431, *Contract Route Box Customer Notice.* Highway contract route *customers* residing between two post offices may receive mail service from that post office which is the one next preceding the customer's residence, or from either post office if there is a return trip. In addition, the customer may receive delivery from the post office from which the highway contract route originates.

.33 DELIVERY OF MAIL

Mail matter addressed to a qualified customer of a highway contract route will be taken by the carrier from the post office and deposited into the proper mailbox. If required by the contract, the carrier will deliver registered, certified, insured, and COD mail: Delivery of this mail will be made only when customer meets the carrier at the box or along the route. Parcel post packages too large to go into boxes may be delivered outside boxes, provided the addressee has filed with the postmaster a written request for delivery in that manner. Otherwise, notice will be left in customer's box to meet carrier on next trip. If delivery cannot be made by carrier, the mail will be held at the post office.

.34 COLLECTION OF MAIL

Mail matter properly stamped and placed in a mailbox for dispatch must be collected by the carrier and deposited in the next post office at which the carrier arrives, unless otherwise directed by the Postal Service. Mail collected on the route, addressed for delivery on that part of the route still to be covered before reaching the next post office, will be delivered on the day of collection. The carrier will cancel the stamps before delivery by writing across them the name of the post office last served, the State, the date, and the number of the route. Bulky mailable matter, properly prepared and stamped, will be collected by the carrier if placed on or near the box. Money left in mailboxes for the purchase of stamps is at the risk of the customer.

* * * * *

PART 158—FORWARDING MAIL

* * * * *

.32 CHANGE TO ANOTHER POST OFFICE

Mail forwarded to another post office is subject to additional postage as follows, to be computed the same as if the piece were originally mailed at the office from which it is forwarded:

a. *First-Class Mail weighing* not more than 12 ounces, including postal and post cards, is forwarded without charge when postage has been fully prepaid by the sender. No additional charge is made for forwarding first-class mail weighing not more than 12 ounces that is not fully prepaid, but any amount shortpaid at the time of original mailing will be collected on delivery.

* * * * *

f. Priority mail (heavy pieces) which includes all mail weighing over 12 ounces with postage prepaid thereon at the rates provided by 136.1, is forwarded by air and additional postage at the applicable rate in 136.1 between the forwarding and the delivery office will be collected on delivery.

* * * * *

158.6 REFORWARDING

The address (but not the name) may be changed and the mail reforwarded as many times as necessary to reach the addressee. Each time second-class mail, third-class mail of obvious value, or fourth-class mail, and priority mail weighing over 12 ounces, is reforwarded, it is charged additional postage at the appropriate rate.

FORWARDING						APPLICABLE RATES:	RETURN

KEY

A—Forward free.
B—Return free endorsed with reason for nondelivery.
C—Send address correction to mailer, collect address correction fee.
D—Forward at rate "a."
E—Sender must pay Fwdng & Return Postage if addressee refuses mail.
F—For 3-month Period: Transfer locally free and forward out of town postage due if addressee guarantees forwarding postage. Furnish #3578 to addressee. After 3 months, or if not forwardable originally, apply G, H, below as appropriate.
G—Send address correction together with old address, collect address correction fee.
H—Return complete copy with address correction attached. Collect "b" or "c" rate plus address correction fee.
I—Transfer locally free, forward out of town at applicable rate.
J—Transfer locally free if endorsed *Return Postage Guaranteed* or if addressee has guaranteed forwarding postage. Forward out of town only if addressee has guaranteed forwarding postage.
K—Return at applicable rate plus fee for address correction attached.
L—No return—treat as waste.
M—Return at applicable rate, marked NOT DELIVERABLE AS ADDRESSED—UNABLE TO FORWARD only.
N—Return endorsed with reason for nondelivery, collect address correction fee.
O—If of obvious value, return at applicable rate—otherwise treat as waste.
P—If of obvious value, return at applicable rate plus fee for address correction—otherwise send address correction and collect fee.

* * * * *

PART 159—UNDELIVERABLE MAIL

159.2 TREATMENT BY CLASSES

.21 FIRST-CLASS MAIL

.211 *Letters and Packages*

First-class mail weighing not more than 12 ounces, except postal and post cards, is returned to the sender, if known, without additional charge. See section 159.26 for mail weighing over 12 ounces. Any postage due because of failure to fully prepay postage at the time of mailing will be collected from the sender when the undeliverable mail is returned. When first-class mail bearing the words *Address Correction Requested* is forwarded to a new address, the sender is notified on Form 3547, *Notice to Mailer of Correction in Address,* of the new address. The charge for this notice is 25¢.

* * * * *

.26 PRIORITY

Priority mail (heavy pieces) will be returned by the same transportation as first-class mail at no additional charge. Priority mail (heavy pieces) includes all mail weighing over 12 ounces which has postage prepaid thereon at the rates provided by section 136.1.

* * * * *

.44 ARTICLES FOUND LOOSE IN THE MAIL

.441 Process articles found loose in the mail in accordance with this section (159.44) at the facility designated in 159.721g(1). Before transferring loose articles to another location:

a. Make every reasonable effort to match such articles with the envelope or wrapper from which lost.

b. Loose articles which are transferred to another facility must be treated in accordance with 159.443 to remove items of no value before the transfer.

* * * * *

.72 TREATMENT AT LAST OFFICE OF ADDRESS

.721 *Disposition*

At the end of retention periods specified in 159.3, mail is declared dead. Dead mail described in 159.412 a, b, c, d, e, and f is disposed of locally. First-class letters, first-class parcels, and other articles that have obvious value are forwarded on fixed schedules to dead letter or dead parcel post branches for final disposition. Dispose of as follows:

* * * * *

g. *Articles Found Loose in the Mail.* Articles found loose in the mail, which cannot be delivered or returned after the initial handling prescribed in 159.44, are treated as dead mail and processed as follows:

(1) *Location.* (a) Process loose articles found in any post office at office where found.

(b) Process loose articles found in any BMC (bulk mail center) either at the BMC where found or at the dead parcel branch post office which serves that BMC service area (see 159.724c). The Regional Postmaster General of the region in which the BMC is located will decide whether the BMC or the dead parcel branch post office will process such articles. Loose articles which are transfered from the BMC where found to a dead parcel branch post office for processing, must be treated at the processing office as loose mail in accordance with 159.724c(3).

(2) *Holding Period.* Hold loose articles at the location where processed for 30 days after the initial handling prescribed by 159.44 and then send to the appropriate dead parcel branch designated in 159.724c at weekly intervals.

(3) *Sorting.* If the volume at any location during the 30-day holding period requires a plan of sorting to facilitate search and disposal on schedule, proceed as follows:

(a) Separate the articles into general groups, such as books, clothing, hardware, etc. Store by weeks to facilitate location and disposal.

(b) Only if the volume makes it necessary, assign a serial number to each category referred to in (a) assign a serial number to each parcel within each category; make a card or book list of the parcels, by category and parcel numbers, with a brief description of the articles.

(4) *Wrapping.* Do not wrap or box loose articles during the holding period except when necessary to keep together several articles known to be from the same parcel.

* * * * *

.724 *Dead Letter and Dead Parcel Post Branches*

* * * * *

c. Dead Parcel Branches

* * * * *

(3) *Separate Activities.* Each post office with a dead parcel branch must provide a separate activity for processing undeliverable and loose matter found within its operation or loose matter designated by the regional postmaster general under 159.721g(1)(b) to be sent from a BMC for processing at the dead parcel branch post office. A physical separation must be provided between the work areas devoted to loose and undeliverable processing and to dead mail activities. Mail subject to a holding period may cross the separation into the dead parcel area only after the applicable holding period has expired. Dead matter which has been held for the appropriate holding period at other facilities must be taken directly into the dead parcel unit and immediately prepared for auction or other appropriate disposal. Activities for each

V 43 / 178 SE 13 78

V 43 / 178

of these operations must be reported separately. Form 3731, *Quarterly Report of Dead Parcel Post Branch,* must not include any volume or work hour statistics for mail matter which has not been held for the prescribed holding period.

. . . . . .

.73 TREATMENT AT DEAD MAIL OFFICE

. . . . . .

b. A fee of 40 cents is charged for delivery to sender or addressee of each letter and first-class parcel opened in the dead mail office.

. . . . . .

.813 *Other Parcels*

. . . . . .

b. Except for books and sound recordings (see 159.814), prepare other parcels, including ordinary, insured, and COD, for disposal as soon as received if sender or addressee cannot be identified. Do not list contents.

.814 *Books and Sound Recordings*

Prepare books and sound recordings for disposal in accordance with 159.85, except for those that may be withheld from sale for release to a publisher or distributor under the following conditions:

a. A publisher or distributor may request, in the manner set forth below, that books and sound recordings bearing a particular trade name, company name, or other organizational identification, be released to the requester, or to the requester's authorized representative.

(1) The requester must apply in writing to the postmaster at each dead parcel branch where release of material is desired.

(2) The request must be in quadruplicate.

(3) Requesters must include a statement that they are a publisher or distributor of books or sound recordings bearing a particular trade name, company name, or other organizational identification.

(4) More than one trade name, company name, or other organizational identification may be listed in the same request.

(5) The request must specify whether the books and sound recordings are to be picked up at the dead parcel branch or whether delivery to another location is desired. If delivery to another location is desired, the address must be specified and must be one used by the requester as a return address. A requester may select only one such address for each dead parcel branch. The specified address may be changed at any time by submitting a written request to the postmaster at the dead parcel branch office.

(6) After approval, the postmaster will retain the original request and send one copy each to the requester, the Inspector in Charge of the Division in which the installation is located, and the General Manager, Special Services Division, Office of Mail Classification, U.S. Postal Service, Washington, DC 20260.

(7) An approved request will remain in effect until canceled in writing by either the requester or the Postal Service (see 159.814j).

b. A book or sound recording will be sold at auction and will not be released to the requester if, although it bears an applicable trade name, company name, or other organizational identification, it does not appear to be new, or was involved in the settlement of a postal indemnity claim, or if it is known that the requester was not the mailer or addressee.

c. A request for release of books or sound recordings will be granted except where a written protest, or a conflicting request from another party, is presented to the postmaster at the dead parcel branch post office. Merchandise involved in such a dispute will be sold at auction in the normal course of business, unless written notice from both parties advising of settlement of the dispute is received prior to the prescribed sale deadline (see 159.814g). The postmaster at the dead parcel branch post office will notify both parties in writing when such disputes arise or are settled and of the consequences to the merchandise in such disputes.

d. Upon approval of a request under 159.814a, dead parcel branches will establish special separations or bins, for segregation of books and sound recordings which bear the specified trade name, company name, or other organizational identification. Such identification must consist of a readily identifiable name and be easily read. Dead parcel branches will attempt to adhere to these special separation requests to the maximum extent practicable.

e. Except where delivery to another locations is desired (see 159.814a[5] and .814h), dead parcel branches will release books and sound recordings to requesters or their authorized representatives at the dead parcel branch at a time and in a manner mutually agreeable between the requester and the postmaster, consistent with the instructions in this section (159.814). Such merchandise must be picked up at least once before each auction, but may be picked up more often by mutual agreement between the postmaster and the requester.

f. When books and sound recordings are to be released at the dead parcel branch, the following procedures apply:

(1) Ten days before each dead parcel auction, or more often, if warranted by volume, the dead parcel branch will send a written notice to each requester who has specified release of such merchandise at the dead parcel branch, advising of the quantity of books and sound recordings on hand. Merchandise which is to be released at the dead parcel branch will not be listed in the sale catalog.

(2) Requesters or their representatives may pick up books and sound recordings at the dead parcel branch upon presentation of a letter from the requester authorizing the Postal Service to release such merchandise to the bearer. This letter of authorization must be executed in triplicate. Upon release of the merchandise, all copies of the letter of authorization will be receipted in bulk by the person accepting delivery. One copy will be given out with the merchandise, one copy will be mailed directly to the requester, and the original will be retained by the dead parcel branch.

g. Books and sound recordings must be picked up at the dead parcel branch before the close of the business day immediately preceding the public display of auction sale merchandise. Failure to do so will result in cancellation of a request (see 159.814j).

h. As to books and sound recordings, which are to be released at another location under 159.814a(5), dead parcel branches will make up individual packages for shipment to the other location desired by the requester, unless hampers or other types of containers would be more advantageous.

(1) *Individual Packages.* Individual packages will be as large as possible subject to the weight and size limitations for fourth-class mail in 135.3. Each package will be prepared to comply with the requirements of 135.24, sent under a penalty label, and delivered at the destination as ordinary mail.

(2) *Containers.* Books and sound recordings from dead mail branches may be delivered in hampers, or other containers, where this means is more advantageous than making up individual packages, and adequate security against pilferage can be maintained. Postmasters at dead parcel branches and postmasters at delivery offices may coordinate suitable arrangements for containment, labeling, movement, and security of such merchandise through their respective transportation management officers.

i. Failure to accept delivery of any shipment under 159.814h will result in cancellation of a request (see 159.814j).

j. When a request is canceled (see 159.814a[7], .814g, and .814i), the requester must be notified by the postmaster in writing. A canceled request may not be renewed for six months after the date of cancellation. At that time, an application must be resubmitted in writing, as if it were a new request. Copies of any cancellation notice must be sent to the General Manager, Special Services Division, Office of Mail Classification, U.S. Postal Service, Washington, DC 20260. Merchandise on hand at the time of a cancellation will be included in the next auction.

.22 POSTAL INSURANCE LIABILITY

.221 *Without Other Insurance*

Postal insurance covers value up to the maximum of $25,000, except as provided in 161.222 and 161.223.

. . . . . .

.223 *With Commercial Insurance and Deductible, Excess or other Insurance Clauses*

When a commercial policy contains a deductible clause, the deductible is considered to be without commercial insurance. To obtain full postal liability coverage for the amount of the deductible, the full registry fee (161.21, Col. 1) must be paid for the amount of the deductible. When the commercial policy contains an excess or other insurance clause, there is considered to be no commercial insurance. To obtain full postal liability, the full registry fee (161.21, Col. 1) must be paid. In either case, postal liability cannot exceed $25,000.

. . . . . .

.535 *Hand-to-Hand Receipts*

. . . . . .

c. When hand-to-hand receipt is exchanged in transferring custody of rotary-lock pouches, numbered seal pouches, and outside registered pieces, enter the particulars of the pouches and outside pieces on a dispatch bill, at least in duplicate, and deliver one or more copies of the bill with the registered mail. Unless otherwise authorized, check the particulars of the rotary lock pouches, numbered seal pouches, and outside pieces against entries on the bill at the time of transfer. Obtain a descriptive receipt from the person to whom delivery is made. The postal employee convoying registered mail shipments may assist the receiving postal employee in checking registered articles against the bills, if requested to do so by the receiving employee. Under exceptional conditions when available time does not permit descriptive checking of rotary lock pouches, numbered seal pouches, and outside pieces, the general manager, logistics division, may authorize their bulk transfer with the understanding that full particulars will be checked against entries on the bill as soon as possible after actual transfer.

SE 13 78

.536 *Bus Service*

Dispatch only registered mail of nominal value in iron lock pouches via bus service. Do not send valuable registered mail such as negotiable securities or currency shipments via bus service. Do not dispatch outside registered articles via bus service unless authorized by the general manager, logistics division.

.537 *Air Taxi Service*

Dispatch only registered mail of nominal value in iron-lock or snap-seal pouches transported via air taxi service. Do not dispatch valuable registered mail such as negotiable securities or currency shipments and outside registered articles via air taxi service, unless specifically authorized by the general manager, logistics division.

.538 *Request for Special Routing*

Post offices originating a shipment requiring hand-to-hand receipt for which a routing has not been established on Form 5167 should request routing instructions from the general manager, logistics division. Use Form 5168, *Coded Value Registered Mail Dispatch Instructions,* to record the pertinent information.

.54 RECORDS OF IRON LOCK DISPATCHES

.541 Check Form 3830-A, *Registry Dispatch Record,* daily to determine that dispatches have been accounted for satisfactorily. Note date of return of dispatch receipt cards promptly on the dispatch records and file card. When Form 3830-A is used and the dispatch receipt card is filed with the dispatch record, date of the return of the dispatch card need not be noted on the dispatch record. Paste returned coupons of dispatch bills promptly over the coupon of the office dispatch record on file. Report consistent delays in return of dispatch receipts from any installation to the general manager, logistics division, identifying dispatches involved.

.55 CONVOY SERVICE

.551 All registered mail dispatches (except those requiring hand-to-hand receipt) for transportation via highway contract route or mail messenger, whether enclosed in rotary-lock, numbered seal, or iron-lock pouches, must be accompanied by an employee from the registry section or pouching area to the loading platform. The employee should remain there until loading is completed and the doors of the vehicles locked. When advisable, the employee may be authorized to deliver the pouches to a responsible employee on the platform after identifying dispatches which are to be given.

.63 TRANSFER OF RETURN OR MISSENT MATTER

Transfer at meeting points return or missent matter by pouching in iron-lock pouches, as authorized by the general manager, logistics division. If mail is accessible at the meeting point to employee with LA key, enclose mail in jackets or rotary-lock pouches.

PART 162—INSURED MAIL

162.2 FEES AND LIABILITY

.21 FEES (IN ADDITION TO POSTAGE)

Liability	Fee
$0.01 to $15	$0.50
$15.01 to $50	.85
$50.01 to $100	$1.10
$100.01 to $150	1.40
$150.01 to $200	1.75
$200.01 to $300	2.25
$300.01 to $400	2.75

Liability for insured mail is limited to $400.

PART 163—COD MAIL

.174 *Registered COD Mail*

Sealed domestic mail of any class bearing postage at the first-class rate may be sent as registered COD mail. Such mail is handled the same as other registered mail. The maximum amount of charges collectible on a parcel is $400, but additional indemnity may be obtained over $400 up to the regular registry limit of $25,000 by payment of a higher fee. Registered COD mail is subject to a handling charge applicable to other registered mail, except that the basis of the handling charge is the amount by which the declared actual value of the article exceeds the limit of liability covered by the fee paid. Envelopes used as covers must not be smaller than 4 × 7¾ inches.

163.2 FEES

.21 IN ADDITION TO POSTAGE

Amount to be collected or insurance coverage desired	COD fees
$0.01 to $10	$1.10
$10.01 to $25	1.35
$25.01 to $50	1.65
$50.01 to $100	1.95
$100.01 to $200	2.30
$200.01 to $300	2.75
$300.01 to $400	3.25
Restricted delivery	$0.80
Notice of nondelivery	1.00
Alteration of COD charges or designation of new addressee	1.00
Registered COD	1.40

PART 165—CERTIFICATES OF MAILING, RETURN RECEIPTS, AND RESTRICTED DELIVERY

.12 FEES

.121 *Individual Pieces*

Original certificate of mailing for individually listed pieces of all classes of ordinary mail.	15¢ for each piece of mail described.
Each additional copy of original certificate of mailing or original mailing receipt for registered, insured, certified, and COD mail.	Do.

.122 *Bulk Pieces*

Identical pieces of first- and third-class mail paid with ordinary stamps, precanceled stamps, or matter stamps are subject to the following fees:

	Cents
Up to 1,000 pieces (One certificate for total number)	75
For each additional 1,000 pieces, or fraction	15
Duplicate copy	15

.22 FEES (IN ADDITION TO POSTAGE AND OTHER FEES)

Requested at time of mailing:

Showing to whom (signature) and date delivered	$0.45
Showing to whom (signature), date and address where delivered	.55

Requested at time of mailing:

	Cents
Showing to whom and date delivered	2.10

.242 *Request for Duplicate or Return Receipt After Mailing, Form 3811-A*

c. Form 3811-A shall be postmarked and the $2.10 postage for receipt after mailing shall be canceled. A line is to be drawn through the address of the delivery post office on the front of Forms 3811-A (1973 and later printings) and the form mailed back to the mailer.

.32 FEE (IN ADDITION TO POSTAGE AND OTHER FEES)

Restricted delivery, $0.80.

PART 166—SPECIAL DELIVERY

166.2 PAYMENT FOR SPECIAL DELIVERY

.21 SPECIAL DELIVERY FEES

Part 166

SPECIAL DELIVERY

166.2 PAYMENT FOR SPECIAL DELIVERY

.21 SPECIAL DELIVERY FEES

Class of mail	Weight: Not more than 2 pounds	Weight: More than 2 pounds but not more than 10 pounds	Weight: More than 10 pounds
First-class and priority mail	$2.00	$2.25	$2.85
All other classes	2.25	2.85	3.25

Part 167

SPECIAL HANDLING

167.2 FEES

Weight	Fee
Not more than 10 pounds	$0.70
More than 10 pounds	1.25

The special handling fee is in addition to regular third- or fourth-class postage and may be prepaid by ordinary postage stamps or by meter stamps. The special handling fee on officail mail is collected from Federal Government agencies and departments under the reimbursement procedures in 137.21.

V 43 / 178 SE 13 78

The special handling fee is in addition to regular third- or fourth-class postage and may be prepaid by ordinary postage stamps or by meter stamps. The special handling fee on official mail is collected from Federal Government agencies and departments under the reimbursement procedures in 137.21.

* * * * *

Showing to whom and date delivered	2.10

168.5 DELIVERY

.51 PROCEDURE

Mail for delivery by carriers is taken out on the first trip after it is received, unless the addressee has requested the postmaster to hold his mail at the post office. Certified mail not restricted in delivery will be delivered to the addressee or his authorized representative. Restricted delivery may be obtained as set forth in 165.3 and by payment of additional fees as provided in 165.32. For circumstances under which restricted delivery may be accomplished by delivery other than to the addressee, see 165.34. Delivery rules are the same as for registered mail. See 161.4.

* * * * *

.55 NOTICE OF ARRIVAL

The carrier will leave a notice of arrival on Form 3849-A if he cannot deliver the certified article for any reason. The article will be brought back to the post office and held for the addressee. If the article is not called for within 5 days, a second notice on Form 3849-B will be issued. If the article is not called for or its redelivery requested, it will be returned at the expiration of the period stated by the sender, or after 15 days if no period is stated.

* * * * *

PART 169—POST OFFICE LOCKBOX AND CALLER SERVICE

* * * * *

.27 RENTAL RATES FOR LOCKBOXES

Cubic inch capacity of lockboxes	Rate or fee per semiannual period				
	To 265	266 to	500 to	1,000 to	2,000 and over
Box size	1	2	3	4	5
Group 1:					
Subgroup A	$14.00	$20.00	$28.00	$40.00	$55.00
Subgroup B	14.00	20.00	28.00	40.00	55.00
Subgroup C	10.00	14.00	20.00	30.00	40.00
Subgroup D	8.00	11.00	15.00	24.00	30.00
Subgroup E	8.00	11.00	15.00	24.00	30.00

Subgroup F	2.50	4.00	5.00	7.50	10.00
Subgroup G	2.50	4.00	5.00	7.50	10.00
Subgroup H	2.00	3.00	4.00	6.00	8.00
Group 3:	1.50	1.50	1.50	1.50	1.50

.322 *Basic Caller Service Fee*

a. *General Rule.* The basic fee for caller service for semi-annual periods beginning on or after May 29, 1978, to be applied to each caller number or separation used shall be $60.00. Account for these revenues the same as box rent. (See 169.122e).

* * * * *

.52 PAYMENT OF BOX RENT AND CALLER FEES

.521 *Purpose*

This section establishes semi-annual payment periods for Lockbox and Caller Service fees.

.522 *Rent Paid in Advance*

a. Box rent and caller fees must be paid in advance for no less than one and no more than two semiannual periods except as provided by 169.262 and 169.522c. Fees and rent may be paid by check to postmasters. However, checks sent by mail must be received by the postmaster by the due date.

* * * * *

c. Postmasters who adopt Option 2 (see 169.524b) will adjust new or existing payment periods to begin on April 1 or October 1 at the time of a new rental or at the expiration of all payment periods for which a customer has paid. Adjustments will be made by charging one-sixth of a semiannual rental fee for each month remaining between the beginning of a new payment period (as determined under

169.527), or the expiration of existing payment periods, and the next subsequent April 1 or October 1. Round off the total amount due to the next higher 10 cents. After payment periods have been adjusted in accordance with this section, only fees for full semi-annual payment periods will be accepted, as indicated in 169.522a. Payments for up to two semiannual periods plus the adjustment period may be accepted.

* * * * *

.524 *Payment Periods*

a. Option 1: Payment may be made for any six or twelve consecutive months. The beginning of a payment period is established on the date of the approval of the application to rent a box.

b. Option 2: Postmasters at group 2 and 3 offices with less than 500 lockboxes or caller service numbers may establish April 1 and October 1 as the beginning of payment periods for boxholders or caller service customers in their office. When this Option is used, payment periods beginning other than April 1 or October 1 must be brought into alignment with these dates by adjusting fees in accordance with 169.522c.

.525 *How a Customer May Change His Payment Period Date*

Except for customers at facilities which have adopted Option 2 (see 169.524b), boxholders of record may change their payment period by submitting a new application to rent a box, and noting on the application the month they wish to use as the start of their payment period. This date must be before the end of their current payment period, and rents and fees already paid will not be refunded or applied to the new payment period, except that a remaining period of six months or more will be applied to six months of the new payment period.

* * * * *

PART 171—MONEY ORDERS

171.1 ISSUANCE OF DOMESTIC MONEY ORDERS

.11 WHERE SOLD

Domestic money orders may be purchased at all post offices, branches, and stations in the United States and its possessions. Money order facilities are also provided for members of the Armed Forces of the United States.

.12 AMOUNTS, FEES, PAYMENTS

.121 *Money Order Amounts*

The maximum amount for a single money order is $400. There is no limitation on the number of orders that may be purchased at one time, except when the Postal Service may impose temporary restrictions.

.122 *Money Order Fees*

a. The fee for a postal money order issued to authorized civilian and military personnel and/or their dependents by an Armed Forces Postal Clerk on board any ship or at any Military Post Office (APO or FPO) located outside the 50 States, Puerto Rico, and Guam is $.20, regardless of the amount of the money order. Postal money orders issued to others shall be charged at the fees indicated below.

b. Fees for domestic money orders issued at other post offices including those with branches or stations on military installations are as follows:

Amount of money order	Amount of fee
	Domestic
$0.01 to $10	$0.55
$10.01 to $50	0.80
$50.01 to $400	1.10

* * * * *

.133 *Imprinting the Order*

Before imprinting each money order, clerks will verify that the proper date is set, the validation plate is in place and the print handle is positioned to the extreme left. Set the five amount keys to the requested amount (never more than $400) and verify the setting as registered in the small windows above the keys. Next, select and insert the limitation plate for the same or next higher amount, and insert the blank money order form set so that it lies flat on the machine within the form guides. Finally, imprint the order by moving the print handle in one continuous motion to the extreme right position and returning it in a continuous motion to the starting position.

* * * * *

.14 COMPLETION OF MONEY ORDER BY PURCHASER

* * * * *

a. Name and address of payee and name and address of purchaser. The customer should do this promptly to protect his rights in the event the order is lost. Also, he should complete and safeguard the customer receipt since it must be presented if inquiries are made later. Money orders may be made payable to:

* * * * *

.162 *Spoiled (or incorrectly prepared)*

* * * * *

b. Treat a *spoiled* order as follows:

* * * * *

(3) If the bank refused to accept the returned money order for deposit, send it to the Money Order Division with a completed Form 6401, *Inquiry As To Payment of Money Order.* In the section *Issue Duplicate To,* on Form 6401, show postmaster and the appropriate address. Write or stamp *spoiled* in the *Pay To* or *Purchased By* portion of the money order. Record the amount of the *spoiled* order in AIC 814, Suspense. The Money Order Division will issue a replacement money order payable to the postmaster. Upon receipt of the replacement order, deposit it with other postal funds and clear the entry to AIC 814, Suspense.

* * * * *

171.2 INTERNATIONAL MONEY ORDERS

.21 ISSUANCE

.211 *Where Sold, Amounts and Fees*

An authorization to issue an international money order may be purchased at almost all post offices with 950 or more revenue units. Some post offices with fewer than 950 revenue units have been designated to provide this service. Post offices not designated but having sufficient need for the service will make application to the regional director, finance department. International money orders will be issued to addressees in those countries that have agreed with the United States to conduct such business. The maximum amount for an international order is $300. Except that orders should not

V 43 / 178 SE 13 78

exceed £50 (approx. $90) when payable in Great Britain, $250 when payable in Syria, and $100 when payable in Morocco. The fees are as follows:

Amount of International Order:	Fee
$0.01 to $10	$0.90
$10.01 to $50	1.10
$50.01 to $300	1.40

* * * * *

PART 172—NONPOSTAL STAMPS AND BONDS

172.1 MIGRATORY-BIRD HUNTING STAMPS

.11 WHERE SOLD

Migratory-bird hunting stamps are sold at all post offices in CAG's A—G, and at certain designated offices in CAG's K and L where there is a demand for them. A current migratory-bird poster shall be displayed in the lobby.

.12 PRICE

Migratory-bird hunting stamps cost $5 each.

.13 INSTRUCTIONS ON ADMINISTRATION OF THE LAW

Postal employees must not instruct purchasers of migratory-bird hunting stamps on matters relating to administration of the law. Refer them to: Fish and Wildlife Service, Washington, DC 20240, or the local game warden.

* * * * *

PART 173—POSTAL SAVINGS

* * * * *

173.3 WITHDRAWALS

All withadrawals will be paid by the Treasury Department. Advise customers to mail the endorsed certificates to the Treasury Department, Bureau of Government Financial Operations, Division of Financial Management, Claims Review and Settlement Branch, Washington, DC 20226.

* * * * *

SUBCHAPTER 180—EXPRESS MAIL

PART 181—RATES

181.1 GENERAL RATE INFORMATION

.11 Except as provided in 181.31 and 181.41, postage on Express Mail is charged on each piece. For shipments tendered in Express Mail pouches under a Custom Designed Service service agreement, each pouch is a piece.

.12 Express mail postage rates are based on zones measured by great circle air miles between the airport serving the origin postal facility and the airport serving the destination postal facility, as follows:

Zone	Miles	
	Greater than	Up to and including
3	0	300
4	300	600
5	600	1,000
6	1,000	1,400
7	1,400	1,800
8	1,800	2,400
9	2,400	.....

181.2 SAME DAY AIRPORT SERVICE RATES

NOTE.—Formerly called Airport to Airport Service.

See rate chart in exhibit 181.2

181.3 CUSTOM DESIGNED SERVICE RATES

NOTE.—Formerly called Programmed Service.

.31 See rate chart in exhibit 181.31.

.32 These rates are subject to the following:

a. If tendered at origin airport mail facility, deduct $3.00.

b. If tendered for claim by addressee at destination airport mail facility, deduct $3.00.

c. If tendered at origin airport mail facility for claim by addressee at destination airport mail facility, deduct $6.00.

d. Add $5.25 for each delivery stop for item(s) tendered for delivery to addressee.

e. For each collection stop, add $5.25 per occurrence.

181.4 NEXT DAY SERVICE RATES

NOTE.—Formerly called Regular Service

.41 See rate chart for Next Day Service—Post Office to Addressee in exhibit 181.41.

.42 See rate chart for Next Day Service—Post Office to Post Office in exhibit 181.42.

.43 For each collection stop, add $5.25 per occurrence.

Exhibit 181.42. Next Day Service—Post Office to Post Office (p. 2)

PART 182—CLASSIFICATION

182.1 DESCRIPTION

.11 AVAILABILITY OF SERVICE

.111 Express Mail is a service available to mailers for shipments of any mailable matter which is tendered to the Postal Service, properly prepared, and in accordance with the terms of this directive.

.112 *Service is available:*

a. Between designated postal facilities throughout the United States.

b. To an addressee within the delivery area of a designated destination facility.

c. By prior arrangement, pursuant to a service agreement between the Postal Service and the mailer, from and to designated locations throughout the United States.

.12 SERVICE OFFERINGS

Express Mail provides a high speed, high reliability service. Three basic service offerings are available:

a. Same Day Airport Service (see 182.2).

b. Custom Designed Service (see 182.3).

c. Next Day Service (see 182.4).

182.2 SAME DAY AIRPORT SERVICE

NOTE.—Formerly called Airport to Airport Service.

.21 Same Day Airport Service is available between designated airport mail facilities. Mail tendered for Same Day Airport Service will be dispatched on the next available transportation to the destination airport mail facility. Such mail must be tendered during hours specified by the Postal Service. Upon arrival at the destination airport mail facility, the mail will be made available for claim by the addressee by the time which was determined for each such shipment when accepted at the origin facility. The designated airport mail facilities between which Same Day Airport Service is offered are published in Notice 44, *Airport to Airport Service.* Service at facilities not listed is prohibited.

.22 The Postal Service will refund the postage under provisions in 189.5 for any item that is not available for claim by the time specified, unless the delay is caused by:

a. Strikes or work stoppage.

b. Delay or cancellation of flights.

c. Governmental action beyond the control of the Postal Service or air carriers.

182.3 CUSTOM DESIGNED SERVICE

NOTE.—Formerly called Programmed Service.

.31 AVAILABILITY OF SERVICE

.311 Custom Designed Service is available only on a scheduled basis between designated postal facilities or other designated locations for mailable matter tendered in accordance with the service agreement, Form 5631, *Express Mail Service Agreement,* between the Postal Service and the mailer. Service under a service agreement shall not be offered in a manner that makes any undue or unreasonable discrimination among users or grants any undue or unreasonable preferences to any such user.

.312 Custom Designed Service is provided between any combination of the following: designated airport facilities; designated post offices; and all other addresses within designated three-digit ZIP Code delivery areas. Names and locations of these designated facilities and the designated three-digit ZIP Code areas are in Pub. 97, *Express Mail Custom Designed Service—Service Directory.* Service at facilities, or to or from three-digit ZIP Code areas, not listed is prohibited.

.32 SERVICE AGREEMENT

.321 *Provisions in All Custom Designed Service Agreements*

Each Custom Designed service agreement includes the following:

a. The scheduled place and day or date of origin for each shipment tendered for service to each specific destination.

b. Scheduled place and day or date for claim, or delivery, at destination for each scheduled shipment.

c. Scheduled times of day for tender at origin and for claim or delivery at destination.

.322 *Commencement of Service*

Service provided pursuant to a service agreement will begin not more than 10 days after the signed service agreement is tendered to the Postal Service.

.323 *Termination of Service*

a. Express Mail service provided pursuant to a service agreement may be terminated by the Postal Service after given 10 days written notice to the mailer if:

(1) Service cannot be provided for reasons beyond the control of the Postal Service or because of changes in Postal Service facilities or operations, or,

(2) The mailer fails to adhere to the terms of the service agreement or of this directive.

b. The mailer may terminate a service agreement, for any reason, by notice to the Postal Service.

.33 SERVICE GUARANTEE

Except where a service agreement provides for claim, or delivery, more than 24 hours after scheduled tender at point of origin, the Postal Service will refund postage under provisions in 189.5 for an item not available for claim or not delivered, within 24 hours of mailing unless the item was delayed by strike or work stoppage.

182.4 NEXT DAY SERVICE

NOTE.—Formerly called Regular Service.

.41 AVAILABILITY OF SERVICE

Next Day Service is available at designated retail postal facilities for overnight service to designated destination facilities or locations for items tendered by 5 p.m. For each designated facility at which Next Day Service Express Mail may be tendered, a list of cities to which the delivery is offered, and a list of facilities at which Next Day Service Express Mail may be claimed, will be published later this year. Service to facilities or offices not listed is prohibited.

.42 TYPES OF SERVICE AVAILABLE

.421 *Post Office to Post Office Service*

Items tendered in accordance with 182.41 will be available for claim by the addressee at the destination facility by 10 a.m. of the next day the destination office is open for retail business.

.422 *Post Office to Addressee Service*

Items tendered in accordance with 182.41 will be delivered to an addressee within the city delivery area of the destination facility by 3 p.m. of the next day.

.43 SERVICE AGREEMENT

Pickup service is available for Next Day Service only on a scheduled basis pursuant to a service agreement (Form 5631) between the Postal Service and the mailer. The service agreement shall specify the time, place, day or date, and frequency of such service. Service under a service agreement shall not be offered in a manner that makes any undue or unreasonable preference to any such user. Commencement and termination of service agreements are subject to the provisions of 182.322 and 182.323.

.44 SERVICE GUARANTEE

The Postal Service will refund postage under provisions in 189.5 for an item not available for claim, or not delivered, in accordance with 182.42 unless the item was delayed by strike or work stoppage.

PART 183—SERVICE GUARANTEE

Service Guarantees for the various service offerings of Express Mail are as prescribed in 182.22, 182.33, and 182.44.

PART 184—AUTHORIZATIONS AND PERMITS

184.1 SERVICE AGREEMENTS

A service agreement is required before mailings may be made under

V 4 3 / 1 7 8

the Custom Designed Service or Next Day Service pickup provisions, as described in 182.32 and 182.43. Prior authorization or pre-arrangement is not required for the other types of Express Mail service.

184.2 SPECIAL PERMIT AND POSTAGE TRUST ACCOUNTS

A written application is required before mailings are made under special permit or postage trust accounts as described in 188.

PART 185— PHYSICAL LIMITATIONS

185.1 WEIGHT

A piece of Express Mail may weigh not more than 70 pounds.

185.2 SIZE

.21 A piece of Express Mail may not measure more than 100 inches in length and girth combined. See 135.32 for instructions on how to measure.

.22 Express Mail pieces which are not required to be tendered in a pouch must be large enough to hold the required labels and indicia on a single optical plane.

PART 186—PREPARATION REQUIREMENTS

186.1 SAME DAY AIRPORT SERVICE

.11 Customers must complete Label 11C, *Express Mail to Airport to Airport Service,* for each piece of Same Day Airport Service Express Mail.

.12 An item which does not fit in an Express Mail pouch, or which must be mailed as an outside piece under provisions of part 124 may be accepted and dispatched as an outside piece if documentation is securely attached and the piece clearly identified as Express Mail. Use Label 63, *Express Mail—Outside Shipment,* for identification.

186.2 CUSTOM DESIGNED SERVICE

Except as provided in 186.12, all Custom Designed Service Express Mail must be tendered in sealed Express Mail pouches with the required receipt forms and labels combined and attached. See 186.12 for outside pieces.

186.3 NEXT DAY SERVICE

.31 Customers must complete Label 11A, *Express Mail—Post Office to Post Office,* or 11B, *Express Mail—Post Office to Addressee,* for each piece of Next Day Service Express Mail. See 186.12 for outside pieces.

.32 For Next Day Service pickup (182.43) the customer must complete Form 5625-B, *Mailing Statement for Next Day and Same Day Airport Express Mail Service,* for each pickup. Volume mailers must tender the mail in containers provided or approved by the Postal Service.

PART 187—MAILING

Express Mail service is available only between designated postal facilities. See 182.21, 182.312, and 182.41 for reference to the designated postal facilities for each service offering.

PART 188—POSTAGE PAYMENT

188.1 Mailers of Express Mail matter may pay postage by adhesive stamps, meter stamps, special permit, or through the use of an Express Mail trust account. (See chapter 7, Methods handbook M-68, *Express Mail Service,* for procedures.)

188.2 Postage and Fees Paid indicia may be used by Federal agencies entitled to use the indicia.

188.3 Penalty indicia may be used for official mail of the U.S. Postal Service.

188.4 The appropriate charge will be made for all pickups scheduled in a service agreement (see 182.32 and 182.43) unless the scheduled service is not required, and the customer notifies the Postal Service prior to dispatch of the pickup employee.

PART 189—GENERAL PROVISIONS

189.1 FORWARDING

Express Mail pieces may only be forwarded locally. They may not be forwarded to another post office. No additional postage is collected for local forwarding. Follow 159.5 for Directory Service.

189.2 RETURN

Express Mail pieces which are undeliverable or unclaimed after 5 working days are returned to the sender at no additional postage. Pieces being returned to the sender will be handled and transported as Express Mail. The mailer can direct return after less than 5 working days by placing instructions to that effect under the return address.

189.3 EVIDENCE OF MAILING

A receipt showing the time and date of mailing will be provided to the mailer upon acceptance of Express Mail by the Postal Service. This receipt serves as evidence of mailing. Form 5625, *Express Mail Service Receipt,* or 5625-A, *Express Mail Service Receipt/Mailing List,* is used for Custom Designed Service; Form 5625-B for pickup of Next Day Service Express Mail; Label 11A or 11B for Next Day Service; and Label 11C for Same Day Airport Service.

189.4 INSURANCE AND INDEMNITY

.41 COVERAGE

Express Mail is insured against loss, damage, or rifling at no additional cost. Indemnity will be paid by the Postal Service under provisions in 189.5, as outlined below.

.42 DOCUMENT RECONSTRUCTION INSURANCE

.421 Non-negotiable documents are insured against loss, damage, or delay while in transit. Coverage is limited to $50,000 per piece (the unit upon which postage is paid), subject to a limit of $500,000 per occurrence (a single accident or major catastrophe). Claims for document reconstruction insurance must be supported by a statement of expenses incurred in reconstruction.

a. *Non-negotiable documents* include commercial papers, documents, and such written instruments as are used in the conduct and operation of banks and banking institutions, that have not been made negotiable or which cannot be negotiated or converted into cash by unauthorized persons without resort to forgery. Other non-negotiable documents include valuable records, audit media, and other business records. They may be in conventional hard copy form, data processing cards, tapes, film, microfilm, or other forms of data storage.

b. *While in transit* is the time beginning when the Postal Service receives custody of the insured material and ending when the material is delivered to the addressee, or if undeliverable, when the material is received by the sender upon return.

c. *Delay.* For purposes of document reconstruction coverage, an item is considered delayed when the scheduled delivery time for Custom Designed Service, or the guaranteed delivery time for Next Day or Same Day Airport Service is not met.

.422 *Indemnity will be paid as follows:*

a. Reasonable costs incurred in the construction of lost or damaged non-negotiable documents. The mailer must establish reasonable costs.

b. Loss of, or damage to, non-negotiable documents that cannot be reconstructed. The mailer must establish the value of the documents. Maximum indemnity is $5,000.

c. Loss sustained through the use of funds to maintain cash balances during a period of document reconstruction (based on the applicable Federal Reserve discount rate) for a period not to exceed 15 days, beginning at the scheduled delivery time.

d. In the event of a delay, indemnity will be paid under provisions in 189.5 for reconstruction expense incurred or obligated between the time of guaranteed/scheduled delivery and actual delivery, provided the documents are useable upon delivery.

e. In the event of a catastrophic loss, the liability limit is $500,000 per occurrence, regardless of the number of Express Mail pieces or the number of customers involved, and will be paid as follows: Each claim under provisions in 189.5 resulting from the catastrophic loss first will be adjudicated individually. If the sum of the preliminary adjudication exceeds $500,000, the percentage of the sum represented by each individual settlement will be applied to the $500,000 to determine each claimant's pro rata share of the final settlement.

.43 MERCHANDISE INSURANCE

.431 Parcels are insured against loss or damage; coverage is limited to $500.

.432 Claims for loss must be supported by evidence of value. See 164.142.

.433 Subject to 189.434, indemnity will be paid under provisions in 189.5 on the basis of the value at the time of mailing.

.434 Claims for articles that are commercially insured shall be adjudicated in the same manner as registered and insured mail. See 164.9.

.44 EXCLUSIONS

Indemnity will not be paid for:

a. Negotiable items.

b. Currency or bullion.

c. Consequential loss.

d. Nonmailable items (as defined in part 123) or items packaged in such a manner that they could not have reached their destination undamaged in the normal course of the mail.

e. Articles of sentimental value.

f. Acts of employees or agents of the sender or addressee.

g. War, insurrection, or civil disturbance, or seizure by any agency of government.

189.5 CLAIMS PROCEDURES

Claims for refunds of postage and/or insurance claims shall be made by application at the originating office within 60 days of the date of mailing. Such claim may be filed only by the mailer. The dated receipt must be presented with the claim. Use Form 5690, *Express Mail Service Insurance Claim,* for insurance claims and Form 3533, *Application and Voucher for Refund of Postage and Fees,* for postage refunds.

Title 40—Protection of Environment

CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

SUBCHAPTER D—WATER PROGRAMS

[FRL 955-7]

PART 125—NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM

Interim Final Rule

AGENCY: Environmental Protection Agency.

ACTION: Interim final rule.

SUMMARY: Under the Clean Water Act persons may receive a modification from the best available technology economically achievable (BAT) requirements for certain pollutants. This interim final rule notifies affected persons of the statutory deadlines for submission of applications for modifications of BAT requirements based on the economic conditions of the particular facility or based on the lack of environmental necessity of the specified limitation. The rule also identifies information which is required in that application.

DATES: These regulations will become effective September 13, 1978. Comments received on or before November 13, 1978, will be considered before promulgation of these regulations in final form. Because certain dischargers will become ineligible for section 301 (c) or (g) modifications if they do not apply by September 25, 1978, EPA finds good cause exists to make these regulations effective without the 30 day waiting period prescribed under 5 U.S.C. § 553(d)(3).

ADDRESSES: Interested persons may participate in this rulemaking by submitting comments or suggestions to Mr. Scott Slesinger, Permits Division (EN-336), Office of Water Enforcement, Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460. Each person submitting a comment should include his or her name and address and give reasons for any recommendations. A copy of all public comments will be available for inspection and copying at EPA Public Information Reference Unit, Room 2922 (EPA Library), 401 M Street SW., Washington, D.C. 20460. The EPA information regulation (40 CFR Part 2) provides that a reasonable fee may be charged for copying.

FOR FURTHER INFORMATION CONTACT:

Scott Slesinger (EN-336), Office of Water Enforcement, Environmental Protection Agency, Washington, D.C. 20460, 202-755-0750.

SUPPLEMENTARY INFORMATION:

(1) BACKGROUND

The Clean Water Act (33 U.S.C. § 1251 et seq. Pub. L. 92-500, 95-217), ("Act") requires that dischargers (other than publicly owned treatment works) achieve compliance with Best Available Technology Economically Achievable (BAT) for certain pollutants. Generally, the Act provides for modification of the BAT requirements, only for those pollutants deemed to be "non-conventional" pollutants. Non-conventional pollutants are those that are defined as neither toxic nor conventional. Toxic pollutants are those pollutants listed by the Agency on January 31, 1978 (43 FR 4108). Conventional pollutants listed in the Act are pH, fecal coliform, biological oxygen demanding and total suspended solids. The Agency proposed on July 28, 1978, (43 FR 32857) that chemical oxygen demand (COD), phosphorous and oil and grease be included as conventional pollutants. However, those pollutants will be considered non-conventionals until those regulations are effective. Only effluent limitations for non-conventional pollutants may be modified under section 301(c) and 301(g).

(2) WHY ARE THESE REGULATIONS IN INTERIM FINAL FORM

The regulations are being published in interim final form and take effect immediately upon publication. The usual Agency rulemaking practice is to propose regulations. In this situation EPA believes it is in the public interest to issue these regulations in interim final form and have them take effect immediately.

Section 301(j)(1)(B) requires that applications for modifications be filed within 270 days after the promulgation of an applicable effluent guideline or 270 days after the enactment of the Act, whichever is later. In the case of industries listed in Appendix A, BAT guidelines for non-conventional pollutants were promulgated before enactment of the Clean Water Act, December 27, 1977. Thus the filing deadline for those industries is September 25, 1978. Therefore, it is in the public interest for these regulations to become effective as soon as possible so that interested persons will have adequate notice on what will be required by the deadline. Section 301(j) requires that applications must be submitted by the 270 day deadline or applicants are precluded from getting a modification.

Publishing these regulations in proposed form and allowing a comment period followed by final promulgation would delay the effective date of these regulations beyond the statutory deadline. Accordingly, EPA finds, pursuant to 5 U.S.C. section 533(b), that notice and comment on proposed regulations would be impracticable and contrary to the public interest and that there exists cause for promulgation of these regulations in interim final form. However, even though these regulations take effect immediately, all comments received on or before [60 days after publication], will be considered before issuance of final regulations.

(3) SUBSTANTIVE REQUIREMENTS FOR A MODIFICATION FROM BAT REQUIREMENTS

The economic modification section [301(c)] gives the Administrator au-

SEP 13 1978

V 43 / 178 SE 13 78

thority to modify BAT requirements for non-conventional pollutants for dischargers who file a permit application after July 1, 1977, upon a showing that such modified requirements will (1) represent the maximum use of technology within the economic capability of the owner or operator and (2) result in reasonable further progress toward the elimination of the discharge of pollutants.

The environmental modification section [301(g)] allows the Administrator, with the concurrence of the State, to modify BAT requirements for non-conventional pollutants other than heat upon a satisfactory showing that:

(A) The resulting modified limits are at least equal to best practicable technology or more stringent limitations required pursuant to section 301(b)(1)(C) of the Act,

(B) Such modification will not result in additional requirements on other point and nonpoint sources, and

(C) Such modification will not interfere with the attainment or maintenance of that water quality which shall assure protection of public water supplies, and the protection and propagation of a balanced population of shellfish, fish, and wildlife, and allow recreational activities, in and on the water and such modification will not result in the discharge of pollutants in quantities which may reasonably be anticipated to pose an unacceptable risk to human health or the environment because of bioaccumulation, persistency in the environment, acute toxicity, chronic toxicity (including carcinogenicity, mutagenicity or teratogenicity), or synergistic propensities.

The Agency is in the process of developing regulations establishing criteria for 301(c) and 301(g) determinations. However, the discharger must comply with the regulations promulgated today to be eligible for a modification.

(4) EPA Policy on Modifications

The Agency's current intention concerning 301(c) and 301(g) modifications is that modification determinations will be considered at the time the National Pollutant Discharge Elimination System (NPDES) permit is being reissued.

Many permits are expiring in 1979, 1980 or 1981. It would make little sense to require substantial information in a request for a modification under these sections now when historical economic data or biological information could be outdated at the time the permit limitation would be imposed. Therefore, in the interest of decreasing the paperwork burden on industry and the government, substantive requirements for a modification will have to be met after the draft permit establishes a BAT requirement for the particular "non-conventional" pollutant.

Many dischargers will receive BAT permit limitations for non-conventionals not based on a promulgated effluent guideline. Those limitations may also be eligible for modifications under section 301(c) or 301(g). However, such dischargers are not reguired to comply with section 301(j). Such dischargers must comply only with the substantive requirements for a modification during the permit reissuance process.

(5) What Are the Requirements for 301(j)(1)(B)

Initial applications must be filed with the Regional Administrator and, in those States that participate in the NPDES program, a copy must be sent to the Director of the State program. Initial applications to comply with 301(j) must include the name of the permittee, the permit and outfall number, the applicable effluent guideline and whether he or she is applying for a 301(c) or 301(g) modification or both. Applicants interested in applying for both must do so in their initial application.

All dischargers who file an initial application will be sent a copy of the substantive requirements for 301(c) and 301(g) once they are promulgated.

Note.—The Environmental Protection Agency has determined that this document does not constitute major regulation requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and under OMB Circular A-107.

Dated: September 8, 1978.

Douglas M. Costle,
Administrator.

1. Part 125 is amended by adding a new Subpart M and Appendix A as follows:

Subpart M—Criteria for modification of Best Available Technology requirements pursuant to 301(c) and 301(g)

125.61 Definitions.
125.62 Filing initial applications for 301(c) or 301(g) modification.

Appendix A—Industrial categories subject to § 125.62(a)(1).

Authority: Section 301(c) (g), and (j) and 501(a) of the Clean Water Act, 33 U.S.C. 1251 et seq.

Subpart M—Criteria for modification of Best Available Technology requirements pursuant to 301(c) or 301(g)

§ 125.61 Definitions.

(a) The term "conventional pollutants" means those pollutants classified as biological oxygen demanding, suspended solids, fecal coliform, pH and those added to this list in accordance with section 304(a)(4) of the Act;

[*Comment:* Chemical oxygen demand (COD), phosphorus, and oil and grease were proposed on July 28, 1978 (43 FR 32857), to be considered as "conventional" in accordance with section 304(a)(4). For the purpose of this regulation, they will continue to be considered non-conventional until those regulations are effective].

(b) The term "toxic pollutants" means those pollutants published on January 31, 1978 (43 FR 4108), and any modification to that list in accordance with section 307(a)(1) of the Act; and

(c) The term "non-conventional pollutants" means pollutants not included in either (a) or (b) of this section.

§ 125.62 Filing initial applications for 301(c) and 301(g) modifications.

(a) Any person requesting a modification from Best Available Technology Economically Achievable for non-conventional pollutants under section 301(c) or 301(g) must file an initial application by:

(1) September 25, 1978, if the applicable effluent guideline was promulgated before December 27, 1977. [Comment: Appendix A lists those industries and limitations to which this subsection is applicable.]

(2) Not later than 270 days after the promulgation of the applicable effluent limitation guideline if such date of promulgation is after December 27, 1977.

(b) An initial application shall include the name of the applicant, the permit number, the outfall number(s), the applicable effluent guideline, and whether the applicant is applying for a section 301(c) or section 301(g) modification or both.

(c) Persons applying for both section 301(c) and section 301(g) modifications must do so during the same 270 day period.

(d) The initial application shall be submitted to the Regional Administrator and, in States that participate in the NPDES, a copy to the Director.

(e) An application submitted by a corporation must be signed by a principal executive officer of at least the level of vice president, or his duly authorized representative, if such representative is responsible for the overall operation of the facility from which the discharge described in the application form originates. In the case of a partnership or a sole proprietorship the application must be signed by a general partner or the proprietor respectively.

[*Comment:* This section deals only with initial applications for section 301(c) and 301(g) modifications. No substantive criteria have yet been promulgated for determining whether to grant or deny such an application. Once such substantive criteria have been promulgated; initial applications will have to be supplemented to provide sufficient information to determine whether the criteria are met and this section will be amended accordingly.]

Appendix A.—*Industrial categories and pollutants subject to § 125.62(a)(1)*

Industries listed below must apply for variances by September 25, 1978. Variances are only available for nonconventional pollutants from best available technology economically achievable. Variances cannot be less stringent than best practicable control technology. Those pollutants whose BPT requirements are equal to BAT have been eliminated from this list.

Subpart of Title 40 of CFR and industry	Pollutant
410 Textile:	
All subcategories except dry processing	Color, chemical oxygen demand.
414 Organic Chemicals:	
Subcategory B—Quench or vent gas absorbent	Chemical oxygen demand.
415 Inorganic Chemicals:	
Subcategory T—Sodium sulfite	Do.
417 Soaps and Detergents:	
All subcategories	Oil and grease, chemical oxygen demand.
All subcategories that have a best available technology limitation for surfactants (subcategories I, J, K, L, M, N, O, P, Q, R, S).	Surfactants.
418 Fertilizer:	
Subcategory A—Phosphate	Phosphorus, fluoride.
Subcategory B—Ammonia	Ammonia.
Subcategory C—Urea*	Ammonia, organic nitrogen.
Subcategory D—Ammonia Nitrate*	Ammonia, nitrate.
Subcategory E—Nitric Acid	Do.
420 Iron and Steel:	
Subcategory D—Blast furnace (iron)	Sulfide, ammonia, fluoride.
Subcategory E—Blast furnace ferromanganese	Do.
Subcategory H—Open hearth furnace	Fluoride, nitrate.
Subcategory J—Electric arc furnace (wet air pollution control).	Do.
Subcategory K—Vacuum degassing	Manganese nitrate.
Subcategory L—Continuous casting and pressure slab	Oil and grease.
421 Nonferrous:	
Subcategory B—Primary aluminum smelting	Fluoride.
Subcategory C—Secondary aluminum smelting	Fluoride, ammonia as N, chemical oxygen demand.
422 Phosphate:	
Subcategory A—Phosphorus production	Elemental phosphorus, total phosphorus, fluoride.
Subcategory B—Phosphorus consuming	Total phosphorus.
Subcategory C—Phosphate	Do.
Subcategory E—Sodium phosphates	Total phosphorus, fluoride.
423 Steam Electric:	
A and B subcategories (generating unit and small unit)	Phosphorus, iron, oil and grease, nontoxic corrosion inhibitors.
424 Ferroalloys:	
Subcategory A—Open electric furnaces	Manganese total.
Subcategory B—Covered electric	Do.
Subcategory C—Slag processing	Do.
Subcategory F—Electrolytic manganese	Ammonia as N, manganese.
Subcategory G—Electrolytic chromium	Do.
426 Glass:	
Subcategory F—Automotive glass tempering	Oil, phosphorus.
Subcategory H—Glass container manufacturing	Oil.
Subcategory K—Television picture tube envelope	Fluoride.
Subcategory L—Incandescent lamp envelope	Oil, fluoride, ammonia.
Subcategory M—Hard pressed and blown glass	Fluoride.
427 Asbestos:	
Subcategory F—Asbestos roofing	Chemical oxygen demand.
Subcategory G—Asbestos floor tile	Do.
428 Rubber Manufacturing:	

APPENDIX A.—*Industrial categories and pollutants subject to § 125.62(a)(1)*—Continued

Industries listed below must apply for variances by September 25, 1978. Variances are only available for nonconventional pollutants from best available technology economically achievable. Variances cannot be less stringent than best practicable control technology. Those pollutants whose BPT requirements are equal to BAT have been eliminated from this list.

Subpart of Title 40 of CFR and industry	Pollutant
Subcategory B—Emulsion crumb rubber	Do.
Subcategory C—Solution cement rubber	Oil and grease, chemical oxygen demand.
Subcategory D—Latex	Do.
429 Timber products processing:	
Subcategory G—Wood preserving steam	Do.
430 Pulp and paper:	
Subcategory A—Unbleached kraft	Color.
Subcategory B—Sodium-based neutral sulfite semichemical.	Do.
Subcategory C—Ammonia base neutral sulfite semichemical.	Do.
Subcategory D—Unbleached kraft—Neutral sulfite semichemical.	Do.
432 Meat Products:	
Subcategory A—Simple slaughterhouse	Oil and grease.
Subcategory B—Complex slaughterhouse	Do.
Subcategory C—Low processing packinghouse	Do.
Subcategory D—High processing packinghouse	Do.
Subcategory G—Sausage and luncheon meats	Ammonia.
Subcategory H—Ham processors	Do.
Subcategory I—Canned meats	Do.
Subcategory J—Renderer	Oil and grease, ammonia.
443 Paving and Roofing:	
All subcategories	Oil and grease.

* Subcategories urea and ammonia nitrate were promulgated on Apr. 26, 1978. Applications for those two categories are required by Jan. 21, 1979.

Title 42—Public Health

CHAPTER I—PUBLIC HEALTH SERVICE, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

PART 58—GRANTS FOR TRAINING OF PUBLIC HEALTH AND ALLIED HEALTH PERSONNEL

Grants for Public Health Traineeships for Students in Schools of Public Health and in Other Graduate Public Health Programs

AGENCY: Public Health Service, HEW.

ACTION: Interim-final regulations.

SUMMARY: These regulations set forth requirements for implementing the Secretary's authority to award grants to schools of public health or nonprofit private educational entities to support traineeships for students in the graduate educational programs of these entities in public health.

DATES: These regulations are effective immediately. As discussed below, comments on the regulations are invited. To be considered, comments must be received on or before November 13, 1978.

ADDRESS: Written comments should be addressed to the Director, Bureau of Health Manpower, Health Resources Administration, 3700 East-West Highway, Center Building, Fourth Floor, Hyattsville, Md. 20782. All comments received will be available for public inspection and copying at the above address weekdays (Federal holidays excepted) between the hours of 8:30 a.m. and 5 p.m.

FOR FURTHER INFORMATION CONTACT:

Dr. Merrill DeLong, Education Development Branch, Division of Associated Health Professions, Bureau of Health Manpower, Room 5-27 at the above address, telephone 301-436-6824.

SUPPLEMENTARY INFORMATION:

The Assistant Secretary for Health, Department of Health, Education, and Welfare with the approval of the Secretary of Health, Education, and Welfare proposes to add a new subpart C entitled "Public Health Traineeships for Students in Schools of Public Health and in Other Graduate Public Health Programs" to part 58 of Title 42, Code of Federal Regulations.

Section 748 of the Public Health Service Act (42 U.S.C. 294r) provides that the Secretary may award grants to public or nonprofit private educational entities to provide traineeships in the graduate educational programs of these entities in public health. The purpose of this new subpart C is to establish regulations implementing this authority.

Particular attention is drawn to the following provisions of the regulations:

SECTION 58.202 DEFINITIONS

The definitions of "graduate training" and "specialized training in public health" require that graduate programs be in an accredited institution and that residencies in preventive medicine and dental public health be approved by the relevant specialty boards. Since the statute requires that schools of public health be accredited, in order to provide an overall standard of quality, we believe the requirement that other eligible entities be accredited or approved is a reasonable exercise of the Secretary's discretion under the broad rulemaking authority of section 748(b)(1) which provides "traineeships * * * shall be awarded in accordance with such regulations as the Secretary may prescribe."

Similarly, by limiting the award of traineeships to students enrolled in a "graduate program" or in "specialized training in public health" (approved residency) these regulations preclude the award of traineeships to students enrolled in undergraduate programs or in postbaccalaureate programs of continuing education not leading to an advanced degree. This limitation is based on the legislative history of Pub. L. 94-484 as amended by Pub. L. 95-215, and the statutory language of section 748, which emphasizes the need for graduate training of public health professionals. Limitation of "specialized training in public health" to residency programs in preventive medicine and dentistry is clearly consistent with the emphasis placed on those areas in the enactment of Pub. L. 95-215, which added this language to section 748.

SECTION 58.203 WHO IS ELIGIBLE TO APPLY FOR A GRANT FOR TRAINEESHIPS FOR GRADUATE OR SPECIALIZED TRAINING IN PUBLIC HEALTH?

A literal interpretation of section 748, as amended, would preclude grants from being awarded for any of the purposes authorized under section 748 to an institution (other than a school of public health) which has an accredited program in health administration, hospital administration, or health policy analysis and planning, and is therefore eligible for a grant under section 749. Legislative history surrounding the passage of Pub. L. 95-215, however, indicates that the clear intent of Congress was to make it possible for "all" public or nonprofit private educational entities, which have graduate programs in public health, to be eligible to receive grants. The regulations, therefore, provide the following eligibility requirements:

1. Accredited schools of public health are eligible to apply for support of traineeships in any of the types of graduate and specialized fields specified in the regulation.

2. Other institutions may apply for support of traineeships in any of these programs, except in graduate programs in health administration, or health policy analysis or planning.

SECTION 58.208 HOW WILL GRANT AWARDS BE MADE?

Section 748 provides that grants shall be awarded in accordance with regulations prescribed by the Secretary, and in amounts determined by the Secretary. Under this broad authority, the Secretary has elected to approve applications and determine grant amounts to schools of public health and to other eligible entities by two different methods. Accredited schools of public health which provide the statutorily required assurances will be approved, and will receive grants on a formula basis. Applications from other eligible institutions will be evaluated and approved on a case-by-case basis based on criteria specified in the regulations. The amount of the grants awarded to these institutions will be based on the Secretary's determination of the sum necessary to cover student expenses specified in the regulations.

The legislative history of section 748 makes it clear that Congress was concerned with maintaining a level and predictable source of funding for schools of public health and providing incentives for the development of personnel trained in the fields listed in that section. Because all schools of public health are within the universe of institutions which Congress intended to support under section 748, and a reasonable quality of training is assured by the statutory accreditation requirement for schools of public health, the Secretary has determined that all accredited schools of public health which provide the necessary assurances will receive assistance. Each school will receive an amount based on the ratio of students enrolled in eligible programs in that school to the number of students enrolled in eligible programs in all these schools.

In adding other public or nonprofit institutions as eligible entities, Congress added a diverse and essentially unlimited group of institutions for which no specialized accreditation is required. Therefore, the Department cannot predict the number or nature of potential applications which might be submitted, nor the quality or relevance of the training programs. Consequently, case-by-case determinations will have to be made not only with respect to the quality and relevance of these programs but also with respect to the amount of each grant award.

It should be noted that the regulations provide that the total amount of funds to be distributed to schools of public health will be determined annually, and announced in the FEDERAL REGISTER. The Secretary has determined that for fiscal year 1978 the amount to be distributed to schools of public health is approximately $6.3 million and the amount to be distributed to other institutions is approximately $700,000. This distribution is based on the approximate level of support provided to schools of public health in fiscal year 1977 and the statement in the report of the Subcommittee on Health of the Senate Committee on Labor and Public Welfare (S. Rep. 95-545, p. 15), that for fiscal year 1978, support for other eligible institutions permits continuation of traineeships previously awarded.

Timely implementation is essential if eligible applicants are to have adequate leadtime to comply with the requirements of the statute and this subpart so that grants can be made as quickly as possible in order for schools to make commitments to students for the fall semester and to make continuation awards to institutions which have grants that end June 30. Therefore, the Secretary has determined in accordance with 5 U.S.C. 553 and Department policy that it would be impractical and contrary to the public interest to follow proposed rulemaking procedures or to delay the effective date of these regulations.

Notwithstanding the omission of the proposed rulemaking procedures, interested persons are invited to submit written comments or data relating to these regulations to the Director of the Bureau of Health Manpower at the address given above. All relevant materials received not later than November 13, 1978, will be considered, and following the close of the comment period, the regulations will be revised as warranted by the public comments received. It is intended that any revision of the regulations arising from these comments will be published within 90 days of the close of the comment period.

The regulations as set forth below will be effective September 13, 1978.

Accordingly, subpart C is added to part 58 of title 42 of the Code of Federal Regulations and is adopted as set forth below.

Dated: June 20, 1978.

JULIUS B. RICHMOND,
Assistant Secretary for Health.

Approved: September 1, 1978.

HALE CHAMPION,
Acting Secretary.

Subpart C—Public Health Traineeships for Students in Schools of Public Health and in Other Graduate Public Health Programs

Sec.
58.201 To what educational institutions are these regulations applicable?
58.202 Definitions.
58.203 Who is eligible to apply for a grant for traineeships for graduate or specialized training in public health?
58.204 How is application made for a grant?
58.205 What are the requirements for traineeships and the appointment of trainees?
58.206 Who is eligible for financial assistance as a trainee?
58.207 Duration and termination of traineeships.
58.208 How will grant awards be made?
58.209 How will grant payments be made?
58.210 For what purposes may grant funds be spent?
58.211 What prohibitions against discrimination are applicable to these traineeship grants?
58.212 How must a grantee account for the grant funds it receives?
58.213 What recordkeeping, audit, and inspection requirements apply to these grants?
58.214 What provisions of 45 CFR 74 apply to these grants?
58.215 What additional conditions may apply to these grants?

AUTHORITY: Sec. 215 of the Public Health Service Act, 58 Stat. 690, as amended by 63 Stat. 35 (42 U.S.C. 216); sec. 748 of the Public Health Service Act, 90 Stat. 2279, as amended by 91 Stat. 1505 (42 U.S.C. 294r).

Subpart C—Public Health Traineeships for Students in Schools of Public Health and in Other Graduate Public Health Programs

§ 58.201 To what educational institutions are these regulations applicable?

The regulations of this subpart are applicable to the award of grants to eligible educational entities under section 748 of the Public Health Service Act (42 U.S.C. 294r) to provide funds for traineeships for students enrolled in graduate programs in schools of public health or in other public or nonprofit private entities which provide graduate or specialized training in public health.

§ 58.202 Definitions.

"Act" means the Public Health Service Act, as amended.

"Budget period" means an interval of time into which the project period is divided for budgetary purposes, as specified in the grant award document.

"Educational entity" means a school, college, or university which is accredited by a body or bodies recognized for this purpose by the Commissioner of Education.

V 4 3 / 1 7 8

"Fiscal year" means the Federal fiscal year, beginning October 1 and ending the following September 30.

"Full-time student" means a student who is either (1) in a residency program in preventive medicine or dentistry or (2) is enrolled on a full-time basis in a graduate program in public health and who is enrolled for a sufficient number of credit hours in a semester or other academic term to enable the student to complete the course of study within not more than the number of semesters of other academic terms normally required to complete that course of study on a full-time basis at the school in which the student is enrolled.

"Graduate program" means a program of education leading to a master's degree or equivalent or doctoral degree or equivalent.

"National of the United States" means (1) a citizen of the United States or (2) a person who, though not a citizen of the United States, owes permanent allegiance to the United States (8 U.S.C. 1101(a)(22)).

"Nonprofit," as applied to any entity, means one which is a corporation or association, or is owned or operated by one or more corporations or associations, no part of the net earnings of which inures, or may lawfully inure, to the benefit of any private shareholder or individual.

"Project period" means the total time for which support for a project has been approved, including any extension.

"Secretary" means the Secretary of the Department of Health, Education, and Welfare or any officer or employee of the Department to whom the authority involved has been delegated.

"School of public health" means a school which provides training leading to a graduate degree in public health or equivalent degree and which has been accredited by the Council on Education for Public Health as a school of public health.

"Specialized training in public health" or "specialized training in preventive medicine or dentistry" means a residency training program approved by the Liaison Committee on Graduate Medical Education or by the Commission on Accreditation of the Dental and Dental Auxiliary Education Programs leading to board eligibility in a specialty in preventive medicine or dental public health respectively.

"State" means any one of the several States, the District of Columbia, the Commonwealth of Puerto Rico, the Northern Mariana Islands, the Virgin Islands, Guam, American Samoa, and the Trust Territory of the Pacific Island.

"Stipend" means a sum of money from a grant made under this subpart given to a student for living expenses during the period of traineeship.

"Trainee" means a student who is receiving traineeship funds from a grant made under this subpart.

§ 58.203 Who is eligible to apply for a grant for traineeships for graduate or specialized training in public health?

A school of public health or a public or nonprofit private educational entity which provides graduate or specialized training in public health and which is located in a State is eligible for a grant under section 748 of the act and this subpart.[1]

§ 58.204 How is application made for a grant?

(a) Each eligible applicant desiring a grant under this subpart must submit an application in the form and at the time the Secretary may require.[2]

(b) The application must be signed by an individual authorized to act for the applicant and to assume on behalf of the applicant the obligations imposed by the terms and conditions of any award made under section 748 of the Act, including the regulations of this subpart.

(c) In addition to other pertinent information the Secretary may require, an application for a grant under this subpart must contain the following information:

(1) A description of the graduate or residency programs offered by the applicant for which funds for traineeships are requested.

(2) A description of the qualifications and experience of the director of each graduate or residency program for which funds for traineeships are requested.

(d) An application for a grant under this subpart from a school of public health must contain an assurance that at least 45 percent of the grant funds received for the fiscal year ending September 30, 1978, at least 55 percent of the grant funds received in the fiscal year ending September 30, 1979, and at least 65 percent of the grant funds received in the fiscal year ending September 30, 1980, and in succeeding fiscal years will go to individuals who:

(1) Have previously received a post-baccalaureate degree, or have 3 years of work experience in health services, and

(2) Are pursuing graduate training in (i) biostatistics or epidemiology, (ii) health administration, hospital administration, health planning, or health policy analysis and planning, (iii) environmental or occupational health, (iv) dietetics or nutrition, or are pursuing specialized training in preventive medecine or dentistry as defined in § 58.202.

(e) An application for a grant under this subpart from a public or nonprofit private educational entity, other than a school of public health, must contain:

(1) An assurance that at least 45 percent of the grant funds received for the fiscal year ending September 30, 1978, at least 55 percent of the grant funds received for the fiscal year ending September 30, 1979, and at least 65 percent of the grant funds received in the fiscal year ending September 30, 1980, and in succeeding fiscal years will go to individuals who:

(i) Have previously received a post-baccalaureate degree, or have 3 years of work experience in health services, and

(ii) Are pursuing graduate training in (A) biostatistics or epidemiology, (B) environmental or occupational health, (C) dietetics or nutrition, or are pursuing specialized training in preventive medicine or dentistry as defined in § 58.202.

(2) The number of students for whom traineeship support is requested.

(3) A detailed budget and justification for the amount of funds requested for the period of support (not to exceed 3 years) based on the tuition and fees of the applicant and proposed stipends and allowances for trainees.

§ 58.205 What are the requirements for traineeships and the appointment of trainees?

(a) The grantee must appoint as trainees only individuals who meet the eligibility requirements of § 58.206 and must terminate traineeships in accordance with § 58.207.

(b) Schools of public health may offer traineeships only to individuals enrolled in graduate training in (1) biostatistics or epidemiology, (2) health administration, health planning, or health policy analysis and planning, (3) environmental or occupational health, (4) dietetics or nutrition, or (5) other graduate training in public health, or specialized training in preventive medicine or dentistry.

[1] Public and nonprofit private educational entities, excluding accredited schools of public health, are eligible for grants under sec. 749 of the Act to support traineeships for students enrolled in their accredited programs in health administration, hospital administration, or health policy analysis and planning. Therefore, in accordance with the exclusion in sec. 748 of the Act of institutions eligible for grants under sec. 749 of the Act, public and nonprofit private educational entities are not eligible for grants under this subpart to support traineeships in health administration, hospital administration, or health policy analysis and planning.

[2] Applications and instructions may be obtained from the Grants Management Officer, Bureau of Health Manpower, Health Resources Administration, Department of Health, Education, and Welfare, Center Building, Room 4-22, 3700 East-West Highway, Hyattsville, Md. 20782.

S E 1 3 7 8

(c) Other public or nonprofit private educational entities may offer traineeships only to individuals enrolled in graduate training in (1) biostatistics or epidemiology, (2) environmental or occupational health, (3) dietetics or nutrition, or (4) other graduate training in public health (excluding graduate training in health administration, health planning, or health policy analysis and planning), or to individuals receiving specialized training in preventive medicine or dentistry.
